The Husson University Catalog for the 2016-2017 academic year provides a wealth of information for existing and prospective students, their families, and the University community. The reader will find useful information relating to Admissions, Financial Aid, and Student Affairs. In addition, the Catalog provides program requirements and course lists relevant for students entering during the 2016-2017 academic year. Though the University and its academic departments reserve the right to modify degree program requirements and courses so as to enhance educational outcomes, degree requirements noted herein represent the expected course of study and academic policies that will apply to students throughout their academic career at Husson so long as they remain within their chosen discipline of study.

Husson University faculty, staff, and administration feel privileged to foster the intellectual and personal development of students who enter our programs. We hope that the Husson University Catalog for the 2016-2017 academic year provides you with clear and sufficient information of our programs of study and policies. We are grateful for the opportunity to serve you and welcome any questions you might have.
New England Association of Schools and Colleges, Inc. (NEASC)
http://www.neasc.org/

Husson University is accredited by the New England Association of Schools and Colleges, Inc. through its Commission on Institutions of Higher Education. Accreditation of an institution of higher education by the New England Association indicates that it meets or exceeds criteria for the assessment of institutional quality periodically applied through a peer review process. An accredited college or university is one which has available the necessary resources to achieve its stated purposes through appropriate educational programs, is substantially doing so, and gives reasonable evidence that it will continue to do so in the foreseeable future. Institutional integrity is also addressed through accreditation.

Accreditation by the New England Association of Schools and Colleges, Inc. is not partial but applies to the institution as a whole. As such, it is not a guarantee of every course or program offered, or of the competence of individual graduates. Rather, it provides reasonable assurance about the quality of opportunities available to students who attend the institution.

Inquiries regarding the accreditation status by the New England Association of Schools and Colleges, Inc. should be directed to the administrative staff of the institution. Individuals may also contact:

- Bachelor of Science in Sport Management

Public Disclosure documents regarding each of these programs can be found at http://www.husson.edu/accreditation

Commission on Collegiate Nursing Education (CCNE)
http://www.aacn.nche.edu/accreditation/

The School of Nursing programs are accredited by the Commission on Collegiate Nursing Education, One Dupont Circle, NW, Suite 530, Washington, DC 20036, (202) 887-6791, http://www.aacn.nche.edu/accreditation/. The BSN program is approved by the Maine State Board of Nursing <http://www.maine.gov/boardofnursing/>.

Accreditation Council for Occupational Therapy Education (ACOTE)

The Accreditation Council for Occupational Therapy Education (ACOTE®) is recognized as the accrediting agency for the American Occupational Therapy Association (AOTA). AOTA and ACOTE can be contacted at 4720 Montgomery Lane, Suite 200, Bethesda Maryland 20824-3449. ACOTE’s telephone number c/o AOTA’s is (301) 652 AOTA (6611) and the web address for ACOTE is: http://www.aota.org/education-careers/accreditation.aspx

Commission on Accreditation in Physical Therapy Education (CAPTE)
http://www.capteonline.org

The Doctor of Physical Therapy Program in the School of Physical Therapy, College of Health and Education, is fully accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE). Information about CAPTE and the accreditation process is available through the American Physical Therapy Association website at www.capteonline.org. CAPTE can also be contacted at 1111 North Fairfax Street, Alexandria, VA 22314, by email at accreditation@apta.org or by phone at 703.706.3245.

Accreditation Council for Pharmacy Education (ACPE)

Husson University School of Pharmacy’s Doctor of Pharmacy program is accredited by the Accreditation Council for Pharmacy Education, 135 South LaSalle Street, Suite 4100, Chicago, IL 60503, 312/664-3575; FAX 312/664-4652
Website: www.acpe-accredit.org (http://www.acpe-accredit.org)

Maine Department of Education
http://maine.gov/education/

The School Counseling and Teacher Education programs in the School of Education are approved by the State of Maine Department of Education.
**National Board for Certified Counselors**
http://www.nbcc.org/

The Masters programs in Clinical Mental Health and School Counseling are approved by the National Board for Certified Counselors to provide continuing professional education and development.

**Council for Accreditation of Counseling and Related Educational Program (CACREP)**

The Council for Accreditation of Counseling and Related Educational Program (CACREP), a specialized accrediting body recognized by the Council for Higher Education Accreditation (CHEA), has conferred accreditation to the following program areas in the Counseling and Human Relations program at Husson University: Master of Science (M.S.) in Clinical Mental Health Counseling and Master of Science in School Counseling.
SUPPLEMENTS TO THIS CATALOG

Husson University reserves the right to change, at any time without notice, the policies, procedures, tuition and fees, curriculum, program requirements and all other contents of this catalog. The Husson University catalog does not constitute an express or implied contract, nor does it establish the express or implied authority of those listed herein. In addition, it is not intended for the language of the catalog to limit reasonable actions the University may take in responding to matters relating to students, faculty, or staff. The catalog is offered only as information. It is the responsibility of persons relying on this catalog to confirm with the appropriate Husson University official that any provision herein is applicable.

Husson University is committed to maintaining an environment that is free from unlawful harassment and discrimination of all kinds and will not tolerate discrimination against or harassment of any individual or group based upon race, color, religion, national origin, sex, sexual orientation, age, disability, citizenship, or veteran status in matters of admissions, employment, housing, or services or in the educational programs or activities it operates, or any factor that is a prohibited consideration under applicable law. The University operates its programs so that, when viewed as a whole, they are accessible to handicapped persons. It is Husson’s policy to ensure that no qualified student with a disability is denied the benefits of, excluded from participation in, or otherwise subjected to discrimination in any University program or activity. Any concerns regarding compliance with non-discrimination laws should be directed to:

Fax: 207-941-7905
HUSSON UNIVERSITY

Founded in 1898, Husson became a University in October of 2008, having evolved from a small proprietary school to an accredited independent institution offering undergraduate programs in business, education, health, communications, and science and humanities, graduate programs in business, nursing, occupational therapy, criminal justice administration, counseling psychology, education, school counseling, and first professional doctoral programs in pharmacy and physical therapy. The undergraduate student body has grown to over two thousand day students and one thousand graduate and evening students on the campus in Bangor and at extended learning centers in Westbrook, Presque Isle, and Wells, Maine. In addition, the campus is home to international students who come to Husson from all parts of the world. Husson graduates have achieved success in a wide variety of professional positions in Maine and throughout the world.

The Eastern Maine Medical Center School of Nursing, founded in 1892, merged with Husson University and became the origins of the School of Health. In 1997, Husson purchased the New England School of Communications, which was a wholly-owned subsidiary of the University with separate accreditation and degree granting authority until 2014 when it merged with Husson becoming a school within the University.

Vision

Husson will be a University of choice for premier professional programs where students succeed, experiential learning is championed and global engagement is emphasized.

Mission Statement

Husson University inspires and prepares students for professional careers in current and emerging fields within the context of an education informed by the sciences and humanities.

We achieve this career preparation by supporting and emphasizing

• Outstanding teaching.
• Scholarly contributions to one’s discipline or field of expertise.
• An undergraduate and graduate curriculum that is challenging, relevant, and promotes critical thinking skills, self-confidence and strong communication skills.
• Commitment to ethical behavior and social responsibility through involvement in the world by faculty and students, administrators and staff, board members, and involved citizenship as a university.
• Lifelong learning to prepare students professionally and personally for the challenges of a constantly changing world.
• A diverse cultural and global perspective achieved through student development and experiential learning opportunities that reinforces our commitment to a strong academic community.
• Careful management and stewardship of University resources.

The Campus

Husson’s approximately 200 acre campus is situated on a wooded hillside that is only a short walk away from a shopping center and two miles from the business district of the city of Bangor, Maine (population 36,000). Most points in the city are accessible by public transportation from the campus, and Bangor is the home to the second largest public library in New England, and the oldest continuous community symphony orchestra in the country. The population of greater Bangor is approximately 100,000.

Campus amenities include three residence halls with single and double rooms all equipped with cable TV and internet access via data port and wireless systems. The Darling Learning Center combines experiential learning classroom space and administrative offices on the first floor with four additional floors of suite style residential accommodations. The newly renovated dining center provides a healthy dining experience with options that satisfy a variety of tastes and needs. The center offers flexible meal plans. Academic amenities include science and networked microcomputer labs, library and conference rooms as well as an arboretum, an athletic complex that includes the Swan Fitness Center and a 6-lane competition-size pool. The George E. Wildey Communications Center is home to the New England School of Communications (NESCom) and houses the radio station and television, recording and production studios. The Richard E. Dyke Center for Family Business serves as an interface between the University and Bangor business community. The campus includes four academic and administrative buildings. Peabody Hall hosts the College of Business and the School of Pharmacy. The O’Donnell Commons houses the health programs in the College of Health and Education. The Education programs of the College are located in the Darling Learning Center. The Meeting House hosts the College of Science and Humanities, executive administration, as well as the Gracie Theater, a state-of-the-art 500 seat auditorium. Peabody Hall also offers a bookstore and a campus center that houses an art gallery, chapel, and dining and performance areas for the Husson community as well as the Furman Center that serves as a center for student activities and recreation.

Husson is located near some of the finest recreational opportunities in Maine. The Kenduskeag Stream is a five-minute walk from campus. Excellent skiing and hiking trails are nearby, and the campus is only an hour away from the great Maine woods, the rockbound coast and Acadia National Park.

The Sawyer Library

The W. Tom and Bonnie Sawyer Library provides physical and online informational resources that support curricular as well as research activities. The Library acquires materials that complement the degree programs and reflect the interests of the University. These include introductory, practical, professional, and theoretical materials. Books and journals for recreational reading and for personal growth are also part of the collection. In addition, the Library maintains modest collections of federal and state documents, company annual reports, and pamphlets.

Online resources are a critical component of the Library’s collection. The Library has online resources to support all the degree programs, and these include a variety of full-text databases and journal indexes. Information about the Library’s resources, and its online catalog, is accessible from the Library’s Internet home page. Follow links to the Library from the University’s home page at http://www.husson.edu/.

Sawyer Library belongs to a consortium of over fifty public and academic libraries in Maine. Students may borrow materials from these libraries, and from other Maine libraries. Students also have access to local libraries, including Bangor Public Library, Parrot Health Science Library at Eastern Maine Medical Center, and Fogler Library at the University of Maine. The Library is open seven days a week during the academic year and offers a quiet environment which is conducive to learning and studying.
**Information Resources**

The Information Resources Office is responsible for designing, implementing and maintaining Husson’s computer and technology systems and facilitating the use of these systems by the Husson Community. It also manages the computer labs, campus email, Husson’s Ethernet and telecommunications network and various Web and file servers. The University has five computer labs in Bangor, and two at our South Portland site. The University operates one networked lab 24-hours of each day for continuous student access.

All students have access to their own campus email address, server storage and personalized Web portal for viewing grades and registering for classes. Public computer kiosks are available for access to email and to the World Wide Web, and each residence hall is equipped with copper and wireless access to the Internet.

**Collaborations and Locations**

Husson University offers degree programs at offsite locations and closely collaborates with other educational initiatives including:

**New England School of Communications**

The New England School of Communications (NESCom), was a wholly owned subsidiary of Husson until 2014 when it merged with the University to become its fifth school or college under the leadership of a Dean. Up until the merger NESCom was accredited by the Accrediting Commission of Career Schools and Colleges. It is now under the umbrella of accreditation afforded to Husson University by the New England Association of Schools and Colleges (NEASC).

**University of Fredericton**

A close collaboration with the University of Fredericton in New Brunswick, Canada affords the opportunity for Canadian citizens who obtain their diploma from a Canadian Public Community College to complete a baccalaureate degree from Husson University in an abbreviated period of time through online course offerings.

**Offsite Locations**

Husson University actively promotes educational opportunities throughout the State through its offsite locations. Extended learning communities are found in centrally located areas in Westbrook, Presque Isle, and Wells, Maine.
The following pages provide information regarding important policies and procedures that are designed to guide, explain, and enhance the experience of student members of the Husson University community.

**Student Affairs**

**Student Services**

**OASIS: The Center for Student Success**

**Academic Services**

Academic Services provides guidance and advising for students who have not yet declared a major program of study and for students who are between majors. It is also a resource for students in need of assistance with study skills, tutoring, time management and other types of academic assistance. Academic Services staff collaborate with faculty to identify and support the academic progress of students as they utilize early intervention strategies to support the students’ academic and social needs.

Academic Services also manages the Learning Center which provides peer and faculty tutors in most General Education math and science courses as well as psychology and Spanish courses. Tutoring for different courses is added as determined by student needs. Supplemental Instructors are also offered for several General Education science courses. Additionally, the Writing Center is co-located with the Learning Center. Writing Center consultants provide assistance for both graduate and undergraduate students in all types of writing. Fully online students may schedule a tutoring appointment with either a Learning Center or Writing Center tutor utilizing Google Hang Outs by emailing either:

learningcenter@husson.edu

writingcenter@husson.edu

Husson University’s freshman seminar course, the Husson Experience, HE 111, is developed and coordinated through Academic Services. A one-credit, graded requirement of all traditional-age, first-semester students, it focuses on developmental tasks that enhance student persistence and success. These tasks include academic and social assimilation, critical thinking, financial literacy, interpersonal responsibility and self-reliance. Academic major and career exploration are significant parts of the course. The course meets once a week during the first semester and is taught by full time faculty and OASIS staff. The first class session of the Husson Experience meets the first day of Welcome Weekend to prepare students to successfully begin their first semester.

**Career Services**

Career Services supports Husson students and alumni in all aspects of career exploration and professional development. Career Services staff provide a comprehensive array of vocational resources and assistance designed to address student’s needs at every stage of their college and professional development including career counseling, choosing a major, internships, graduate school applications, professional networking and etiquette, resume and cover letter development, job search strategies and interviewing techniques. Career Services maintains a comprehensive website and several social media platforms offering a number of tools designed to support students and alumni with vocational self-assessment, career information, and job search resources. They also maintain a database of current job and internship postings.

**Disability Services**

Husson University is committed to providing reasonable accommodations to otherwise qualified students with documented, qualifying disabilities. Accommodations are provided and supported through the OASIS office. Information regarding where to access support is provided to all incoming students and their parents during New Student Orientation days and in letters sent by the Admissions Office. Returning students who receive support for disabilities are sent reminders of the need to meet and update their accommodation plans at the start of each semester. In order for Husson to provide reasonable accommodations, students must provide documentation of a disability and request accommodations; submission of documentation alone does not establish an accommodation plan. The Disability Services office will review documentation and work with the student to assure an appropriate accommodation plan.

**International Student Services**

Husson University supports a growing population of international students who will find a full complement of support and advocacy services within the OASIS office. OASIS’s Student Success Advisor (SSA) for international students will facilitate connections with tutoring services and immigration/Visa services as well as acting as academic advisor for students until they have determined their program of study. The SSA directs EAGLE-Week—a week-long orientation for all international students—and will facilitate the connection of each international student with his/her peer mentor. The SSA is also committed to supporting the transition needs of all international students.

**New Student Orientations**

Each summer, New Student Orientation days are offered through OASIS. These student orientations are intended to provide incoming students and their parents with the information they need to successfully transition to higher education. Programming strands for parents and students throughout the day introduce them to a variety of campus departments and staff who provide many types of student services and supports. Information is provided on academic protocols and procedures, athletics, purchasing textbooks, class schedules and student life on campus to name just a few areas. Students have the opportunity to meet with an advisor in their respective college/school (College of Business, School of Science & Humanities, College of Health & Education, New England School of Communications), to have their photo taken for their student ID, and to see a room in the residence halls. Over 90% of incoming students have historically participated in New Student Orientation days. For those students unable to attend one of these New Student Orientation days, or who are accepted into the University after these dates have passed, many orientation activities are available during Welcome Weekend, and OASIS staff are also available for assistance on an individual basis.

**Office of Student Life:**

**Dean of Student Life**

The Office of Student Life is charged with providing a variety of activities and services that enhance and extend a student’s educational experience at Husson University. The Office is responsible for the overall engagement of students through purposeful and innovative programs that foster a sense of community, both in our residential commons and
for our commuter student population; endeavors to create a sense of well-being — physically, emotionally, and spiritually — through our direct services to students; works to maintain an atmosphere of civility through our educational-based Student Conduct Code and community standards; and, provides educational trainings to student leaders, the general student body, and partners across the curriculum and co-curriculum to make the Husson experience a positive environment for all to live, learn, and engage with.

Welcome Weekend

Husson’s Student Life office hosts Welcome Weekends each fall when students return to campus for the start of the semester. The first day of Welcome Weekend is for new students only and is dedicated to helping them become acclimated to the start of the school year. After moving into the residence halls, students and parents jointly attend a welcome barbecue. Later, students are provided opportunities to meet with advisors and assemble in their first Husson Experience class which provides instructions the opportunity to welcome students to campus, to assist them in meeting other students on their first day on campus, and to answer any questions they might have about academic protocols and expectations.

Throughout the weekend the planned social activities help students to get to know each other, learn their way around campus, and get ready to begin classes.

Student and Community Standards

Husson University’s Student Conduct Code is administered by the Office of Student Life and is designed to create a civil, educational, and positive environment for students to live, study, and succeed in.

Husson University’s mission is to inspire and prepare students for professional careers. This endeavor includes a commitment to ethical and social responsibility. Students associated with Husson University are charged to be good citizens and foster a positive living and learning environment. The Student Conduct Code provides the framework for student behavior within which students are expected to live while a student at Husson University. Adherence to the Student Conduct Code is expected as a student voluntarily associates themselves with the institution. The Husson University Student Conduct Code is published on the University’s website.

Commuter Student Services

The Office of Student Life provides services and guidance to commuter students with whatever questions or concerns they might have. In partnership with Student Activities, Community and Student Engagement, Counseling and Health Services, our staff is ready to help.

Our signature commuter program is the Commuter Assistants (CAs) program. Each incoming commuter student is assigned a CA, an experienced student leader who knows the campus well, excels academically and is active in the campus community. CAs strive to be a resource and to assist commuters with the transition to the University. They encourage participation in campus clubs and organizations and often will accompany incoming students to University-sponsored events.

Student Government

The Student Government serves to represent the best interests of the student body and acts as a liaison to the University. Students can serve on the Student Government as Senators or Executive Board Members. Elections for these positions are conducted in the fall and spring semesters respectively.

Clubs & Organizations

Over 50 student clubs and organizations exist on the Husson University campus. These groups are student driven and supported by Student Government. Student clubs and organizations provide engagement opportunities in the areas of service, professional development, recreation, fraternal societies and academics. A current list of student clubs and organizations can be found on the University’s web site.

Campus Chaplain

Husson University recognizes that its primary mission of providing an excellent educational program impacts the total life experience of its students. An integral part of that life experience is a person’s spirituality and Husson is committed to addressing the spiritual needs of its students. The University’s Chaplain is available to students for spiritual counseling on a one-to-one basis by appointment. Additionally, the Chaplain is responsible for establishing a campus ministry program that is open to all students. The types of programs vary but may include activities such as prayer services, Bible study, focus groups and spirituality development groups.

Community and Student Engagement

The Office of Community and Student Engagement (CASE) provides opportunities for student to engage in community-building volunteer activities. Through the database of not-for-profits, individual students or student clubs and organizations can discover the multitude of opportunities, both local and international, to serve their community and prepare for effective citizenship. The Office provides information for the development and implementation of service-learning/community-based learning opportunities, community partner building and advocacy. Currently we offer specific opportunities such as Big Brother/Big Sister Clubs, Boys and Girls Club of America for Husson students who work to mentor youth in our communities, and the Commuter Assistant program for upper-class students to work with incoming Husson Students.

Counseling Services

The primary mission of Husson’s Counseling Services Center (CSC) is to assist students in their pursuit of success. In order to do this, counselors help students use their strengths and resources to overcome barriers and to develop new strategies to improve mood, relationships and performance.

The Counseling Services Center staff provides a number of services, including evaluation, personal coaching and performance enhancement, individual therapy, couples therapy, outreach, consultation and instruction. They also offer substance abuse programming and counseling for students who are concerned about their own alcohol or substance abuse, or that of others. This might include prevention, early intervention, assessment, education, individual and group counseling, and referral.

Students are eligible for free, time-limited counseling services from our licensed mental health professionals between the hours of 8:00 am and 4:00 pm Monday through Friday.

Residence Life

The Residence Life Staff strives to cultivate a living-learning environment where students can flourish within the structure and support of our
college community. It is our intent to challenge our students and provide opportunities through consistent and collaborative efforts so that they may reach their fullest potential. We embrace and support the development of a strong community that practices hospitality, embraces the concept of personal accountability, and nurtures a trusting and civil environment that celebrates the unique and diverse experiences of each student while acknowledging what binds us together. To this end, we strive to guide and mentor our students to become successful, contributing, and interdependent citizens of society.

The residential community is comprised of four residence halls – three traditional halls and one suite-style hall. The traditional halls (Bell, Carlisle, and Hart) are co-ed by floor, mostly double rooms, with a mixture of freshmen to seniors, and shared bathroom on each floor. Every room comes with the following furnishings for each student: desk, chair, dresser, wardrobe, bunkable/stackable bed (in most cases), and mattress. Furthermore, each room is equipped with a cable TV outlet and access to wireless internet as well as the use of a hard-wired data port. One Micro-Chill® is provided for each room. All housing contracts include a board plan.

The suite-style residence hall (Living Learning Center, located on the upper four floors of the Darling Learning Center) accommodates up to four students in a suite. Each suite has two bedrooms (two students in each), living room, private bath and vanity area, and electronic locks on the suite entrance as well as individual bedrooms. The bedroom furniture, as well as cable TV and internet, are the same as the traditional halls. The living room furniture includes a sectional sofa and a hard topped ottoman. One Micro-Chill® is provided for each bedroom in the suite. All housing contracts include a board plan. There are no appliances in the suite.

All full time, first and second year undergraduate day students of Husson University are required to reside in on-campus housing unless they are married or commuting from their parent(s)/legal guardian(s) address within a specified distance from the University. Housing contracts are for the full academic year.

Student Activities

Husson University’s Student Activities Office works to enhance the student life experience by providing a wide variety of activities and programs to engage and enrich the campus community. Programming provides social, educational and cultural opportunities. Activities are held both on and off campus and are available free or at reduced fees to students. Students are encouraged to be actively involved with the Student Activities Office by serving on programming advisory boards or working in the office in a work study position. Current Student Activities Programs can be found on Facebook, Twitter, and Instagram (@HussonSA).

Student Health Services

The mission of the Student Health Center is to enhance the academic environment of Husson by providing quality health care, health education and preventative services to students in a caring, cost-effective and convenient manner. The Student Health Center is staffed with health care professionals that focus on student wellness. The Student Health Center is open Monday through Friday for walk-in care; see the Student Health Services website for hours. Services include general medical care, emergent care, preventative care, some lab services and allergy shots. There is no charge for any examination or consultation in the health center and services are available to both resident and commuter students.

Immunization

Maine State Law (22-MRSA§6359) amendment 10:144 DHHS requires post-secondary students born after 1956 to show proof of immunization against measles, mumps, rubella, tetanus and diphtheria. This applies to all full-time students and all part-time students who are seeking a degree. Specific University programs (usually those in health care fields) may require additional immunizations and documentation.

Student Insurance

All full-time students are required to have some form of accident and sickness insurance coverage. Husson University makes available to its students a Student Health Insurance Plan with the following provisions and limitations:

- Undergraduate students with 9 or more credits, excluding non-Bangor campuses and online.
- Graduate students with full time equivalency of 6 credits or more, excluding non-Bangor campuses and online.
- The Student Health Insurance Plan is not offered to Extended Learning Students.

Students already insured by another plan are exempt from this requirement upon proof of insurance coverage that is usable in the State of Maine.

Other Campus Services:

Dining Services

Husson University Dining Services welcomes you to the renovated Dickerman Dining Center where you will find culinary professionals committed to providing you with a quality dining experience. We serve a wide variety of foods designed to meet the needs of a diverse university community. In addition to meal plans for resident students, dining dollars and commuter meal plans are available and may be purchased in the Dining Services office located in the Dickerman Dining Center.

Cressy Marketplace located next to the Campus Center on the lower level of Peabody Hall provides deli style sandwiches, fresh beef burgers, and daily specials that are popular with our students. Excellent coffee, an assortment of cold beverages, packaged snacks, as well as, fresh fruit and other healthy food and snack options are always available. Open late nights and weekends.

Willey’s Café located next to the Furman Student Center specializes in Gevalia coffee and espresso drinks and our very popular, house-made Panini sandwiches. Check out our selection of pastries for that perfect sweet treat.

Athletics and Recreation

The Athletic and Recreation facilities include the Newman Athletic Complex that has basketball and volleyball courts, a 25-yard, 6-lane competitive swimming pool, a strength-training room, and a dance studio. The Swan Fitness Center has cardiovascular machines, weight machines, free weights, televisions and a sound system, and also houses the Kenduskeag Institute Research Laboratory and athletic trainer facilities. The Husson outdoor athletic and recreation facilities include the Winkin
Sports Complex with the Harold Alfond Diamond, the Boucher Soccer Pitch, the O’Keefe Softball Field, tennis courts and practice fields.

The University offers an extensive intramural, recreational and intercollegiate sports program for both men and women. The men’s and women’s intercollegiate programs conform to and hold memberships in the National Collegiate Athletic Association, Division III (NCAA) and the North Atlantic Conference (NAC). Men’s intercollegiate competition includes soccer, football, basketball, baseball, lacrosse, cross country and golf. Women’s competition includes volleyball, soccer, basketball, softball, swimming, lacrosse, field hockey, cross country, indoor track and outdoor track.

Intramural sports play a large part in satisfying the recreational needs of the University community. Many students compete in basketball, swimming, volleyball, tennis, softball, soccer, floor hockey and flag football, just to name a few. Husson campus facilities also provide many opportunities for informal recreation like the new W.T. Gardner & Sons Recreation area.

**Bookstore**
The Mary McDonald Bookstore is located in the lower level of 107 Peabody Hall and is operated by Follett Higher Education Group. The bookstore stocks course materials required in all programs of study at the University. They also offer a wide variety of school supplies, reference books, technology accessories, and an exclusive line of Husson University apparel and gifts.

Textbooks can be purchased or rented through their website at http://www.hussonshop.com/. You can also purchase select University apparel, gifts and school supplies or view current store hours and events on their website. Contact the bookstore directly at 207.947.2270, campus ext. 7114 or via email at bookstore@husson.edu.

**Student Employment**
The Student Employment Office, 105 Peabody Hall, offers student employment opportunities associated with the institution. Many of these positions require a work study award from financial aid, though some other opportunities are available. Student employment on campus provides direct experiential learning to our student body. Job postings are available through the Husson University Goggle site (https://sites.google.com/a/husson.edu/student-employment).

**Safety and Security Services**
Husson’s uniformed security officers provide 24/7 campus coverage. Our staff consists of 8 full time and 11 part time Security Officers, as well as one full time officer from the Bangor Police Department. We are committed to providing our faculty, staff, students, and guests with a safe and friendly environment both on and around our campus. Statistically, Maine is the second safest state in our nation. However, that’s not to say that crime never occurs here at Husson University. Husson, along with many other institutions of higher education is required to publish an annual report (http://www.husson.edu/jeanne-clery) which illustrates certain classes of crimes and fire safety statistics for our campus. We are confident that after reviewing our Jeanne Clery Act statistics, you will see that Husson is indeed a safe place to be.

Husson University is fortunate to have experienced so few crimes, but because crimes can and do occasionally occur on our campus, we strongly encourage a collaborative approach towards safety. We truly believe that we all share a responsibility in keeping our community a safe and enjoyable place to live and visit. Husson University is committed to achieving campus safety and security for all members and visitors of our community.

Our Safety & Security department offers POMCO (Piece of Mind Company) safety button devices that can connect a student directly to our services with a push of a button. Campus Safety & Security at Husson offers a “safe walk” escort service on campus for all members of the Husson community. The security department collaborates with Student Life to offer classes such as CPR, self-defense and other safety programs. For additional information please use the information on our website (http://www.husson.edu/security) and learn how to report criminal actions, prevent crimes, and practice responsible behavior. Husson University Safety & Security is located in 106 Peabody Hall and by phone at 207.941.7785 (http://catalog.husson.edu/generalinformation/studentaffairs/tel:207.941.7785)

**Admissions**
Husson University believes all individuals should have the opportunity to further their education. Undergraduate candidates approved for admission prior to fulfilling the requirement of high school or the equivalent thereof are accepted contingent upon successful completion of all academic work and the receipt of a final transcript of grades. The University reserves the right to refuse the acceptance of a degree candidate. Admission to the University or to particular programs may also be refused to applicants where academic record provides doubt as to the candidate’s ability to make reasonable academic progress. It invites applications from secondary school graduates or students having received a General Equivalency Diploma (GED) and qualified international students without regard to age, color, religion, sex, national origin, sexual orientation, level of family income, or physical ability. While the information below elaborates general policies for undergraduate admissions, candidates should refer to selected undergraduate and graduate programs for specific requirements on admittance.

When a student begins study at the University leading to a degree, he or she must meet the curriculum requirements in effect at that time. However, without prior notice, the University may at any time replace or update curricula and courses. All courses may not be offered during a given academic year. If a student should drop out of school for a calendar year (12-month period), he or she is obligated to meet any new curriculum requirements imposed by the University subsequent to the student’s initial enrollment. Nonattendance in summer school sessions does not constitute a break in enrollment.

Applicants for admission to Husson may receive guidance and assistance from the Admissions Office on the Husson campus. The Admissions Office provides materials to help applicants learn more about the University. They also invite applicants for personal interviews and campus tours.

**Application Information**
Husson University’s rolling admission program allows applications to be reviewed as soon as they are complete. Applications are accepted for consideration for September, January or May semesters. There is a $40 application fee. All applicants should have copies of their transcripts sent to the Admissions Office as soon as possible after applying for admission.

Admission is competitive and applicants to the first year of college study are admitted on the strength of their secondary school curriculum, grade-point average, class rank, counselor recommendations, and SAT
or ACT scores in relation to their intended major. Completion of college preparatory courses at the secondary level with a "C" or better, or its equivalent, is recommended. This includes four years of English, three years of math, two sciences, social studies, and other elective college preparatory courses.

Students whose high school transcripts show limited academic performance may be accepted on a conditional basis if they have a favorable recommendation from a high school guidance counselor or principal and show evidence of potential for success.

Transfer students are welcome and must present transcripts of their high school and college records. Transfer applicants should be in good academic standing and generally need a grade-point average of at least 2.0.

To be considered for admission, an applicant should do the following:

1. Complete and return the application form, available through the Admissions Office or on-line at www.husson.edu.
2. Submit an official high school transcript or GED scores.
3. Forward SAT or ACT scores
4. Forward to the Admissions Office official transcript(s) from any college(s) or university(s), which the applicant attended.
5. A letter of recommendation from guidance counselor, teacher or non-family member.

Applicants should also see their program for additional admissions information.

When the file is complete and all credentials are received, the Director of Admissions will notify the applicant by letter regarding her/his admissions status.

All incoming students for September are required to submit a $250 tuition deposit. This deposit is refundable until May 1, to all incoming high school seniors. Requests for the refund must be addressed to the Director of Admissions and be postmarked no later than May 1. Deposits received after May 1 or from non high school seniors are nonrefundable. The deposit will be applied to first term tuition charges.

Candidates for the spring or summer terms must also submit a $250 tuition deposit upon notification of acceptance to the University. The spring and summer term's deposit is nonrefundable. The deposit will be applied to first term tuition charges.

The priority application deadline for all health programs is January 1st for the fall term. Admission to most health programs is based on competitive comparison to other applicants for the same term, therefore applicants who meet the expressed minimum admission requirements are not necessarily guaranteed acceptance.

Prospective applicants are encouraged to become familiar with Husson University. Campus tours and open house programs provide candidates with an opportunity to visit the University and experience campus life. Visits may occur at other times, and personal interviews are recommended.

All correspondence concerning undergraduate admission should be addressed to:

Admissions Office
Husson University

1 College Circle
Bangor, ME 04401

Telephone: 207-941-7100 or 800-448-7766 (toll-free)
Email: admit@husson.edu (www.husson.edu)
Website: www.husson.edu

Readmission

Students who desire readmission must fill out and submit an Application for Readmission, which can be obtained from the Admissions Office or online at www.husson.edu.

The Director of Admissions will consider the application for readmission on the basis of space availability, program availability, and past academic performance. Upon review of the student’s request and examination of the required data, the student will be notified by letter of the decision regarding his/her readmission to the University.

Non-Degree Admissions

Space permitting, Husson allows students who do not have the intent of completing a degree at the University to enroll in a limited number of courses in any given semester. Such students may include those seeking to take a special course offering, those seeking professional recertification, or those who may need to take one or two courses as a prerequisite to further studies at other institutions. Students wishing to register for courses under this status must complete a Non-degree Admissions application and submit a $40.00 application fee. Please note that acceptance of admission for courses is contingent upon the availability of space and the demonstration that the applicant is appropriately qualified to take the particular offering.

Veterans

Admissions criteria for veterans include graduation from an approved senior high school or a high school equivalency certificate recognized by the applicant’s State Department of Education. Husson also accepts a General Educational Development Certificate administered under the United States Armed Forces Institute and subsequently recognized by the applicant’s State Department of Education. Veterans Administration paperwork for new students requires four to six weeks for processing.

The University may recognize applicable credit based on the American Council on Education’s Guide to the Evaluation of Educational Experience in the Armed Services. Interested applicants must provide a DD 214, a DD 295, AART, SMART, JST, and/or other appropriate credentials for evaluation.

International Students

Husson University welcomes international students who meet all established University admission criteria. Since admission requirements vary among areas of study, applicants are advised to read carefully the criteria for their program of choice (see program descriptions at www.husson.edu/schools-and-degrees). In addition, international applicants must comply with rules established by the Student and Exchange Visitor Information System (SEVIS) and follow the process for acquiring and maintaining an F-1 Visa (See "F-1 Visa Information" at www.husson.edu).

Both first-year and transfer international applicants are admitted through July 1 for entry in September and through December 1 for entry in
January. Transfer applicants must have a minimum grade point average of 2.5 at the time of application. Applications are reviewed by a Selection Committee as soon as they are complete, and applicants are typically notified of a decision within three weeks. Because some programs fill early, it is advisable to complete applications by January 31 for September entry. Candidates for programs in Nursing, Occupational Therapy, Physical Therapy and Pharmacy must be aware that these programs are highly competitive, have a small number of openings each year, and may be filled before January 1. Please refer to specific programs for admission deadlines at www.husson.edu. Applicants applying to graduate programs should follow the application instructions for their specific program, found at www.husson.edu/graduate.

For undergraduate admission consideration, applications must include the following:

1. A completed application found online at www.husson.edu
2. Official transcripts  - one from every high school attended in grades 9 through 12. All applicants must submit transcripts translated in English or submit transcripts to a credential evaluation service which holds a membership in NACES (www.naces.org/members). Evaluation reports must be course-by-course. All transfer candidates must submit transcripts to a credential service.
3. Test of English Proficiency. Husson accepts TOEFL (minimum score 75, Nursing, Physical Therapy, Occupational Therapy and graduate programs minimum score 80), IELTS (minimum score 6), or iTEP (minimum score 6). Applicants who have been studying in an English immersion environment for two or more years may replace the test of English competency with SAT or ACT scores or comparable exam results.
4. A letter of recommendation from a teacher or non-family member.
5. Affidavit of Financial Support with accompanying proof of finances (a bank statement indicating resources for one complete year of attendance) and dated within six months. http://www.husson.edu/assets/husson-admissions_InternationalApp-FinancialDeclaration_08142014-fillable.pdf
6. Interview in person or via Skype is optional but encouraged.
7. Copy of passport ID Page
8. Optional photo (no larger than 2x3" - 6.35x7.62cm)
9. There is no application fee for international applicants.

All accepted students must submit an enrollment deposit of $500 by June 1 for September admission. Students accepted after May 1 must submit the deposit of $500 upon receiving their acceptance.

International Student Scholarships

The President’s Global Scholarship is available to all undergraduate international students. Students may be eligible for awards of up to $10,000. Every applicant is screened for eligibility based upon merit criteria that include grade point average, test scores, strength of program of study, leadership, and service. Scholarships are renewable based upon maintaining a 2.5 grade point average and good school citizenship. Students must submit all application materials by January 31 to be considered for any level of the President’s Global Scholarship.

Contact Information

International students and their families are encouraged to explore Husson University through our website, visits, and personal contact with our staff. We welcome your questions and the opportunity to showcase our programs.

Direct Inquiries to the following:

Director of International Initiatives - Colleen Grover
Phone: +1 207.404.5640 or email: groverc@husson.edu

Coordinator of International Initiatives - Andrius Ksikvas
Phone: +1 207. 941.7014 or email: ksikvasa@husson.edu

Coordinator of International Student Immigration Affairs - Steve Egland
Phone: +1 207.941.7085 or Email: eglands@husson.edu

Professional Clinical Licensure and Certification Notice

Students who are pursuing degrees leading to application for professional licensure or certification, and/or who will be participating in clinical placements, internships, or practica through their Husson program of study should be aware that their host facility may require a criminal background check, fingerprinting or drug screening. In such situations, students are responsible for obtaining and paying for the background check or other screening processes and for delivering required documentation to the facility. Although Husson will make reasonable efforts to place admitted students in field experiences and internships, the host facility will determine whether a student will be allowed clinical access at that facility. Students should be aware that a criminal record may jeopardize completion of their coursework and degree requirements, as well as licensure by the state professional regulating body. Students may consult the licensure and/or certification organization corresponding to their intended major for more details.

Successful completion of a program of study at Husson does not guarantee licensure, certification or employment in the relevant occupation.

Student Classification

Degree Status

Students in this category are those enrolled in doctorate, master, bachelor or associate degree programs. Undergraduate degree status students are eligible for financial aid. Degree students may defer their declaration of a major until the end of the first year.

Non-degree Status

Students in this category are pursuing courses for personal enrichment, professional certification, or to fulfill prerequisites at other institutions. Non-degree status students are not eligible for financial aid.

Special Status

Students in this category may have specific academic needs and may not meet the University admissions requirements. They will be assigned an advisor who will monitor their progress. Special students in good academic standing may apply for admission to a degree program. It should be noted that students taking courses without regard to a future academic major may take courses that are not transferable for degree credit. It is to a student’s advantage to declare a degree objective as soon as is practical. As a guideline, a decision should be made after (24) credit hours have been successfully completed. Special status students are not eligible for financial aid.

Conditional Status

Students in this category are those considered to have academic deficiencies, for which a longer time may be required than is shown in the catalog to complete degree requirements. For those students, an
individual academic plan may include a reduced course load. Conditional status students are eligible for financial aid.

**Advanced Standing Test Programs**

Depending upon the program of study, entering students may be awarded advanced standing to a maximum of thirty credit hours on the basis of advanced placement examinations. College credit can be earned through the College Level Examination Program (CLEP), Advanced Placement (AP) through testing with the College Board or the International Baccalaureate (IB). Students must attain a minimum of 3 or better on the AP and 4 or better on the IB. Six (6) credit hours per subject area may be awarded for the American Council on Education based on recommended passing scores attained on the CLEP as administered by ETS. Other recognized college-credit granting programs may also provide a student advanced standing at Husson. Students are encouraged to present earned credit for evaluation when applying for admission.

**ECAP**

Husson University recognizes the desire of high school students to take college courses for credit in order to enter college with advanced standing, thereby bypassing selected introductory level courses. In order to address this need, Husson University has created the Early College Access Program. Students must currently be in their junior or senior year of high school. Students are allowed to take a maximum of two classes a semester. Contact the Admissions Office for additional information.

**Proficiency Exam**

Proficiency examinations developed by departments and divisions within the University are also used to assess attained competencies and provide for advanced standing. These examinations are used to measure student attainment of specific learning normally provided through regular Husson courses. Successful performance results in the awarding of credit for specified courses. The departments and schools of the University designate the courses for which proficiency examinations are available to students.

Proficiency examinations are intended for the purpose of recognizing the already attained skills and knowledge of persons who are enrolled at Husson. Students may challenge any course at Husson with the following exceptions:

- If a course has a prerequisite, the student must have met the prerequisite requirement before challenging the course;
- Those courses restricted by catalog statements on eligibility or otherwise not approved by the separate university departments or divisions;
- The most advanced-level course in a sequence of courses where skills and knowledge attained are closely related to potential job performance; and
- Graduate courses. Some graduate nursing courses are open to challenge by examination. For information, contact the Office of the Dean of the College of Health and Education.

Students may not take a proficiency exam in any course for which credit has already been accepted in transfer by Husson University. Husson University will accept proficiency credits from other colleges and universities that are regionally accredited. A student must be registered in a degree program at Husson University to be eligible to take a proficiency exam (with the exception of high school students enrolled in the ECAP).

If the student’s proficiency examination score meets the minimum standard required for “C” work in the course, credit for the course will be entered on the student’s permanent record by the University Registrar. Such credit will be shown as “credit by proficiency.” No grade will be recorded, and the credits will not be included in the computation of the student’s grade-point average. If the student’s examination does not meet the standard required for “C” work, no credit shall be granted. A student may take a proficiency examination for a given course only once.

Candidates for advanced standing who wish to enroll in a degree program must complete their last thirty (30) credit hours at Husson.

**Advanced Standing - Transfer Credit**

Students who have attended other accredited institutions and who wish to transfer to Husson are admitted to advanced standing on the quality of their credentials. Such transfer students should have the institution(s) attended send official transcripts of the course work completed to the Husson Admissions Office for evaluation. This should be done as part of the process of applying for admission to the University. Invitations are extended to all transfer students to arrange interviews with the Admissions Office.

Transfer students should follow the regular admission procedure outlined in this catalog. It is recommended that application be made at least one month before the semester in which the student wishes to enter Husson.

The essence of the transfer policy is an evaluation of the individual’s complete official transcript(s) from the institution(s) previously attended. It is the transferee’s responsibility to have these transcripts forwarded to the Husson Admissions Office. Upon admission to the University, a copy of the evaluation of transfer credit is forwarded to the transferee.

A transfer student who is admitted to Husson from an accredited institution is granted academic credit for acceptable transfer courses with the following guidelines:

The transfer student with an associate degree may be granted advanced standing, i.e., junior status with sixty (60) credit hours accepted from the transcript. The student must be aware that more than two additional academic years at Husson may be necessary to complete the degree requirements for a specific Bachelor of Science degree program. Earning degree credits in the summer sessions at Husson may shorten the length of time.

The transfer student, after becoming a resident student at Husson, cannot transfer additional credits from any other institution into a Husson degree or certificate program. A transfer student without an associate degree is granted academic credit for courses in which a “C” or better grade had been attained, or demonstrates academic performance which is acceptable to the Chief Academic Officer and Director of Admissions.

Students who transfer into Husson University must complete their final 30 credit hours at Husson University and a minimum of 15 credits must be specific to the major.

Students who wish to transfer credit into Husson University after having been admitted must follow the policy under Academic Policies (p. 22).
English and Math General Education Policy

All students are required to demonstrate competency in Math and English. Before starting in their first year, all students that do not have AP or Transfer credits in College Algebra will be required to complete an online math placement exam. The test results and SAT scores will determine class placement for math. Students are placed in English courses based on their previous transcripts and verbal SAT score as well as an initial diagnostic given once classes begin. Placement changes may take place during the add/drop period.

Undeclared Major

Most Husson students declare their intended major when applying for admission to the University. Students may, however, choose to defer their declaration of a major until the end of the first year of study. For those students, the University provides a basic first-year curriculum composed of general education and foundation courses. The student develops a schedule in conjunction with an academic advisor from Academic Services. Subsequent approval of first-year courses for transfer into a degree program rests with the School or academic department offering the degree.

Dual Major – Undergraduate

A student who seeks a second or additional major for his or her baccalaureate degree must meet all General Education requirements for the original major and complete all degree requirements for both majors. A student seeking a second major should complete a “Request for Second Major” form and submit it to his or her original advisor, the new advisor within secondary major, and the department head and dean where the new major is housed. A completed transcript evaluation must be attached and submitted along with the form to the registrar’s office.

Dual/ Second Bachelor’s Degree

A student who seeks a second or additional Bachelor’s degree must complete a minimum of 30 additional semester hours at Husson beyond the requirements for the first degree and complete all the requirements in the second degree area.

Dual/Second Master’s Degree

If the graduate program allows, a student who seeks a second or additional graduate (Master’s) degree must meet admissions requirements, complete a minimum of 15 additional credit hours at Husson University beyond the requirements for the first graduate (Master’s) degree and must complete all required course for the second graduate (Master’s) degree.

Additional Fees

New Students

Returning and Readmitted Students
Payment Plans

Husson offers a protected pay-by-the-month plan. Details are available in the Student Accounts Office.

Under the protected pay-by-the-month plan, the total charges for the semester, net of financial aid, are divided into 4, 5, or 6 equal monthly installments. Normally the payments begin as early as June for the following semester. This plan is administered by a third party.

Deferred Tuition Plan for Employer Reimbursed Students

The University will defer the tuition for a period of 30 days after grades have been posted for the semester. At the end of the deferment period the account will be reviewed and if full payment has not been applied to the student’s account, the credit/debit card on file will be charged. The completed Deferred Tuition Plan contract must be submitted prior to the end of the add/drop period of each semester. The student’s tuition balance will not be charged interest while participating in this plan.

Student’s Responsibilities:

1. Student must submit a copy of their employer’s reimbursement policy. The policy must be mailed, faxed, or scanned and emailed directly to the Student Accounts Office and received prior to the end of the add/drop period and must be attached to the completed Deferred Tuition Plan contract.

2. Student must provide a credit/debit card which will be stored in a secure environment and will be used to pay for any unpaid portion of tuition/fees if the payment has not been posted by the 30 days after grades have been posted for the semester. If during the course of the semester the card information provided changes, the student must submit the new card information to the Student Accounts Office accordingly. If the card information on file is rejected, the student will be immediately removed from the deferred tuition plan and subject to standard University collection procedures.

3. If tuition reimbursement is less than 100%, the non-reimbursed portion must be paid in full by the student at the time of registration.

4. Maintain good financial and academic standing.

5. Submit a new contract for continued enrollment in the plan each semester prior to the end of the add/drop period.

6. If the employee has financial aid in place to cover the balance the employee is not eligible for deferred tuition, the financial aid is the first payer.

If any required items are omitted, the deferment cannot be processed and payment will not be deferred. Husson University reserves the right to cancel students from the deferred tuition plan who fail to comply with the requirements of the plan.

Tuition Assistance

Students that are eligible for third party tuition assistance are required to turn in the appropriate documentation reflecting the third party assistance prior to the end of the add/drop period. The student’s tuition balance will not be charged interest if there is a record of tuition assistance on file and it covers the whole balance on the account.

Tuition Refund Policy

Students are enrolled for the entire semester, not for a period of attendance. Paying fees in installments does not result in a fractional contract. A student who withdraws from school prior to the completion of his/her program of study, during a semester or between semesters, must file an official form of withdrawal with the Registrar’s Office.

Tuition refund credits are computed from the official date of withdrawal. Nonattendance of classes does not constitute an official withdrawal. Full tuition credits will be given for individual course withdrawals during the standard add/drop period each term. For individual course withdrawals after the standard add/drop period, tuition and fees will not be adjusted.

Students who are academically or administratively dismissed will receive a refund in accordance with the refund policy below.

Financial aid will be proportionately charged back in accordance with government regulations.

For program withdrawals during the regular academic year or for terms that are 15 or 12 weeks in length, refund credits will be prorated on the balance of tuition and other charges, after deducting the tuition deposit and other nonrefundable fees, using the following schedule:

<table>
<thead>
<tr>
<th>Week of Term</th>
<th>Refund Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>During the First week</td>
<td>100%</td>
</tr>
<tr>
<td>During the Second Week</td>
<td>85%</td>
</tr>
<tr>
<td>During the Third Week</td>
<td>70%</td>
</tr>
<tr>
<td>During the Fourth Week</td>
<td>55%</td>
</tr>
<tr>
<td>During the Fifth Week</td>
<td>40%</td>
</tr>
<tr>
<td>During the Sixth Week</td>
<td>25%</td>
</tr>
<tr>
<td>After the Sixth Week</td>
<td>0%</td>
</tr>
</tbody>
</table>

Summer Session withdrawals will be prorated using the following schedule:

<table>
<thead>
<tr>
<th>Withdrawal Date</th>
<th>Refund Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Withdrawal on or before the number of days equal to the number of weeks a class is scheduled.</td>
<td>100%</td>
</tr>
</tbody>
</table>

For example, for a six week course, a refund will be granted through the sixth day.

After the number of days equal to the number of weeks a class is scheduled. | 0% |

Residence Refund Policy

Students who withdraw from the University or are academically or administratively dismissed, must complete and sign a Residence Withdrawal form and turn in his or her room key and student ID card to the Director of Residential Life. A refund credit will be prorated on the residence charges in accordance with the same schedule as is used for tuition refunds (see Tuition Refund Policy above).

Financial Aid

Students attending Husson University annually receive financial aid funds totaling in excess of $46 million from federal, state, community, and campus-based sources. Aid resources are made available to
students on the basis of financial need determined by the submission of the Free Application for Federal Student Aid (FAFSA). The FAFSA is the only application required for need-based financial aid consideration at Husson.

The FAFSA collects income and asset information about parents and students. This information is analyzed by the Department of Education and provided to financial aid agencies and institutions. The FAFSA should be completed as soon after October 1 as possible to ensure equitable consideration for existing aid resources. All applicants must file by April 15 in order to be considered for all available financial aid.

Financial aid is renewed annually based upon continued financial need as demonstrated through the annual filing of the FAFSA and the requirement that the student meet the stipulations of the Satisfactory Academic Progress Financial Aid Policy.

Financial Aid Sources
The following is a list of aid sources available to Husson University students. Applicants are encouraged to research the possibility of assistance from other sources such as local fraternal and social organizations and special service groups. Often, your high school guidance counselor is the best resource for this type of scholarship information.

Federal Sources
- Federal Pell Grants
- Federal Supplemental Educational Opportunity Grants (FSEOG)
- Federal College Work Study Program (FWS)
- Federal Direct Loan Program
  - Subsidized
  - Unsubsidized
- Parent PLUS
- Graduate PLUS

State Sources
- Maine State Grant Programs
- Non-Maine students should apply to the state grant program in their state of residence (See FAFSA for State deadlines)

Community Sources
Many communities support student efforts to attend institutions of higher education. Information regarding local aid programs is available through guidance counselors at local high schools.

Other Sources
- Husson University payment plans (TMS)
- Alternative Education Loans from Private Lenders (www.elmselect.com)

Institutional Grants
- Husson annually offers a limited amount of grant assistance to students with demonstrated financial need and/or academic achievement.

See the Financial Aid Office’s webpage at http://www.husson.edu/scholarships for a complete list of scholarships.

Withdrawal
Withdrawal from School
If you register and then withdraw from all classes, your eligibility for aid will be recalculated based on the number of days you attended class. If you withdraw from all classes prior to the first class day, you must repay any and all financial aid received. If you withdraw on or after the first class day, you may have to repay a portion of any financial aid received. If you withdraw, you should consult the definition of Satisfactory Academic Progress to determine if your withdrawal will affect your eligibility for future aid.

The Higher Education Amendments of 1998 changed the formula for calculating the amount of aid a student and school can retain when the student withdraws from all classes. (Consumer Information 34 CFR 668.22). This law specifies how Husson University must determine the amount of Title IV program assistance that you earn if you withdraw from school. The Title IV programs that are covered by this are: Federal Pell Grants, Direct Loans, Direct PLUS Loans, Federal Supplemental Education Opportunity Grants (FSEOG), and Federal Perkins Loans.

Though your aid is posted to your account at the start of each semester, you earn the funds as you complete the semester. If you withdraw during your payment period or period of enrollment the amount of the Title IV program assistance that you have earned up to that point is determined by a specific formula. If you received (or Husson or your parent received on your behalf) less assistance than the amount that you earned, you may be able to receive those additional funds. If you received more assistance than you earned, the excess funds must be returned by Husson University and/or by you.

The amount of assistance that you have earned is determined on a pro-rated basis. For example, if you completed 30% of your payment period or period of enrollment, you earn 30% of the assistance you were originally scheduled to receive. Once you have completed more than 60% of the payment period or period of enrollment, you earn all the assistance that you were scheduled to receive for that period.

If you did not receive all of the funds you earned, you may be due a post-withdrawal disbursement. If your post-withdrawal disbursement includes loan funds, Husson must get your permission before it can disburse them. You may choose to decline some or all of the loan funds so that you don't incur additional debt. We highly encourage this practice. We may automatically use all or a portion of your post-withdrawal disbursement of grant funds for tuition, fees, and room/board charges (as contracted with Husson). Husson needs your permission to use the post-withdrawal disbursement for all other school charges. If you do not give your permission, you will be offered the funds. However, it may be in the best interest to allow us to keep the funds to reduce your debt at the school.

There are some Title IV funds that you were scheduled to receive that cannot be disbursed to you once you withdraw because of other eligibility requirements.

If you receive (or Husson or parent receive on your behalf) excess Title IV program funds that must be returned, your school must return a portion of the excess equal to the lesser of:

1. Husson charges are multiplied by the unearned percentage of your funds, or
2. The entire amount of excess funds.
We must return this amount even if you didn’t keep this amount of your Title IV program funds. If Husson is not required to return all of the excess funds, you must return the remaining amount.

Any loan funds that you must return, you (or your parent for a Direct PLUS Loan) repay in accordance with the terms of the promissory note. That is, you make a scheduled payment to the holder of the loan over a period of time.

Any amount of unearned grant funds that you must return is called an overpayment. The maximum amount of a grant overpayment that you must repay is half of the grant funds you received or were scheduled to receive. You do not have to repay a grant overpayment if the original amount of the overpayment is $50 or less. You must make arrangements with Student Accounts or the Department of Education to return the unearned grant funds.

The requirements for Title IV program funds when you withdraw are separate from any refund policy that Husson has. Therefore, you may still owe funds to the school to cover unpaid institutional charges. Husson may also charge you for any Title IV program funds that the school is required to return. If you don’t already know our refund policy please talk to Financial Aid and Student Accounts before making any decisions. Also please visit the OASIS Office (http://www.husson.edu/academic-support) located in Peabody 208 for procedures for withdrawing from school.

If you have any questions about your Title IV program funds, you can call Federal Student Aid Information Center at 1.800.4.FEDAID (1.800.433.3243). TTY users may call 1.800.730.8913. Information is also available on Student Aid at www.studentaid.ed.gov (https://www.studentaid.ed.gov).

**Satisfactory Academic Progress Financial Aid Policy**

The U.S. Department of Education requires that a student who receives financial assistance make real and measurable progress in the academic program in which the student is enrolled. This is called Satisfactory Academic Progress (SAP), and it affects all federal, state, and most forms of need-based institutional aid.

To be eligible for financial aid, you must meet specific minimum thresholds:

**Undergraduate students:**

<table>
<thead>
<tr>
<th># of credits attempted</th>
<th>GPA below</th>
<th>or earned greater than x % of attempted credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-23</td>
<td>1.50</td>
<td>67%</td>
</tr>
<tr>
<td>24-53</td>
<td>1.70</td>
<td>67%</td>
</tr>
<tr>
<td>54-83</td>
<td>1.80</td>
<td>67%</td>
</tr>
<tr>
<td>84+</td>
<td>1.90</td>
<td>67%</td>
</tr>
</tbody>
</table>

**Graduate students:**

<table>
<thead>
<tr>
<th># of credits attempted</th>
<th>GPA below</th>
<th>or earned greater than x % of attempted credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Doctorate of Pharmacy</td>
<td>2.0</td>
<td>67%</td>
</tr>
<tr>
<td>All Other Graduate Programs</td>
<td>3.0</td>
<td>67%</td>
</tr>
</tbody>
</table>

Failures, withdrawals, and incompletes are considered attempted but not completed credits for the purposes of assessing Satisfactory Academic Progress.

SAP is reviewed at the end of fall and spring semesters for undergraduate and graduate students.

If you drop below the minimum SAP requirements you are allowed a warning term to raise your GPA and/or credit hour completion rate to the minimum requirements. You can receive your financial aid during your warning term, but if you are not meeting the required minimum GPA and/or credit hour completion rate at the end of your warning term, your financial aid will be suspended.

If you were placed on warning in a previous semester and continued to fall below minimum requirements, you will be placed on SAP Disqualification, causing the loss of financial aid going forward.

You have two options if you are on SAP Disqualification:

1. You may appeal the suspension **
2. You may continue without the benefits of financial aid. You will still be responsible for finding a way to pay your student account charges if you decide not to appeal. Ways to pay include a payment plan or student alternative loans.

In order to appeal the disqualification, there are two pieces of information you must submit before our SAP Appeals Committee can review your appeal:

1. A written statement that discusses any circumstances that kept you from meeting SAP requirements in the past, and what you have changed in order to foster academic success moving forward. Include specifics regarding your anticipated academic program completion date, and the estimated number of hours remaining for your academic program completion.
2. Written support from an academic advisor, endorsing your academic plan moving forward.

**Submission of an appeal **does not guarantee** reinstatement of your eligibility.

Your appeal must be submitted within 30 days of notice of the suspension. Appeals submitted after the respective dates below will be considered for the following enrollment period. Incomplete appeals will not be reviewed. Once all required pieces of information are received, the SAP Appeals Committee will review your appeal within 14 business days, and notify you of their decision via email. If your appeal is approved, then your financial aid will be reinstated for the appropriate terms in accordance with federal, state and university regulations and processing requirements/ deadlines, and the availability of funds. For students whose aid has been reinstated, they will be placed on Financial Aid Probation. Even if your appeal is denied, you may continue to pursue your education without the benefit of financial aid. You may apply for a payment plan or explore your options with student alternative loans at www.elmselect.com.

The degree programs at Husson University are approved by the Maine State Approving Agency for Veterans Education Programs for persons eligible for Veteran’s Administration GI Bill ® benefits. Students who request veteran’s educational assistance are required to have all previous post-secondary experience evaluated for possible transfer credit in order
to be eligible for benefits. For more information, contact the Registrar’s Office.

**Academic Policies**

**Academic Integrity**

Husson University strives to promote and preserve an academic environment that facilitates learning throughout students’ undergraduate and graduate experience. Students demonstrate learning and faculty assess learning through a variety of means such as testing, papers, and research. In order to preserve a healthy academic environment, students must demonstrate their own efforts.

The learning environment is undermined when students do not act with integrity by presenting other’s works as their own or by distorting academic records. Although the following is not an exclusive list, violations of academic integrity include:

- Cheating – sharing, providing, obtaining or submitting information, whether verbally, electronically or by other means, with the intent of fraudulently improving course grades.
- Plagiarism – presenting ideas as your own without proper attribution to the person who originally developed the idea or expression or the means or method of conveying it.
- Fabrication – presenting information as fact that has not been verified or cannot be substantiated by reference to professional material or the scientific process.
- Falsification – altering or causing documents or records, official or otherwise, to reflect a false representation regarding work, credentials, or accomplishments.

In utilizing Husson University technology, each student acknowledges his or her responsibility to uphold these standards of integrity and willingness to be subject to them. Each instructor is empowered to determine the appropriate sanction based on a violation of this policy, including failure in the course. If an instructor determines that a violation of academic integrity has transpired, the instructor will memorialize the finding in a report and meet with the student to discuss the findings and proposed sanctions. The student may appeal the findings to the Dean of the respective school for the course within 10 business days of the scheduled meeting with the instructor. Other academic sanctions may also be taken by the University authorities, including dismissal from the University.

**Credit Hour Defined**

A credit hour is defined as one, 50-minute period of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately fifteen weeks for one semester. An equivalent amount of work is expected for other activities such as laboratory work and internships.

**Student Course Load**

A full-time Husson undergraduate student normally enrolls for 15 credit hours of course work. Exceptions may include the following conditions: (1) a student on probation is required to carry a reduced load of 12 credit hours; or (2) a conditionally accepted student is required to carry a reduced load. Full-time attendance is defined as a course load of 12 or more semester hours.

**Change of Academic Program**

Students applying for a change of academic program must obtain the approval of the chairs of the departments involved. All program changes become effective at the beginning of the following semester. Students who change their program of study must submit required forms to the Registrar’s Office prior to the beginning of their final term or semester.

A student who seeks a second or additional major for his or her baccalaureate degree must meet all General Education requirements for the original major and complete all degree requirements for both majors. A student seeking a second major should complete a Request for Second Major form and submit it to the Registrar’s Office.

A student who seeks a second or additional bachelor’s degree must complete a minimum of 30 additional semester hours at Husson beyond the requirements for the first degree and complete all requirements for both degrees. Students who would like to enroll in a second degree must submit Change of Major paperwork to the Registrar’s Office indicating both degrees being pursued.

**Course Change and Course Withdrawals**

During the first week of classes in the semester, students are given the opportunity to adjust their course schedules by adding and dropping courses. Verbal notice to the instructor or failure to attend class is not sufficient notice. Written approval must be obtained from the faculty advisor. Dropping courses may delay graduation and adversely impact class status, athletic eligibility, immigration status and financial aid.

The policy with respect to withdrawing from a course is as follows:

1. A student who withdraws from a course after the Add/Drop period will generally not be registered or admitted to another course.
2. A student who withdraws from a course up to the midterm of classes will receive a grade of "WW."
3. If a student withdraws after the midterm, a grade of PW or FW will appear on the student’s official transcript indicating:
   - PW (Withdraw Pass)—The student withdraws from the course having completed all work and assignments up to the time of the withdrawal and/or having participated in the course to the academic expectation of the professor.
   - FW (Withdraw Fail)—The student withdraws from the course not having completed the work and the assignments up to the time of withdrawal and/or had not participated in the course to the academic expectation of the professor.

The grade of PW or FW will be determined by the professor of the course and submitted to the Registrar at the time the student withdraws from the course, on an official withdrawal form.

The grade of PW, although included on the student’s transcript, is not computed into the grade-point average or the cumulative average. The grade of FW is computed into the grade-point average and the cumulative average.

No course withdrawal can be initiated after the last day of classes as designated in the academic calendar in the semester or term in which the course is taken.
Attendance
Students are expected to attend all scheduled class sessions for courses in which they are enrolled and to be responsible for all coursework. The only recognized absences are those that are the consequence of family or personal emergencies, or extended illness that results in confinement or hospitalization. Proof of the validity of a particular class absence may be required of a student by an instructor. The decision as to whether or not a student may make up class work, quizzes or examinations missed while absent is exclusively that of the course instructor.

Husson University policy requires that faculty keep attendance records. When students are absent from either more than 15% of the scheduled class meetings for a semester or more than the number of absences allowed per the syllabus for a specific course, faculty may award the grade of X and deny course credit for excessive absences. It is recommended that faculty inform students when they are in danger of losing credit due to excessive absences.

Attendance in online courses is demonstrated in a variety of ways such as by submitting academic assignments, taking exams, engaging in interactive tutorials or computer-assisted instruction, participating in online discussions about academic matters, or initiating contact with the faculty members to ask questions about the academic content of the course.

Students must log in at least once a week at a minimum but multiple logins are highly recommended to satisfy academic obligations. Any students who begins active participation but does not log in to their course(s) for 7 consecutive calendar days, or as outlined in the course syllabus, may be assigned a grade of “X” (Failure for excessive absences).

Synchronous Sessions Policy for Asynchronous Courses
All instruction in asynchronous courses and programs is delivered online with no required in-person activities. Certain exceptions exist for practicum requirements for clinical programs such as may be found in the health care disciplines. Although the majority of online instructions will be asynchronous, some courses may involve synchronous interactivity-including real-time events, guest lectures, panel discussions, simulations, student group work, consultations, or meetings. Synchronous sessions will meet accessibility and Universal Design for Learning (UDL).

Online synchronous sessions are those for which students and instructors are engaged in simultaneous electronic communication with each other. When a synchronous session is scheduled, faculty must record the session or provide a suitable alternative for students whose schedules prevent them from participating at that time. Any recording should be made available for at least two weeks after the session for any student who is not able to attend. Instructors are required to provide adequate notice of all synchronous sessions and to indicate to the means by which information will be available for those unable to participate.

Leave of Absence from the Campus
A written leave of absence request submitted to the Dean of the College allows the student to bypass the more lengthy college admissions process and return to school.

Administrative Withdrawal
If a student never attends any course in which they have enrolled for a given semester or term, the Registrar’s Office may initiate an Administrative Withdrawal. For online students an Administrative Withdrawal may occur when a student does not log into the learning management system and begin completion of course assignments in all courses for a period of 7 consecutive calendar days within the first 14 days after the start of the course(s).

Directed Course Study
In a Directed Study, an individual student and a faculty member cover the content of a course in the Husson University curriculum but do not meet in a regular class section with other students. Normally, a directed study is only approved for those students with fifteen or fewer credit hours remaining in their program of study. Final evaluation of a student includes an assessment of learning outcomes by the faculty member.

Only six (6) semester hours of directed study may be applied to the requirements for a bachelor’s degree. Only three (3) semester hours of directed study may be applied to the requirements for an associate’s degree.

Independent Study
In an Independent Study, an individual student and faculty member pursue subject matter not covered by an established Husson University course. Independent Study courses may be available to students who meet the following criteria:

• Junior or senior status
• An overall average of 3.0 or
• A 3.0 average in the previous semester

A plan of study is developed by the faculty member and submitted to the department chair or dean for approval.

Transfer Credit Policy for Degree Candidates
A student at Husson who is a degree candidate and has not transferred any credit hours from another college or university may transfer twelve (12) credits to apply toward a bachelor’s degree program or six (6) credits to apply toward an associate’s degree program. However, unless an active-duty service-member, students are not permitted to transfer in any part of the last year’s work in their program [usually thirty (30) semester hours]. A transfer student who becomes a Husson degree candidate cannot transfer in additional credit beyond what was accepted in transfer at the time of admission to Husson University. A minimum grade of C must be earned for the course to be eligible for transfer. Students should consult specific program information and/or department heads to determine whether additional requirements or limitations apply. In addition, students should seek permission to transfer credits from another institution prior to registering for their courses. Such permission may not be granted if the course under consideration is similar to one being offered by the University during that same term. Course credits transferred in to Husson appear on the transcript as a “T”. Grades earned
at other institutions as course repeats do not replace those earned at Husson.

**Special Schedule Options**

Husson University offers a January and May term and from time to time may offer quarter courses and other special formats in which classes meet on a more intensive schedule than in semester length courses.

**Summer Sessions**

Summer sessions are offered to allow students early entry into a college program, to accelerate their graduation date, or to make up academic deficiencies.

**Grading System**

The system of evaluating a student’s achievement at Husson is by letter grade, with grade-point values based upon an earned three-hour credit unit as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Grade-Point Average</th>
<th>Quality Points</th>
<th>Earned 3-hour Credit Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.0</td>
<td>12.0</td>
<td>95-100</td>
</tr>
<tr>

</tr>
</tbody>
</table>

**++P** C Level work or higher. Passed

**+HP** Above average achievement in pass/fail course

**+++NG** No grade submitted (temporary grade)

**WW** Withdrawal up to midterm

**+PW** Withdrew passing

**FW** Withdrew failing

**+E** Exited with out withdrawing

**X** Credit denied because of excessive absence

**+WA** Administrative withdrawal

+++I Incomplete (temporary grade)

++AU Audit, no credit earned

+L Student enrolled but never attended course, no withdrawal on file.

+ Grade does not affect GPA

++ Audit Courses. Students who wish to audit a course (enroll for noncredit) must follow the usual registration procedure.

+++ A temporary grade (I & NG), if not converted to a final grade, becomes an F at the mid point of the following term or semester.

The Registrar’s Office does not report grades upon a verbal request to do so. Only written requests by authorized personnel are acknowledged.

**Student Appeal of a Course Grade**

If a student believes he or she has received an improper grade for a course, he or she must present the case to the instructor within one week from the beginning of the next regular semester (e.g. fall, spring). If the matter is not resolved within two weeks of discussion with the instructor, the student may appeal the matter in writing with supportive evidence and rationale to the Dean of the School offering the course. The Dean will consider only issues of procedure and fair treatment and will not review the academic judgment used in determining a grade. The Dean’s decision on matters pertaining to grade appeals is final. Certain procedural variations may exist depending upon the student’s course of study.

**Pass/Fail Courses**

The option to take a course on a pass/fail basis may not be available in all courses. When it is available, the students must declare choice of the option before the end of the add/drop period. Students enrolled in pass/fail courses may also receive a grade of Honors signifying that the student’s achievement in the course was significantly above the average achievement of other students in that course.

**Incomplete Grades**

In exceptional circumstances students may be given an “I” (Incomplete) grade. Criteria for granting Incompletes include illness or accident, death or critical illness in the family, emotional disturbance requiring special guidance, and similar difficulties. Incompletes must be concluded and earned grades recorded by midpoint of the semester following the
assignment of the incomplete grades. An Incomplete automatically becomes an “F” if the Registrar’s Office is not notified by the instructor that another grade has been awarded.

**Academic Warning, Probation and Dismissal**

Undergraduate degree and Special students who do not achieve the minimum cumulative grade-point average listed below receive warnings or are placed on Probation as indicated:

<table>
<thead>
<tr>
<th>On the Completion of</th>
<th>Academic Probation</th>
<th>Academic Warning</th>
</tr>
</thead>
<tbody>
<tr>
<td>0-23 Credit Hours</td>
<td>0-1.49 GPA</td>
<td>1.50-1.99 GPA</td>
</tr>
<tr>
<td>24-53 Credit Hours</td>
<td>0-1.69 GPA</td>
<td>1.70-1.99 GPA</td>
</tr>
<tr>
<td>54-83 Credit Hours</td>
<td>0-1.79 GPA</td>
<td>1.80-1.99 GPA</td>
</tr>
<tr>
<td>84+ Credit Hours</td>
<td>0-1.89 GPA</td>
<td>1.90-1.99 GPA</td>
</tr>
</tbody>
</table>

**Students who earn a 0.00 term grade point average will automatically be placed on Academic Probation.**

**Warning**: Academic Warning alerts students that their achievement is below the standard required for normal progress toward graduation. As a result, reduction in student credit-hour course loads may be imposed as well as restrictions on extracurricular activities. Grade deficiencies should be removed during the subsequent semester or during summer terms when possible.

**Probation**: Academic Probation signifies that students are in serious academic jeopardy. Students on probation must remove grade deficiencies during the subsequent semester or during summer sessions. Failure to do so may result in academic dismissal from the University. Students on Probation are required to carry a reduced course load and are restricted on extracurricular activities. A student on probation is required to carry a reduced load of 12 credit hours.

Students with a 0.00 term grade point average will be placed on academic probation regardless of number of credits earned and cumulative grade point average. Failure to earn a term average of at least 2.0 in the subsequent semester will result in academic dismissal.

**Dismissal**: The University will dismiss students whose GPA falls within the standards of academic probation for two consecutive semesters or terms. This policy is consistent with the ethical obligation of the University to assure that all students registered for courses can demonstrate satisfactory academic progress. Dismissal takes effect immediately upon the determination of the grades for the semester. Unless the student successfully appeals the dismissal, the period of absence must include at least one regularly scheduled fall or spring semester. Thus, subject to appeal, students dismissed at the end of the spring semester cannot register for or attend May, summer or fall courses. Students dismissed after the fall semester may not register for or attend classes in the winter or spring terms. When a full-time day student is dismissed for academic reasons, the student will not be allowed to register for Husson Extended Learning courses while the dismissal is in force.

A student who seeks a reconsideration of dismissal may appeal the decision on the grounds of extenuating circumstances and by demonstrating a reasonable prospect for academic success in the upcoming semester. The appeal should be initiated in writing and submitted to the Dean of the respective School. After reviewing the matter, which may include a meeting with the student, the Dean will provide a recommendation to the Deans’ Council for affirmation or rejection. Further appeal of the Deans’ Council decision shall be made to the Chief Academic Officer or his or her designee whose decision shall be final. When the consideration of an appeal requires immediate attention and the Dean of the School is not readily available, the Chief Academic Officer may exercise prerogative in accepting a direct appeal and rendering a final decision. A student may be dismissed from an academic program but remain in acceptable standing in the University. Students dismissed from a degree program will be assigned to special or undeclared status until they complete a change of major form.

**Repeating a Course**

Students may elect to repeat courses in which they have received a grade of “C” or below, but may not attempt a course more than three times. The newly earned grade will replace the original grade in the calculation of a student’s cumulative grade-point average, regardless of whether the new grade earned is higher or lower than the previous grade. The former grade is retained as originally recorded in the student’s transcript. Students cannot repeat a course that has been removed from the curriculum unless another course has been designated as an approved alternative for the deleted course. When a student receives a failing grade (X, F, or FW) in a topics course (usually designated by a course number X99) and seeks to repeat the course, the Dean of the School in which the course was offered may authorize a comparable course to be taken as a substitute. The grade in the designated substitute course will replace the failing grade in calculating the cumulative grade-point average.

Students are required to repeat Rhetoric and Composition courses (EH 123 (http://catalog.husson.edu/generalinformation/academicpolicies) and EH 124 (http://catalog.husson.edu/generalinformation/academicpolicies)), and, if applicable, The Writing Workshop (EH 91 (http://catalog.husson.edu/generalinformation/academicpolicies)) if they earn a grade of “C-” or lower. Students in these courses will present a portfolio of their work at the end of the semester for evaluation, to be graded “Pass” or “No Pass. A student must receive a “Pass” to receive a grade of “C” or better. Students must complete the Approaches to Literature course (EH 200 (http://catalog.husson.edu/generalinformation/academicpolicies)) with a grade of “C” or better in order to meet prerequisite requirements for any upper-level English Literature courses.

A student required to repeat a course will be charged full tuition for the course. Grades at other institutions do not replace those earned at Husson.

Students should also refer to policies of their particular discipline for further information on repeating a course.

**Academic Forgiveness**

A Husson student who withdraws from one baccalaureate program and enters another may petition the Chief Academic Officer to obtain relief from low grades. The Chief Academic Officer will consult with the Dean who has jurisdiction over the student’s new program of study. If the petition is granted, the Dean will identify courses which are unrelated to the new major and to the University’s general education requirements and in which the student earned grades of F, X, or FW. The grades from these courses will be withdrawn from the calculation of the GPA in the student’s new program of study. Relief under this policy is an option open to students only once. Should the student later seek re-admission to her or his original degree program, the grades withdrawn from the GPA calculation under this policy will be restored to reflect the student’s performance in that program.
A reentry student who previously received grades of F, X, or FW at Husson University, may petition the Provost for Academic Forgiveness if they meet the following requirements:

1. At least five years have lapsed since the last semester of attendance at Husson University.
2. The student must be enrolled in an undergraduate degree program leading to an Associate or Baccalaureate degree.
3. Prior to petitioning for academic forgiveness the student must have earned a minimum of 12 credits and maintained a GPA of 2.5 or higher with no grade lower than a "C".

The ability to petition for forgiveness of these grades is available even if the student pursues the same or similar degree. All course grades forgiven will remain on the student's transcript, but will not be calculated into the student's GPA. Academic Forgiveness for reentering students is available only once and applies solely to Undergraduate courses.

**Class Identification**

A student is usually identified as a first-year student, sophomore, junior or senior. Such a classification is applicable to the four years of regular college attendance. However, an increase in hours earned during one or more semesters or enrollment in summer sessions may result in an accelerated program. Thus, it is more accurate to designate class standing in accordance with credit hours earned plus credits accepted in transfer according to the following schedule:

- 0-23 Freshman
- 24-53 Sophomore
- 54-83 Junior
- 84+ Senior

The schedule above has no necessary relationship to the cumulative hours and required grade-point average necessary for continuing enrollment.

**Distance Education Verification of Student Identity**

In order to sustain the integrity of distance education programs, the academic community must assure that students registered for those courses are the same as those who are participating in them. Students who participate in distance education courses affirm their compliance with the University's Academic Integrity policies each time they utilize Husson's course management software. In addition, instructors and students will arrange for at least one synchronous meeting during the course at which the identity of the student can be confirmed visually or telephonically. The meetings between instructors and students will verify the student’s identity as well as reinforce learning outcomes and augment personal connection between instructors and students.

**Graduation Requirements**

Course requirements for Bachelor of Science and Associate in Science degrees are listed in the sections of this catalog devoted to each School. When the degree candidate successfully completes the curriculum for a selected program of study, he or she is recommended for a degree. Students may complete more than one concentration of study within a degree area. Candidates for a Bachelor of Science degree are required to complete a minimum of 120 semester credit hours maintaining a minimum 2.0 overall cumulative grade-point average (may be higher in select programs) and 2.0 in the professional requirements of the concentration, with at least 15 credit hours in their concentration completed at Husson University. Some programs extend into the fifth year and require substantially more than 120 semester hours to complete. Some programs may have more rigorous grade-point average requirements. A student who seeks a second or additional bachelor’s degree must complete a minimum of 30 additional semester hours at Husson beyond the requirements for the first degree and complete all requirements in the second degree area. Candidates for an Associate in Science degree are required to complete a minimum of 60 semester credit hours maintaining a 2.0 or better cumulative grade-point average, and a 2.0 in the professional requirements of the concentration, with at least 15 credit hours in their concentration completed at Husson University. A degree candidate is required to spend at least one academic year (or its equivalent) in residence as an enrolled student. Students must take their final thirty (30) credit hours at Husson University. The final thirty (30) credit hour residency requirement is waived for active duty service-members.

Students can request their transcript by filling out a paper request form, available in the Registrar’s Office, or electronically through a secure website. Transcript fees are as follows:

**Paper Requests**

- Fee per transcript requested (up to 5): No Charge
- Additional copies: $3.00
- Same-day, walk-in service: Additional $5.00

**Electronic Requests**

- Fee per transcript requested: $3.00
- Delivery Method
  - Electronic: No additional charge
  - Mail: Additional $2.00 per transcript requested
  - Overnight Delivery (w/in U.S.): Additional $25.00 per transcript requested

No transcript is issued until the student’s financial account has been paid in full.

Degrees are conferred at Spring Commencement exercises held in May. Students are encouraged to be present at Spring Commencement. Students should expect to receive their diploma 4-6 weeks after completion. No diploma is issued until the student’s financial account has been paid in full. For further information on graduation requirements for graduate degrees, please review the respective program.

**Honors**

A student carrying a full course load of 12 credit hours who has achieved the semester grade-point average listed below for the semester and completed all attempted courses in the time allotted for the semester has earned the following honor for the semester:

<table>
<thead>
<tr>
<th>Honors</th>
<th>Semester GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>President’s List</td>
<td>3.80-4.00</td>
</tr>
</tbody>
</table>
for Degree option, a student must be in good academic standing. The
may not be acceptable as transfer courses. To qualify for the Contract
at Husson, fifteen of which must be in the major. Some major courses
be able to complete a minimum of thirty of the last sixty credit hours
completing their studies because of a work assignment. The student must
waived for active-duty servicemembers, a Contract for Degree option may
must be completed at Husson University. While this requirement is
Normally, the final thirty credit hours of a student’s program of study
be approved by the Chair of the major before the student registers. The
student must file a written progress report annually with the Chair of the
major area, and all work on the degree should be completed within five
years of the time the Contract is written.

**Religious Observation Policy**

Husson University recognizes that the student body includes adherents
of many faiths, and that observance of religious holidays is an important
part of religious practice. In support of this sentiment, any student
who is unable to attend classes or to participate in any examination,
study, or course requirements on a day of observance because of his
or her religious belief, shall be provided with an opportunity to make
up the course requirements so long as the effort to do so does not
create an unreasonable burden upon the instructor, department or the
University. The student must provide advanced notice as established
in the syllabus such that the instructor has adequate opportunity to
prepare for a makeup. At the discretion of the instructor, the occasion
for making up coursework could occur prior to the examination or due
date of the assignment. No adverse or prejudicial effects shall result
from a student’s grade for the examination, study, or course requirement
on the day of religious observance because he or she relies upon these
provisions. In the case of an internship or clinical, students should refer
to the applicable policy in place by the employer or site.

**Confidentiality of Student Records**

All students and alumni are authorized access, upon presentation
of written requests, to records of their attendance, performance, and
scholastic achievement maintained by the University. In accordance
with the Family Educational Rights and Privacy Act of 1974 as amended,
regulations setting forth the procedures by which access may be
obtained, the person or persons responsible for custody of records
and the persons authorized to have access to student records have
been published. These regulations are available to interested persons
upon request. Records are maintained in accordance with federal and
state regulations. In general, after seven years beyond termination
or graduation, only transcripts of Husson courses are retained in the
Registrar’s Office.

**Contract for Degree**

Normally, the final thirty credit hours of a student’s program of study
must be completed at Husson University. While this requirement is
waived for active-duty servicemembers, a Contract for Degree option may
be available for other students who are forced to leave the region before
completing their studies because of a work assignment. The student must
be able to complete a minimum of thirty of the last sixty credit hours
at Husson, fifteen of which must be in the major. Some major courses
may not be acceptable as transfer courses. To qualify for the Contract
for Degree option, a student must be in good academic standing. The

**Valedictorian/Salutatorian**

To be eligible for the award of Valedictorian or Salutatorian a student
must complete a minimum of 90 credit hours at Husson; take a minimum
of 12 credit hours per semester for at least six semesters, and complete
degree requirements within five years of matriculation. Students
matriculating in programs in which the bachelor’s degree is normally
awarded at the end of five years must complete degree requirements
within six years to qualify for valedictorian or salutatorian. The
valedictorian will be the graduating senior with the highest grade-point
average. The salutatorian will be the graduating senior with the second
highest grade-point average. The winner of the Outstanding Academic
Achievement Award will be the graduating senior with the highest
grade-point average who does not meet the eligibility requirements for
valedictorian or salutatorian. Valedictorian, salutatorian, and outstanding
academic achievement awards are based on grades on record as of
the end of the previous Fall semester. They are awarded at each May
Commencement exercise.

Dean’s List
Honors List

Husson makes several awards annually in recognition of the
accomplishments of members of the graduating class. Gold honor
cords are worn by all associates and baccalaureate-level graduates
who participate in commencement ceremonies and have achieved a
cumulative grade-point average of 3.4 or better. Special recognition is
also given to outstanding men and women of the graduating class in both
the Bachelor of Science and Associate in Science degrees. These honors
are determined by cumulative grade-point averages computed at the end
of the Fall semester. Graduation honors are as follows:

Dean responsible for the student’s major area must give permission
to develop a Contract for Degree. The Contract is to be developed with
the academic advisor and the Chair of the major program, and must
stipulate the specific courses to be completed at another institution. The
Contract process must be initiated while the student is in residence at
Husson. The specific courses to be taken at another institution should
be approved by the Chair of the major before the student registers. The
student must file a written progress report annually with the Chair of the
major area, and all work on the degree should be completed within five
years of the time the Contract is written.

**Husson University Student Complaints Policy**

Husson University promotes a community of learning that provides
access to faculty, staff, and administration. We are committed to
resolving problems experienced by students when interacting at any level
with the University. Accordingly, we want to know if you are experiencing
difficulties resulting from the University’s policies or the actions
of its employees, agents, or volunteers. The University encourages
students with complaints to seek informal resolution of the complaint
prior to initiating a formal process. An informal process involves a
direct conversation with the person who has caused the difficulty; the
conversation is conducted in a fashion that is calm and professional. All
members of the University community are expected to engage in these
conversations with an attitude of listening, understanding, and respect
for the other person regardless of the merit of the complaint. If those
involved with the complaint are unable to resolve the matter through
an informal process, or the matter is of such a nature that it cannot
appropriately be discussed with the person causing the complaint, then
the student may initiate the formal process as follows:

1. Please use the document provided at the following URL, http://
   www.husson.edu/academics/registrar/complaint-form. The
   complaint should clearly identify the circumstances, the specific
   complaint, and the desired resolution. The written document should
   also provide the contact information for the student initiating
   the complaint. Such complaints should be submitted to the
   Administrative Assistant of the Provost who will direct it to the
   attention of an appropriate University representative (e.g., Dean,
   Associate Dean, or Department Chair). The person submitting the
complaint will receive a response or update on its status within 30 days.

2. If the Department, School, or College is unable to address the issue, or it is not addressed to the student’s satisfaction, then the student may request of the Provost's Administrative Assistant that the complaint be directed to the appropriate University office or personnel for further consideration. The appeal may require further conversations with the student and the party against whom the complaint has been filed.

Matters of serious legal or consequential outcomes will be directed without delay to other appropriate venues. All matters shall be considered confidential and shall involve only the necessary parties and representatives of the University. Records of complaints and their resolutions shall be retained in such a way to respect the privacy of the complainant. Students should rest assured that their complaints will not result in retaliation. The New England Association of Schools and Colleges (NEASC) also has a procedure to receive complaints from other institutions, students, faculty, or the public against a university, including tuition and fee policies, and as related to NEASC standards, policies or procedures. Such complaints shall be placed in writing in detail by the complainant and submitted to the NEASC office. You may review the criteria for making a public comment or filing a formal complaint and download the required complaint form at https://cihe.neasc.org/information-public/comments-and-complaints. If the complaint meets the Commission’s criteria for consideration, it will be forwarded to the University’s President, who is asked to respond within 30 days. At NEASC’s next regularly scheduled meeting, the Commission may consider both the complaint and the Husson University’s response and determine whether or not further action is required. The complainant and the institution will be notified in writing of the Commission’s decision in the matter. For guidance on filing either a Public Comment or Complaint, you may email cihe@neasc.org. The policies and procedures with respect to student complaints are not meant to prevent a student from seeking immediate resolution to a matter that could result in ongoing and serious physical, emotional, or financial harm to the student or to others. Rather, they are meant to foster a productive and meaningful resolution to legitimate student concerns.

Compliance

It is the responsibility of the student to be familiar with and abide by all academic regulations, including requirements for completing the major and degree, prerequisites to be met for enrolling in certain courses, restrictions on enrollment in certain courses, and withdrawal from and repeating of courses. Failure to comply with all regulations could adversely affect the student’s status and graduation.

General Education

In the fall of 1997, the Husson University Faculty approved a new General Education Curriculum for all programs leading to the baccalaureate degree. The General Education Curriculum is organized around a set of broad personal and professional attributes that the faculty believes ought to characterize a graduate in every Husson major. These attributes are:

- Professional and technical competence in a major field of study
- Knowledge of ethical standards and skill in ethical analysis
- Knowledge of self and positive self image
- Effectiveness in communication
- Global and cultural awareness and understanding

In addition to these major attributes, the Husson Faculty expect graduates to be able to manage their own life-long learning, exhibit leadership and interpersonal skills, and know the value of service to one’s community.

The General Education Curriculum includes a set of core requirements and elective courses designed to help students develop these attributes. Every baccalaureate student must complete this set of eight core courses:

- EH 123 Rhetoric and Composition I
- EH 124 Rhetoric and Composition II
- EH 200 Approaches to Literature
- Laboratory Science
- Mathematics (two courses)
- Senior Seminar

Each student must also satisfy a set of distribution requirements through selection of appropriate electives in the following areas:

- Experiential Learning (co-op, internship, clinical, other) (1)
- Ethics (1)
- Psychology (1)
- Communications (3)
- Foreign Culture and Conversation (1)
- Fine Arts (1)
- Global Perspectives (1)

To complete the General Education requirements, students must also document learning through co-curricular and/or community service experiences.

Starting in 2012, as part of its ongoing commitment to inspiring and preparing students for professional careers in current and emerging fields within the context of an education informed by the sciences and humanities, Husson University began revising its General Education curriculum with the following goals in mind:

- Provide a more integrated experience stressing the context and connections of General Education in informing major fields of study
- Develop a greater understanding of the purpose and importance of General Education in the curriculum by students, parents, and faculty
- Better prepare students for the demands of the new century
- Create greater efficiency in the curriculum
- Provide greater choice and flexibility to students
- Continue to meet and exceed accreditation requirements
- Improve assessment of student learning outcomes and share assessment data across campus units to better inform curriculum decisions

The Faculty Forum voted to adopt the mission statement and the learning outcomes during the 2015-2016 academic year. Over the course of the 2016-2017 academic year, the General Education Task Force and General Education Committee of the Faculty Forum will be creating a new structure for Husson’s General Education program with hopes that it will take effect during the 2017-2018 academic year.

General Education Mission Statement (adopted 2015)

The mission of the general education core curriculum at Husson University is three-fold:
1. to educate students in broad, foundational knowledge encompassing their larger societies and cultures;

2. to educate students in universal and multi-faceted skills including communication, problem solving, and critical thinking

3. to open students’ minds to the life-possibilities available to them with a Husson education.

Students build upon this core as they move through their major programs by

1. using their cultural competencies to better serve their patients, employers, peers, or customers

2. applying their intellectual skills to discipline-specific studies or occupations

3. taking full advantage of social, economic, and cultural opportunities to be successful, productive members of their chosen communities.

General Education Outcomes (adopted 2016)

All General Education outcomes require “adequate breadth” by showing a “balanced regard for what are traditionally referred to as the arts and humanities, the sciences including mathematics, and the social sciences.” These outcomes require “offerings that focus on the subject matter and methodologies of these three primary domains of knowledge as well as on their relationships to one another.” NEASC Standards for Accreditation p. 8 https://cihe.neasc.org/downloads/Standards/Standards_for_Accreditation.pdf

1. Knowledge:

Students will demonstrate basic knowledge of human cultures and how those impact the individual, and the physical and natural worlds.

Students will explore, identify, explain, and apply the ways in which knowledge is created about the individual, society and the physical and natural worlds. They will identify and apply methods of quantitative and qualitative investigative research and of presentation.

2. Perspectives:

Students will be able to identify, explain, and apply a wide variety of fundamental human perspectives—global, historical, cultural, racial, gendered, social, economic, religious, political, psychological and geographical—through studies in the humanities, social sciences, arts, math, and science.

Students will integrate knowledge garnered from the course work in general education to shape their informed perspectives on global issues as well as their own lives. Such awareness will help students make intelligent assessments and choices when encountering diverse people, ideas, beliefs and cultures.

3. Thinking:

Reasoning—Students will identify, understand, and be able to use different methods of reasoning effectively.

Problem Solving—Students will rationally solve problems and make decisions through analysis and synthesis of relevant information.

Creative Thinking—Students will demonstrate capacity to analyze, synthesize, and interpret ideas and representations of human experience found in literature, philosophy, psychology and the arts in order to create and express new ideas.

4. Skills

Students will demonstrate essential college level skills associated with reading comprehension, careful interpretation of texts, clear oral and written communication, and use of technology.

Students will demonstrate capacity to gather, analyze, interpret, and articulate quantitative and qualitative information and results.

Upon completion of their general education curriculum, students will have

• Understood, interpreted, and communicated ideas and information using written, oral and visual media.

• Thought critically and creatively to solve unfamiliar problems

• Used quantitative and qualitative reasoning in a variety of general education contexts.

• Demonstrated an understanding of the history, principles, economics, psychology and politics of the United States and the wider world.

• Demonstrated an awareness of different social and cultural perspectives.

• Demonstrated proficiency in computer and information literacy.

• Demonstrated an understanding of how the social sciences describe and explain interpersonal and intrapersonal behaviors.

• Demonstrated an understanding of how the biological and physical sciences, social sciences, and humanities describe and explain the natural world.

• Identified and explained aesthetic and ethical dimensions of humankind.

Programs of Study

Husson University offers the following programs of study for undergraduate and graduate students. Some programs have specialized concentrations, and more detailed information is available in the sections of this catalog devoted to each School. The University also provides opportunities for undergraduate students to choose a minor program of study (see below). Students of Online and Extended Learning Programs should consult with the Center Director or Coordinator in their respective locations to determine which degrees can be completed on site or online.

Associate of Science

• Accounting

• Business Administration

• Business Studies

• Computer Information Systems

• Criminal Justice

• Paralegal Studies

Bachelor of Science

• Accounting

• Biology

• Biochemistry

• Business Administration

• Business and Liberal Studies

• Business and Professional Studies

• Communications Technology

• Computer Information Systems
• Criminal Justice
• Criminal Justice/ Psychology
• Data Analytics
• Educational Studies
• Elementary Education
• English
• Entertainment Production
• Environmental Science
• Exercise Science
• Forensic Science
• Health Sciences
• Healthcare Studies
• Hospitality & Tourism Management
• Legal Studies
• Liberal Studies
• Mass Communications
• Nursing
• Paralegal Studies
• Physical Education
• Psychology
• Secondary Education
• Software Development
• Sport Management

Masters
• Business
• Clinical Mental Health Counseling
• Criminal Justice Administration
• Education
• Human Relations
• Nursing
• Occupational Therapy
• Pharmacology
• School Counseling

First Professional Doctorate
• Pharmacy
• Physical Therapy

Certificate Programs
• Accounting
• Business Administration
• Counter Terrorism and Security
• Elementary Education (Pathways II)
• Entrepreneurship
• Entertainment & Design Technology
• Entertainment Production
• Graphic Design
• Paralegal Studies
• Paralegal Certificate - Advanced Civil Practice
• Paralegal Certificate - Advanced Criminal Practice
• Sales
• Secondary Education (Pathways II)

• Small Business
• Web Design
• Web Media

Dual Baccalaureate and Graduate Degree Programs
The following programs lead to a graduate degree, but are designed for entry by undergraduate students. These programs yield both a bachelor’s and a graduate degree.

• B.S. Accounting/Master of Business Administration
• B.S. Business Administration/Master of Business Administration
• B.S. Computer Information Systems/Master of Business Administration
• B.S. Criminal Justice/M.S. Criminal Justice Administration
• B.S. Healthcare Studies/Master of Business Administration
• B.S. Healthcare Studies/M.S. in Occupational Therapy*
• B.S. Hospitality and Tourism Management/Master of Business Administration
• B.S. Kinesiology/Doctor in Physical Therapy*
• B.S. Sport Management/Master of Business Administration

* Qualified individuals with a bachelor’s degree may seek admission to the third year.

Minor Programs
All students enrolled in baccalaureate degree programs have the opportunity to acquire an academic minor in addition to their major course of study. Minor programs include Accounting, Behavioral Science, Biology, Coaching, Computer Information Systems, English, History, Hospitality Management, Mathematics, Natural Science, Psychology, and Tourism and Recreation. Each minor carries a minimum requirement of eighteen (18) credit hours of prescribed course work, and no more than nine (9) credit hours transferred from another college or university can be applied to meet the requirements of a minor. For specific information, students should consult the Office of the Dean of the School offering the minor.

Dual Major
A student who seeks a second or additional major for his or her baccalaureate degree must meet all General Education requirements for the original major and complete all degree requirements for both majors. A student seeking a second major should complete a “Request for Second Major” form and submit it to his or her original advisor, the new advisor within secondary major, and the department head and dean where the new major is housed. A completed transcript evaluation must be attached and submitted along with the form to the registrar’s office.

Dual/Second Master’s Degree
If the graduate program allows, a student who seeks a second or additional graduate (Master’s) degree must meet admissions requirements, complete a minimum of 15 additional credit hours at Husson University beyond the requirements for the first graduate (Master’s) degree and must complete all required course for the second graduate (Master’s) degree.

Experiential Learning
Internships, clinicals, and practicums combine classroom theory with practical work experience. These experiential learning opportunities are available to students when business, industry, or nonprofit institutions join with the University to provide planned periods of learning while in
an employment setting. The major objective is to provide students with a career-oriented, educational program that is beneficial to both the student and the employer.

Through the blending of study and employment, students may
1. better understand classroom theory through application to a working situation;
2. clarify and define career goals;
3. evaluate chosen academic majors;
4. acquire professional experience;
5. develop maturity, self-confidence, and communication skills; and
6. defray a portion of their educational expenses.

Given the benefits from and variety of off-campus experiential learning opportunities, students are encouraged to consult with their advisors early in their time at Husson to understand the requirements for participating. Early planning is also advisable since experiential learning credits could satisfy elective requirements in certain programs of study.

Army R.O.T.C.

Army ROTC is a college elective program designed to develop individual leadership skills for either a military or civilian career. Husson students can participate in the ROTC program during freshman and sophomore college years without any military obligation. Credits from ROTC courses can be applied to traditional degree programs like business, criminal justice or nursing. Students will take classes at Husson during their first two years with some physical fitness at the University of Maine campus in Orono. Students will join with University of Maine colleagues in their third and fourth years for classes on the Orono campus.

Army ROTC gives students a wide range of experiences while you work toward your college degree. ROTC combines classroom instruction with hands-on training. The results are skills that give an edge over peers when it comes time to look for a job. Participants may gain scholarship status in their second year and graduate from ROTC as second lieutenants in the Army.

Graduate Program Policies and Information

Husson University offers a variety of programs through which students can attain a Masters Degree or First Professional Doctorate. While the following sections provide general criteria and standards, the programs relate information that is applicable to those areas of study. Students are advised to refer to those program areas and academic policies that specifically apply.

Academic Standards

Admission to a graduate program is a student’s permission to attempt graduate-level work at Husson University. Admission does not imply that Husson University guarantees that a student will necessarily graduate. Once admitted, it is up to the student to demonstrate ability to do graduate work. Those students who do not demonstrate this ability will be dismissed. In order to more fully understand the standards expected of students at the graduate level, please refer to the specific program of study.

Dual/Second Master’s Degree

If the graduate program allows, a student who seeks a second or additional graduate (Master’s) degree must meet admissions requirements, complete a minimum of 15 additional credit hours at Husson University beyond the requirements for the first graduate (Master’s) degree and must complete all required course for the second graduate (Master’s) degree.

Grading System

The system of evaluating a student’s performance in the graduate program is by letter grade. Grade-point values are the same as those appearing in the General - Academic Policies section of the catalog, with the exception that a student cannot receive a passing grade below a C.

Withdrawal

A student who withdraws must file a withdrawal notice in writing with the Registrar’s Office. Refund credits will be computed from the date that official notice is received in the Registrar’s Office. Students wishing to withdraw should first consult with administrative staff in their respective Graduate Programs. Please note, nonattendance of classes does not constitute an official withdrawal. Laboratory and application fees are not refundable.

Financial Aid

The Federal Stafford Loan Program is available for students admitted to and enrolled in the graduate program. Also available are Graduate Plus Loans. Grad Plus eligibility is based on the applicant not having an adverse credit history. These loans are administered through Husson University’s financial aid office. To become eligible, you must complete the FAFSA (Free Application for Federal Student Aid). Alternative Loan information is also available. Please contact the financial aid office for further information.

Housing

A limited number of spaces may be available in the residence halls during the academic year. Students who attend only during the summer sessions may be accommodated in a residence hall.

Off-campus rooms and apartments are available in Bangor and the surrounding communities. Living accommodations are scarce, however, so the student is advised to arrange for housing in advance of initial enrollment. All inquiries about residence hall spaces should be sent to the Dean of Student Affairs.
The College of Business

Overview:

The College of Business (COB) supports the mission and vision of the university by offering fully accredited undergraduate and graduate professional programs. We offer degrees in Accounting, Business, Information Technology, Legal Studies, Hospitality and Tourism, and Sport Management. Students interested in careers in these areas can choose from several tracks at both the undergraduate and graduate levels.

Mission:

The mission of the College of Business centers on professionalism by providing a quality, student-centric, experiential education which allows for critical, innovative, and analytical abilities to develop.

To achieve its mission, the College of Business develops and prepares the entrepreneurial leader by instilling acumen and integrity for entering the global workforce.

Accreditation:

Husson University has received specialized accreditation for its business programs through the International Assembly for Collegiate Business Education (http://iacbe.org) (IACBE) located at 11374 Strang Line Road in Lenexa, Kansas, USA. IACBE is recognized by the Council for Higher Education Accreditation (CHEA) and accredits business programs worldwide.

The following degrees in the College of Business are accredited by the IACBE:

- Master of Business Administration
- Master of Business Administration with concentrations in:
  - Healthcare Management
  - Hospitality Management
  - Organizational Management
- Bachelor of Science in Accounting
- Bachelor of Science in Accounting/Computer Information Systems
- Bachelor of Science in Business Administration
- Bachelor of Science in Business Administration with concentrations in:
  - Entrepreneurship and Small Business Management
  - Financial Management
  - Healthcare Management
  - Interdisciplinary Program of Study
  - International Business
  - Management
  - Marketing
- Bachelor of Science in Hospitality and Tourism Management
- Bachelor of Science in Hospitality and Tourism Management with concentrations in:
  - Sales and Marketing
  - Small Business Entrepreneurship
- Bachelor of Science in Sport Management

Accelerated (4+1) degree options:

- Bachelor of Science in Accounting/Master of Business Administration
- Bachelor of Science in Business Administration - Entrepreneurship and Small Business Management/Master of Business Administration
- Bachelor of Science in Business Administration - Financial Management/Master of Business Administration
- Bachelor of Science in Business Administration/MBA
- Bachelor of Science in Business Administration - Interdisciplinary Program of Study/Master of Business Administration
- Bachelor of Science in Business Administration - International Business/Master of Business Administration
- Bachelor of Science in Business Administration - Management/Master of Business Administration
- Bachelor of Science in Business Administration - Marketing/Master of Business Administration
- Bachelor of Science in Hospitality and Tourism Management/MBA
- Bachelor of Science in Sport Management/MBA

• Coaching Minor
• Tourism and Recreation Minor

College of Business Transfer Credit Policy
For undergraduate programs, transfer credits for courses offered in disciplines which are part of the College of Business more than ten years from the time of application may not be transferable. All transfer credits will be reviewed by Directors of the Schools within the College of Business individually.

College of Business Academic Progression and Dismissal Policy

Course Repetition, Progression, and Academic Risk Status

• Academic Risk
  • A student who must retake one or more courses as detailed below will be placed on The College of Business Academic Risk List.
  • Once a student is notified they have been placed on this list they must meet with their advisor within five days to develop a plan to retake the course(s) and to discuss what resources are available to them and the consequences of earning further unsatisfactory grades.
  • Students who successfully remediate their course(s) will be removed from academic risk status.

• Course Repetition and Progressions
  • A student must retake any course for which an F grade was earned. Should an F grade be received in elective that course should be retaken if possible. Should it not be possible a different elective can be taken but the grade received would still be averaged with the failing grade.
  • Students must successfully complete the required core course (identified on the curriculum sheet with an asterisk) with a C or better.

Academic Dismissal
A student may be subject to academic dismissal from their respective School if they fail any of the required core courses twice. The Director of the School will make a decision regarding the Academic Dismissal after review of all the materials on the academic risk and/or course progression policy.
Students who are dismissed from their respective School in the College of Business for academic reasons may appeal in writing within 10 days of the receipt of the dismissal to Dean of The College of Business. The Decision of the Dean is final.

Comprehensive Exam
Students who complete all of the course requirements for an Associate degree in the College of Business will be required to complete a comprehensive examination prior to graduation. Upon petitioning to graduate, students who are completing only Associate degrees will receive a notice of how to take the comprehensive examination. Those students who are co-enrolled in a Bachelor degree or plan to continue to the Bachelor degree program in the next semester, will take the comprehensive examination at the end of their Bachelor degree program.

Programs in Accounting
Husson Accounting majors begin their study of accounting in their first year, and then progress through a series of advanced courses that provide in-depth exposure to all aspects of the profession. Faculty are experienced practitioners who combine practical knowledge with up-to-date theory in their teaching. Small class size ensures that students receive the attention they need to do their best. These unique aspects of the Husson Accounting Programs produce graduates who are well trained and ready to enter the profession.

Requirements for Accounting Majors
All Accounting majors must earn an overall 2.0 cumulative grade-point average as well as a 2.0 in their Ac prefix courses. In addition, transfer students must complete a minimum of 15 credit hours in Ac prefix courses at Husson.

AC Courses
AC 120. Introduction to Accounting. 3 Hours.
This course is for nonaccounting majors and introduces the student to accounting principles and concepts. Emphasis will be placed on completion of the accounting cycle, cash control, and payroll accounting.

AC 121. Principles of Accounting I. 3 Hours.
This introductory course covers fundamental principles and procedures of accounting. It is designed to meet the needs of business students as well as the accounting major. Emphasis is on developing the technical procedures of the accounting cycle including journalizing, posting, recording adjusting entries, understanding merchandising accounting, and preparing financial statements. Students are also introduced to cash control and financial statement analysis.

AC 122. Principles of Accounting II. 3 Hours.
A continuation of the study of basic accounting principles and procedures, the course includes receivables and payables, fixed assets, intangibles, natural resources, inventory methods, payroll accounting, and special journals and subsidiary ledgers. Students are also introduced to the partnership and corporate form of organization. Projects are incorporated into the assignments. Prerequisite(s): AC 121.

AC 201. Intermediate Accounting I. 3 Hours.
The first accounting course at the professional level for the accounting major, this course begins with a comprehensive review of basic accounting principles and financial statement preparation. The course provides an intensive study of the concepts of future and present value, current assets and current liabilities, the various methods of inventory accounting and costing, plant assets and intangible assets. Prerequisite(s): AC 122.

AC 202. Intermediate Accounting II. 3 Hours.
This course continues the in-depth study of accounting topics in financial accounting, including accounting for income taxes, long-term investments, and long-term liabilities. An intensive study is made of the statement of cash flows and accounting for all phases of corporations including formation, retained earnings, dividends, convertible securities, and earnings per share. Prerequisite(s): AC 201.

AC 211. Managerial Accounting. 3 Hours.
Managerial accounting involves the use of accounting information to make business decisions. Topics covered include cost concepts, cost-volume-profit relationships, capital budgeting, master budgets, cost variances and present value analysis, as well as financial statement analysis. Prerequisite(s): AC 121.

AC 251. Accounting Internship. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

AC 252. Accounting Internship II. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

AC 253. Accounting Internship III. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

AC 254. Accounting Internship IV. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.
AC 255. Accounting Internship V. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

AC 256. Accounting Internship VI. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

AC 301. Advanced Accounting I. 3 Hours.
Advanced Accounting I deals with advanced and specialized topics in financial accounting. An in-depth study is made of accounting for pensions and leases and of accounting for partnerships, including formation and operation, dissolution, and liquidation. The course also provides an introduction to such specialized topics as foreign operations, governmental and fund accounting, accounting changes, and error correction. Prerequisite(s): AC 202.

AC 302. Advanced Accounting II. 3 Hours.
Advanced Accounting II concentrates on an in-depth study of business combinations and the equity method of accounting for a subsidiary on the parent’s unaudited consolidated statements. Accounting for business combinations by the purchase method is covered and the preparation of consolidated statements is emphasized with a thorough treatment of eliminations of intercompany transactions. Currently developing advanced topics are also covered as time permits. Prerequisite(s): AC 202.

AC 331. Cost Accounting. 3 Hours.
Topics covered include basic cost control concepts, manufacturing statements, accounting for material inventory, factory overhead costs, job order costing, process costing, activity based costing, and process costing. Students are also introduced to cost estimation methods and cost-volume-profit analysis. With assigned projects, budgeting and variances are studied, along with decision-making models. Prerequisite(s): AC 122.

AC 352. Forensic and Investigative Accounting. 3 Hours.
This course covers important topics associated with modern forensic and investigative accounting. Topics include fraud auditing, litigation support, valuation, cybercrime, and other key forensic topics. The objectives include understanding the principles and practices used by public accountants, internal auditors, and others used to examine financial and related information. Prerequisite(s): AC 202.

AC 371. Accounting Information Systems. 3 Hours.
This course explores information systems that provide accounting and other information to make effective and efficient decisions. Emphasis is given to the interaction between the systems analyst, the financial accountant, the internal auditor, the external auditor, and other decision-makers. Overall data flow in systems is studied with an emphasis on flow and logic concepts and designing appropriate internal controls for these systems. Prerequisite(s): AC 122 and MI 111.

AC 441. Federal Taxation I. 3 Hours.
The student is introduced to the basic theory of taxation, particularly as it deals with the individual. Among the topics examined are the computation of gross income, gains and losses, sales and exchanges of property, and various business and personal deductions. Prerequisite(s): AC 122.

AC 442. Federal Taxation II. 3 Hours.
The taxation of corporations, partnerships, and estates and trusts is examined in-depth, along with other selected topics related to taxation of the business entity. Also covered are estate and gift transfer taxes with time devoted to family tax planning, international taxation, and the taxation of exempt organizations. Prerequisite(s): AC 122.

AC 461. Auditing Concepts and Methods. 3 Hours.
The responsibilities of the auditor are examined in-depth in respect to the client, the firm and the public. The course includes a study of ethics, auditing standards and development techniques of the audit program, and the auditor's report. An extensive case study is also required. Prerequisite(s): AC 202.

AC 471. Accounting for Nonprofit Organizations. 3 Hours.
This course consists of the study of fund accounting and the financial statements of state and local governments, hospitals, universities and other nonprofit entities. General financial principles and fund accounting principles are compared. Specific topics covered include budgets for operations, capital improvements, general funds, revenue funds, debt service funds, trust and agency funds, and proprietary funds. Prerequisite(s): AC 202.

AC 483. Financial Acctg & Reporting Adv Problems. 3 Hours.
This course covers current official pronouncements and procedures accepted by the AICPA and the FASB. Comprehensive in depth and inter-area problems are explored and solved; topics include accounting theory, pensions, leases, inventories, current assets and current liabilities, fixed assets, deferred taxes, stockholders' equity, foreign currency transactions and translations, investments, and partnerships. Prerequisite(s): AC 301 and AC 302 and AC 331 and AC 441 and AC 442 and College Level=Senior.

AC 484. Acctg & Reprtg & Consolidation Adv Problems. 3 Hours.
This course covers current official pronouncements and procedures accepted by the AICPA, the IRS, the FASB, the GASB and the Cost Accounting Standards Board. Comprehensive in depth and inter-area problems are explored and solved. Topics include: consolidations, cost accounting, accounting for governmental and nonprofit organizations, and individual and corporate taxes. Prerequisite(s): AC 301 and AC 302 and AC 331 and AC 441 and AC 442 and College Level=Senior.

AC 499. Accounting Seminar. 3 Hours.
The instructor and the student develop the subject matter of this course. The material covered consists of current issues and developments and must be relevant to the accounting field.

BA Courses

BA 101. Introduction to Business. 3 Hours.
This course introduces students to the general nature of functional areas in business such as marketing, management, accounting, finance, research and development, and risk management. The relationship between business, the government, the economy, and the environment is examined.
BA 111. Economic Geography. 3 Hours.
This course is an introduction to the principles of economic geography, ranging from physical and biological geography to cultural and political factors. The decision making processes, both local and global, for different types of service oriented, manufacturing, transportation, and resource based businesses will be examined. The relationship of natural resources, population, and culture, and how such factors affect economic activity will be emphasized.

BA 201. Business Law I. 3 Hours.
This course provides students with a basic knowledge of the law of contracts, personal property and real property.

BA 202. Business Law II. 3 Hours.
This course is intended to augment BA 201 with in depth analysis of the law in Contracts, UCC, Corporations, Principal Agency Law, Advanced Tort Law, Environmental Law, Real Property Law, Securities Law and Employment Law.

BA 204. Franchise Formation and Management. 3 Hours.
This class will discuss franchise formation and management with particular emphasis on the discovery and evaluation of the franchise and the feasibility of entrepreneurs converting an existing business into a franchise chain or creating and selling new franchises, domestic and international. Franchise accounting and finance (borrowing or leveraging) will be covered, as well as, taking the franchise to the stock market or going public (IPO) and raising investment capital. Prerequisite(s): BA 401.

BA 205. Real Estate Law. 3 Hours.
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

BA 210. Economics Overview for Non-Business Majors. 3 Hours.
This is an overview of microeconomic and macroeconomic concepts for non-business majors. It will include an introduction to American capitalism including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of competitive firms. It will also be an introduction to national income accounts, unemployment, inflation, government fiscal policy and monetary policy.

BA 211. Microeconomics. 3 Hours.
This is an introduction to American capitalism and microeconomic concepts including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of purely and impurely competitive firms.

BA 212. Macroeconomics. 3 Hours.
This is an introduction to macroeconomics in the American economy: national income accounts, unemployment, inflation, government fiscal policy, monetary policy and economic growth.

BA 220. Real Estate Principles and Practices. 3 Hours.
This course will provide students with methods of analyzing acquisition and retention of Real Estate. Also, there will be a focus on the skills and techniques required to operate a real estate business, including trust accounts, risk management, and property management.

BA 243. The Business of Innovation. 3 Hours.
This is a cross-disciplinary class that will introduce students to the Lean Startup Scientific Method for developing and commercializing ideas for new ventures or else innovating and developing new products or business models within existing companies. Topics include marketplace innovations, technology and science based innovations, marketplace hypothesis development and testing, frugal and agile engineering, business models, intellectual property, prototyping, exit strategies, and fundraising. Lab component is integrated within module deliverables.

BA 271. Risk Management. 3 Hours.
A study is made of the risks encountered by individuals and business firms. A presentation is made of the basic principles and institutions, which have been developed in risk management. This material is treated primarily from the consumer point of view.

BA 299. Topic/. 1 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 300. Business Presentations. 3 Hours.
Communication is a vital function of any business. Managers at all levels must be able to communicate effectively to advance their career and ensure the success of their organization. This course will give students a working knowledge of how to create, brief, and present information across the organizational communications spectrum. Students will learn how to think critically and apply problem solving skills across a variety of historical and contemporary business topics. Students will learn how to collect, analyze, synthesize, and present information in a professional manner to assorted audiences in different venues. The foundational skill set developed in this course is the ability for students to articulate their ideas in a professional manner within a variety of business settings. Prerequisite(s): EH 124.

BA 302. Business Ethics. 3 Hours.
This course is designed to raise a moral consciousness and sensitivity within the various disciplines of the business curriculum. The disciplines focused on here are business, accounting, marketing, multinational corporations, and those areas of human resource management inclusive of diversity in the workplace within the context of environmental and social responsibility.

BA 306. Franchise Law. 3 Hours.
This is a law class that analyzes all the issues of Franchise Law with a particular emphasis on Contracts, Principal/Agent Franchise Relations, Corporate Formation of Franchises, and Securities Law. Prerequisite(s): BA 201 and BA 202.

BA 310. Organization and Management. 3 Hours.
This course focuses on how to design organization systems and effectively manage them. Students completing the course should understand the universal process of management and key terminology in the language of management. Students are encouraged conceptually to blend contributions from the various schools of management thought into an integrated perspective of what managers do and why.

BA 311. Human Resource Management. 3 Hours.
This course addresses traditional personnel administration issues. Emphasis in the course is on how to manage the major human resource administration functions of job design, reward system design, staffing, training and performance control, to achieve maximum employee performance and satisfaction. Prerequisite(s): BA 310 or ( Major=BS Criminal Justice or Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Paralegal or Major=BS English - Prelaw).
BA 312. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics include leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 321. Marketing Principles. 3 Hours.
The course covers the language and issues of marketing with an emphasis on developing responsive marketing strategies that meet customer needs. The course focuses on marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing. Other topics will be incorporated into the course including the external environment (focus on integrative topics within marketing, such as economics, politics, government, and nature), marketing research, international/global marketing with relevance to cultural diversity, ethics, the impact of technology on marketing, and careers in marketing.

BA 334. International Economics. 3 Hours.
This applied economics course will emphasize the use of cases to study topics such as comparative advantage, treaties, tariffs, non-tariff trade barriers, and trade blocks among developed and developing nations. Prerequisite(s): BA 211 and BA 212.

BA 344. Personal Financial Planning. 3 Hours.
This course provides comprehensive coverage of personal financial planning in the areas of money management, axes, consumer credit, housing and other consumer decisions, legal protection, insurance, retirement planning, and estate planning. Prerequisite(s): MS 141 or MS 142 or MS 140 or MS 180 or MS 181.

BA 351. Internship. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 352. Internship II. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 353. Internship III. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 354. Internship IV. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 355. Internship V. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 356. Financial Management I. 3 Hours.
The foundation finance course covers basic personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management. Students are expected to become proficient in financial analysis of a corporation and in various aspects of corporate financial management. Prerequisite(s): AC 121 and (AC 122 or AC 211) and BA 211 and (MS 141 or MS 111 or MS 242 or MS 180 or MS 181).

BA 357. Supply Chain Management. 3 Hours.
This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategies to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.

BA 361. Managerial Economics. 3 Hours.
This course is designed to close the gap between economic theory and business application. It reviews traditional analysis and shows its application to the understanding and solution of economic problems of the firm and industry. Prerequisite(s): BA 211 and BA 212.

BA 411. Organizational Behavior. 3 Hours.
This course is highly experiential in its approach to helping students understand and appreciate why people behave the way they do in an organizational context. Students learn how to manage employee behavior by analysis of real world phenomena and by application of principles in the areas of human perception and communication, leadership and motivation, small group dynamics, organizational culture, and organizational change. Prerequisite(s): BA 310.

BA 413. Operations Management. 3 Hours.
Quantitative model building and manipulation are a means of analyzing and synthesizing the elements of productions management. Both deterministic and stochastic modeling are emphasized in the areas of work systems design, queuing, PERT, SQC, inventory control, forecasting, and linear and nonlinear programming. Prerequisite(s): BA 310 and MS 132.
BA 414. Business Strategy. 3 Hours.
This Business Administration senior seminar focuses on decision making at the executive management level, the formulation of strategy, and its implementation in the organization. The course will employ case studies, laboratory simulation techniques, and computer spreadsheet analysis. Prerequisite(s): College Level=Senior.

BA 421. Integrated Marketing Communication and Advertising. 3 Hours.
An introduction into the world of advertising: Students will plan and design Ad campaigns, write copy and design layouts for the different types/forms of advertising. The students will work with local companies and assist them in redesign of their ad campaigns. Prerequisite(s): BA 321.

BA 422. Sales and Sales Management. 3 Hours.
This course provides students with the fundamentals of good salesmanship and sales management. Prior to studying management principles students practice sales techniques in simulations. Cases are used to illustrate and evaluate principles of sales management. Prerequisite(s): BA 321.

BA 423. Retail Management. 3 Hours.
The purpose of this course is to provide students with an understanding of the fundamentals of successful retail operations. Topics included are the market concept in retailing, factors of area and market analysis, and aspects of organizational structure, layout, and personnel planning. Also covered are methods of pricing, merchandising planning, inventory, expense control and sales promotion techniques. Prerequisite(s): BA 321.

BA 424. Marketing Research. 3 Hours.
The basic research concepts and practices as applied to the analysis of marketing problems are examined. Topics include sources of data, collecting data, sampling, questionnaire construction, tabulating data, and report preparation; computerized statistical software is used. Prerequisite(s): BA 321 and MS 132.

BA 425. Marketing Management. 3 Hours.
This is the capstone course for marketing majors. Students apply concepts learned in other courses to marketing problems of business and nonprofit organizations. Cases and business simulations are used to teach decision-making in the complex environment of business. A complete marketing plan for a simulated company of the student’s choice summarizes the student’s knowledge of the field. Prerequisite(s): BA 321.

BA 426. Real Estate, Market, Research and Analysis. 3 Hours.
This course will discuss market research, real estate sales, property valuations and analysis. Students will examine market research reports to gain insight into product and market trends, opportunities, projections, and growth in the Maine, the US and global real estate markets. Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 427. Franchise Market Research and Analysis. 3 Hours.
This class will focus on analysis of market demographics, feasibility studies, product pricing, promotion and distribution, franchise broker contacts, extrapolation of sales and expenses, and the projection of costs and net profits, emerging markets and capital expansion. Prerequisite(s): BA 401 and MS 132 and MS 232 and BA 362.

BA 428. Strategic Selling. 3 Hours.
This course builds on the fundamentals of selling. The student will understand how to advance sales in light of complex business environments consisting of layers of buyers, decision makers and those who influence purchasing decisions. A strategic account planning process will be analyzed and applied to real companies by way of case studies. The art and skill of negotiating will be studied and learned through role play. Prerequisite(s): BA 422.

BA 434. International Finance. 3 Hours.
The factors affecting exchange rates are discussed, as well as different types of exchange rate systems and how governments attempt to influence exchange rates. The relationships among interest rate parity, purchasing power parity, the Fisher effect and International Fisher effect and exchange rates are analyzed. Students learn how currency futures, currency options and money market hedges are used to hedge exchange rate risk. Prerequisite(s): BA 362.

BA 437. International Marketing. 3 Hours.
The basics of international marketing will be taught including the foundations of culture, cultural understanding, business customs and practices in global marketing, assessing global markets, and developing international marketing strategy. Prerequisite(s): BA 321.

BA 438. Export-Import Procedures. 3 Hours.
The basics of export-import procedures will be taught including justification for exporting/importing, market planning methods, selection of appropriate marketing mix variables, and regulation. Prerequisite(s): BA 321.

BA 439. International Franchising Management. 3 Hours.
This course will focus on international expansion of franchises, learning the culture, monetary exchanges, imports and exports, local international market analysis and much more. Prerequisite(s): BA 204 and BA 306 and BA 427.

BA 440. Small Business Management I. 3 Hours.
This course supplies prospective and current small business managers with the essential concepts of starting and operating small businesses. Topics covered include: environment and management of small business enterprise, problems in starting small businesses, financial and administrative control, and management of business operations. Particular emphasis is placed on the interrelated nature of the components, particularly as they affect the financial picture of the firm. Through a lecture and discussion format, students are expected to share their own experiences in small businesses with their fellow students. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 441. Entrepreneurship I: New Venture Development. 3 Hours.
Students will be introduced to the practical application of classic and contemporary business theory as it applies to the early stages of entrepreneurship and intrapreneurship, opportunity recognition, innovation, and new venture development. Course topics include types of entrepreneurs, opportunity recognition, marketing, cash and other resource requirements, financial statements, planning, franchising, intellectual property, success/failure/resilience, and growth. Class will use text, cases, articles, internet sources, and guest lecturers. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 442. Applied Small Business Management. 3 Hours.
This is an advanced course which focuses on real problems in Small Business Management, using the case approach. Cases are drawn from the text, from actual local small businesses, and from the practical experience of students in the class. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 443. Entrepreneurship II: Business Plans. 3 Hours.
This class builds on BA 441, New Venture Development. The focus of this class is on the early stages of formalizing and growing a venture. Topics include business plan writing, fund raising and cash flow, measuring and conveying financial position, core strategy development and competitive advantage, sustainability, international entrepreneurship, supply chain, growth, and exit. Prerequisite(s): College Level=Junior or College Level=Senior.
BA 460. Investments. 3 Hours.
Beginning with an introduction to financial markets and investment instruments, topics include stock and bond quotations and trading procedures, rate of return, margin trading, stock indexes, stock and bond valuation, risk and return, portfolio theory, active and passive portfolio management, and investment performance evaluation. Prerequisite(s): BA 362.

BA 464. Bank & Financial Services Management. 3 Hours.
This course will introduce students to the specific issues in the financial management of a banking firm and, to a smaller degree, of other financial intermediaries. Emphasis will be on products, roles, regulatory framework, and risk management. Prerequisite(s): BA 362.

BA 465. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 471. Life and Health Insurance. 3 Hours.
This course is intended to provide background knowledge for personal application and for those responsible for administering benefit plans for employees; it provides the necessary information required to pass the State of Maine license examination. Prerequisite(s): BA 271.

BA 472. Casualty and Property Insurance. 3 Hours.
The first part of the course introduces the basics of the entire insurance business, including a summary of legal aspects, types of insurers and principles of reinsurance; next, each type of insurance is studied in detail. Topics covered are fire, consequential loss, inland marine, ocean marine, theft and surety, liability and miscellaneous property insurance. Prerequisite(s): BA 271.

BA 473. Real Estate Appraisal. 3 Hours.
This course familiarizes the student with the foundation and principles of the appraisal process. The student will become familiar with the three approaches to value. Site valuation, construction costs, depreciation; comparables selection and adjustments; rental multipliers; and reconciliation will be discussed. The student will focus on the elements making up the standards for professional appraisal practice. These elements, i.e., Definitions, Rules, Standards and Standard Rules, Statements and advisory opinions are discussed in detail along with the philosophy and history of USPAP. Prerequisite(s): BA 401 and MS 132 and BA 362.

BA 475. E-Business and E-Commerce for Managers. 3 Hours.
This course teaches the basic e-business and e-commerce theory. The students will apply the theory through the development of a website for the prime purpose of marketing a product or service or idea online.

BA 490. International Business. 3 Hours.
This course covers the international dimensions of managerial decision-making including: world economies, international trade theories, tariffs, quotas and other trade issues, global strategic planning, cross-cultural management, international market entry, international human resource management, international organization strategy, international logistics, import/export operations, currency exchange, international financial management. Current developments in global economic and business are emphasized; students participate in a computerized simulation throughout the semester. Prerequisite(s): BA 310 and BA 321.

BA 495. Senior Management Project. 3 Hours.
An experiential course that gives seniors the opportunity to apply what they have learned in class to a real business situation. Prerequisite(s): College Level=Senior.

BA 496. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 497. Business and Culture Travel Study Course. 3 Hours.
Business and Culture Travel Study course is designed to expose students to economies across the world. During the course students will travel to important commercial, cultural and governmental cities. Through a combination of readings students will be exposed to 20th and 21st century history, economics, culture political and business philosophy. The course will also involve visits to major multinational corporations, cultural activities and lectures from University business faculty when available. The course will also have two pre-trip class sessions with readings and one post course session to wrap up the experience and discuss the student travel logs.

BA 498. Business Seminar. 3 Hours.
This honors course requires the study of various business problems under the supervision of members of the Department of Business Administration. A paper is required. An oral examination is scheduled as the final examination in the course. Prerequisite(s): College Level=Senior.

BA 499. Topic/ 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 600. Research Methods in Business and Education. 3 Hours.
This course is designed for beginning graduate students who have little or no formal preparation in those areas of research and problem-solving essential for a comprehensive study of business and education at the graduate level. Emphasis is placed on the identification of common problem types and the selection and use of appropriate methods of analysis (primarily statistical in nature).

BA 601. Managerial Economics. 3 Hours.
This course begins with a comprehensive overview of micro- and macroeconomic concepts with the aim of developing within students a picture of how business and nonprofit organizations relate to the economy as a whole. The course then focuses on practical applications of economic analysis to problems of concern to managers. Case studies and projects are used to demonstrate the methods used to determine economic feasibility and cost-effectiveness of products, services, and programs.

BA 602. Managerial Accounting. 3 Hours.
This is an accelerated accounting course for those with little or no formal accounting background. The emphasis is on concepts which managers need to know in order to be effective. Topics include the preparation and interpretation of financial statements, cost planning and control, cost-volume-profit analysis, decision-making models, master budgeting and variances, and evaluation of capital projects.
BA 605. Management Communications. 3 Hours.
This is an advanced communications course that builds upon a student's experience and prior undergraduate coursework in writing and oral communications. Topics include: advanced business writing, use of visual materials, selection of secondary sources of information, report preparation, and presentations to small and large groups.

BA 611. Organizational Behavior. 3 Hours.
This course surveys the major field of management, examining structures and processes on both group and organizational levels. Both traditional and contemporary theories are analyzed and applied to business operations.

BA 620. Financial Management. 3 Hours.
Topics considered include financial planning, operating and capital budgets, cash flow, purchasing and accounting procedures, the sources and uses of corporate and institutional funds, and financial analysis for evaluation and control. Students develop projects specifically related to their needs in educational administration, small business, or corporate management. Prerequisite(s): BA 602 or AC 301.

BA 621. Marketing Management. 3 Hours.
This course focuses on complex problems facing decision-makers in the marketing of goods and services. Emphasis is placed on the decision-making process, including assessment of the social, economic, and political environment in which the organization operates; problem definition; development and evaluation of alternatives, and the implementation of the best alternative. Cases in advertising, sales, marketing research, and strategic marketing management provide practice in marketing analysis and decision-making.

BA 622. Production Management. 3 Hours.
Emphasis is placed on the use of quantitative techniques for solving manufacturing problems. The student is given an opportunity to practice mathematical model-building and manipulation. Other topics considered include queuing system design, plant layout, statistical quality control, inventory modeling, Program Evaluation and Review Technique (PERT), linear and nonlinear programming, and control theory.

BA 625. Global Strategic Management. 3 Hours.
This course focuses on the strategic challenges and opportunities confronting firms that undertake to create value and to compete in the global economy. Successful companies develop strategies for doing business in emerging markets that are different from those they use at home and often find novel ways of implementing them too. The class will make extensive use of case analysis and discussion to evaluate and understand the strategic issues that confront firms operating internationally, as well as to appreciate the importance of values and ethics in organization decision and actions. In this course we will probe the workings of business strategies in transition and emerging economies, gain an understanding of the strategies of local firms, and analyze the international success and failure of companies. Prerequisite(s): BA 600 and 15 Credits From Range [BA 600 To BA 799].

BA 626. Accounting in Planning, Budgeting and Control. 3 Hours.
This course examines the role of accounting in the planning, budgeting, and control process of a business in a dynamic environment. The integration of measuring and analyzing (planning), short-term decisions and managing organizations (control), and preparing various budgets (budgeting) are emphasized. This course is designed as a continuation of BA602 Managerial Accounting. Numerical problems, as well as case studies, are utilized as methods of study. Prerequisite(s): BA 602 or AC 211.

BA 627. Investment Analysis. 3 Hours.
This course provides a detailed description of securities market organization and approaches to investment opportunities. Students will examine theories used in the valuation of financial securities and employ projects and applications to develop a real world understanding of portfolio management. Prerequisite(s): BA 602.

BA 628. New Venture Planning and Management. 3 Hours.
This course deals with the foundation of new ventures and related aspects of managing the small growing enterprise. Techniques taught in this course are equally applicable to small businesses, nonprofit organizations, and new ventures of larger organizations. Topics include: use of scarce resources, such as money, talent and technological expertise; identification of environmental threats and opportunities; and operational considerations such as organizational structure, legal requirements, financing, and accounting procedures.

BA 641. Human Resource Management. 3 Hours.
This course explores human resource management as an integrated process of planning and control designed to achieve high employee productivity and job satisfaction. The course focuses on the essential functions of human resource management as they apply both to the general supervisory responsibilities of every manager and to the specific operations of the personnel department.

BA 642. Leadership in Business and Professions. 3 Hours.
This course is designed to provide graduate management students with a comprehensive review of the essentials for effective leadership. It focuses on the identification of basic leadership styles, explores the theoretical and practical findings of research in leadership development, and seeks to synthesize the student’s leadership style with the most effective working models of leadership.

BA 643. Strategic Change Management. 3 Hours.
Strategic Change Management focuses on the skills required to deal effectively with organizational change. The course addresses first the pressures in the business environment that make change a fundamental reality for managers. Particular attention is paid to change arising from public policy initiatives that impinge on business. The course then examines the manager as change agent responsible for initiating innovation and explores both the personal skills required in the role of change agent and the tools and techniques available to support the manager in that role. The course also examines the problems and opportunities of those who are the recipients of change in an organization and the skills required to cope effectively with that situation.

BA 644. The Legal Environment of Business. 3 Hours.
This course will provide an overview of the important aspects of business law for executives, managers, accountants, and other professionals. The areas of law covered include but are not limited to administrative, contract, corporate and other business organizations, employment relations, real estate, taxes, and UCC sales.

BA 646. Current Issues in Business. 3 Hours.
This course, conducted in seminar fashion, draws on current literature to analyze contemporary and emerging issues facing management in the late twentieth century. Content will vary.
BA 700. Health Care Management. 3 Hours.
This course examines management problems and policy-making in the health care industry. Several areas are considered including: (1) the functions of the health care manager, (2) the types of health care delivery systems, (3) the administration of hospitals, (4) the financing of medical care, and (5) the role of government. Through readings, lectures, discussions, and projects, students clarify their own role in the delivery of health services. The course regularly draws on experts in health planning and health care administration.

BA 701. Legal Environment of Health Care Management. 3 Hours.
The course provides a foundation in the legal and regulatory framework in which health care institutions operate. Students will also examine the legal issues confronting health care managers including director and administrative liability, malpractice, negligence, patient rights and confidentiality, licensure requirements, and the like.

BA 702. Health Care Economics. 3 Hours.
In this course, the principles and tools of economic decision-making are applied to management in the health care sector. The course explores the application to health care management functions of such concepts and processes as supply and demand, resource allocation and utilization, costing and pricing, resource productivity, forecasting and economic aspects of planning, and utilization review. While the principal emphasis in the course is on micro-economic analysis, some consideration is also given to an economic analysis of public policy alternatives for the delivery of health care service. Prerequisite(s): BA 601.

BA 703. Financial Management in Healthcare Organizations. 3 Hours.
This course applies the perspectives and tools of financial analysis to the management of health care organizations and evaluation of organizational performance. Topics covered include capital budgeting, sources of operating revenue, management of cash and inventories, risk analysis and forecasting. Particular attention is paid to cost containment regulatory strategies and their implications for financial planning and management. Prerequisite(s): BA 602.

BA 704. Managing Quality in Healthcare. 3 Hours.
This course examines methods and tools for managing quality in health facilities, physician practices, managed care, and public health. Topics include developments in quality assurance and improvement, utilization review, risk management, and patient satisfaction.

BA 705. Global Perspectives in Healthcare. 3 Hours.
This course examines the social, political, and economic aspects of global healthcare issues. Through a comparative analysis of the health systems of multiple nations, students will compare theories of health policy and priorities, healthcare system facilities, workforce, technology, cost, quality, and access. The emphasis of the course will be on health management strategies used in different countries and healthcare systems to mobilize, allocate, and maintain resources to improve the healthcare status and delivery systems.

BA 710. Law & Ethics for Non-Profit Organizations. 3 Hours.
Non-profit managers and supervisors are held to a higher standard of ethical behavior due to the nature of their funding sources and their mission. This course is designed to develop in the student a basic understanding of the laws governing non-profit organizations, the practical applications of these laws and the ethics that are demanded of non-profit managers.

BA 711. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics covered include: leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 712. Strategic Marketing for Nonprofit Organizations. 3 Hours.
This course applies the concepts of marketing and strategy to the management of non-profit organizations. Through class lectures, discussion, case studies, and applied projects, students will build an understanding of the marketing process in the non-profit environment in order to be able to design, implement, and evaluate an organization’s approach to marketing and strategic positioning.

BA 713. Fundraising. 3 Hours.
This course takes a systems approach to the process of fund-raising. Topics covered include: donor cultivation, use of the annual fund, major gifts, corporate giving, and grant writing.

BA 720. Advanced Sales and Marketing in Hospitality. 3 Hours.
This course focuses on difficult problems and issues facing sales and marketing personnel in the hospitality industry. Students will make use of case studies in order to develop their decision-making process including the use of marketing research and analysis.

BA 721. Convention Planning and Events Planning. 3 Hours.
This course focuses on the rapidly growing convention sales and events planning industries. The student will learn how to design, plan, market and manage meetings and events.

BA 722. Advanced Front Office Operations. 3 Hours.
This course begins with detailed introduction about numerous aspects of front office operations and management. The next section of the course examines the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.

BA 723. Legal Issues in Hospitality Management. 3 Hours.
This course will provide the student an overview of the important aspects of Hospitality Law for Managers, and other professionals. Some of the areas of study include and are not limited to Torts, Products Liability, Constitutional Law and Criminal Law and many other subjects.

BA 724. Managing Service. 3 Hours.
This course begins with an introduction to the framework for providing quality service to customers and guests. Next we will discuss the needs of the customer/guest and proceed to develop our menu and/or product accordingly. Finally, we will learn how management and staff create loyal customers and guests by delivering service that exceeds their expectations.

BA 729. Hospitality Graduate Directed Practicum. 3 Hours.
Each student will find, will choose or will be provided with an internship site. The site chosen will be based on; and interview conducted by the management of the internship site and the student’s preference of location based on those available. The Coordinator of Hospitality Management will have the final decision on all internship site placements. The Coordinator’s decision will be based on his or her interaction with the student during previous course work, his or her understanding of the student and the internship properties requirements. Every consideration will be given to the student’s personal preferences with regard to location and types of property. However, the student’s preferences will not be the only consideration for placement. Prerequisite(s): BA 720 and BA 722 and BA 724.
BA 731. Business and Information Technology. 3 Hours.
This graduate course approaches Information Technology from the perspective of information consumers as opposed to technology implementers. During this course, students will examine various technologies and their application within modern organizations. The course has two primary goals. (1) The course will explain information technologies in non-technical terms so that students can evaluate a technology’s effectiveness relative to any existing alternatives and the overall organizational needs. (2) This course should increase student awareness regarding how they interact with technology in a personal or business setting. Business leaders are constantly bombarded with technology. This course addresses the need to sift through that information in an intelligent manner and make smart business decisions.

BA 741. Staffing & Selection. 3 Hours.
A source of competitive advantage for any organization is its talent. The effectiveness of an organization depends on the performance of each individual in that organization. Hence, one of the most important human resource functions is that of staffing the organization. This course is essential for HR professionals who are responsible for recruiting, screening, hiring, promoting, and outplacing employees. It is also very crucial for any line managers, supervisors, team leaders, and hiring managers who are involved in recruiting, making promotions, succession, or any other workforce decisions. An examination of the scientific, legal, and administrative issues associated with the recruitment, selection, employment and retention of individuals by organizations augments the study. Specific attention will be given to the current challenges of an increasingly dynamic workplace and diverse workforce.

BA 742. Training & Development. 3 Hours.
The effective training and development of human resources creates tremendous and unique value for an organization. This course examines how organizations can develop and manage the talents and skillset of human capital. The course explores topics such as training needs analysis, formulating training objectives, and the design, implementation, and evaluation of training and development programs.

BA 745. Innovative Global Strategy. 3 Hours.
This course will build students’ awareness of the challenges that must be addressed and the opportunities that may be present when competing in the global marketplace. The course focuses on how firms apply innovative strategies to create a sustainable competitive advantage in the global arena. Course content will be drawn from readings, case analysis, online content and discussions. The course requires students to analyze and understand real world examples of both successful and unsuccessful global strategy implementation.

BA 750. Fundamentals of Risk Management. 3 Hours.
This course explores the fundamentals of risk management. After discussion of the importance of risk and the rationale for its management in organizations, the remainder of the course will analyze the process of and methods for managing risk.

BA 751. Employee Benefits. 3 Hours.
This course explores the nature and operation of employer-sponsored benefit plans. Emphasis is placed on plan design, administration, funding, and regulation. The course also addresses organizational characteristics, benefit structure, and pricing of risk transfer schemes for groups.

BA 752. Crisis Management. 3 Hours.
Crisis Management can be defined as a communications response to an event that has a negative impact on an audience - the public, customers/clients, employees, shareholders, etc. Examples of such events could include tainted food, a corporate leak, a political scandal, an entertainment or athletic scandal, damaged products that cause or could potentially cause life-threatening situations, natural disasters, terrorism, and financial disasters. In this course, students will analyze and critique high-profile cases and learn how to effectively respond to crises.

BA 753. Corporate Risk Management. 3 Hours.
Corporate risk is analyzed through the lens of enterprise risk management. This course explores the operational and financial risks faced by firms and the study of various methods of handling these risks.

BA 754. Strategic Selling. 3 Hours.
The focus of this course is on key, strategic customer selling approaches. The process of sales planning and strategy development for these types of customers will be emphasized. The objective of this course is to understand and execute sales strategies for managing major and large customers.

BA 760. Technology & Innovation. 3 Hours.
BA 760 Technology & Innovation offers a research approach to identifying, analyzes, and creating technological advantage in nascent and mature industries. Students will apply the methodologies of innovation and discovery to business settings and markets, seeking to create competitive advantage and achieve market transformation through strategic initiatives that redefine consumer expectations and industry practices and reframe organizations to embrace innovative practices and processes.

BA 761. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 762. Groupthink. 3 Hours.
This course explores the origin of groupthink. Groupthink is a term first used by social psychologist Irving L. Janis (1972) that refers to a psychological phenomenon in which people strive for consensus within a group. This course explores groupthink as a phenomenon where people set aside their own personal beliefs or adopt the opinion of the rest of the group.

BA 763. Biotechnology & Innovation: Intellectual Property. 3 Hours.
This course focuses on the protection of proprietary and intellectual rights in inventions, writings, creative works, software, industry trade secrets, industry trade designations, and other intellectual assets at the international, Federal, and State Levels. The course will give special consideration to the emergence of new areas of patent law in Biotechnology and Pharmaceutical fields, examining not only the patentability of intellectual assets, but also the discovery process, particularly in collaborative environments involving multiple organizations and institutions, and the qualifying distinctions between collaborative and competitive research.
BA 790. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.*

BA 791. Professional Project. 3-6 Hours.
This course is used to award graduate credit for prior learning and educational experience obtained outside of the traditional classroom. Through the preparation of a professional project, students provide formal documentation of the specific graduate-level learning competencies which they have acquired through prior experience. A maximum of six (6) credit hours may be earned.

BA 792. Graduate Internship I. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 793. Graduate Internship II. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization’s supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 792.

BA 794. Graduate Internship III. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.

BA 796. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 798. Thesis. 6 Hours.
The thesis may be library-oriented research with extensive reliance on documents and a relatively limited amount of primary field research, or it may be action-oriented field research with relevant documentation from the literature. The title of the thesis topic must be filed with the graduate committee. A student, with the approval of his/her advisory committee, may register for the thesis after completion of twenty-four (24) semester hours.

BA 799. Topic. 3 Hours.
Students work together in a seminar setting under the direction of a member of the graduate faculty. The content of the seminar will vary according to the interests of students and faculty involved.

CJ Courses

CJ 101. Intro to Justice & Pub Safety. 3 Hours.
This course introduces students to the social reality of crime, criminal behavior, and law as each of these relates to the criminal justice system. Students examine the role of law enforcement, prosecution, defense, court system, corrections, and juvenile justice at various levels. Students are challenged to expand both their knowledge and appreciation of the criminal justice system through arranged visits to courts, detention facilities and working law enforcement agencies.

CJ 190. The Science of Fingerprints. 3 Hours.
This course will allow students to examine every facet of the discipline, from the history of friction ridge identification and its earliest pioneers and researchers, skin growth in the embryo, structure of skin, scarring and histology, the chemistry of sweat and other secretions, to the scientific basis and the various steps of the identification process.

CJ 215. Police Operations. 3 Hours.
This course deals with everyday problems, situations and operations of the police department and the police officer. Included in the course is the study of many jobs and applications of duty in the police service. The course is a study of the patrol officer’s function, with a background investigation of the total organization. The use of staff deployment, tactical operations, and the use of various equipment are discussed in some detail during the course with an emphasis on how operations and equipment are changing. Prerequisite(s): CJ 101.

CJ 221. Criminalistics. 3 Hours.
This course will focus on the recovery, documentation and laboratory analysis of physical evidence found at the scene of a crime. The course covers the principles of effective crime scene management as well as what information can be obtained from particular pieces of physical evidence as a result of laboratory study. The laboratory analysis of the following will be covered: glass, soil, organic and inorganic substances, hairs, fibers, paint, drugs, poison, arson and explosive evidence, serology, DNA, fingerprints, firearms, tool impressions, miscellaneous impressions, photography, document and voice examinations. Prerequisite(s): CJ 101.

CJ 225. Criminal Procedure. 3 Hours.
This course is designed to teach the background and current information regarding arrest, search and seizure. It explores the development of standards in this field, through constitutional law, state law, concepts and interpretation, limitations of police powers, probable cause, and the suppression hearing.
CJ 235. Criminology. 3 Hours.
This course is intended to introduce and review the sociological perspective as it is applied to the themes of crime, criminality and the individual offender. Specifically, criminological theories of social process, social structure and social conflict will be explored in conjunction with views on developmental and trait-based perspectives to illuminate the social underpinnings of crime in modern society. Each particular viewpoint will be applied to the understanding of broad categories of criminal behavior and activity, including but not limited to: violent crime, property crime, public order crimes, organized crime, and white collar offenses. Additionally, the criminal justice system and its component structural and procedural parts will be reviewed to provide the student with an enhanced awareness of the social aspects of criminal behavior and its impact for law-making and enforcement. Prerequisite(s): CY 111 and (SY 201 or SY 222).

CJ 290. Psychology and the Legal System. 3 Hours.
Students will explore the movement of criminal defendants through the legal system in light of various clinical necessities, including but not limited to: Competencies to offer testimony, as well as to be sentenced and excused; jury selection; and the identification and evaluation of criminal suspects. Additionally, emphasis will be placed upon the psychology of victimization. Prerequisite(s): CY 101 and CJ 225 and CY 111.

CJ 301. Critical Skills. 3 Hours.
This course is intended to introduce and review the basic law enforcement skills of self defense and control. Specifically, students will learn and practice the important elements of establishing control of situations using verbal, nonverbal and physical techniques as complementary intervention options. Strategies to manage the initial encounter will be discussed in regard to proper stance, appropriate social distance, authoritative body language and the use of verbal diffusion. The physical element of encounters will be reviewed and practiced to provide the student with a practical knowledge of techniques including, but not limited to: deflection, strikes and counters, takedowns, and ground control of a combative individual. The above skills will be expanded upon to provide the necessary understanding of other control systems such as proper use of handcuffs, baton, and chemical products to establish control. The focus on practical skills will be reviewed within the context of the use of force continuum ranging from verbal redirection to deadly force. Prerequisite(s): CY 101 and CY 215.

CJ 302. Advanced Critical Skills. 3 Hours.
This course is intended as a continuation of the psychological and physical applications of critical skills (police physical restraint and control). Through a series of steps, the student will reinforce the basics, enhance the flow of technique and finally though situational training strengthen and secure psychological and physical technique to specific calls and events. The focus on practical skills will be reviewed within the context of the use of force continuum ranging from verbal redirection to deadly force. Prerequisite(s): CJ 301.

CJ 305. Motor Vehicle Law. 3 Hours.
This course is intended to introduce and review motor vehicle law as relates to the enforcement of those statutes concerned with moving violations. The student will also be introduced to the principles and procedures of identification and investigation of motor vehicle infractions. Specifically, topics will be presented ranging from vehicle stops and pursuit driving to operating under the influence and traffic-related fatalities, including homicide. Students will gain an in-depth understanding of accident and hit-and-run investigation, as well as an overview of providing testimony in the courtroom. Each aspect of enforcement and investigation will thereby contribute to an appreciation of the complexities of police responsibilities regarding the monitoring and control of traffic movement. Prerequisite(s): PL 200.

CJ 307. Community Policing. 3 Hours.
This course is intended to introduce and review the basic principles of community policing strategies in contemporary society. The importance of enhanced law enforcement-community relationships will be discussed in relation to the benefits to the citizenry as well as enhanced relations with community stakeholders such as schools, businesses and religious institutions. Specifically, the student will be expected to gain an appreciation of the police officer as a community member who works collaboratively with private citizens to analyze, evaluate and respond to crime. This focus on cooperative problem-solving will be further explored in regard to how strategic partnerships between law enforcement and the community can positively impact criminal acts, fear of crime and social disorder. Prerequisite(s): CJ 215.

CJ 309. Constitutional Law. 3 Hours.
This course will explore the First, Second, Fourth, Fifth, Sixth, Eighth and Fourteenth Amendments of the Constitution through reading of case law and real life examples. Students will understand the arguments that exist for persons involved in civil and criminal matters from the Constitution. Prerequisite(s): CY 225.

CJ 310. Mod Penology and Corrections. 3 Hours.
This course offers an in-depth familiarity with the key readings in the history and sociology of incarceration. Topics include: theories of incarceration, sentence determination, with emphasis on the controversy over the federal guidelines, history of our incarceration system, inmate and staff perspectives on incarceration, special category inmates such as mentally ill, rape victims, death row inmates, and juvenile offenders, the death penalty, and the community supervision movement. The course concludes with an examination of the new technologies of incarceration. Prerequisite(s): CY 101.

CJ 315. Juvenile Justice. 3 Hours.
This course covers the institutional response to the problems of juvenile delinquency, juvenile misconduct and dependent/neglected and abused children. It emphasizes the police, court, and correctional agencies that process young people. In addition, it devotes attention to an understanding of the history of the system, recent legal developments, and an assessment of current proposals for reform. Prerequisite(s): CY 101.

CJ 330. Ethics in Criminal Justice. 3 Hours.
This course will offer the student an examination of ethical systems as they relate to moral beliefs and professional behavior in law enforcement. Students will discuss how ideology and belief systems, whether liberal, moderate, or conservative affects criminal justice policy making and the day-to-day functioning of criminal justice agencies. As an exercise, students will apply ethical decision-making models to real world scenarios. Additionally, the course will include thirteen objectives that the student will be expected to master extending from a code of ethics for police to major rationales for punishment. Prerequisite(s): CY 101.
CJ 333. Computer Forensics. 3 Hours.
This course will focus on the investigative use of computer technologies and electronic records. Students will be exposed to “digital evidence” and the valuable information it can provide to investigators. The course will have a two-tier approach. (1) Students will be shown how to extract readily decipherable information from someone’s computer such as looking for at their files or their browser history of web sites visited. Even if the information is password protected or has been deleted it might still be recoverable. (2) The course will examine criminals who use computers and the Internet to commit various crimes ranging from trying to lure children into chat rooms or face-to-face meetings to every sort of financial fraud. This course is intended to address a growing need in law enforcement. Prerequisite(s): Major=BS Comp Info Systems or Major=BS Criminal Justice.

CJ 335. Report Writing and Testifying. 3 Hours.
This course is designed to teach students how to write police reports, search warrants and affidavits. Topics studied will include: the SEE method; legal concepts of reasonable articulable suspicion; probable cause to arrest; determination of custody for purposes of Miranda; and testifying effectively in court. Prerequisite(s): CJ 101 and CJ 225 and PL 200.

CJ 337. Interviewing and Interrogation. 3 Hours.
This course will focus on interviewing skills and techniques, both from a practical and legal perspective. Primary attention will be given to what needs to be done to satisfy the legal standards of voluntariness of admissions and confessions. Fifth and Sixth Amendment law will be thoroughly reviewed and discussed. The course will prepare students to conduct effective interrogations, and document the interrogation in a manner that will withstand later legal challenges. Prerequisite(s): CJ 101 and CJ 225 and PL 200.

CJ 341. Investigations. 3 Hours.
This course covers both private and public investigations as well as the practice and application to criminal investigations. It stresses the professionalism and modern investigation tools as it covers established investigation policies, procedures, and techniques for the law enforcement officer. Recent court cases and investigations are thoroughly reviewed and discussed. The course will provide students to conduct effective interrogations, and document the interrogation in a manner that will withstand later legal challenges. Prerequisite(s): CJ 101 and CJ 225 and PL 200.

CJ 345. Comparative Criminal Justice. 3 Hours.
This course is intended to introduce and review the basic theoretical, cultural and practical applications of criminal justice systems in other parts of the world. American criminal law and procedure will be discussed to provide a comparative reference point for the variations in systems and practices across differing cultures in other nations. Additionally, the course will provide students with an understanding of the roles of social control mechanisms such as police, judiciary and correctional institutions outside of the U.S. Prerequisite(s): CJ 101.

CJ 399. Topic/. 1-6 Hour.
This course is intended to provide the opportunity to offer advanced courses in criminal justice that would not normally be a part of the Husson curriculum. As such the topics will depend of the interests of students and faculty.

CJ 400. Evidence. 3 Hours.
This course will present the basic principles of the law of evidence as expressed in the Federal Rules of Evidence and the Maine Rules of Evidence. The student will develop the ability to read and apply a rule of evidence to specific information and circumstances. An emphasis will be placed on learning how the Federal & Maine Rules of Evidence affect trial preparation, negotiation, and trial. Participatory role play and discussion of hypothetical situations will constitute a significant part of the learning experience. Prerequisite(s): Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Criminal Justice or Major=BS Paralegal or Major=BS English - Prelaw.

CJ 401. Civil Liability in Law Enforcement. 3 Hours.
This course will provide students with a historical overview and current trends in civil litigation against law enforcement as well as describing the varying types of liability that exist under the law. Students will study the defenses to liability claims made against law enforcement. Liability claims will also be examined from the administrator’s point of view including claims of failure to train and failure to supervise. Use of force and section 1983 claims will be examined in detail as the main claims against law enforcement. Prerequisite(s): CJ 101.

CJ 402. Perspectives in Terrorism. 3 Hours.
This course will analyze aspects of historical and current extremism and terrorism which will be related to contemporary domestic and international terrorism issues. The course will cover sophisticated theories developed by analysts around the world to investigate paramilitarism, white supremacy groups, hate groups, religious fundamentalism, and foreign terrorist groups which may pose a threat to United States interests. The special topic analyzed is not a regular course offering of the social sciences department. Since the topic covered in this class differs from year to year, students should seek further information from the instructor before registering regarding the particular topic that will be analyzed. Possible topics to be analyzed include: the ancient roots of terrorism, motivation of terrorists, the current vulnerability of modern democracies, and global jihad.

CJ 403. Domestic Violence Law. 3 Hours.
This course introduces domestic violence law from an interdisciplinary perspective and offers a contemporary view of the criminal justice experience with diverse populations and forms of violence. Topics will include violence perpetrated in a variety of age and gender relationships including: dating violence, sibling abuse, rape and incest, child and elder abuse and neglect, male battering, violence within the lesbian and gay communities, and violence against women. Students will also be expected to master current State of Maine and federal statutes relating to domestic violence. Prerequisite(s): PL 100 or CJ 101.

CJ 404. Cults. 3 Hours.
This course is intended to introduce and explore the structure and psychology of totalistic cultic organizations. Students will examine the key differences between conventional religious movements, splinter sects and cults to better understand the differences among varied faith-based organizations. Cults will be viewed both from historical and contemporary viewpoints in regard to recruiting practices, thought reform and control, personal and social consequences of cult membership, and the unique challenges that such groups pose for law enforcement. Additionally, students will review the clinical precursors which may predispose an individual to cultic persuasion and indoctrination, as well as the psychological consequences of membership. The course will rely heavily upon a detailed case study format which will scrutinize selected cult leaders/groups and allow students to apply theoretical knowledge to particular historical events and figures. Prerequisite(s): PY 332 or PY 232.
CJ 405. Crime & Literature. 3 Hours.
This course is intended to introduce several works of classical and modern literature which have incorporated the use of crime or criminality as a central theme. Students will be required to read from works of short fiction and novels as a means of preparing for discussion and analysis of core elements. Additionally, the various experiences of the individual criminal will be considered in light of those factors which may have an impact on the development of crime as a situational or social phenomenon. Required sources may include, but not remain limited to: Ernest Hemingway, Arthur Miller, William Faulkner and Truman Capote. Prerequisite(s): EH 200.

CJ 406. Victimology. 3 Hours.
This course will focus on the forgotten member of the criminal dyad: the victim. The purpose of this course is to introduce students to these developments and to alert them to ongoing victim-related issues. The goals of the course will include: Introducing the student to the development of the field of victimology; Delineating the conceptual boundaries of victimology; Familiarizing the student with basic concepts and literature within various sub-areas of victimology; Exploring policy developments and practical applications that stem from this concern over victims; and Assessing the progress away from a criminal justice system towards achieving a victim justice system. Prerequisite(s): CJ 235.

CJ 407. Advanced Community Policing. 3 Hours.
In this practicum based course, students will establish partnerships with relevant community members to identify problems related to the incidence of crime and social disorder. Students will engage in a collaborative problem solving exercise which will illustrate the enhanced ability of communities to prevent crime and disorder through cooperative and reciprocal relationships between police and citizens. Prerequisite(s): CJ 307.

CJ 408. Serial Homicide. 3 Hours.
This course is intended to introduce and explore the phenomenon of repetitive, intrinsically motivated homicide utilizing both clinical and law enforcement perspectives. Primary behavioral and crime scene characteristics of both organized and disorganized types of offenders will be reviewed to explain the incidence of serial homicide as a function of motivational factors ranging from sociopathy to severe psychiatric disturbance. The varied typologies and classification systems for serial murderers will be presented as a means of discussing issues ranging from victim selection to law enforcement investigative responsibilities. The course will rely heavily upon a detailed case study format which will scrutinize the crimes of key selected offenders and allow students to apply theoretical knowledge to particular serial perpetrators. Prerequisite(s): PY 332 or PY 232.

CJ 409. Criminal Profiling. 3 Hours.
This course is intended to introduce and review the basic theoretical and practical applications of criminal profiling techniques. Specifically, the student will be introduced to concepts including, but not limited to: the uses of criminal profiling; crime scene evaluation and reconstruction; criminal motivation and offender characteristics; modus operandi and offender signature; psychopathic and sadistic behavior; behavioral aspects of fire-setting; serial offenses, including rape and homicide. Students will explore varied offense behaviors and their psychological underpinnings to develop an understanding of the role of behavioral analysis of evidence in critical investigations. Prerequisite(s): PY 332 or PY 232.

CJ 410. Criminal Justice Internship. 3-9 Hours.
In this experiential course, the student serves as an intern with a criminal justice professional in a work setting. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional, and the internship director. The experience may be multidisciplinary, but should have a strong criminal justice element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): College Level=Junior or College Level=Senior.

CJ 412. Homeland Security. 3 Hours.
This course of study relates principle aspects of terrorism and how it affects our communities. This course compiles information from programs available on the national level that pertain to terrorism and the law enforcement officer's response to these types of incidents. The instruction is designed to provide the student with an understanding of the key role of first responder in their response to a suspected terrorist incident.

CJ 414. Counterterrorism and Counterinsurgency. 3 Hours.
This course introduces students to the topics of counterterrorism and counterinsurgency. A variety of concepts, theories, and methodologies will be examined in an effort to better understand what drives violent jihadism and global terrorism. Students will learn about policies, strategies, and tactics designed to counter the global threats currently posed during the terror age, and the operational and political risks of government action or inaction.

CJ 415. Corporate Security. 3 Hours.
Security has entered a new era since the events of 9/11 and this course focuses on the impact of these events on Corporate Security. Risk assessment models and proactive strategic planning concepts will be discussed drawing from actual cases. Students will also learn the importance of working from measurable metrics and business needs rather than unproven assumptions.

CJ 416. Global Jihad and Radicalization. 3 Hours.
This course will focus on the rise of radical Islam beginning in the late 20th century with the Mujahideen in Afghanistan and the Muslim Brotherhood in Egypt, through the 21st century with the emergence of Al Qaeda, Taliban, Boka Haram and ISIS. The course will examine methods, practices and global ambitions of these groups. Additionally attention will be given to the global ambitions for the creation of an Islamic caliphate and its implications for the modern world. The process and dynamics of Islamic fundamentalist radicalization will be explored in terms of how and where it occurs and how it can be prevented. Extensive use will be made of multimedia images of historical and current events.

CJ 420. Leadership in Police Organizations I. 3 Hours.
This course awards academic credit for participation in the International Association of Chiefs of Police Leadership in Police Organizations Program (LPO). The program is a leadership training program based on the principles of dispersed leadership in a policing environment.

CJ 421. Leadership in Police Organizations II. 3 Hours.
This course awards academic credit for participation in the International Association of Chiefs of Police Leadership in Police Organizations Program (LPO). The program is a leadership training program based on the principles of dispersed leadership in a policing environment.
CJ 435. Management & Criminal Justice. 3 Hours.
This course examines the application of modern management theory and technique to the criminal justice system. It emphasizes the unique nature of the criminal justice community and the complex relationships, which are necessary to make it efficient and effective. Topics covered include: hiring, developing personnel; managing budgets, dealing with public sector unions; discipline and problem behaviors; complaints and grievances; stress and time management; performance appraisals; deploying human resources; and emerging trends in criminal justice management. Prerequisite(s): CJ 215.

CJ 445. Criminal Justice Capstone. 3 Hours.
This course is designed to synthesize the information and insights from other courses in the Criminal Justice Curriculum. It includes research in crime trends and causes, scholarly research, and an assessment of each student's knowledge and understanding of the essential elements of the criminal justice system. This Capstone Course will focus on pragmatic application of principles and theories which guide Criminal Justice practice in the United States. Prerequisite(s): CJ 225 and PL 200.

CJ 490. Forensic Psychology. 3 Hours.
This course will introduce and review the basic theoretical and practical applications of forensic Psychology in our society. The student will be introduced to concepts in the field that directly impact or influence law enforcement and the judicial system. Concepts will range from the uses of criminal profiling, risk assessment of violent behavior and interrogation to custody, competency and discrimination determinations. Students will gain an in-depth understanding of each core topic as well as an appreciation for how each contributes to the broader domain of the criminal justice system. Prerequisite(s): (PY 332 or PY 232) and (College Level=Junior or College Level=Senior).

CJ 491. Forensic Science I. 4 Hours.
This course builds on the scientific knowledge and analytical skills developed in the prerequisite science courses and laboratory work. The student will apply scientific principles and use current laboratory instrumentation to compare and distinguish between typical forensic evidence items. Students will become familiar with microscope examinations of trace evidence including soil, fibers and hairs, forensic serology and screening, DNA typing, bloodstain pattern analysis and toxicology. Topical discussions and lectures will be supplemented by scheduled field trips and guest speakers from the forensic science community. Prerequisite(s): SC 191 and SC 192 and SL 191 and SL 192 and SC 241 and CJ 221 and CJ 330 and SC 224.

CJ 492. Forensic Science II. 4 Hours.
This course builds on the scientific knowledge and analytical skills developed in the prerequisite science courses, laboratory work and Forensic Science I course. The student will build on their understanding of the properties of organic and inorganic compounds and apply these to analysis of typical forensic science samples. Students will analyze drugs, inks and dyes, explosives, fire debris samples. Forensic document examination, fingerprint development and bullet comparisons will be conducted. Scientific reports will be written for each specific forensic discipline. Topical discussions and lectures will be supplemented by scheduled field trips and guest speakers from the forensic science community. Prerequisite(s): CJ 491.

CJ 493. Forensic Seminar. 4 Hours.
This course is the capstone of the bachelor's degree in forensic science. The course will draw on the knowledge acquired throughout the previous seven semesters. The course will guide students through correct processing and sequencing of processing of evidence at the crime scene and in the laboratory. Particular attention will be placed on understanding the pros and cons, false negatives and false positives, cross reactions and potential for cross contamination in analyzing and testing evidence items. Students will learn various techniques for describing scientific principles in layman's terms. The course will finish up with a mock trial at the end of the semester, giving the student the chance to experience direct and cross examination. During the course of the semester the class will sit for the International Association of Identification (IAI) crime scene technician certification. This will give the students the opportunity to acquire international certification and well as earn the degree. Prerequisite(s): SC 103 and SL 103 and SC 241 and SL 241 and CJ 221 and CJ 330 and SC 224 and CJ 491.

CJ 496. Concepts and Issues in CJ. 3 Hours.
This course provides a broad overview and critical examination of criminal justice topics. Commentary on these issues is written by experts in fields such as crime and justice and America, American law enforcement, the court system, juvenile justice, corrections, and the future of justice in America. Students will be required to meet nineteen course objectives and will be expected to read and comprehend a series of essays and subsequently research current events related to the CJ topics. An additional requirement will be student-led class discussion on an assigned topic area over the course of the semester. Prerequisite(s): (College Level=Junior or College Level=Senior) and (Major=BS Criminal Justice or Major=BS Psychology - Crim Justice).

CJ 498. Basic Law Enforcement Training. 15 Hours.
Taught at the Maine Criminal Justice Academy, this 18-week course is designed to qualify a student as a Maine law enforcement officer. The Academy program tests a student's ability and willingness to assume the complex and challenging responsibilities of a modern law enforcement officer in keeping the peace, protecting state and federal constitutional rights and enforcing the law.

CJ 499. Topic/. 1-6 Hour.
This course is intended to provide the opportunity to offer advanced courses in criminal justice that would not normally be a part of the Husson curriculum. As such the topics will depend on the interests of students and faculty. Prerequisite(s): (College Level=Junior or College Level=Senior).

CJ 700. Introduction to Criminal Justice Administration. 3 Hours.
This course provides an analysis and overview of the theories of organization and the administration of criminal justice agencies, including management styles, techniques of leadership, ethics, and decision-making for those students who do not have a previous background in criminal justice.

CJ 701. Justice Administration and Information Systems. 3 Hours.
This course will include the examination of contemporary law enforcement organizations and the issues police and other public service managers confront every day. The course will focus on case study analysis as a method of learning the latest management and behavioral theories. The five approaches to management that will be emphasized include: commitment to a common purpose; concern for high-quality public services; empowerment and shared leadership; pragmatic incrementalism; and dedication to public service.
CJ 702. Perspectives in Terrorism. 3 Hours.
The students in this course will analyze aspects of historical and current extremism and terrorism which will be related to contemporary domestic and international terrorism issues. The course will cover sophisticated theories developed by analysts around the world to investigate paramilitarism, white supremacy groups, hate groups, religious fundamentalism, and foreign terrorist groups which may pose a threat to United States interests. Among the topics to be analyzed include the ancient roots of terrorism, motivation of terrorists, the current vulnerability of modern democracies, and global jihad.

CJ 703. Labor and Employment Law. 3 Hours.
This course reviews the law under the National Labor Relations Act (NLRA). It will focus on unfair labor practices, union representative elections and conflict in the workplace. It includes an emphasis on proper collective bargaining processes, methods of mediation and arbitration to resolve disputes and the duty to bargain in good faith between employers and employees. Students are expected to study the text of the statute, relevant selections from actual cases, and various other materials and apply them to current events and hypothetical situations.

CJ 704. Psychology and the Legal Environment. 3 Hours.
This course is intended to introduce and review the basic theoretical and practical applications of forensic psychology in our society. Specifically, issues related to the use of psychological research and knowledge in legal environments will be presented to allow the student to appreciate the unique interaction between psychology and the law. Concepts will range from the analysis of competency and insanity to the use of criminal profiling, risk assessments of violent behavior, and psychopathology. Considerable attention will be allotted to an investigation of victimology concerns stemming from sexual assault of children and adults, as well as domestic violence. Students will gain an in-depth understanding of each core topic as well as an appreciation for how each contributes to the broader domain of the legal system.

CJ 705. Leadership & Ethics. 3 Hours.
This course will provide students with a study of leadership principles and strategies using historical figures as examples. The primary source of effective leadership will be Ernest Shackleton and is 1914 Antarctic expedition. Other historical leaders that will be drawn from include, but are not limited to: George Washington, Abraham Lincoln, and Theodore Roosevelt. Students will focus on leadership decisions made by these individuals and the ethical framework that surrounds every decision. Students will incorporate the leadership and ethical decision making skills into a final project related to their own field of study.

CJ 706. Corporate Security. 3 Hours.
This course will focus on the impacts on corporate security from the new age that has been entered since 9/11/01. Entirely new risk assessment models and proactive strategic planning concepts will be discussed drawing from actual cases. The important of working from measurable metrics and business needs rather than unproven assumptions will be discussed.

CJ 707. Public Policy and Planning. 3 Hours.
Students will examine policy development and planning processes. Topics will include the process and models of policy formation, policy implementation methods and evaluation components typically associated with planned change in criminal justice.

CJ 708. Global Jihad and Radicalization. 3 Hours.
This course will focus on the issues of radical Islam beginning in the late 20th century with the Mujahedeen in Afghanistan and the Muslim Brotherhood in Egypt, through the 21st century with the emergence of Al Qaeda, Taliban, Boka Haram and ISIS. The course will examine methods, practices, and global ambitions of these groups. Additional attention will be given to the global ambitions for the creation of an Islamic caliphate and its implications for the modern world. The process and dynamics of Islamic fundamentalist radicalization will be explored in terms of how and where it occurs and how it can be prevented. Extensive use will be made of multimedia images of historical and current events.

CJ 709. Advanced Criminological Theories. 3 Hours.
This course is intended to introduce an advanced sociological perspective as it is applied to the themes of crime, criminality and the individual offender. Specifically, definitions of selected crimes will be explored in conjunction with various perspectives on both causation and response to criminal acts. This analysis will require students to read and discuss the primary writings of those thinkers responsible for the development of landmark classical and contemporary criminological theories.

CJ 710. Criminal Justice Graduate Internship. 3-6 Hours.
This course is designed for students who desire to obtain on-the-job experience in the criminal justice profession who have not previously been employed in the internship locale. The nature of the work and the location of the internship must be approved by the student’s advisor. Included in the experience and pre-counseling, on-site supervision, periodic summary and evaluation reporting, supplemental reading, pertinent research or practical work-related projects, and presentation of projects.

CJ 711. White Collar Crime. 3 Hours.
This course explores the nature of elite deviance as it relates to crime and power in American society. Various forms of white collar crime will be examined and illustrated through case studies and estimates of the extent and costs of these crimes will be presented. Students will have the opportunity to gain a better understanding of how white collar crime affects employees, consumer and citizens.

CJ 712. Homeland Security. 3 Hours.
This course relates principle aspects of terrorism and how it affects our communities. It compiles information from programs available on the national level that pertain to terrorism and the law enforcement officer’s response to these types of incidents. The instruction is designed to provide the student with an understanding of the key role of first responder in their response to a suspected terrorist incident.

CJ 713. Psychology and the Legal Environment. 3 Hours.
This course is intended to introduce and review the basic theoretical and practical applications of forensic psychology in our society. Specifically, issues related to the use of psychological research and knowledge in legal environments will be presented to allow the student to appreciate the unique interaction between psychology and the law. Concepts will range from the analysis of competency and insanity to the use of criminal profiling, risk assessments of violent behavior, and psychopathology. Considerable attention will be allotted to an investigation of victimology concerns stemming from sexual assault of children and adults, as well as domestic violence. Students will gain an in-depth understanding of each core topic as well as an appreciation for how each contributes to the broader domain of the legal system.

CJ 714. Counterterrorism and Counterinsurgency. 3 Hours.
This course introduces students to the topics of counterterrorism and counterinsurgency. A variety of concepts, theories, and methodologies will be examined in an effort to better understand what drives violent jihadism and global terrorism. Students will learn about policies, strategies, and tactics designed to counter the global threats currently posed during the terror age, and the operational and political risks of government action or inaction.

CJ 715. Corporate Security. 3 Hours.
This course will focus on the impacts on corporate security from the new age that has been entered since 9/11/01. Entirely new risk assessment models and proactive strategic planning concepts will be discussed drawing from actual cases. The important of working from measurable metrics and business needs rather than unproven assumptions will be discussed.

CJ 716. Global Jihad and Radicalization. 3 Hours.
This course will focus on the issue of the rise of radical Islam beginning in the late 20th century with the Mujahedeen in Afghanistan and the Muslim Brotherhood in Egypt, through the 21st century with the emergence of Al Qaeda, Taliban, Boka Haram and ISIS. The course will examine methods, practices, and global ambitions of these groups. Additional attention will be given to the global ambitions for the creation of an Islamic caliphate and its implications for the modern world. The process and dynamics of Islamic fundamentalist radicalization will be explored in terms of how and where it occurs and how it can be prevented. Extensive use will be made of multimedia images of historical and current events.

CJ 717. Graduate Capstone Course. 3 Hours.
This course focuses on providing students an understanding of the major theories of the public policymaking process, the mechanics of the process, methods of examining policy impacts, and how criminological research can affect policy change as well as be driven by policy. Another goal of this course is to familiarize students with current pressing criminal justice issues and to have the students become sophisticated practitioners and consumers of evaluation research. Students will be expected to reflect critically upon the role of criminological research in the policy making / decision making process. Prerequisite(s): BA 600 and 18 Credits From Range [BA 600 To BA 799].
The Bachelor of Science in Accounting program is designed to provide a strong professional base in accounting; students may choose electives to specialize in either public accounting or management accounting. Public accountants work with clients in many different industries. They audit organizations’ financial records, provide tax advice, work with information systems, or consult on business problems. Some work within large multinational firms, but most work for regional or local firms. Management accountants work for a single organization, which may be a large corporation, a small business, a not-for-profit organization, or a government entity. They are part of the management team and analyze data, recommend ways to increase profitability, and help plan for the future. Specialized tasks include internal auditing, financial accounting, cost accounting, tax planning and compliance, business planning and budgeting, management consulting and information systems management.

The program objectives for the B.S. Accounting degree are:

- To explain the major concepts in the functional areas of marketing, finance, and management
- To evaluate the legal, social, and economic environment of business
- To demonstrate thorough, technical knowledge of the generally accepted accounting principles and practices tested on the uniform CPA exam
- To demonstrate knowledge of the core business concepts relevant to the accounting profession
- To apply ethical decision-making skills and integrity in an ever-changing, global environment
- To produce and present effective oral and written forms of communication
- To apply critical problem-solving and professional skills in an experiential, learning environment

The goal of the program is to prepare future leaders with the knowledge of accounting principles and their applications. Data gained from accountants are necessary for planning, decision making, and control. As an accountant, the student will be prepared to supervising the preparation, interpretation, and reporting of economic data for management operations and the general public depending upon the type of work sought.

*** Credit may not be required for degree completion.

## Courses

**AC 120. Introduction to Accounting. 3 Hours.**
This course is for nonaccounting majors and introduces the student to accounting principles and concepts. Emphasis will be placed on completion of the accounting cycle, cash control, and payroll accounting.

**AC 121. Principles of Accounting I. 3 Hours.**
This introductory course covers fundamental principles and procedures of accounting. It is designed to meet the needs of business students as well as the accounting major. Emphasis is on developing the technical procedures of the accounting cycle including journalizing, posting, recording adjusting entries, understanding merchandising accounting, and preparing financial statements. Students are also introduced to cash control and financial statement analysis.

**AC 122. Principles of Accounting II. 3 Hours.**
A continuation of the study of basic accounting principles and procedures, the course includes receivables and payables, fixed assets, intangibles, natural resources, inventory methods, payroll accounting, and special journals and subsidiary ledgers. Students are also introduced to the partnership and corporate form of organization. Projects are incorporated into the assignments. Prerequisite(s): AC 121.

**AC 201. Intermediate Accounting I. 3 Hours.**
The first accounting course at the professional level for the accounting major, this course begins with a comprehensive review of basic accounting principles and financial statement preparation. The course provides an intensive study of the concepts of future and present value, current assets and current liabilities, the various methods of inventory accounting and costing, plant assets and intangible assets. Prerequisite(s): AC 121.

**AC 202. Intermediate Accounting II. 3 Hours.**
This course continues the in-depth study of accounting topics in financial accounting, including accounting for income taxes, long-term investments, and long-term liabilities. An intensive study is made of the statement of cash flows and accounting for all phases of corporations including formation, retained earnings, dividends, convertible securities, and earnings per share. Prerequisite(s): AC 201.

**AC 211. Managerial Accounting. 3 Hours.**
Managerial accounting involves the use of accounting information to make business decisions. Topics covered include cost concepts, cost-volume-profit relationships, capital budgeting, master budgets, cost variances and present value analysis, as well as financial statement analysis. Prerequisite(s): AC 121.

**AC 251. Accounting Internship. 3 Hours.**
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.
AC 301. Advanced Accounting I. 3 Hours.
Advanced Accounting I deals with advanced and specialized topics in financial accounting. An in-depth study is made of accounting for pensions and leases and of accounting for partnerships, including formation and operation, dissolution, and liquidation. The course also provides an introduction to such specialized topics as foreign operations, governmental and fund accounting, accounting changes, and error correction. Prerequisite(s): AC 202.

AC 302. Advanced Accounting II. 3 Hours.
Advanced Accounting II concentrates on an in-depth study of business combinations and the equity method of accounting for a subsidiary on the parent's unconsolidated statements. Accounting for business combinations by the purchase method is covered and the preparation of consolidated statements is emphasized with a thorough treatment of eliminations of intercompany transactions. Currently developing advanced topics are also covered as time permits. Prerequisite(s): AC 202.

AC 331. Cost Accounting. 3 Hours.
Topics covered include basic cost control concepts, manufacturing statements, accounting for material inventory, factory overhead costs, job order costing, process costing, activity based costing, and process costing. Students are also introduced to cost estimation methods and cost-volume-profit analysis. With assigned projects, budgeting and variances are studied, along with decision-making models. Prerequisite(s): AC 122.

AC 352. Forensic and Investigative Accounting. 3 Hours.
This course covers important topics associated with modern forensic and investigative accounting. Topics include fraud auditing, litigation support, valuation, cybercrime, and other key forensic topics. The objectives include understanding the principles and practices used by public accountants, internal auditors, and others used to examine financial and related information. Prerequisite(s): AC 202.

AC 371. Accounting Information Systems. 3 Hours.
This course explores information systems that provide accounting and other information to make effective and efficient decisions. Emphasis is given to the interaction between the systems analyst, the financial accountant, the internal auditor, the external auditor, and other decision-makers. Overall data flow in systems is studied with an emphasis on flow and logic concepts and designing appropriate internal controls for these systems. Prerequisite(s): AC 122 and MI 111.

AC 441. Federal Taxation I. 3 Hours.
The student is introduced to the basic theory of taxation, particularly as it deals with the individual. Among the topics examined are the computation of gross income, gains and losses, sales and exchanges of property, and various business and personal deductions. Prerequisite(s): AC 122.

AC 442. Federal Taxation II. 3 Hours.
The taxation of corporations, partnerships, and estates and trusts is examined in-depth, along with other selected topics related to taxation of the business entity. Also covered are estate and gift transfer taxes with time devoted to family tax planning, international taxation, and the taxation of exempt organizations. Prerequisite(s): AC 122.

AC 461. Auditing Concepts and Methods. 3 Hours.
The responsibilities of the auditor are examined in-depth in respect to the client, the firm and the public. The course includes a study of ethics, auditing standards and development techniques of the audit program, and the auditor's report. An extensive case study is also required. Prerequisite(s): AC 202.

AC 471. Accounting for Nonprofit Organizations. 3 Hours.
This course consists of the study of fund accounting and the financial statements of state and local governments, hospitals, universities and other nonprofit entities. General financial principles and fund accounting principles are compared. Specific topics covered include budgets for operations, capital improvements, general funds, revenue funds, debt service funds, trust and agency funds, and proprietary funds. Prerequisite(s): AC 202.
AC 483. Financial Acctg & Reporting Adv Problems. 3 Hours.
This course covers current official pronouncements and procedures accepted by the AICPA and the FASB. Comprehensive in depth and inter-area problems are explored and solved; topics include accounting theory, pensions, leases, inventories, current assets and current liabilities, fixed assets, deferred taxes, stockholders' equity, foreign currency transactions and translations, investments, and partnerships. Prerequisite(s): AC 301 and AC 302 and AC 331 and AC 441 and AC 442 and College Level=Senior.

AC 484. Acctg & Reprt & Consolidation Adv Problems. 3 Hours.
This course covers current official pronouncements and current procedures accepted by the AICPA, the IRS, the FASB, the GASB and the Cost Accounting Standards Board. Comprehensive in depth and inter-area problems are explored and solved. Topics include: consolidations, cost accounting, accounting for governmental and nonprofit organizations, and individual and corporate taxes. Prerequisite(s): AC 301 and AC 302 and AC 331 and AC 441 and AC 442 and College Level=Senior.

AC 499. Accounting Seminar. 3 Hours.
The instructor and the student develop the subject matter of this course. The material covered consists of current issues and developments and must be relevant to the accounting field.

B.S. in Accounting/M.B.A

The dual B.S. in Accounting / M.B.A. degree program affords students the opportunity to earn both degrees in five years as opposed to the six years it would take to pursue the degrees separately. The BS/MBA Program enables a student to fulfill the Maine Board of Accountancy requirement of 150 semester hours of college education for individuals who wish to be licensed to practice as a Certified Public Accountant. High-level courses in management complement intensive professional training in accounting to prepare graduates for leadership in the field. Students in this dual degree program achieve the program objectives for both the B.S. Accounting and M.B.A degrees.

**AC Courses**

**AC 120. Introduction to Accounting. 3 Hours.**
This course is for nonaccounting majors and introduces the student to accounting principles and concepts. Emphasis will be placed on completion of the accounting cycle, cash control, and payroll accounting.

**AC 121. Principles of Accounting I. 3 Hours.**
This introductory course covers fundamental principles and procedures of accounting. It is designed to meet the needs of business students as well as the accounting major. Emphasis is on developing the technical procedures of the accounting cycle including journalizing, posting, recording adjusting entries, understanding merchandising accounting, and preparing financial statements. Students are also introduced to cash control and financial statement analysis.

**AC 122. Principles of Accounting II. 3 Hours.**
A continuation of the study of basic accounting principles and procedures, the course includes receivables and payables, fixed assets, intangibles, natural resources, inventory methods, payroll accounting, and special journals and subsidiary ledgers. Students are also introduced to the partnership and corporate form of organization. Projects are incorporated into the assignments. Prerequisite(s): AC 121.

**AC 201. Intermediate Accounting I. 3 Hours.**
The first accounting course at the professional level for the accounting major, this course begins with a comprehensive review of basic accounting principles and financial statement preparation. The course provides an intensive study of the concepts of future and present value, current assets and current liabilities, the various methods of inventory accounting and costing, plant assets and intangible assets. Prerequisite(s): AC 122.

**AC 202. Intermediate Accounting II. 3 Hours.**
This course continues the in-depth study of accounting topics in financial accounting, including accounting for income taxes, long-term investments, and long-term liabilities. An intensive study is made of the statement of cash flows and accounting for all phases of corporations including formation, retained earnings, dividends, convertible securities, and earnings per share. Prerequisite(s): AC 201.

**AC 211. Managerial Accounting. 3 Hours.**
Managerial accounting involves the use of accounting information to make business decisions. Topics covered include cost concepts, cost-volume-profit relationships, capital budgeting, master budgets, cost variances and present value analysis, as well as financial statement analysis. Prerequisite(s): AC 121.

**AC 251. Accounting Internship. 3 Hours.**
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.
AC 252. Accounting Internship II. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

AC 253. Accounting Internship III. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

AC 254. Accounting Internship IV. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

AC 255. Accounting Internship V. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

AC 256. Accounting Internship VI. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

AC 301. Advanced Accounting I. 3 Hours.
Advanced Accounting I deals with advanced and specialized topics in financial accounting. An in-depth study is made of accounting for pensions and leases and of accounting for partnerships, including formation and operation, dissolution, and liquidation. The course also provides an introduction to such specialized topics as foreign operations, governmental and fund accounting, accounting changes, and error correction. Prerequisite(s): AC 202.

AC 302. Advanced Accounting II. 3 Hours.
Advanced Accounting II concentrates on an in-depth study of business combinations and the equity method of accounting for a subsidiary on the parent's unconsolidated statements. Accounting for business combinations by the purchase method is covered and the preparation of consolidated statements is emphasized with a thorough treatment of eliminations of intercompany transactions. Currently developing advanced topics are also covered as time permits. Prerequisite(s): AC 202.

AC 331. Cost Accounting. 3 Hours.
Topics covered include basic cost control concepts, manufacturing statements, accounting for material inventory, factory overhead costs, job order costing, process costing, activity-based costing, and process costing. Students are also introduced to cost estimation methods and cost-volume-profit analysis. With assigned projects, budgeting and variances are studied, along with decision-making models. Prerequisite(s): AC 122.

AC 352. Forensic and Investigative Accounting. 3 Hours.
This course covers important topics associated with modern forensic and investigative accounting. Topics include fraud auditing, litigation support, valuation, cybercrime, and other key forensic topics. The objectives include understanding the principles and practices used by public accountants, internal auditors, and others used to examine financial and related information. Prerequisite(s): AC 202.

AC 371. Accounting Information Systems. 3 Hours.
This course explores information systems that provide accounting and other information to make effective and efficient decisions. Emphasis is given to the interaction between the systems analyst, the financial accountant, the internal auditor, the external auditor, and other decision-makers. Overall data flow in systems is studied with an emphasis on flow and logic concepts and designing appropriate internal controls for these systems. Prerequisite(s): AC 122 and MI 111.

AC 411. Federal Taxation I. 3 Hours.
The student is introduced to the basic theory of taxation, particularly as it deals with the individual. Among the topics examined are the computation of gross income, gains and losses, sales and exchanges of property, and various business and personal deductions. Prerequisite(s): AC 122.

AC 442. Federal Taxation II. 3 Hours.
The taxation of corporations, partnerships, and estates and trusts is examined in-depth, along with other selected topics related to taxation of the business entity. Also covered are estate and gift transfer taxes with time devoted to family tax planning, international taxation, and the taxation of exempt organizations. Prerequisite(s): AC 122.

AC 461. Auditing Concepts and Methods. 3 Hours.
The responsibilities of the auditor are examined in-depth in respect to the client, the firm and the public. The course includes a study of ethics, auditing standards and development techniques of the audit program, and the auditor’s report. An extensive case study is also required. Prerequisite(s): AC 202.

AC 471. Accounting for Nonprofit Organizations. 3 Hours.
This course consists of the study of fund accounting and the financial statements of state and local governments, hospitals, universities and other nonprofit entities. General financial principles and fund accounting principles are compared. Specific topics covered include budgets for operations, capital improvements, general funds, revenue funds, debt service funds, trust and agency funds, and proprietary funds. Prerequisite(s): AC 202.
AC 483. Financial Acctg & Reporting Adv Problems. 3 Hours.
This course covers current official pronouncements and procedures accepted by the AICPA and the FASB. Comprehensive in depth and inter-area problems are explored and solved; topics include accounting theory, pensions, leases, inventories, current assets and current liabilities, fixed assets, deferred taxes, stockholders' equity, foreign currency transactions and translations, investments, and partnerships. Prerequisite(s): AC 301 and AC 302 and AC 331 and AC 441 and AC 442 and College Level=Senior.

AC 484. Acctg & Reprtng & Consolidation Adv Problems. 3 Hours.
This course covers current official pronouncements and current procedures accepted by the AICPA, the IRS, the FASB, the GASB and the Cost Accounting Standards Board. Comprehensive in depth and inter-area problems are explored and solved. Topics include: consolidations, cost accounting, accounting for governmental and nonprofit organizations, and individual and corporate taxes. Prerequisite(s): AC 301 and AC 302 and AC 331 and AC 441 and AC 442 and College Level=Senior.

AC 499. Accounting Seminar. 3 Hours.
The instructor and the student develop the subject matter of this course. The material covered consists of current issues and developments and must be relevant to the accounting field.

BA Courses

BA 101. Introduction to Business. 3 Hours.
This course introduces students to the general nature of functional areas in business such as marketing, management, accounting, finance, research and development, and risk management. The relationship between business, the government, the economy, and the environment is examined.

BA 111. Economic Geography. 3 Hours.
This course is an introduction to the principles of economic geography, ranging from physical and biological geography to cultural and political factors. The decision making processes, both local and global, for different types of service oriented, manufacturing, transportation, and resource based businesses will be examined. The relationship of natural resources, population, and culture, and how such factors affect economic activity will be emphasized.

BA 201. Business Law I. 3 Hours.
This course provides students with a basic knowledge of the law of contracts, personal property and real property.

BA 202. Business Law II. 3 Hours.
This course is intended to augment BA 201 with in depth analysis of the law in Contracts, UCC, Corporations, Principal Agency Law, Advanced Tort Law, Environmental Law, Real Property Law, Securities Law and Employment Law.

BA 204. Franchise Formation and Management. 3 Hours.
This class will discuss franchise formation and management with particular emphasis on the discovery and evaluation of the franchisor and the feasibility of entrepreneurs converting an existing business into a franchise chain or creating and selling new franchises, domestic and international. Franchise accounting and finance (borrowing or leveraging) will be covered, as well as, taking the franchise to the stock market or going public (IPO) and raising investment capital. Prerequisite(s): BA 401.

BA 205. Real Estate Law. 3 Hours.
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

BA 210. Economics Overview for Non-Business Majors. 3 Hours.
This is an overview of microeconomic and macroeconomic concepts for non-business majors. It will include an introduction to American capitalism including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of competitive firms. It will also be an introduction to national income accounts, unemployment, inflation, government fiscal policy and monetary policy.

BA 211. Microeconomics. 3 Hours.
This is an introduction to American capitalism and microeconomic concepts including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of purely and impurely competitive firms.

BA 212. Macroeconomics. 3 Hours.
This is an introduction to macroeconomics in the American economy: national income accounts, unemployment, inflation, government fiscal policy, monetary policy and economic growth.

BA 220. Real Estate Principles and Practices. 3 Hours.
This course will provide students with methods of analyzing acquisition and retention of Real Estate. Also, there will be a focus on the skills and techniques required to operate a real estate business, including trust accounts, risk management, and property management.

BA 243. The Business of Innovation. 3 Hours.
This is a cross-disciplinary class that will introduce students to the Lean Startup Scientific Method for developing and commercializing ideas for new ventures or else innovating and developing new products or business models within existing companies. Topics include marketplace innovations, technology and science based innovations, marketplace hypothesis development and testing, frugal and agile engineering, business models, intellectual property, prototyping, exit strategies, and fundraising. Lab component is integrated within module deliverables.

BA 271. Risk Management. 3 Hours.
A study is made of the risks encountered by individuals and business firms. A presentation is made of the basic principles and institutions, which have been developed in risk management. This material is treated primarily from the consumer point of view.

BA 299. Topic/. 1 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.
BA 300. Business Presentations. 3 Hours.
Communication is a vital function of any business. Managers at all levels must be able to communicate effectively to advance their career and ensure the success of their organization. This course will give students a working knowledge of how to create, brief, and present information across the organizational communications spectrum. Students will learn how to think critically and apply problem solving skills across a variety of historical and contemporary business topics. Students will learn how to collect, analyze, synthesize, and present information in a professional manner to assorted audiences in different venues. The foundational skill set developed in this course is the ability for students to articulate their ideas in a professional manner within a variety of business settings. Prerequisite(s): EH 124.

BA 302. Business Ethics. 3 Hours.
This course is designed to raise a moral consciousness and sensitivity within the various disciplines of the business curriculum. The disciplines focused on here are business, accounting, marketing, multinational corporations, and those areas of human resource management inclusive of diversity in the workplace within the context of environmental and social responsibility.

BA 306. Franchise Law. 3 Hours.
This is a law class that analyzes all the issues of Franchise Law with a particular emphasis on Contracts, Principal.Agent Franchise Relations, Corporate Formation of Franchises, and Securities Law. Prerequisite(s): BA 201 and BA 202.

BA 310. Organization and Management. 3 Hours.
This course focuses on how to design organization systems and effectively manage them. Students completing the course should understand the universal process of management and key terminology in the language of management. Students are encouraged conceptually to blend contributions from the various schools of management thought into an integrated perspective of what managers do and why.

BA 311. Human Resource Management. 3 Hours.
Emphasis in the course is on how to manage the major human resource administration functions of job design, reward system design, staffing, training and performance control, to achieve maximum employee performance and satisfaction. Prerequisite(s): BA 310 or ( Major=BS Criminal Justice or Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Paralegal or Major=BS English - Prelaw).

BA 312. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics include leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 321. Marketing Principles. 3 Hours.
The course covers the language and issues of marketing with an emphasis on developing responsive marketing strategies that meet customer needs. The course focuses on marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing. Other topics will be incorporated into the course including the external environment (focus on integrative topics within marketing, such as economics, politics, government, and nature), marketing research, international/global marketing with relevance to cultural diversity, ethics, the impact of technology on marketing, and careers in marketing.

BA 334. International Economics. 3 Hours.
This applied economics course will emphasize the use of cases to study topics such as comparative advantage, treaties, tariffs, non-tariff trade barriers, and trade blocks among developed and developing nations. Prerequisite(s): BA 211 and BA 212.

BA 344. Personal Financial Planning. 3 Hours.
This course provides comprehensive coverage of personal financial planning in the areas of money management, axes, consumer credit, housing and other consumer decisions, legal protection, insurance, retirement planning, and estate planning. Prerequisite(s): MS 141 or MS 111 or MS 242 or MS 180 or MS 181.

BA 351. Internship. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 352. Internship II. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 353. Internship III. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 354. Internship IV. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 355. Internship V. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 351 and BA 352 and BA 353 and BA 354.
BA 362. Financial Management I. 3 Hours.
The foundation finance course covers basic personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management. Students are expected to become proficient in financial analysis of a corporation and in various aspects of corporate financial management. Prerequisite(s): AC 121 and (AC 122 or AC 211) and BA 211 and (MS 141 or MS 111 or MS 242 or MS 180 or MS 181).

BA 364. Financial Management II. 3 Hours.
The course is a continuation of Financial Management I and will cover such topics as real options, sensitivity, scenario and break-even analysis, basic issues regarding stocks and bonds, risk/return and cost of capital, capital structure and limits to the use of debt. Prerequisite(s): BA 362.

BA 375. Supply Chain Management. 3 Hours.
This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategies to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.

BA 401. Managerial Economics. 3 Hours.
This course is designed to close the gap between economic theory and business application. It reviews traditional analysis and shows its application to the understanding and solution of economic problems of the firm and industry. Prerequisite(s): BA 211 and BA 212.

BA 411. Organizational Behavior. 3 Hours.
This course is highly experiential in its approach to helping students understand and appreciate why people behave the way they do in an organizational context. Students learn how to manage employee behavior by analysis of real world phenomena and by application of principles in the areas of human perception and communication, leadership and motivation, small group dynamics, organizational culture, and organizational change. Prerequisite(s): BA 310.

BA 413. Operations Management. 3 Hours.
Quantitative model building and manipulation are a means of analyzing and synthesizing the elements of productions management. Both deterministic and stochastic modeling are emphasized in the areas of work systems design, queuing, PERT, SQC, inventory control, forecasting, and linear and nonlinear programming. Prerequisite(s): BA 310 and MS 132.

BA 414. Business Strategy. 3 Hours.
This Business Administration senior seminar focuses on decision making at the executive management level, the formulation of strategy, and its implementation in the organization. The course will employ case studies, laboratory simulation techniques, and computer spreadsheet analysis. Prerequisite(s): College Level+Senior.

BA 421. Integrated Marketing Communication and Advertising. 3 Hours.
An introduction into the world of advertising: Students will plan and design Ad campaigns, write copy and design layouts for the different types/forms of advertising. The students will work with local companies and assist them in redesign of their ad campaigns. Prerequisite(s): BA 321.

BA 422. Sales and Sales Management. 3 Hours.
This course provides students with the fundamentals of good salesmanship and sales management. Prior to studying management principles students practice sales techniques in simulations. Cases are used to illustrate and evaluate principles of sales management. Prerequisite(s): BA 321.

BA 423. Retail Management. 3 Hours.
The purpose of this course is to provide students with an understanding of the fundamentals of successful retail operations. Topics included are the market concept in retailing, factors of area and market analysis, and aspects of organizational structure, layout, and personnel planning. Also covered are methods of pricing, merchandising planning, inventory, expense control and sales promotion techniques. Prerequisite(s): BA 321.

BA 424. Marketing Research. 3 Hours.
The basic research concepts and practices as applied to the analysis of marketing problems are examined. Topics include sources of data, collecting data, sampling, questionnaire construction, tabulating data, and report preparation; computerized statistical software is used. Prerequisite(s): BA 321 and MS 132.

BA 425. Marketing Management. 3 Hours.
This is the capstone course for marketing majors. Students apply concepts learned in other courses to marketing problems of business and nonprofit organizations. Cases and business simulations are used to teach decision-making in the complex environment of business. A complete marketing plan for a simulated company of the student's choice summarizes the student's knowledge of the field. Prerequisite(s): BA 321.

BA 426. Real Estate Market, Research and Analysis. 3 Hours.
This course will discuss market research, real estate sales, property valuations and analysis. Students will examine market research reports to gain insight into product and market trends, opportunities, projections, and growth in the Maine, the US and global real estate markets. Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 427. Franchise Market Research and Analysis. 3 Hours.
This class will focus on analysis of market demographics, feasibility studies, product pricing, promotion and distribution, franchise broker contacts, extrapolation of sales and expenses, and the projection of costs and net profits, emerging markets and capital expansion. Prerequisite(s): BA 401 and MS 132 and MS 232 and BA 362.

BA 428. Strategic Selling. 3 Hours.
This course builds on the fundamentals of selling. The student will understand how to advance sales in light of complex business environments consisting of layers of buyers, decision makers and those who influence purchasing decisions. A strategic account planning process will be analyzed and applied to real companies by way of case studies. The art and skill of negotiating will be studied and learned through role play. Prerequisite(s): BA 422.

BA 434. International Finance. 3 Hours.
The factors affecting exchange rates are discussed, as well as different types of exchange rate systems and how governments attempt to influence exchange rates. The relationships among interest rate parity, purchasing power parity, the Fisher effect and International Fisher effect and exchange rates are analyzed. Students learn how currency futures, currency options and money market hedges are used to hedge exchange rate risk. Prerequisite(s): BA 362.
BA 437. International Marketing. 3 Hours.
The basics of international marketing will be taught including the foundations of culture, cultural understanding, business customs and practices in global marketing, assessing global markets, and developing international marketing strategy. Prerequisite(s): BA 321.

BA 438. Export-Import Procedures. 3 Hours.
The basics of export-import procedures will be taught including justification for exporting/importing, market planning methods, selection of appropriate marketing mix variables, and regulation. Prerequisite(s): BA 321.

BA 439. International Franchising Management. 3 Hours.
This course will focus on international expansion of franchises, learning the culture, monetary exchanges, imports and exports, local international market analysis and much more. Prerequisite(s): BA 204 and BA 306 and BA 427.

BA 440. Small Business Management I. 3 Hours.
This course supplies prospective and current small business managers with the essential concepts of starting and operating small businesses. Topics covered include: environment and management of small business enterprise, problems in starting small businesses, financial and administrative control, and management of business operations. Particular emphasis is placed on the interrelated nature of the components, particularly as they affect the financial picture of the firm. Through a lecture and discussion format, students are expected to share their own experiences in small businesses with their fellow students. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 441. Entrepreneurship I - New Venture Development. 3 Hours.
Students will be introduced to the practical application of classic and contemporary business theory as it applies to the early stages of entrepreneurship and intrapreneurship, opportunity recognition, innovation, and new venture development. Course topics include types of entrepreneurs, opportunity recognition, marketing, cash and other resource requirements, financial statements, planning, franchising, intellectual property, success/failure/resilience, and growth. Class will use text, cases, articles, internet sources, and guest lecturers. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 442. Applied Small Business Management. 3 Hours.
This is an advanced course which focuses on real problems in Small Business Management, using the case approach. Cases are drawn from the text, from actual local small businesses, and from the practical experience of students in the class. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 443. Entrepreneurship II: Business Plans. 3 Hours.
This class builds on BA 441, New Venture Development. The focus of this class is on the early stages of formalizing and growing a venture. Topics include business plan writing, fund raising and cash flow, measuring and conveying financial position, core strategy development and competitive advantage, sustainability, international entrepreneurship, supply chain, growth, and exit. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 460. Investments. 3 Hours.
Beginning with an introduction to financial markets and investment instruments, topics include stock and bond quotations and trading procedures, rate of return, margin trading, stock indexes, stock and bond valuation, risk and return, portfolio theory, active and passive portfolio management, and investment performance evaluation. Prerequisite(s): BA 362.

BA 464. Bank & Financial Services Management. 3 Hours.
This course will introduce students to the specific issues in the financial management of a banking firm and, to a smaller degree, of other financial intermediaries. Emphasis will be on products, roles, regulatory framework, and risk management. Prerequisite(s): BA 362.

BA 465. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 471. Life and Health Insurance. 3 Hours.
This course is intended to provide background knowledge for personal application and for those responsible for administering benefit plans for employees; it provides the necessary information required to pass the State of Maine license examination. Prerequisite(s): BA 271.

BA 472. Casualty and Property Insurance. 3 Hours.
The first part of the course introduces the basics of the entire insurance business, including a summary of legal aspects, types of insurers and principles of reinsurance; next, each type of insurance is studied in detail. Topics covered are fire, consequential loss, inland marine, ocean marine, theft and surety, liability and miscellaneous property insurance. Prerequisite(s): BA 271.

BA 473. Real Estate Appraisal. 3 Hours.
This course familiarizes the student with the foundation and principles of the appraisal process. The student will become familiar with the three approaches to value. Site valuation, construction costs, depreciation; comparables selection and adjustments; rental multipliers; and reconciliation will be discussed. The student will focus on the elements making up the standards for professional appraisal practice. These elements, i.e., Definitions, Rules, Standards and Standard Rules, Statements and advisory opinions are discussed in detail along with the philosophy and history of USPAP. Prerequisite(s): BA 401 and MS 132 and BA 362.

BA 475. E-Business and E-Commerce for Managers. 3 Hours.
This course teaches the basic e-business and e-commerce theory. The students will apply the theory through the development of a website for the prime purpose of marketing a product or service or idea online.

BA 490. International Business. 3 Hours.
This course covers the international dimensions of managerial decision-making including: world economies, international trade theories, tariffs, quotas and other trade issues, global strategic planning, cross-cultural management, international market entry, international human resource management, international organization strategy, international logistics, import/export operations, currency exchange, international financial management. Current developments in global economic and business are emphasized; students participate in a computerized simulation throughout the semester. Prerequisite(s): BA 310 and BA 321.

BA 495. Senior Management Project. 3 Hours.
An experiential course that gives seniors the opportunity to apply what they have learned in class to a real business situation. Prerequisite(s): College Level=Senior.
BA 496. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 497. Business and Culture Travel Study Course. 3 Hours.
Business and Culture Travel Study course is designed to expose students to economies across the world. During the course students will travel to important commercial, cultural and governmental cities. Through a combination of readings students will be exposed to 20th and 21st century history, economics, culture political and business philosophy. The course will also involve visits to major multinational corporations, cultural activities and lectures from University business faculty when available. The course will also have two pre-trip class sessions with readings and one post course session to wrap up the experience and discuss the student travel logs.

BA 498. Business Seminar. 3 Hours.
This honors course requires the study of various business problems under the supervision of members of the Department of Business Administration. A paper is required. An oral examination is scheduled as the final examination in the course. Prerequisite(s): College Level=Senior.

BA 499. Topic/. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 600. Research Methods in Business and Education. 3 Hours.
This course is designed for beginning graduate students who have little or no formal preparation in those areas of research and problem-solving essential for a comprehensive study of business and education at the graduate level. Emphasis is placed on the identification of common problem types and the selection and use of appropriate methods of analysis (primarily statistical in nature).

BA 601. Managerial Economics. 3 Hours.
This course begins with a comprehensive overview of micro- and macroeconomic concepts with the aim of developing within students a picture of how business and nonprofit organizations relate to the economy as a whole. The course then focuses on practical applications of economic analysis to problems of concern to managers. Case studies and projects are used to demonstrate the methods used to determine economic feasibility and cost-effectiveness of products, services, and programs.

BA 602. Managerial Accounting. 3 Hours.
This is an accelerated accounting course for those with little or no formal accounting background. The emphasis is on concepts which managers need to know in order to be effective. Topics include the preparation and interpretation of financial statements, cost planning and control, cost-volume-profit analysis, decision-making models, master budgeting and variances, and evaluation of capital projects.

BA 605. Management Communications. 3 Hours.
This is an advanced communications course that builds upon a student's experience and prior undergraduate coursework in writing and oral communications. Topics include: advanced business writing, use of visual materials, selection of secondary sources of information, report preparation, and presentations to small and large groups.

BA 611. Organizational Behavior. 3 Hours.
This course surveys the major field of management, examining structures and processes on both group and organizational levels. Both traditional and contemporary theories are analyzed and applied to business operations.

BA 620. Financial Management. 3 Hours.
Topics considered include financial planning, operating and capital budgets, cash flow, purchasing and accounting procedures, the sources and uses of corporate and institutional funds, and financial analysis for evaluation and control. Students develop projects specifically related to their needs in educational administration, small business, or corporate management. Prerequisite(s): BA 602 or AC 301.

BA 621. Marketing Management. 3 Hours.
This course focuses on complex problems facing decision-makers in the marketing of goods and services. Emphasis is placed on the decision-making process, including assessment of the social, economic, and political environment in which the organization operates; problem definition; development and evaluation of alternatives, and the implementation of the best alternative. Cases in advertising, sales, marketing research, and strategic marketing management provide practice in marketing analysis and decision-making.

BA 622. Production Management. 3 Hours.
Emphasis is placed on the use of quantitative techniques for solving manufacturing problems. The student is given an opportunity to practice mathematical model-building and manipulation. Other topics considered include queuing system design, plant layout, statistical quality control, inventory modeling, Program Evaluation and Review Technique (PERT), linear and nonlinear programming, and control theory.

BA 625. Global Strategic Management. 3 Hours.
This course focuses on the strategic challenges and opportunities confronting firms that undertake to create value and to compete in the global economy. Successful companies develop strategies for doing business in emerging markets that are different from those they use at home and often find novel ways of implementing them too. The class will make extensive use of case analysis and discussion to evaluate and understand the strategic issues that confront firms operating internationally, as well as to appreciate the importance of values and ethics in organization decisions and actions. In this course we will probe the workings of business strategies in transition and emerging economies, gain an understanding of the strategies of local firms, and analyze the international success and failure of companies. Prerequisite(s): BA 600 and 15 Credits From Range [BA 600 To BA 799].

BA 626. Accounting in Planning, Budgeting and Control. 3 Hours.
This course examines the role of accounting in the planning, budgeting, and control process of a business in a dynamic environment. The integration of measuring and analyzing (planning), short-term decisions and managing organizations (control), and preparing various budgets (budgeting) are emphasized. This course is designed as a continuation of BA602 Managerial Accounting. Numerical problems, as well as case studies, are utilized as methods of study. Prerequisite(s): BA 602 or AC 211.

BA 627. Investment Analysis. 3 Hours.
This course provides a detailed description of securities market organization and approaches to investment opportunities. Students will examine theories used in the valuation of financial securities and employ projects and applications to develop a real world understanding of portfolio management. Prerequisite(s): BA 602.
BA 628. New Venture Planning and Management. 3 Hours. 
This course deals with the foundation of new ventures and related aspects of managing the small growing enterprise. Techniques taught in this course are equally applicable to small businesses, nonprofit organizations, and new ventures of larger organizations. Topics include: use of scarce resources, such as money, talent and technological expertise; identification of environmental threats and opportunities; and operational considerations such as organizational structure, legal requirements, financing, and accounting procedures.

BA 641. Human Resource Management. 3 Hours. 
This course explores human resource management as an integrated process of planning and control designed to achieve high employee productivity and job satisfaction. The course focuses on the essential functions of human resource management as they apply both to the general supervisory responsibilities of every manager and to the specific operations of the personnel department.

BA 642. Leadership in Business and Professions. 3 Hours. 
This course is designed to provide graduate management students with a comprehensive review of the essentials for effective leadership. It focuses on the identification of basic leadership styles, explores the theoretical and practical findings of research in leadership development, and seeks to synthesize the student’s leadership style with the most effective working models of leadership.

BA 643. Strategic Change Management. 3 Hours. 
Strategic Change Management focuses on the skills required to deal effectively with organizational change. The course addresses first the pressures in the business environment that make change a fundamental reality for managers. Particular attention is paid to change arising from public policy initiatives that impinge on business. The course then examines the manager as change agent responsible for initiating innovation and explores both the personal skills required in the role of change agent and the tools and techniques available to support the manager in that role. The course also examines the problems and opportunities of those who are the recipients of change in an organization and the skills required to cope effectively with that situation.

BA 644. The Legal Environment of Business. 3 Hours. 
This course will provide an overview of the important aspects of business law for executives, managers, accountants, and other professionals. The areas of law covered include but are not limited to administrative, contract, corporate and other business organizations, employment relations, real estate, taxes, and UCC sales.

BA 646. Current Issues in Business. 3 Hours. 
This course, conducted in seminar fashion, draws on current literature to analyze contemporary and emerging issues facing management in the late twentieth century. Content will vary.

BA 700. Health Care Management. 3 Hours. 
This course examines management problems and policy-making in the health care industry. Several areas are considered including: (1) the functions of the health care manager, (2) the types of health care delivery systems, (3) the administration of hospitals, (4) the financing of medical care, and (5) the role of government. Through readings, lectures, discussions, and projects, students clarify their own role in the delivery of health services. The course regularly draws on experts in health planning and health care administration.

BA 701. Legal Environment of Health Care Management. 3 Hours. 
The course provides a foundation in the legal and regulatory framework in which health care institutions operate. Students will also examine the legal issues confronting health care managers including director and administrative liability, malpractice, negligence, patient rights and confidentiality, licensure requirements, and the like.

BA 702. Health Care Economics. 3 Hours. 
In this course, the principles and tools of economic decision-making are applied to management in the health care sector. The course explores the application to health care management functions of such concepts and processes as supply and demand, resource allocation and utilization, costing and pricing, resource productivity, forecasting and economic aspects of planning, and utilization review. While the principal emphasis in the course is on micro-economic analysis, some consideration is also given to an economic analysis of public policy alternatives for the delivery of health care service. Prerequisite(s): BA 601.

BA 703. Financial Management in Healthcare Organizations. 3 Hours. 
This course applies the perspectives and tools of financial analysis to the management of health care organizations and evaluation of organizational performance. Topics covered include capital budgeting, sources of operating revenue, management of cash and inventories, risk analysis and forecasting. Particular attention is paid to cost containment regulatory strategies and their implications for financial planning and management. Prerequisite(s): BA 602.

BA 704. Managing Quality in Healthcare. 3 Hours. 
This course examines methods and tools for managing quality in health facilities, physician practices, managed care, and public health. Topics include developments in quality assurance and improvement, utilization review, risk management, and patient satisfaction.

BA 705. Global Perspectives in Healthcare. 3 Hours. 
This course examines the social, political, and economic aspects of global healthcare issues. Through a comparative analysis of the health systems of multiple nations, students will compare theories of health policy and priorities, healthcare system facilities, workforce, technology, cost, quality, and access. The emphasis of the course will be on health management strategies used in different countries and healthcare systems to mobilize, allocate, and maintain resources to improve the healthcare status and delivery systems.

BA 710. Law & Ethics for Non-Profit Organizations. 3 Hours. 
Non-profit managers and supervisors are held to a higher standard of ethical behavior due to the nature of their funding sources and their mission. This course is designed to develop in the student a basic understanding of the laws governing non-profit organizations, the practical applications of these laws and the ethics that are demanded of non-profit managers.

BA 711. Non-Profit Management and Leadership. 3 Hours. 
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics covered include: leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 712. Strategic Marketing for Nonprofit Organizations. 3 Hours. 
This course applies the concepts of marketing and strategy to the management of non-profit organizations. Through class lectures, discussion, case studies, and applied projects, students will build an understanding of the marketing process in the non-profit environment in order to be able to design, implement, and evaluate an organization’s approach to marketing and strategic positioning.
BA 713. Fundraising. 3 Hours.
This course takes a systems approach to the process of fund-raising. Topics covered include: donor cultivation, use of the annual fund, major gifts, corporate giving, and grant writing.

BA 720. Advanced Sales and Marketing in Hospitality. 3 Hours.
This course focuses on difficult problems and issues facing sales and marketing personnel in the hospitality industry. Students will make use of case studies in order to develop their decision-making process including the use of marketing research and analysis.

BA 721. Convention Planning and Events Planning. 3 Hours.
This course focuses on the rapidly growing convention sales and events planning industries. The student will learn how to design, plan, market and manage meetings and events.

BA 722. Advanced Front Office Operations. 3 Hours.
This course begins with detailed introduction about numerous aspects of front office operations and management. The next section of the course examines the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.

BA 723. Legal Issues in Hospitality Management. 3 Hours.
This course will provide the student an overview of the important aspects of Hospitality Law for Managers, and other professionals. Some of the areas of study include and are not limited to Torts, Products Liability, Constitutional Law and Criminal Law and many other subjects.

BA 724. Managing Service. 3 Hours.
This course begins with an introduction to the framework for providing quality service to customers and guests. Next we will discuss the needs of the customer/guest and proceed to develop our menu and/or product accordingly. Finally, we will learn how management and staff create loyal customers and guests by delivering service that exceeds their expectations.

BA 729. Hospitality Graduate Directed Practicum. 3 Hours.
Each student will find, will choose or will be provided with an internship site. The site chosen will be based on; and interview conducted by the management of the internship site and the student’s preference of location based on those available. The Coordinator of Hospitality Management will have the final decision on all internship site placements. The Coordinator’s decision will be based on his or her interaction with the student during previous course work, his or her understanding of the student and the internship properties requirements. Every consideration will be given to the student’s personal preferences with regard to location and types of property. However, the student’s preferences will not be the only consideration for placement. Prerequisite(s): BA 720 and BA 722 and BA 724.

BA 731. Business and Information Technology. 3 Hours.
This graduate course approaches Information Technology from the perspective of information consumers as opposed to technology implementers. During this course, students will examine various technologies and their application within modern organizations. The course has two primary goals. (1) The course will explain information technologies in non-technical terms so that students can evaluate a technology’s effectiveness relative to any existing alternatives and the overall organizational needs. (2) This course should increase student awareness regarding how they interact with technology in a personal or business setting. Business leaders are constantly bombarded with technology. This course addresses the need to sift through that information in an intelligent manner and make smart business decisions.

BA 741. Staffing & Selection. 3 Hours.
A source of competitive advantage for any organization is its talent. The effectiveness of an organization depends on the performance of each individual in that organization. Hence, one of the most important human resource functions is that of staffing the organization. This course is essential for HR professionals who are responsible for recruiting, screening, hiring, promoting, and outplacing employees. It is also very crucial for any line managers, supervisors, team leaders, and hiring managers who are involved in recruiting, making promotions, succession, or any other workforce decisions. An examination of the scientific, legal, and administrative issues associated with the recruitment, selection, employment and retention of individuals by organizations augments the study. Specific attention will be given to the current challenges of an increasingly dynamic workplace and diverse workforce.

BA 742. Training & Development. 3 Hours.
The effective training and development of human resources creates tremendous and unique value for an organization. This course examines how organizations can develop and manage the talents and skillset of human capital. The course explores topics such as training needs analysis, formulating training objectives, and the design, implementation, and evaluation of training and development programs.

BA 745. Innovative Global Strategy. 3 Hours.
This course will build students’ awareness of the challenges that must be addressed and the opportunities that may be present when competing in the global marketplace. The course focuses on how firms apply innovative strategies to create a sustainable competitive advantage in the global arena. Course content will be drawn from readings, case analysis, online content and discussions. The course requires students to analyze and understand real world examples of both successful and unsuccessful global strategy implementation.

BA 750. Fundamentals of Risk Management. 3 Hours.
This course explores the fundamentals of risk management. After discussion of the importance of risk and the rationale for its management in organizations, the remainder of the course will analyze the process of and methods for managing risk.

BA 751. Employee Benefits. 3 Hours.
This course explores the nature and operation of employer-sponsored benefit plans. Emphasis is placed on plan design, administration, funding, and regulation. The course also addresses organizational characteristics, benefit structure, and pricing of risk transfer schemes for groups.

BA 752. Crisis Management. 3 Hours.
Crisis Management can be defined as a communications response to an event that has a negative impact on an audience - the public, customers/clients, employees, shareholders, etc. Examples of such events could include tainted food, a corporate leak, a political scandal, an entertainment or athletic scandal, damaged products that cause or could potentially cause life-threatening situations, natural disasters, terrorism, and financial disasters. In this course, students will analyze and critique high-profile cases and learn how to effectively respond to crises.

BA 753. Corporate Risk Management. 3 Hours.
Corporate risk is analyzed through the lens of enterprise risk management. This course explores the operational and financial risks faced by firms and the study of various methods of handling these risks.

BA 754. Strategic Selling. 3 Hours.
The focus of this course is on key, strategic customer selling approaches. The process of sales planning and strategy development for these types of customers will be emphasized. The objective of this course is to understand and execute sales strategies for managing major and large customers.
BA 760. Technology & Innovation. 3 Hours.
BA 760 Technology & Innovation offers a research approach to identifying, analyzing, and creating technological advantage in nascent and mature industries. Students will apply the methodologies of innovation and discovery to business settings and markets, seeking to create competitive advantage and achieve market transformation through strategic initiatives that redefine consumer expectations and industry practices and reframe organizations to embrace innovative practices and processes.

BA 761. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 762. Grouthink. 3 Hours.
This course explores the origin of grouthink. Grouthink is a term first used by social psychologist Irving L. Janis (1972) that refers to a psychological phenomenon in which people strive for consensus within a group. This course explores grouthink as a phenomenon where people set aside their own personal beliefs or adopt the opinion of the rest of the group.

BA 763. Biotechnology & Innovation: Intellectual Property. 3 Hours.
This course focuses on the protection of proprietary and intellectual rights in inventions, writings, creative works, software, industry trade secrets, industry trade designations, and other intellectual assets at the international, Federal, and State Levels. The course will give special consideration to the emergence of new areas of patent law in Biotechnology and Pharmaceutical fields, examining not only the patentability of intellectual assets, but also the discovery process, particularly in collaborative environments involving multiple organizations and institutions, and the qualifying distinctions between collaborative and competitive research.

BA 790. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.*

BA 791. Professional Project. 3-6 Hours.
This course is used to award graduate credit for prior learning and educational experience obtained outside of the traditional classroom. Through the preparation of a professional project, students provide formal documentation of the specific graduate-level learning competencies which they have acquired through prior experience. A maximum of six (6) credit hours may be earned.

BA 792. Graduate Internship I. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization’s supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 793. Graduate Internship II. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization’s supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 792.

BA 794. Graduate Internship III. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization’s supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.

BA 795. Graduate Internship IV. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization’s supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 794.

BA 796. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 798. Thesis. 6 Hours.
The thesis may be library-oriented research with extensive reliance on documents and a relatively limited amount of primary field research, or it may be action-oriented field research with relevant documentation from the literature. The title of the thesis topic must be filed with the graduate committee. A student, with the approval of his/her advisory committee, may register for the thesis after completion of twenty-four (24) semester hours.

BA 799. Topic/. 3 Hours.
Students work together in a seminar setting under the direction of a member of the graduate faculty. The content of the seminar will vary according to the interests of students and faculty involved.

B.S. In Accounting Computer Information Systems

Bachelor of Science in Accounting/Computer Information Systems

This dual major enables the student to add significant knowledge of computers to professional training in accounting. This combination is highly sought by employers in both public and management accounting settings. The credits earned for this program can apply to the 150 semester hours required to obtain the CPA designation.

The program objectives for the B.S. Accounting/Computer Information Systems dual major are:

• To explain the major concepts in the functional areas of marketing, finance, and management
• To evaluate the legal, social, and economic environment of business
• To demonstrate a thorough, technical knowledge of the generally accepted accounting principles and practices tested in the uniform CPA exam
- To demonstrate knowledge of core business concepts relevant to the accounting profession
- To apply ethical decision-making skills and integrity in an ever-changing, global environment
- To demonstrate oral and written communication skills, appropriate to the profession
- To apply critical problem-solving and professional skills in an experiential, learning environment
- To demonstrate knowledge of computer hardware and software infrastructure
- To construct appropriate database solutions using computer software
- To apply project management practices and principles
- To utilize computer technology solutions to address business policies and practices

*** Credit may not be required for degree completion.

**AC Courses**

**AC 120. Introduction to Accounting. 3 Hours.**
This course is for nonaccounting majors and introduces the student to accounting principles and concepts. Emphasis will be placed on completion of the accounting cycle, cash control, and payroll accounting.

**AC 121. Principles of Accounting I. 3 Hours.**
This introductory course covers fundamental principles and procedures of accounting. It is designed to meet the needs of business students as well as the accounting major. Emphasis is on developing the technical procedures of the accounting cycle including journalizing, posting, recording adjusting entries, understanding merchandising accounting, and preparing financial statements. Students are also introduced to cash control and financial statement analysis.

**AC 122. Principles of Accounting II. 3 Hours.**
A continuation of the study of basic accounting principles and procedures, the course includes receivables and payables, fixed assets, intangibles, natural resources, inventory methods, payroll accounting, and special journals and subsidiary ledgers. Students are also introduced to the partnership and corporate form of organization. Projects are incorporated into the assignments. Prerequisite(s): AC 121.

**AC 201. Intermediate Accounting I. 3 Hours.**
The first accounting course at the professional level for the accounting major, this course begins with a comprehensive review of basic accounting principles and financial statement preparation. The course provides an intensive study of the concepts of future and present value, current assets and current liabilities, the various methods of inventory accounting and costing, plant assets and intangible assets. Prerequisite(s): AC 122.

**AC 202. Intermediate Accounting II. 3 Hours.**
This course continues the in-depth study of accounting topics in financial accounting, including accounting for income taxes, long-term investments, and long-term liabilities. An intensive study is made of the statement of cash flows and accounting for all phases of corporations including formation, retained earnings, dividends, convertible securities, and earnings per share. Prerequisite(s): AC 201.

**AC 211. Managerial Accounting. 3 Hours.**
Managerial accounting involves the use of accounting information to make business decisions. Topics covered include cost concepts, cost-volume-profit relationships, capital budgeting, master budgets, cost variances and present value analysis, as well as financial statement analysis. Prerequisite(s): AC 121.

**AC 251. Accounting Internship. 3 Hours.**
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

**AC 252. Accounting Internship II. 3 Hours.**
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

**AC 253. Accounting Internship III. 3 Hours.**
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

**AC 254. Accounting Internship IV. 3 Hours.**
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

**AC 255. Accounting Internship V. 3 Hours.**
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.
AC 256. Accounting Internship VI. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

AC 301. Advanced Accounting I. 3 Hours.
Advanced Accounting I deals with advanced and specialized topics in financial accounting. An in-depth study is made of accounting for pensions and leases and of accounting for partnerships, including formation and operation, dissolution, and liquidation. The course also provides an introduction to such specialized topics as foreign operations, governmental and fund accounting, accounting changes, and error correction. Prerequisite(s): AC 202.

AC 302. Advanced Accounting II. 3 Hours.
Advanced Accounting II concentrates on an in-depth study of business combinations and the equity method of accounting for a subsidiary on the parent’s unconsolidated statements. Accounting for business combinations by the purchase method is covered and the preparation of consolidated statements is emphasized with a thorough treatment of eliminations of intercompany transactions. Currently developing advanced topics are also covered as time permits. Prerequisite(s): AC 202.

AC 331. Cost Accounting. 3 Hours.
Topics covered include basic cost control concepts, manufacturing statements, accounting for material inventory, factory overhead costs, job order costing, process costing, activity based costing, and process costing. Students are also introduced to cost estimation methods and cost-volume-profit analysis. With assigned projects, budgeting and variances are studied, along with decision-making models. Prerequisite(s): AC 122.

AC 352. Forensic and Investigative Accounting. 3 Hours.
This course covers important topics associated with modern forensic and investigative accounting. Topics include fraud auditing, litigation support, valuation, cybercrime, and other key forensic topics. The objectives include understanding the principles and practices used by public accountants, internal auditors, and others used to examine financial and related information. Prerequisite(s): AC 202.

AC 371. Accounting Information Systems. 3 Hours.
This course explores information systems that provide accounting and other information to make effective and efficient decisions. Emphasis is given to the interaction between the systems analyst, the financial accountant, the internal auditor, the external auditor, and other decision-makers. Overall data flow in systems is studied with an emphasis on flow and logic concepts and designing appropriate internal controls for these systems. Prerequisite(s): AC 122 and MI 111.

AC 441. Federal Taxation I. 3 Hours.
The student is introduced to the basic theory of taxation, particularly as it deals with the individual. Among the topics examined are the computation of gross income, gains and losses, sales and exchanges of property, and various business and personal deductions. Prerequisite(s): AC 122.

AC 442. Federal Taxation II. 3 Hours.
The taxation of corporations, partnerships, and estates and trusts is examined in-depth, along with other selected topics related to taxation of the business entity. Also covered are estate and gift transfer taxes with time devoted to family tax planning, international taxation, and the taxation of exempt organizations. Prerequisite(s): AC 122.

AC 461. Auditing Concepts and Methods. 3 Hours.
The responsibilities of the auditor are examined in-depth in respect to the client, the firm and the public. The course includes a study of ethics, auditing standards and development techniques of the audit program, and the auditor’s report. An extensive case study is also required. Prerequisite(s): AC 202.

AC 471. Accounting for Nonprofit Organizations. 3 Hours.
This course consists of the study of fund accounting and the financial statements of state and local governments, hospitals, universities and other nonprofit entities. General financial principles and fund accounting principles are compared. Specific topics covered include budgets for operations, capital improvements, general funds, revenue funds, debt service funds, trust and agency funds, and proprietary funds. Prerequisite(s): AC 202.

AC 483. Financial Acctg & Reporting Adv Problems. 3 Hours.
This course covers current official pronouncements and procedures accepted by the AICPA and the FASB. Comprehensive in depth and inter-area problems are explored and solved; topics include accounting theory, pensions, leases, inventories, current assets and current liabilities, fixed assets, deferred taxes, stockholders’ equity, foreign currency transactions and translations, investments, and partnerships. Prerequisite(s): AC 301 and AC 302 and AC 331 and AC 441 and AC 442 and College Level=Senior.

AC 484. Acctg & Reptg & Consolidation Adv Problems. 3 Hours.
This course covers current official pronouncements and current procedures accepted by the AICPA, the IRS, the FASB, the GASB and the Cost Accounting Standards Board. Comprehensive in depth and inter-area problems are explored and solved. Topics include: consolidations, cost accounting, accounting for governmental and nonprofit organizations, and individual and corporate taxes. Prerequisite(s): AC 301 and AC 302 and AC 331 and AC 441 and AC 442 and College Level=Senior.

AC 499. Accounting Seminar. 3 Hours.
The instructor and the student develop the subject matter of this course. The material covered consists of current issues and developments and must be relevant to the accounting field.

MI Courses

MI 111. Introduction to Microcomputing. 3 Hours.
The elements of hardware, software and the uses of the microcomputer in today’s society. Hands-on experience includes word processing, spreadsheet, database management, and presentation software.

MI 131. Intro to Information Systems. 3 Hours.
Course surveys the historical, social and technological contexts of modern computing and computer science. Students are exposed to material through lectures and a number of online lab activities.

MI 210. Basic Database Design and Implementation. 3 Hours.
The course provides a strong hands-on overview of relational databases. Using small office database technologies (such as Microsoft Access) students will explore proper database design and construction. SQL is introduced as the primary tool for extracting data out of a database. The course is intended for non-IT majors. IT majors are directed to MI 411.
MI 214. Microcomputer Spreadsheet Applications. 3 Hours.
This course covers microcomputer spreadsheet software. Topics include: functions, decision making, macros, custom menus, importing and exporting.

MI 226. Web Applications. 3 Hours.
Students construct web pages using Hypertext Markup Language (HTML) and JavaScript. Emphasis is on object-oriented thinking and hands on work. Internet technologies including TCP/IP protocols, client/server programming, and security are also discussed. Prerequisite(s): MI 111.

MI 241. Managing and Maintaining a PC I. 3 Hours.
Course develops a base for supporting end-user workstation system. Emphasis is on hands on installation, configuration, and problem solving computer hardware and software in a laboratory setting. Prepares the student for the Comp TIA's A+ exams.

MI 242. Managing and Maintaining a PC II. 3 Hours.
A continuation of Managing and Maintaining a PC I. Prepares the student for the Comp TIA's A+ exams. Prerequisite(s): MI 241.

MI 245. Desktop Publishing. 3 Hours.
Students use current software packages to produce a wide range of high-quality interoffice publications such as forms, proposals and directories, and outside-of-organization communications such as flyers, catalogs, annual reports, brochures, newsletters, etc. Students will become familiar with typographic techniques used to create professional-looking documents. The use of basic design and layout features such as white space, graphic elements, and color will be introduced. Accuracy and creativity are essential as the students design and publish functional promotional materials. A professional portfolio containing sample projects is an integral part of the evaluation process.

MI 261. Introduction to Computer Programming I. 3 Hours.
This is a three credit hour course and the first of a two course sequence serving as an introduction to computer programming. The course covers the basic terminology and structure of writing computer software. In addition, the course establishes a solid foundation in the use of the basic building blocks associated with writing software including data types, variables, conditional and looping constructs, error handling, and debugging. Throughout the course, students will be introduced to and expected to follow industry standards and best practices of the software development discipline.

MI 262. Introduction to Computer Programming II. 3 Hours.
This is a three credit hour course and the second of a two course sequence serving as an introduction to computer programming. The course covers the basic terminology and structure of writing computer software. In addition, the course builds upon the solid foundation in the use of the basic building blocks associated with writing software including arrays, collections, classes, file I/O, and database connections. Throughout the course, students will be introduced to and expected to follow industry standards and best practices of the software development discipline. Prerequisite(s): MI 261.

MI 299. Topic/. 3 Hours.
This course is of variable content with selected topics presented to provide prerequisites for specifically identified additional coursework in CIS. The course emphasizes independent investigation and the fundamental principles of computing and information technology.

MI 321. Systems Analysis & Design. 3 Hours.
Methodology for the investigation analysis and general design, detailed design, and implementation of computer information systems is covered. Comprehensive case studies are used to illustrate the phases of CIS project development. Topics presented for system development include data flow diagrams, normalization, RAD, extreme programming (XP), software development life cycle (SDLC), and program specifications. Prerequisite(s): MI 261.

MI 322. Decision Support and Expert Systems. 3 Hours.
These systems are designed to synthesize what is known about the business application and to make that knowledge available to and effective in the hands of working decision-makers. Topics covered include artificial intelligence, natural language systems, expressing rules, and dealing with uncertainty. Expert system development software is used. Prerequisite(s): MI 111.

MI 325. Algorithms and Data Structures I. 3 Hours.
This is a three credit hour course and the first of a two course sequence serving as an introduction to the algorithms and data structures utilized in computer programming. The course covers the basic data structures used in software development including lists, sorted lists, stacks, queues, sets, and graphs and their implementations. For algorithms, the students will be introduced to a number of algorithm designs including greedy and divide-and-conquer, and specific algorithms including resizing arrays, shortest path, and spanning trees. Prerequisite(s): MI 261.

MI 326. Algorithms and Data Structures II. 3 Hours.
This is a three credit hour course and the second of a two course sequence serving as an introduction to the algorithms and data structures utilized in computer programming. The course covers the basic data structures used in software development including lists, sorted lists, stacks, queues, sets, and graphs and their implementations. For algorithms, the students will be introduced to a number of algorithm designs including greedy and divide-and-conquer, and specific algorithms including resizing arrays, shortest path, and spanning trees. Prerequisite(s): MI 261.

MI 331. Networking. 3 Hours.
This course covers the different types of networking topologies: client-server, peer-to-peer, and network administration. Practical aspects include setting up a network, hardware maintenance, and hands-on experience.

MI 332. Advanced Networking. 3 Hours.
This course builds upon basic network knowledge. Topics covered include network topology, infrastructure, hardware, segmentation, and troubleshooting as networks increase in scale and complexity. Security issues will be examined to protect data assets from internal and external threats. Prerequisite(s): MI 331.

MI 333. Computer Forensics. 3 Hours.
This course will focus on the investigative use of computer technologies and electronic records. Students will be exposed to “digital evidence” and the valuable information it can provide to investigators. The course will have a two-tier approach. (1) Students will be shown how to extract readily decipherable information from someone's computer such as looking for at their files or their browser history of web sites visited. Even if the information is password protected or has been deleted it might still be recoverable. (2) The course will examine criminals who use computers and the Internet to commit various crimes ranging from trying to lure children into chat rooms or face-to-face meetings to every sort of financial fraud. This course is intended to address a growing need in law enforcement. Prerequisite(s): Major=BS Comp Info Systems or Major=BS Criminal Justice.
MI 341. Managing and Maintaining a Windows Server I. 3 Hours.
Course builds on fundamentals developed in MI 241-242 to detail the challenges and technology of distributed system management. Example topics include Configuration Management, Backup/Disaster Recovery, User Management, Data Management, Application Management, Logistics and Licensing. Prerequisite(s): MI 242.

MI 342. Managing and Maintaining a Windows Server II. 3 Hours.
Course is a continuation of MI 341 Managing and Maintaining a Windows Server I. This course focuses on network configuration and security of the server. Prerequisite(s): MI 341.

MI 351. Information System Internship. 3 Hours.
Cooperative Education is a College-supervised work experience course with participating employers in business and nonprofit organizations that provide a practical application of classroom theory. Prerequisite(s): College Level=Junior or College Level=Senior.

MI 352. Information System Internship. 3 Hours.
Cooperative Education is a College-supervised work experience course with participating employers in business and nonprofit organizations that provide a practical application of classroom theory. Prerequisite(s): College Level=Junior or College Level=Senior.

MI 353. Information System Internship. 3 Hours.
Cooperative Education is a College-supervised work experience course with participating employers in business and nonprofit organizations that provide a practical application of classroom theory. Prerequisite(s): College Level=Junior or College Level=Senior.

MI 354. Information System Internship. 3 Hours.
Cooperative Education is a College-supervised work experience course with participating employers in business and nonprofit organizations that provide a practical application of classroom theory. Prerequisite(s): College Level=Junior or College Level=Senior.

MI 361. Java I. 3 Hours.
This course focuses on problem solving using an object-oriented programming language. Emphasis is on programming using modern practices. Prerequisite(s): MI 262.

MI 362. Java II. 3 Hours.
This course builds on language used in MI 361. Explores advanced use of the language including packages for data access and web server scripting. Prerequisite(s): MI 361.

MI 411. Database Design. 3 Hours.
The design of a database as part of the CIS development process is covered in detail. The theory and practical application of both relational and network databases is included. Normalization and SQL are also covered in detail.

MI 421. Project Management Techniques. 3 Hours.
Projects are undertaken, which must be completed within cost, schedule and quality constraints. This course provides the student with practical methodology for planning and managing large or small projects effectively. Software such as Microsoft Project for Windows® is used.

MI 422. Information System Project Development. 3 Hours.
A comprehensive project in CIS is undertaken. The team approach is used to plan, manage and implement a realistic CIS project of moderate complexity. Prerequisite(s): MI 421.

MI 499. Topic/. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the area of management information systems. The course may consist of seminars, individualized instruction and/or research related to a specific area of specialization.

A.S. Accounting

The Associate of Science in Accounting degree is a two year program. This program provides a solid introduction to the field and qualifies the graduate to work as a bookkeeper, become a paraprofessional in a public accounting firm, or even to manage a small business. The two year program transfers seamlessly into the B.S. Accounting program at Husson if you so choose.

The program objectives for the A.S. Accounting degree are:

• To demonstrate knowledge of the fundamental accounting principles, taxation, and managerial accounting
• To demonstrate knowledge of the core business concepts relevant to the accounting profession
• To apply ethical decision-making skills and integrity in an ever-changing, global environment
• To produce and present effective forms of communication (oral, written or both)
• To apply critical problem-solving, decision making, and professional skills

Managerial accounting involves the use of accounting information to make business decisions. Topics covered include cost concepts, cost-volume-profit relationships, capital budgeting, master budgets, cost variances and present value analysis, as well as financial statement analysis. Prerequisite(s): AC 121.

AC 251. Accounting Internship. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

AC 252. Accounting Internship II. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

AC 253. Accounting Internship III. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

AC 254. Accounting Internship IV. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

AC 255. Accounting Internship V. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.
AC 256. Accounting Internship VI. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

AC 301. Advanced Accounting I. 3 Hours.
Advanced Accounting I deals with advanced and specialized topics in financial accounting. An in-depth study is made of accounting for pensions and leases and of accounting for partnerships, including formation and operation, dissolution, and liquidation. The course also provides an introduction to such specialized topics as foreign operations, governmental and fund accounting, accounting changes, and error correction. Prerequisite(s): AC 202.

AC 302. Advanced Accounting II. 3 Hours.
Advanced Accounting II concentrates on an in-depth study of business combinations and the equity method of accounting for a subsidiary on the parent’s unconsolidated statements. Accounting for business combinations by the purchase method is covered and the preparation of consolidated statements is emphasized with a thorough treatment of eliminations of intercompany transactions. Currently developing advanced topics are also covered as time permits. Prerequisite(s): AC 202.

AC 331. Cost Accounting. 3 Hours.
Topics covered include basic cost control concepts, manufacturing statements, accounting for material inventory, factory overhead costs, job order costing, process costing, activity based costing, and process costing. Students are also introduced to cost estimation methods and cost-volume-profit analysis. With assigned projects, budgeting and variances are studied, along with decision-making models. Prerequisite(s): AC 202.

AC 352. Forensic and Investigative Accounting. 3 Hours.
This course covers important topics associated with modern forensic and investigative accounting. Topics include fraud auditing, litigation support, valuation, cybercrime, and other key forensic topics. The objectives include understanding the principles and practices used by public accountants, internal auditors, and others used to examine financial and related information. Prerequisite(s): AC 202.

AC 371. Accounting Information Systems. 3 Hours.
This course explores information systems that provide accounting and other information to make effective and efficient decisions. Emphasis is given to the interaction between the systems analyst, the financial accountant, the internal auditor, the external auditor, and other decision-makers. Overall data flow in systems is studied with an emphasis on flow and logic concepts and designing appropriate internal controls for these systems. Prerequisite(s): AC 122 and MI 111.

AC 441. Federal Taxation I. 3 Hours.
The student is introduced to the basic theory of taxation, particularly as it deals with the individual. Among the topics examined are the computation of gross income, gains and losses, sales and exchanges of property, and various business and personal deductions. Prerequisite(s): AC 122.

AC 442. Federal Taxation II. 3 Hours.
The taxation of corporations, partnerships, and estates and trusts is examined in-depth, along with other selected topics related to taxation of the business entity. Also covered are estate and gift transfer taxes with time devoted to family tax planning, international taxation, and the taxation of exempt organizations. Prerequisite(s): AC 122.

AC 461. Auditing Concepts and Methods. 3 Hours.
The responsibilities of the auditor are examined in-depth in respect to the client, the firm and the public. The course includes a study of ethics, auditing standards and development techniques of the audit program, and the auditor’s report. An extensive case study is also required. Prerequisite(s): AC 202.

AC 471. Accounting for Nonprofit Organizations. 3 Hours.
This course consists of the study of fund accounting and the financial statements of state and local governments, hospitals, universities and other nonprofit entities. General financial principles and fund accounting principles are compared. Specific topics covered include budgets for operations, capital improvements, general funds, revenue funds, debt service funds, trust and agency funds, and proprietary funds. Prerequisite(s): AC 202.

AC 483. Financial Acctg & Reporting Adv Problems. 3 Hours.
This course covers current official pronouncements and procedures accepted by the AICPA and the FASB. Comprehensive in depth and inter-area problems are explored and solved; topics include accounting theory, pensions, leases, inventories, current assets and current liabilities, fixed assets, deferred taxes, stockholders’ equity, foreign currency transactions and translations, investments, and partnerships. Prerequisite(s): AC 301 and AC 302 and AC 331 and AC 441 and AC 442 and College Level=Senior.

AC 484. Acctg & Reptg & Consolidation Adv Problems. 3 Hours.
This course covers current official pronouncements and current procedures accepted by the AICPA, the IRS, the FASB, the GASB and the Cost Accounting Standards Board. Comprehensive in depth and inter-area problems are explored and solved. Topics include: consolidations, cost accounting, accounting for governmental and nonprofit organizations, and individual and corporate taxes. Prerequisite(s): AC 301 and AC 302 and AC 331 and AC 441 and AC 442 and College Level=Senior.

AC 499. Accounting Seminar. 3 Hours.
The instructor and the student develop the subject matter of this course. The material covered consists of current issues and developments and must be relevant to the accounting field.

Accounting Certificate

Students interested in acquiring specific accounting skills as a stackable credential should consider the Accounting Certificate. This certificate program cover both private and public accounting topics and prepare students for positions as accounts payable clerks, accounts receivable clerks, bookkeepers or tellers.

These courses can be applied to an A.S. or B.S. degree at Husson University in Accounting, as a way to augment a degree that students already achieved or augment prior learning to provide for a change in career.

Students who wish to take a concentrated program of accounting courses or are changing careers can pursue an Accounting Certificate with 5 classes and total of 15 credits.
AC 121. Principles of Accounting I. 3 Hours.
This introductory course covers fundamental principles and procedures of accounting. It is designed to meet the needs of business students as well as the accounting major. Emphasis is on developing the technical procedures of the accounting cycle including journalizing, posting, recording adjusting entries, understanding merchandising accounting, and preparing financial statements. Students are also introduced to cash control and financial statement analysis.

AC 122. Principles of Accounting II. 3 Hours.
A continuation of the study of basic accounting principles and procedures, the course includes receivables and payables, fixed assets, intangibles, natural resources, inventory methods, payroll accounting, and special journals and subsidiary ledgers. Students are also introduced to the partnership and corporate form of organization. Projects are incorporated into the assignments. Prerequisite(s): AC 121.

AC 201. Intermediate Accounting I. 3 Hours.
The first accounting course at the professional level for the accounting major, this course begins with a comprehensive review of basic accounting principles and financial statement preparation. The course provides an intensive study of the concepts of future and present value, current assets and current liabilities, the various methods of inventory accounting and costing, plant assets and intangible assets. Prerequisite(s): AC 122.

AC 202. Intermediate Accounting II. 3 Hours.
This course continues the in-depth study of accounting topics in financial accounting, including accounting for income taxes, long-term investments, and long-term liabilities. An intensive study is made of the statement of cash flows and accounting for all phases of corporations including formation, retained earnings, dividends, convertible securities, and earnings per share. Prerequisite(s): AC 201.

AC 211. Managerial Accounting. 3 Hours.
Managerial accounting involves the use of accounting information to make business decisions. Topics covered include cost concepts, cost-volume-profit relationships, capital budgeting, master budgets, cost variances and present value analysis, as well as financial statement analysis. Prerequisite(s): AC 121.

AC 251. Accounting Internship. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

AC 252. Accounting Internship II. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

AC 253. Accounting Internship III. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

AC 254. Accounting Internship IV. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

AC 255. Accounting Internship V. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

AC 256. Accounting Internship VI. 3 Hours.
In this experiential course, the student serves as an intern in an accounting related position at a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.
**AC 301. Advanced Accounting I. 3 Hours.**
Advanced Accounting I deals with advanced and specialized topics in financial accounting. An in-depth study is made of accounting for pensions and leases and of accounting for partnerships, including formation and operation, dissolution, and liquidation. The course also provides an introduction to such specialized topics as foreign operations, governmental and fund accounting, accounting changes, and error correction. Prerequisite(s): AC 202.

**AC 302. Advanced Accounting II. 3 Hours.**
Advanced Accounting II concentrates on an in-depth study of business combinations and the equity method of accounting for a subsidiary on the parent's unconsolidated statements. Accounting for business combinations by the purchase method is covered and the preparation of consolidated statements is emphasized with a thorough treatment of eliminations of intercompany transactions. Currently developing advanced topics are also covered as time permits. Prerequisite(s): AC 202.

**AC 331. Cost Accounting. 3 Hours.**
Topics covered include basic cost control concepts, manufacturing statements, accounting for material inventory, factory overhead costs, job order costing, process costing, activity based costing, and process costing. Students are also introduced to cost estimation methods and cost-volume-profit analysis. With assigned projects, budgeting and variances are studied, along with decision-making models. Prerequisite(s): AC 122.

**AC 352. Forensic and Investigative Accounting. 3 Hours.**
This course covers important topics associated with modern forensic and investigative accounting. Topics include fraud auditing, litigation support, valuation, cybercrime, and other key forensic topics. The objectives include understanding the principles and practices used by public accountants, internal auditors, and others used to examine financial and related information. Prerequisite(s): AC 202.

**AC 371. Accounting Information Systems. 3 Hours.**
This course explores information systems that provide accounting and other information to make effective and efficient decisions. Emphasis is given to the interaction between the systems analyst, the financial accountant, the internal auditor, the external auditor, and other decision-makers. Overall data flow in systems is studied with an emphasis on flow and logic concepts and designing appropriate internal controls for these systems. Prerequisite(s): AC 122 and MI 111.

**AC 441. Federal Taxation I. 3 Hours.**
The student is introduced to the basic theory of taxation, particularly as it deals with the individual. Among the topics examined are the computation of gross income, gains and losses, sales and exchanges of property, and various business and personal deductions. Prerequisite(s): AC 122.

**AC 442. Federal Taxation II. 3 Hours.**
The taxation of corporations, partnerships, and estates and trusts is examined in-depth, along with other selected topics related to taxation of the business entity. Also covered are estate and gift transfer taxes with time devoted to family tax planning, international taxation, and the taxation of exempt organizations. Prerequisite(s): AC 122.

**AC 461. Auditing Concepts and Methods. 3 Hours.**
The responsibilities of the auditor are examined in-depth in respect to the client, the firm and the public. The course includes a study of ethics, auditing standards and development techniques of the audit program, and the auditor’s report. An extensive case study is also required. Prerequisite(s): AC 202.

**AC 471. Accounting for Nonprofit Organizations. 3 Hours.**
This course consists of the study of fund accounting and the financial statements of state and local governments, hospitals, universities and other nonprofit entities. General financial principles and fund accounting principles are compared. Specific topics covered include budgets for operations, capital improvements, general funds, revenue funds, debt service funds, trust and agency funds, and proprietary funds. Prerequisite(s): AC 202.

**AC 483. Financial Acctg & Reporting Adv Problems. 3 Hours.**
This course covers current official pronouncements and procedures accepted by the AICPA and the FASB. Comprehensive in depth and inter-area problems are explored and solved; topics include accounting theory, pensions, leases, inventories, current assets and current liabilities, fixed assets, deferred taxes, stockholders’ equity, foreign currency transactions and translations, investments, and partnerships. Prerequisite(s): AC 301 and AC 302 and AC 331 and AC 441 and AC 442 and College Level=Senior.

**AC 484. Acctg & Reprtg & Consolidation Adv Problems. 3 Hours.**
This course covers current official pronouncements and current procedures accepted by the AICPA, the IRS, the FASB, the GASB and the Cost Accounting Standards Board. Comprehensive in depth and inter-area problems are explored and solved. Topics include: consolidations, cost accounting, accounting for governmental and nonprofit organizations, and individual and corporate taxes. Prerequisite(s): AC 301 and AC 302 and AC 331 and AC 441 and AC 442 and College Level=Senior.

**AC 499. Accounting Seminar. 3 Hours.**
The instructor and the student develop the subject matter of this course. The material covered consists of current issues and developments and must be relevant to the accounting field.

### Accounting Minor

Students who major in another field offered by the University may choose to complete a minor in accounting with 6 classes and total of 18 credits.

All students seeking a minor within the School of Accounting must achieve a minimum grade point average of 2.0 in the courses relied upon for earning the designation as well as an average of 2.0 in the courses with the designation of the minor.

### Programs in Business Administration

The undergraduate Business Administration majors, leading to A.S., B.S. and dual BS/MBA degrees, prepare learners for challenging careers in a variety of business fields. In addition to the general business administration degree that provides flexibility for taking electives in diverse areas of study, students may concentrate in: entrepreneurship/small business management, financial management, healthcare management, international business, management, marketing, or create an interdisciplinary programs of study (IPS). In most programs, students
seeking to earn their MBA can do so in conjunction with their B.S. degree in just 5 years. Students also pursuing an MBA may pursue a general path of study with a variety of electives or choose a concentration in: healthcare management, hospitality and tourism management, or organizational management. Students seeking exposure to Business Administration courses may choose a Business Administration Certificate.

Husson University Business Administration majors develop skills, attitudes, and technical knowledge to prepare them for careers in a wide variety of fields that include not only business and industry, but also government and the not-for-profit sector. They work with faculty who combine academic training with industry experience, and consider teaching to be their highest priority. Small class size ensures students receive the attention they need to do their best. Internships, experiential classes, and simulations all provide students with opportunities to practice the skills of business before they leave the college setting.

Requirements for the Major

All Business Administration majors must earn an overall 2.0 cumulative grade-point average as well as a 2.0 in their School of Business courses.

Transfer students must complete a minimum of 30 credits hours at Husson University with a minimum of 15 credit hours in School of Business courses at Husson.

Courses

**BA 101. Introduction to Business. 3 Hours.**
This course introduces students to the general nature of functional areas in business such as marketing, management, accounting, finance, research and development, and risk management. The relationship between business, the government, the economy, and the environment is examined.

**BA 111. Economic Geography. 3 Hours.**
This course is an introduction to the principles of economic geography, ranging from physical and biological geography to cultural and political factors. The decision making processes, both local and global, for different types of service oriented, manufacturing, transportation, and resource based businesses will be examined. The relationship of natural resources, population, and culture, and how such factors affect economic activity will be emphasized.

**BA 201. Business Law I. 3 Hours.**
This course provides students with a basic knowledge of the law of contracts, personal property and real property.

**BA 202. Business Law II. 3 Hours.**
This course is intended to augment BA 201 with in depth analysis of the law in Contracts, UCC, Corporations, Principal Agency Law, Advanced Tort Law, Environmental Law, Real Property Law, Securities Law and Employment Law.

**BA 204. Franchise Formation and Management. 3 Hours.**
This class will discuss franchise formation and management with particular emphasis on the discovery and evaluation of the franchisor and the feasibility of entrepreneurs converting an existing business into a franchise chain or creating and selling new franchises, domestic and international. Franchise accounting and finance (borrowing or leveraging) will be covered, as well as, taking the franchise to the stock market or going public (IPO) and raising investment capital. Prerequisite(s): BA 401.

**BA 205. Real Estate Law. 3 Hours.**
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

**BA 210. Economics Overview for Non-Business Majors. 3 Hours.**
This is an overview of microeconomic and macroeconomic concepts for non-business majors. It will include an introduction to American capitalism including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of competitive firms. It will also be an introduction to national income accounts, unemployment, inflation, government fiscal policy and monetary policy.

**BA 211. Microeconomics. 3 Hours.**
This is an introduction to American capitalism and microeconomic concepts including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of purely and impurely competitive firms.

**BA 212. Macroeconomics. 3 Hours.**
This is an introduction to macroeconomics in the American economy: national income accounts, unemployment, inflation, government fiscal policy, monetary policy and economic growth.

**BA 220. Real Estate Principles and Practices. 3 Hours.**
This course will provide students with methods of analyzing acquisition and retention of Real Estate. Also, there will be a focus on the skills and techniques required to operate a real estate business, including trust accounts, risk management, and property management.

**BA 243. The Business of Innovation. 3 Hours.**
This is a cross-disciplinary class that will introduce students to the Lean Startup Scientific Method for developing and commercializing ideas for new ventures or else innovating and developing new products or business models within existing companies. Topics include marketplace innovations, technology and science based innovations, marketplace hypothesis development and testing, frugal and agile engineering, business models, intellectual property, prototyping, exit strategies, and fundraising. Lab component is integrated within module deliverables.

**BA 271. Risk Management. 3 Hours.**
A study is made of the risks encountered by individuals and business firms. A presentation is made of the basic principles and institutions, which have been developed in risk management. This material is treated primarily from the consumer point of view.

**BA 299. Topic/. 1 Hour.**
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.
BA 300. Business Presentations. 3 Hours.
Communication is a vital function of any business. Managers at all levels must be able to communicate effectively to advance their career and ensure the success of their organization. This course will give students a working knowledge of how to create, brief, and present information across the organizational communications spectrum. Students will learn how to think critically and apply problem solving skills across a variety of historical and contemporary business topics. Students will learn how to collect, analyze, synthesize, and present information in a professional manner to assorted audiences in different venues. The foundational skill set developed in this course is the ability for students to articulate their ideas in a professional manner within a variety of business settings. Prerequisite(s): EH 124.

BA 302. Business Ethics. 3 Hours.
This course is designed to raise a moral consciousness and sensitivity within the various disciplines of the business curriculum. The disciplines focused on here are business, accounting, marketing, multinational corporations, and those areas of human resource management inclusive of diversity in the workplace within the context of environmental and social responsibility.

BA 306. Franchise Law. 3 Hours.
This is a law class that analyzes all the issues of Franchise Law with a particular emphasis on Contracts, Principal/Agent Franchise Relations, Corporate Formation of Franchises, and Securities Law. Prerequisite(s): BA 201 and BA 202.

BA 310. Organization and Management. 3 Hours.
This course focuses on how to design organization systems and effectively manage them. Students completing the course should understand the universal process of management and key terminology in the language of management. Students are encouraged conceptually to blend contributions from the various schools of management thought into an integrated perspective of what managers do and why.

BA 311. Human Resource Management. 3 Hours.
Emphasis in the course is on how to manage the major human resource administration functions of job design, reward system design, staffing, training and performance control, to achieve maximum employee performance and satisfaction. Prerequisite(s): BA 310 or ( Major=BS Criminal Justice or Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Paralegal or Major=BS English - Prelaw).

BA 312. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics include leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 321. Marketing Principles. 3 Hours.
The course covers the language and issues of marketing with an emphasis on developing responsive marketing strategies that meet customer needs. The course focuses on marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing. Other topics will be incorporated into the course including the external environment (focus on integrative topics within marketing, such as economics, politics, government, and nature), marketing research, international/global marketing with relevance to cultural diversity, ethics, the impact of technology on marketing, and careers in marketing.

BA 334. International Economics. 3 Hours.
This applied economics course will emphasize the use of cases to study topics such as comparative advantage, treaties, tariffs, non-tariff trade barriers, and trade blocks among developed and developing nations. Prerequisite(s): BA 211 and BA 212.

BA 344. Personal Financial Planning. 3 Hours.
This course provides comprehensive coverage of personal financial planning in the areas of money management, axes, consumer credit, housing and other consumer decisions, legal protection, insurance, retirement planning, and estate planning. Prerequisite(s): MS 141 or MS 111 or MS 242 or MS 180 or MS 181.

BA 351. Internship. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 352. Internship II. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 353. Internship III. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 354. Internship IV. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 355. Internship V. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 351 and BA 352 and BA 353 and BA 354.
BA 362. Financial Management I. 3 Hours.
The foundation finance course covers basic personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management. Students are expected to become proficient in financial analysis of a corporation and in various aspects of corporate financial management. Prerequisite(s): AC 121 and (AC 122 or AC 211) and BA 211 and (MS 141 or MS 111 or MS 242 or MS 180 or MS 181).

BA 364. Financial Management II. 3 Hours.
The course is a continuation of Financial Management I and will cover such topics as real options, sensitivity, scenario and break-even analysis, basic issues regarding stocks and bonds, risk/return and cost of capital, capital structure and limits to the use of debt. Prerequisite(s): BA 362.

BA 375. Supply Chain Management. 3 Hours.
This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategies to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.

BA 401. Managerial Economics. 3 Hours.
This course is designed to close the gap between economic theory and business application. It reviews traditional analysis and shows its application to the understanding and solution of economic problems of the firm and industry. Prerequisite(s): BA 211 and BA 212.

BA 411. Organizational Behavior. 3 Hours.
This course is highly experiential in its approach to helping students understand and appreciate why people behave the way they do in an organizational context. Students learn how to manage employee behavior by analysis of real world phenomena and by application of principles in the areas of human perception and communication, leadership and motivation, small group dynamics, organizational culture, and organizational change. Prerequisite(s): BA 310.

BA 413. Operations Management. 3 Hours.
Quantitative model building and manipulation are a means of analyzing and synthesizing the elements of productions management. Both deterministic and stochastic modeling are emphasized in the areas of work systems design, queuing, PERT, SQC, inventory control, forecasting, and linear and nonlinear programming. Prerequisite(s): BA 310 and MS 132.

BA 414. Business Strategy. 3 Hours.
This Business Administration senior seminar focuses on decision making at the executive management level, the formulation of strategy, and its implementation in the organization. The course will employ case studies, laboratory simulation techniques, and computer spreadsheet analysis. Prerequisite(s): College Level=Senior.

BA 421. Integrated Marketing Communication and Advertising. 3 Hours.
An introduction into the world of advertising: Students will plan and design Ad campaigns, write copy and design layouts for the different types/forms of advertising. The students will work with local companies and assist them in redesign of their ad campaigns. Prerequisite(s): BA 321.

BA 422. Sales and Sales Management. 3 Hours.
This course provides students with the fundamentals of good salesmanship and sales management. Prior to studying management principles students practice sales techniques in simulations. Cases are used to illustrate and evaluate principles of sales management. Prerequisite(s): BA 321.

BA 423. Retail Management. 3 Hours.
The purpose of this course is to provide students with an understanding of the fundamentals of successful retail operations. Topics included are the market concept in retailing, factors of area and market analysis, and aspects of organizational structure, layout, and personnel planning. Also covered are methods of pricing, merchandising planning, inventory, expense control and sales promotion techniques. Prerequisite(s): BA 321.

BA 424. Marketing Research. 3 Hours.
The basic research concepts and practices as applied to the analysis of marketing problems are examined. Topics include sources of data, collecting data, sampling, questionnaire construction, tabulating data, and report preparation; computerized statistical software is used. Prerequisite(s): BA 321 and MS 132.

BA 425. Marketing Management. 3 Hours.
This is the capstone course for marketing majors. Students apply concepts learned in other courses to marketing problems of business and nonprofit organizations. Cases and business simulations are used to teach decision-making in the complex environment of business. A complete marketing plan for a simulated company of the student’s choice summarizes the student’s knowledge of the field. Prerequisite(s): BA 321.

BA 426. Real Estate Market, Research and Analysis. 3 Hours.
This course will discuss market research, real estate sales, property valuations and analysis. Students will examine market research reports to gain insight into product and market trends, opportunities, projections, and growth in the Maine, the US and global real estate markets. Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 427. Franchise Market Research and Analysis. 3 Hours.
This class will focus on analysis of market demographics, feasibility studies, product pricing, promotion and distribution, franchise broker contacts, extrapolation of sales and expenses, and the projection of costs and net profits, emerging markets and capital expansion. Prerequisite(s): BA 401 and MS 132 and MS 232 and BA 362.

BA 428. Strategic Selling. 3 Hours.
This course builds on the fundamentals of selling. The student will understand how to advance sales in light of complex business environments consisting of layers of buyers, decision makers and those who influence purchasing decisions. A strategic account planning process will be analyzed and applied to real companies by way of case studies. The art and skill of negotiating will be studied and learned through role play. Prerequisite(s): BA 422.

BA 434. International Finance. 3 Hours.
The factors affecting exchange rates are discussed, as well as different types of exchange rate systems and how governments attempt to influence exchange rates. The relationships among interest rate parity, purchasing power parity, the Fisher effect and International Fisher effect and exchange rates are analyzed. Students learn how currency futures, currency options and money market hedges are used to hedge exchange rate risk. Prerequisite(s): BA 362.
BA 437. International Marketing. 3 Hours.
The basics of international marketing will be taught including the foundations of culture, cultural understanding, business customs and practices in global marketing, assessing global markets, and developing international marketing strategy. Prerequisite(s): BA 321.

BA 438. Export-Import Procedures. 3 Hours.
The basics of export-import procedures will be taught including justification for exporting/importing, market planning methods, selection of appropriate marketing mix variables, and regulation. Prerequisite(s): BA 321.

BA 439. International Franchising Management. 3 Hours.
This course will focus on international expansion of franchises, learning the culture, monetary exchanges, imports and exports, local international market analysis and much more. Prerequisite(s): BA 204 and BA 306 and BA 427.

BA 440. Small Business Management I. 3 Hours.
This course supplies prospective and current small business managers with the essential concepts of starting and operating small businesses. Topics covered include: environment and management of small business enterprise, problems in starting small businesses, financial and administrative control, and management of business operations. Particular emphasis is placed on the interrelated nature of the components, particularly as they affect the financial picture of the firm. Through a lecture and discussion format, students are expected to share their own experiences in small businesses with their fellow students. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 441. Entrepreneurship I - New Venture Development. 3 Hours.
Students will be introduced to the practical application of classic and contemporary business theory as it applies to the early stages of entrepreneurship and intrapreneurship, opportunity recognition, innovation, and new venture development. Course topics include types of entrepreneurs, opportunity recognition, marketing, cash and other resource requirements, financial statements, planning, franchising, intellectual property, success/failure/resilience, and growth. Class will use text, cases, articles, internet sources, and guest lecturers. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 442. Applied Small Business Management. 3 Hours.
This is an advanced course which focuses on real problems in Small Business Management, using the case approach. Cases are drawn from the text, from actual local small businesses, and from the practical experience of students in the class. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 443. Entrepreneurship II - Business Plans. 3 Hours.
This course builds on BA 441, New Venture Development. The focus of this class is on the early stages of formalizing and growing a venture. Topics include business plan writing, fund raising and cash flow, measuring and conveying financial position, core strategy development and competitive advantage, sustainability, international entrepreneurship, supply chain, growth, and exit. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 460. Investments. 3 Hours.
Beginning with an introduction to financial markets and investment instruments, topics include stock and bond quotations and trading procedures, rate of return, margin trading, stock indexes, stock and bond valuation, risk and return, portfolio theory, active and passive portfolio management, and investment performance evaluation. Prerequisite(s): BA 362.

BA 464. Bank & Financial Services Management. 3 Hours.
This course will introduce students to the specific issues in the financial management of a banking firm and, to a smaller degree, of other financial intermediaries. Emphasis will be on products, roles, regulatory framework, and risk management. Prerequisite(s): BA 362.

BA 465. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 470. Life and Health Insurance. 3 Hours.
This course is intended to provide background knowledge for personal application and for those responsible for administering benefit plans for employees; it provides the necessary information required to pass the State of Maine license examination. Prerequisite(s): BA 271.

BA 471. Casualty and Property Insurance. 3 Hours.
The first part of the course introduces the basics of the entire insurance business, including a summary of legal aspects, types of insurers and principles of reinsurance; next, each type of insurance is studied in detail. Topics covered are fire, consequential loss, inland marine, ocean marine, theft and surety, liability and miscellaneous property insurance. Prerequisite(s): BA 271.

BA 473. Real Estate Appraisal. 3 Hours.
This course familiarizes the student with the foundation and principles of the appraisal process. The student will become familiar with the three approaches to value. Site valuation, construction costs, depreciation; comparables selection and adjustments; rental multipliers; and reconciliation will be discussed. The student will focus on the elements making up the standards for professional appraisal practice. These elements, i.e., Definitions, Rules, Standards and Standard Rules, Statements and advisory opinions are discussed in detail along with the philosophy and history of USPAP. Prerequisite(s): BA 401 and MS 132 and BA 362.

BA 475. E-Business and E-Commerce for Managers. 3 Hours.
This course teaches the basic e-business and e-commerce theory. The students will apply the theory through the development of a website for the prime purpose of marketing a product or service or idea online.

BA 490. International Business. 3 Hours.
This course covers the international dimensions of managerial decision-making including: world economies, international trade theories, tariffs, quotas and other trade issues, global strategic planning, cross-cultural management, international market entry, international human resource management, international organization strategy, international logistics, import/export operations, currency exchange, international financial management. Current developments in global economic and business are emphasized; students participate in a computerized simulation throughout the semester. Prerequisite(s): BA 310 and BA 321.

BA 495. Senior Management Project. 3 Hours.
An experiential course that gives seniors the opportunity to apply what they have learned in class to a real business situation. Prerequisite(s): College Level=Senior.
BA 496. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 497. Business and Culture Travel Study Course. 3 Hours.
Business and Culture Travel Study course is designed to expose students to economies across the world. During the course students will travel to important commercial, cultural and governmental cities. Through a combination of readings students will be exposed to 20th and 21st century history, economics, culture political and business philosophy. The course will also involve visits to major multinational corporations, cultural activities and lectures from University business faculty when available. The course will also have two pre-trip class sessions with readings and one post course session to wrap up the experience and discuss the student travel logs.

BA 498. Business Seminar. 3 Hours.
This honors course requires the study of various business problems under the supervision of members of the Department of Business Administration. A paper is required. An oral examination is scheduled as the final examination in the course. Prerequisite(s): College Level=Senior.

BA 499. Topic/. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 600. Research Methods in Business and Education. 3 Hours.
This course is designed for beginning graduate students who have little or no formal preparation in those areas of research and problem-solving essential for a comprehensive study of business and education at the graduate level. Emphasis is placed on the identification of common problem types and the selection and use of appropriate methods of analysis (primarily statistical in nature).

BA 601. Managerial Economics. 3 Hours.
This course begins with a comprehensive overview of micro- and macroeconomic concepts with the aim of developing within students a picture of how business and nonprofit organizations relate to the economy as a whole. The course then focuses on practical applications of economic analysis to problems of concern to managers. Case studies and projects are used to demonstrate the methods used to determine economic feasibility and cost-effectiveness of products, services, and programs.

BA 602. Managerial Accounting. 3 Hours.
This is an accelerated accounting course for those with little or no formal accounting background. The emphasis is on concepts which managers need to know in order to be effective. Topics include the preparation and interpretation of financial statements, cost planning and control, cost-volume-profit analysis, decision-making models, master budgeting and variances, and evaluation of capital projects.

BA 605. Management Communications. 3 Hours.
This is an advanced communications course that builds upon a student's experience and prior undergraduate coursework in writing and oral communications. Topics include: advanced business writing, use of visual materials, selection of secondary sources of information, report preparation, and presentations to small and large groups.

BA 611. Organizational Behavior. 3 Hours.
This course surveys the major field of management, examining structures and processes on both group and organizational levels. Both traditional and contemporary theories are analyzed and applied to business operations.

BA 620. Financial Management. 3 Hours.
Topics considered include financial planning, operating and capital budgets, cash flow, purchasing and accounting procedures, the sources and uses of corporate and institutional funds, and financial analysis for evaluation and control. Students develop projects specifically related to their needs in educational administration, small business, or corporate management. Prerequisite(s): BA 602 or AC 301.

BA 621. Marketing Management. 3 Hours.
This course focuses on complex problems facing decision-makers in the marketing of goods and services. Emphasis is placed on the decision-making process, including assessment of the social, economic, and political environment in which the organization operates; problem definition; development and evaluation of alternatives, and the implementation of the best alternative. Cases in advertising, sales, marketing research, and strategic marketing management provide practice in marketing analysis and decision-making.

BA 622. Production Management. 3 Hours.
Emphasis is placed on the use of quantitative techniques for solving manufacturing problems. The student is given an opportunity to practice mathematical model-building and manipulation. Other topics considered include queuing system design, plant layout, statistical quality control, inventory modeling, Program Evaluation and Review Technique (PERT), linear and nonlinear programming, and control theory.

BA 625. Global Strategic Management. 3 Hours.
This course focuses on the strategic challenges and opportunities confronting firms that undertake to create value and to compete in the global economy. Successful companies develop strategies for doing business in emerging markets that are different from those they use at home and often find novel ways of implementing them too. The class will make extensive use of case analysis and discussion to evaluate and understand the strategic issues that confront firms operating internationally, as well as to appreciate the importance of values and ethics in organization decisions and actions. In this course we will probe the workings of business strategies in transition and emerging economies, gain an understanding of the strategies of local firms, and analyze the international success and failure of companies. Prerequisite(s): BA 600 and 15 Credits From Range [BA 600 To BA 799].

BA 626. Accounting in Planning, Budgeting and Control. 3 Hours.
This course examines the role of accounting in the planning, budgeting, and control process of a business in a dynamic environment. The integration of measuring and analyzing (planning), short-term decisions and managing organizations (control), and preparing various budgets (budgeting) are emphasized. This course is designed as a continuation of BA602 Managerial Accounting. Numerical problems, as well as case studies, are utilized as methods of study. Prerequisite(s): BA 602 or AC 211.

BA 627. Investment Analysis. 3 Hours.
This course provides a detailed description of securities market organization and approaches to investment opportunities. Students will examine theories used in the valuation of financial securities and employ projects and applications to develop a real world understanding of portfolio management. Prerequisite(s): BA 602.
BA 628. New Venture Planning and Management. 3 Hours.
This course deals with the foundation of new ventures and related aspects of managing the small growing enterprise. Techniques taught in this course are equally applicable to small businesses, nonprofit organizations, and new ventures of larger organizations. Topics include: use of scarce resources, such as money, talent and technological expertise; identification of environmental threats and opportunities; and operational considerations such as organizational structure, legal requirements, financing, and accounting procedures.

BA 641. Human Resource Management. 3 Hours.
This course explores human resource management as an integrated process of planning and control designed to achieve high employee productivity and job satisfaction. The course focuses on the essential functions of human resource management as they apply both to the general supervisory responsibilities of every manager and to the specific operations of the personnel department.

BA 642. Leadership in Business and Professions. 3 Hours.
This course is designed to provide graduate management students with a comprehensive review of the essentials for effective leadership. It focuses on the identification of basic leadership styles, explores the theoretical and practical findings of research in leadership development, and seeks to synthesize the student’s leadership style with the most effective working models of leadership.

BA 643. Strategic Change Management. 3 Hours.
Strategic Change Management focuses on the skills required to deal effectively with organizational change. The course addresses the pressures in the business environment that make change a fundamental reality for managers. Particular attention is paid to change arising from public policy initiatives that impinge on business. The course then examines the manager as change agent responsible for initiating innovation and explores both the personal skills required in the role of change agent and the tools and techniques available to support the manager in that role. The course also examines the problems and opportunities of those who are the recipients of change in an organization and the skills required to cope effectively with that situation.

BA 644. The Legal Environment of Business. 3 Hours.
This course will provide an overview of the important aspects of business law for executives, managers, accountants, and other professionals. The areas of law covered include but are not limited to administrative, contract, corporate and other business organizations, employment relations, real estate, taxes, and UCC sales.

BA 646. Current Issues in Business. 3 Hours.
This course, conducted in seminar fashion, draws on current literature to analyze contemporary and emerging issues facing management in the late twentieth century. Content will vary.

BA 700. Health Care Management. 3 Hours.
This course examines management problems and policy-making in the health care industry. Several areas are considered including: (1) the functions of the health care manager, (2) the types of health care delivery systems, (3) the administration of hospitals, (4) the financing of medical care, and (5) the role of government. Through readings, lectures, discussions, and projects, students clarify their own role in the delivery of health services. The course regularly draws on experts in health planning and health care administration.

BA 701. Legal Environment of Health Care Management. 3 Hours.
The course provides a foundation in the legal and regulatory framework in which health care institutions operate. Students will also examine the legal issues confronting health care managers including director and administrative liability, malpractice, negligence, patient rights and confidentiality, licensure requirements, and the like.

BA 702. Health Care Economics. 3 Hours.
In this course, the principles and tools of economic decision-making are applied to management in the health care sector. The course explores the application to health care management functions of such concepts and processes as supply and demand, resource allocation and utilization, costing and pricing, resource productivity, forecasting and economic aspects of planning, and utilization review. While the principal emphasis in the course is on micro-economic analysis, some consideration is also given to an economic analysis of public policy alternatives for the delivery of health care service. Prerequisite(s): BA 601.

BA 703. Financial Management in Healthcare Organizations. 3 Hours.
This course applies the perspectives and tools of financial analysis to the management of health care organizations and evaluation of organizational performance. Topics covered include capital budgeting, sources of operating revenue, management of cash and inventories, risk analysis and forecasting. Particular attention is paid to cost containment regulatory strategies and their implications for financial planning and management. Prerequisite(s): BA 602.

BA 704. Managing Quality in Healthcare. 3 Hours.
This course examines methods and tools for managing quality in health facilities, physician practices, managed care, and public health. Topics include developments in quality assurance and improvement, utilization review, risk management, and patient satisfaction.

BA 705. Global Perspectives in Healthcare. 3 Hours.
This course examines the social, political, and economic aspects of global healthcare issues. Through a comparative analysis of the health systems of multiple nations, students will compare theories of health policy and priorities, healthcare system facilities, workforce, technology, cost, quality, and access. The emphasis of the course will be on health management strategies used in different countries and healthcare systems to mobilize, allocate, and maintain resources to improve the healthcare status and delivery systems.

BA 710. Law & Ethics for Non-Profit Organizations. 3 Hours.
Non-profit managers and supervisors are held to a higher standard of ethical behavior due to the nature of their funding sources and their mission. This course is designed to develop in the student a basic understanding of the laws governing non-profit organizations, the practical applications of these laws and the ethics that are demanded of non-profit managers.

BA 711. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics covered include: leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 712. Strategic Marketing for Nonprofit Organizations. 3 Hours.
This course applies the concepts of marketing and strategy to the management of non-profit organizations. Through class lectures, discussion, case studies, and applied projects, students will build an understanding of the marketing process in the non-profit environment in order to be able to design, implement, and evaluate an organization’s approach to marketing and strategic positioning.
BA 713. Fundraising. 3 Hours.
This course takes a systems approach to the process of fund-raising. Topics covered include: donor cultivation, use of the annual fund, major gifts, corporate giving, and grant writing.

BA 720. Advanced Sales and Marketing in Hospitality. 3 Hours.
This course focuses on difficult problems and issues facing sales and marketing personnel in the hospitality industry. Students will make use of case studies in order to develop their decision-making process including the use of marketing research and analysis.

BA 721. Convention Planning and Events Planning. 3 Hours.
This course focuses on the rapidly growing convention sales and events planning industries. The student will learn how to design, plan, market and manage meetings and events.

BA 722. Advanced Front Office Operations. 3 Hours.
This course begins with detailed introduction about numerous aspects of front office operations and management. The next section of the course examines the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.

BA 723. Legal Issues in Hospitality Management. 3 Hours.
This course will provide the student an overview of the important aspects of Hospitality Law for Managers, and other professionals. Some of the areas of study include and are not limited to Torts, Products Liability, Constitutional Law and Criminal Law and many other subjects.

BA 724. Managing Service. 3 Hours.
This course begins with an introduction to the framework for providing quality service to customers and guests. Next we will discuss the needs of the customer/guest and proceed to develop our menu and/or product accordingly. Finally, we will learn how management and staff create loyal customers and guests by delivering service that exceeds their expectations.

BA 729. Hospitality Graduate Directed Practicum. 3 Hours.
Each student will find, will choose or will be provided with an internship site. The site chosen will be based on; and interview conducted by the management of the internship site and the student's preference of location based on that available. The Coordinator of Hospitality Management will have the final decision on all internship site placements. The Coordinator's decision will be based on his or her interaction with the student during previous course work, his or her understanding of the student and the internship properties requirements. Every consideration will be given to the student's personal preferences with regard to location and types of property. However, the student's preferences will not be the only consideration for placement. Prerequisite(s): BA 720 and BA 722 and BA 724.

BA 731. Business and Information Technology. 3 Hours.
This graduate course approaches Information Technology from the perspective of information consumers as opposed to technology implementers. During this course, students will examine various technologies and their application within modern organizations. The course has two primary goals. (1) The course will explain information technologies in non-technical terms so that students can evaluate a technology's effectiveness relative to any existing alternatives and the overall organizational needs. (2) This course should increase student awareness regarding how they interact with technology in a personal or business setting. Business leaders are constantly bombarded with technology. This course addresses the need to sift through that information in an intelligent manner and make smart business decisions.

BA 741. Staffing & Selection. 3 Hours.
A source of competitive advantage for any organization is its talent. The effectiveness of an organization depends on the performance of each individual in that organization. Hence, one of the most important human resource functions is that of staffing the organization. This course is essential for HR professionals who are responsible for recruiting, screening, hiring, promoting, and outplacing employees. It is also very crucial for any line managers, supervisors, team leaders, and hiring managers who are involved in recruiting, making promotions, succession, or any other workforce decisions. An examination of the scientific, legal, and administrative issues associated with the recruitment, selection, employment and retention of individuals by organizations augments the study. Specific attention will be given to the current challenges of an increasingly dynamic workplace and diverse workforce.

BA 742. Training & Development. 3 Hours.
The effective training and development of human resources creates tremendous and unique value for an organization. This course examines how organizations can develop and manage the talents and skillset of human capital. The course explores topics such as training needs analysis, formulating training objectives, and the design, implementation, and evaluation of training and development programs.

BA 745. Innovative Global Strategy. 3 Hours.
This course will build students' awareness of the challenges that must be addressed and the opportunities that may be present when competing in the global marketplace. The course focuses on how firms apply innovative strategies to create a sustainable competitive advantage in the global arena. Course content will be drawn from readings, case analysis, online content and discussions. The course requires students to analyze and understand real world examples of both successful and unsuccessful global strategy implementation.

BA 750. Fundamentals of Risk Management. 3 Hours.
This course explores the fundamentals of risk management. After discussion of the importance of risk and the rationale for its management in organizations, the remainder of the course will analyze the process of and methods for managing risk.

BA 751. Employee Benefits. 3 Hours.
This course explores the nature and operation of employer-sponsored benefit plans. Emphasis is placed on plan design, administration, funding, and regulation. The course also addresses organizational characteristics, benefit structure, and pricing of risk transfer schemes for groups.

BA 752. Crisis Management. 3 Hours.
Crisis Management can be defined as a communications response to an event that has a negative impact on an audience - the public, customers/clients, employees, shareholders, etc. Examples of such events could include tainted food, a corporate leak, a political scandal, an entertainment or athletic scandal, damaged products that cause or could potentially cause life-threatening situations, natural disasters, terrorism, and financial disasters. In this course, students will analyze and critique high-profile cases and learn how to effectively respond to crises.

BA 753. Corporate Risk Management. 3 Hours.
Corporate risk is analyzed through the lens of enterprise risk management. This course explores the operational and financial risks faced by firms and the study of various methods of handling these risks.

BA 754. Strategic Selling. 3 Hours.
The focus of this course is on key, strategic customer selling approaches. The process of sales planning and strategy development for these types of customers will be emphasized. The objective of this course is to understand and execute sales strategies for managing major and large customers.
BA 760. Technology & Innovation. 3 Hours.
BA 760 Technology & Innovation offers a research approach to identifying, analyzing, and creating technological advantage in nascent and mature industries. Students will apply the methodologies of innovation and discovery to business settings and markets, seeking to create competitive advantage and achieve market transformation through strategic initiatives that redefine consumer expectations and industry practices and reframe organizations to embrace innovative practices and processes.

BA 761. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 762. Groupthink. 3 Hours.
This course explores the origin of groupthink. Groupthink is a term first used by social psychologist Irving L. Janis (1972) that refers to a psychological phenomenon in which people strive for consensus within a group. This course explores groupthink as a phenomenon where people set aside their own personal beliefs or adopt the opinion of the rest of the group.

BA 763. Biotechnology & Innovation: Intellectual Property. 3 Hours.
This course focuses on the protection of proprietary and intellectual rights in inventions, writings, creative works, software, industry trade secrets, industry trade designations, and other intellectual assets at the international, Federal, and State Levels. The course will give special consideration to the emergence of new areas of patent law in Biotechnology and Pharmaceutical fields, examining not only the patentability of intellectual assets, but also the discovery process, particularly in collaborative environments involving multiple organizations and institutions, and the qualifying distinctions between collaborative and competitive research.

BA 790. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.*

BA 791. Professional Project. 3-6 Hours.
This course is used to award graduate credit for prior learning and educational experience obtained outside of the traditional classroom. Through the preparation of a professional project, students provide formal documentation of the specific graduate-level learning competencies which they have acquired through prior experience. A maximum of six (6) credit hours may be earned.

BA 792. Graduate Internship I. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 793. Graduate Internship II. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization’s supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 792.

BA 794. Graduate Internship III. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.

BA 796. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 798. Thesis. 6 Hours.
The thesis may be library-oriented research with extensive reliance on documents and a relatively limited amount of primary field research, or it may be action-oriented field research with relevant documentation from the literature. The title of the thesis topic must be filed with the graduate committee. A student, with the approval of his/her advisory committee, may register for the thesis after completion of twenty-four (24) semester hours.

BA 799. Topic/. 3 Hours.
Students work together in a seminar setting under the direction of a member of the graduate faculty. The content of the seminar will vary according to the interests of students and faculty involved.

B.S. Business Administration - General Business

The program objectives for the B.S. Business Administration degree are:

- To explain the major concepts in the functional areas of accounting, marketing, finance and management.
- To evaluate the legal, social and economic environments of business
- To describe the global environment of business
- To apply ethical decision making skills and integrity in an ever-changing, global environment
- To demonstrate oral and written communication skills, appropriate to the profession
- To apply critical problem solving and professional skills in an experiential learning environment

The goal of this program is to prepare business leaders who are effective general managers with expertise in managerial communications, decision making and planning, finance, management, and marketing.

Total Hours: 122

*** Credit may not be required for degree completion.

### Courses

**BA 101. Introduction to Business. 3 Hours.**
This course introduces students to the general nature of functional areas in business such as marketing, management, accounting, finance, research and development, and risk management. The relationship between business, the government, the economy, and the environment is examined.

**BA 111. Economic Geography. 3 Hours.**
This course is an introduction to the principles of economic geography, ranging from physical and biological geography to cultural and political factors. The decision making processes, both local and global, for different types of service oriented, manufacturing, transportation, and resource based businesses will be examined. The relationship of natural resources, population, and culture, and how such factors affect economic activity will be emphasized.
BA 201. Business Law I. 3 Hours.
This course provides students with a basic knowledge of the law of contracts, personal property and real property.

BA 202. Business Law II. 3 Hours.
This course is intended to augment BA 201 with in depth analysis of the law in Contracts, UCC, Corporations, Principal Agency Law, Advanced Tort Law, Environmental Law, Real Property Law, Securities Law and Employment Law.

BA 204. Franchise Formation and Management. 3 Hours.
This class will discuss franchise formation and management with particular emphasis on the discovery and evaluation of the franchisor and the feasibility of entrepreneurs converting an existing business into a franchise chain or creating and selling new franchises, domestic and international. Franchise accounting and finance (borrowing or leveraging) will be covered, as well as, taking the franchise to the stock market or going public (IPO) and raising investment capital. Prerequisite(s): BA 401.

BA 205. Real Estate Law. 3 Hours.
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

BA 210. Economics Overview for Non-Business Majors. 3 Hours.
This is an overview of microeconomic and macroeconomic concepts for non-business majors. It will include an introduction to American capitalism including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of competitive firms. It will also be an introduction to national income accounts, unemployment, inflation, government fiscal policy and monetary policy.

BA 211. Microeconomics. 3 Hours.
This is an introduction to American capitalism and microeconomic concepts including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of purely and impurely competitive firms.

BA 212. Macroeconomics. 3 Hours.
This is an introduction to macroeconomics in the American economy: national income accounts, unemployment, inflation, government fiscal policy, monetary policy and economic growth.

BA 220. Real Estate Principles and Practices. 3 Hours.
This course will provide students with methods of analyzing acquisition and retention of Real Estate. Also, there will be a focus on the skills and techniques required to operate a real estate business, including trust accounts, risk management, and property management.

BA 243. The Business of Innovation. 3 Hours.
This is a cross-disciplinary class that will introduce students to the Lean Startup Scientific Method for developing and commercializing ideas for new ventures or else innovating and developing new projects or business models within existing companies. Topics include marketplace innovations, technology and science based innovations, marketplace hypothesis development and testing, frugal and agile engineering, business models, intellectual property, prototyping, exit strategies, and fundraising. Lab component is integrated within module deliverables.

BA 271. Risk Management. 3 Hours.
A study is made of the risks encountered by individuals and business firms. A presentation is made of the basic principles and institutions, which have been developed in risk management. This material is treated primarily from the consumer point of view.

BA 299. Topic/. 1 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 300. Business Presentations. 3 Hours.
Communication is a vital function of any business. Managers at all levels must be able to communicate effectively to advance their career and ensure the success of their organization. This course will give students a working knowledge of how to create, brief, and present information across the organizational communications spectrum. Students will learn how to think critically and apply problem solving skills across a variety of historical and contemporary business topics. Students will learn how to collect, analyze, synthesize, and present information in a professional manner to assorted audiences in different venues. The foundational skill set developed in this course is the ability for students to articulate their ideas in a professional manner within a variety of business settings. Prerequisite(s): EH 124.

BA 302. Business Ethics. 3 Hours.
This course is designed to raise a moral consciousness and sensitivity within the various disciplines of the business curriculum. The disciplines focused on here are business, accounting, marketing, multinational corporations, and those areas of human resource management inclusive of diversity in the workplace within the context of environmental and social responsibility.

BA 306. Franchise Law. 3 Hours.
This is a law class that analyzes all the issues of Franchise Law with a particular emphasis on Contracts, Principal/Agent Franchise Relations, Corporate Formation of Franchises, and Securities Law. Prerequisite(s): BA 201 and BA 202.

BA 310. Organization and Management. 3 Hours.
This course focuses on how to design organization systems and effectively manage them. Students completing the course should understand the universal process of management and key terminology in the language of management. Students are encouraged conceptually to blend contributions from the various schools of management thought into an integrated perspective of what managers do and why.

BA 311. Human Resource Management. 3 Hours.
This course addresses traditional personnel administration issues. Emphasis in the course is on how to manage the major human resource administration functions of job design, reward system design, staffing, training and performance control, to achieve maximum employee performance and satisfaction. Prerequisite(s): BA 310 or ( Major=BS Criminal Justice or Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Paralegal or Major=BS English - Prelaw).

BA 312. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics include leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.
BA 321. Marketing Principles. 3 Hours.
The course covers the language and issues of marketing with an emphasis on developing responsive marketing strategies that meet customer needs. The course focuses on marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing. Other topics will be incorporated into the course including the external environment (focus on integrative topics within marketing, such as economics, politics, government, and nature), marketing research, international/global marketing with relevance to cultural diversity, ethics, the impact of technology on marketing, and careers in marketing.

BA 334. International Economics. 3 Hours.
This applied economics course will emphasize the use of cases to study topics such as comparative advantage, treaties, tariffs, non-tariff trade barriers, and trade blocks among developed and developing nations. Prerequisite(s): BA 211 and BA 212.

BA 344. Personal Financial Planning. 3 Hours.
This course provides comprehensive coverage of personal financial planning in the areas of money management, axes, consumer credit, housing and other consumer decisions, legal protection, insurance, retirement planning, and estate planning. Prerequisite(s): MS 141 or MS 111 or MS 242 or MS 180 or MS 181.

BA 351. Internship. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 352. Internship II. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 353. Internship III. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 354. Internship IV. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 355. Internship V. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 351 and BA 352 and BA 353 and BA 354.

BA 362. Financial Management I. 3 Hours.
The foundation finance course covers basic personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management. Students are expected to become proficient in financial analysis of a corporation and in various aspects of corporate financial management. Prerequisite(s): AC 121 and (AC 122 or AC 211) and BA 211 and (MS 141 or MS 111 or MS 242 or MS 180 or MS 181).

BA 364. Financial Management II. 3 Hours.
The course is a continuation of Financial Management I and will cover such topics as real options, sensitivity, scenario and break-even analysis, basic issues regarding stocks and bonds, risk/return and cost of capital, capital structure and limits to the use of debt. Prerequisite(s): BA 362.

BA 375. Supply Chain Management. 3 Hours.
This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategies to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.

BA 401. Managerial Economics. 3 Hours.
This course is designed to close the gap between economic theory and business application. It reviews traditional analysis and shows its application to the understanding and solution of economic problems of the firm and industry. Prerequisite(s): BA 211 and BA 212.

BA 411. Organizational Behavior. 3 Hours.
This course is highly experiential in its approach to helping students understand and appreciate why people behave the way they do in an organizational context. Students learn how to manage employee behavior by analysis of real world phenomena and by application of principles in the areas of human perception and communication, leadership and motivation, small group dynamics, organizational culture, and organizational change. Prerequisite(s): BA 310.

BA 413. Operations Management. 3 Hours.
Quantitative model building and manipulation are a means of analyzing and synthesizing the elements of productions management. Both deterministic and stochastic modeling are emphasized in the areas of work systems design, queuing, PERT, SPC, inventory control, forecasting, and linear and nonlinear programming. Prerequisite(s): BA 310 and MS 132.

BA 414. Business Strategy. 3 Hours.
This Business Administration senior seminar focuses on decision making at the executive management level, the formulation of strategy, and its implementation in the organization. The course will employ case studies, laboratory simulation techniques, and computer spreadsheet analysis. Prerequisite(s): College Level=Senior.
BA 421. Integrated Marketing Communication and Advertising. 3 Hours.
An introduction into the world of advertising: Students will plan and
design Ad campaigns, write copy and design layouts for the different
types/forms of advertising. The students will work with local companies
and assist them in redesign of their ad campaigns. Prerequisite(s):
BA 321.

BA 422. Sales and Sales Management. 3 Hours.
This course provides students with the fundamentals of good
salesmanship and sales management. Prior to studying management
principles students practice sales techniques in simulations. Cases
are used to illustrate and evaluate principles of sales management.
Prerequisite(s): BA 321.

BA 423. Retail Management. 3 Hours.
The purpose of this course is to provide students with an understanding
of the fundamentals of successful retail operations. Topics included
are the market concept in retailing, factors of area and market analysis,
and aspects of organizational structure, layout, and personnel planning.
Also covered are methods of pricing, merchandising planning, inventory,
expense control and sales promotion techniques. Prerequisite(s): BA 321.

BA 424. Marketing Research. 3 Hours.
The basic research concepts and practices as applied to the analysis
of marketing problems are examined. Topics include sources of data,
collecting data, sampling, questionnaire construction, tabulating data,
and report preparation; computerized statistical software is used.
Prerequisite(s): BA 321 and MS 132.

BA 425. Marketing Management. 3 Hours.
This is the capstone course for marketing majors. Students apply
concepts learned in other courses to marketing problems of business
and nonprofit organizations. Cases and business simulations are used
to teach decision-making in the complex environment of business. A
complete marketing plan for a simulated company of the student's choice
summarizes the student's knowledge of the field. Prerequisite(s): BA 321.

BA 426. Real Estate Market, Research and Analysis. 3 Hours.
This course will discuss market research, real estate sales, property
valuations and analysis. Students will examine market research reports
to gain insight into product and market trends, opportunities, projections,
and growth in the Maine, the US and global real estate markets.
Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 427. Franchise Market Research and Analysis. 3 Hours.
This class will focus on analysis of market demographics, feasibility
studies, product pricing, promotion and distribution, franchise broker
contacts, extrapolation of sales and expenses, and the projection of costs
and net profits, emerging markets and capital expansion. Prerequisite(s):
BA 401 and MS 132 and MS 232 and BA 362.

BA 428. Strategic Selling. 3 Hours.
This course builds on the fundamentals of selling. The student
will understand how to advance sales in light of complex business
environments consisting of layers of buyers, decision makers and those
who influence purchasing decisions. A strategic account planning
process will be analyzed and applied to real companies by way of case
studies. The art and skill of negotiating will be studied and learned
through role play. Prerequisite(s): BA 422.

BA 434. International Finance. 3 Hours.
The factors affecting exchange rates are discussed, as well as different
types of exchange rate systems and how governments attempt to
influence exchange rates. The relationships among interest rate parity,
purchasing power parity, the Fisher effect and International Fisher effect
and exchange rates are analyzed. Students learn how currency futures,
currency options and money market hedges are used to hedge exchange
rate risk. Prerequisite(s): BA 362.

BA 437. International Marketing. 3 Hours.
The basics of international marketing will be taught including the
foundations of culture, cultural understanding, business customs and
practices in global marketing, assessing global markets, and developing
international marketing strategy. Prerequisite(s): BA 321.

BA 438. Export-Import Procedures. 3 Hours.
The basics of export-import procedures will be taught including
justification for exporting/importing, market planning methods, selection
of appropriate marketing mix variables, and regulation. Prerequisite(s):
BA 321.

BA 439. International Franchising Management. 3 Hours.
This course will focus on international expansion of franchises, learning
the culture, monetary exchanges, imports and exports, local international
market analysis and much more. Prerequisite(s): BA 204 and BA 306
and BA 427.

BA 440. Small Business Management I. 3 Hours.
This course supplies prospective and current small business managers
with the essential concepts of starting and operating small businesses.
Topics covered include: environment and management of small business
enterprise, problems in starting small businesses, financial
and administrative control, and management of business operations.
Particular emphasis is placed on the interrelated nature of the
components, particularly as they affect the financial picture of the firm.
Through a lecture and discussion format, students are expected to share
their own experiences in small businesses with their fellow students.
Prerequisite(s): College Level=Senior or College Level=Junior.

BA 441. Entrepreneurship I- New Venture Development. 3 Hours.
Students will be introduced to the practical application of classic
and contemporary business theory as it applies to the early stages
of entrepreneurship and intrapreneurship, opportunity recognition,
innovation, and new venture development. Course topics include types
of entrepreneurs, opportunity recognition, marketing, cash and other
resource requirements, financial statements, planning, franchising,
intellectual property, success/failure/resilience, and growth. Class
will use text, cases, articles, internet sources, and guest lecturers.
Prerequisite(s): College Level=Senior or College Level=Junior.

BA 442. Applied Small Business Management. 3 Hours.
This is an advanced course which focuses on real problems in Small
Business Management, using the case approach. Cases are drawn from
the text, from actual local small businesses, and from the practical
experience of students in the class. Prerequisite(s): College Level=Junior
or College Level=Senior.

BA 443. Entrepreneurship II: Business Plans. 3 Hours.
This class builds on BA 441, New Venture Development. The focus of this
class is on the early stages of formalizing and growing a venture. Topics
include business plan writing, fund raising and cash flow, measuring
and conveying financial position, core strategy development and
competitive advantage, sustainability, international entrepreneurship,
supply chain, growth, and exit. Prerequisite(s): College Level=Junior
or College Level=Senior.
BA 460. Investments. 3 Hours.
Beginning with an introduction to financial markets and investment instruments, topics include stock and bond quotations and trading procedures, rate of return, margin trading, stock indexes, stock and bond valuation, risk and return, portfolio theory, active and passive portfolio management, and investment performance evaluation. Prerequisite(s): BA 362.

BA 464. Bank & Financial Services Management. 3 Hours.
This course will introduce students to the specific issues in the financial management of a banking firm and, to a smaller degree, of other financial intermediaries. Emphasis will be on products, roles, regulatory framework, and risk management. Prerequisite(s): BA 362.

BA 465. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 471. Life and Health Insurance. 3 Hours.
This course is intended to provide background knowledge for personal application and for those responsible for administering benefit plans for employees; it provides the necessary information required to pass the State of Maine license examination. Prerequisite(s): BA 271.

BA 472. Casualty and Property Insurance. 3 Hours.
The first part of the course introduces the basics of the entire insurance business, including a summary of legal aspects, types of insurers and principles of reinsurance; next, each type of insurance is studied in detail. Topics covered are fire, consequential loss, inland marine, ocean marine, theft and surety, liability and miscellaneous property insurance. Prerequisite(s): BA 271.

BA 473. Real Estate Appraisal. 3 Hours.
This course familiarizes the student with the foundation and principles of the appraisal process. The student will become familiar with the three approaches to value. Site valuation, construction costs, depreciation; comparables selection and adjustments; rental multipliers; and reconciliation will be discussed. The student will focus on the elements making up the standards for professional appraisal practice. These elements, i.e., Definitions, Rules, Standards and Standard Rules, Statements and advisory opinions are discussed in detail along with the philosophy and history of USPAP. Prerequisite(s): BA 401 and MS 132 and BA 362.

BA 475. E-Business and E-Commerce for Managers. 3 Hours.
This course teaches the basic e-business and e-commerce theory. The students will apply the theory through the development of a website for the prime purpose of marketing a product or service or idea online.

BA 490. International Business. 3 Hours.
This course covers the international dimensions of managerial decision-making including: world economies, international trade theories, tariffs, quotas and other trade issues, global strategic planning, cross-cultural management, international market entry, international human resource management, international organization strategy, international logistics, import/export operations, currency exchange, international financial management. Current developments in global economic and business are emphasized; students participate in a computerized simulation throughout the semester. Prerequisite(s): BA 310 and BA 321.

BA 495. Senior Management Project. 3 Hours.
An experiential course that gives seniors the opportunity to apply what they have learned in class to a real business situation. Prerequisite(s): College Level=Senior.

BA 496. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 497. Business and Culture Travel Study Course. 3 Hours.
Business and Culture Travel Study course is designed to expose students to economies across the world. During the course students will travel to important commercial, cultural and governmental cities. Through a combination of readings students will be exposed to 20th and 21st century history, economics, culture political and business philosophy. The course will also involve visits to major multinational corporations, cultural activities and lectures from University business faculty when available. The course will also have two pre-trip class sessions with readings and one post course session to wrap up the experience and discuss the student travel logs.

BA 498. Business Seminar. 3 Hours.
This honors course requires the study of various business problems under the supervision of members of the Department of Business Administration. A paper is required. An oral examination is scheduled as the final examination in the course. Prerequisite(s): College Level=Senior.

BA 499. Topic/. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 600. Research Methods in Business and Education. 3 Hours.
This course is designed for beginning graduate students who have little or no formal preparation in those areas of research and problem-solving essential for a comprehensive study of business and education at the graduate level. Emphasis is placed on the identification of common problem types and the selection and use of appropriate methods of analysis (primarily statistical in nature).

BA 601. Managerial Economics. 3 Hours.
This course begins with a comprehensive overview of micro- and macroeconomic concepts with the aim of developing within students a picture of how business and nonprofit organizations relate to the economy as a whole. The course then focuses on practical applications of economic analysis to problems of concern to managers. Case studies and projects are used to demonstrate the methods used to determine economic feasibility and cost-effectiveness of products, services, and programs.

BA 602. Managerial Accounting. 3 Hours.
This is an accelerated accounting course for those with little or no formal accounting background. The emphasis is on concepts which managers need to know in order to be effective. Topics include the preparation and interpretation of financial statements, cost planning and control, cost-volume-profit analysis, decision-making models, master budgeting and variances, and evaluation of capital projects.
BA 605. Management Communications. 3 Hours.
This is an advanced communications course that builds upon a student's experience and prior undergraduate coursework in writing and oral communications. Topics include: advanced business writing, use of visual materials, selection of secondary sources of information, report preparation, and presentations to small and large groups.

BA 611. Organizational Behavior. 3 Hours.
This course surveys the major field of management, examining structures and processes on both group and organizational levels. Both traditional and contemporary theories are analyzed and applied to business operations.

BA 620. Financial Management. 3 Hours.
Topics considered include financial planning, operating and capital budgets, cash flow, purchasing and accounting procedures, the sources and uses of corporate and institutional funds, and financial analysis for evaluation and control. Students develop projects specifically related to their needs in educational administration, small business, or corporate management. Prerequisite(s): BA 602 or AC 301.

BA 621. Marketing Management. 3 Hours.
This course focuses on complex problems facing decision-makers in the marketing of goods and services. Emphasis is placed on the decision-making process, including assessment of the social, economic, and political environment in which the organization operates; problem definition; development and evaluation of alternatives, and the implementation of the best alternative. Cases in advertising, sales, marketing research, and strategic marketing management provide practice in marketing analysis and decision-making.

BA 622. Production Management. 3 Hours.
Emphasis is placed on the use of quantitative techniques for solving manufacturing problems. The student is given an opportunity to practice mathematical model-building and manipulation. Other topics considered include queuing system design, plant layout, statistical quality control, inventory modeling, Program Evaluation and Review Technique (PERT), linear and nonlinear programming, and control theory.

BA 625. Global Strategic Management. 3 Hours.
This course focuses on the strategic challenges and opportunities confronting firms that undertake to create value and to compete in the global economy. Successful companies develop strategies for doing business in emerging markets that are different from those they use at home and often find novel ways of implementing them too. The class will make extensive use of case analysis and discussion to evaluate and understand the strategic issues that confront firms operating internationally, as well as to appreciate the importance of values and ethics in organization decisions and actions. In this course we will probe the workings of business strategies in transition and emerging economies, gain an understanding of the strategies of local firms, and analyze the international success and failure of companies. Prerequisite(s): BA 600 and 15 Credits From Range [BA 600 To BA 799].

BA 626. Accounting in Planning, Budgeting and Control. 3 Hours.
This course examines the role of accounting in the planning, budgeting, and control process of a business in a dynamic environment. The integration of measuring and analyzing (planning), short-term decisions and managing organizations (control), and preparing various budgets (budgeting) are emphasized. This course is designed as a continuation of BA602 Managerial Accounting. Numerical problems, as well as case studies, are utilized as methods of study. Prerequisite(s): BA 602 or AC 211.

BA 627. Investment Analysis. 3 Hours.
This course provides a detailed description of securities market organization and approaches to investment opportunities. Students will examine theories used in the valuation of financial securities and employ projects and applications to develop a real world understanding of portfolio management. Prerequisite(s): BA 602.

BA 628. New Venture Planning and Management. 3 Hours.
This course deals with the foundation of new ventures and related aspects of managing the small growing enterprise. Techniques taught in this course are equally applicable to small businesses, nonprofit organizations, and new ventures of larger organizations. Topics include: use of scarce resources, such as money, talent and technological expertise; identification of environmental threats and opportunities; and operational considerations such as organizational structure, legal requirements, financing, and accounting procedures.

BA 641. Human Resource Management. 3 Hours.
This course explores human resource management as an integrated process of planning and control designed to achieve high employee productivity and job satisfaction. The course focuses on the essential functions of human resource management as they apply both to the general supervisory responsibilities of every manager and to the specific operations of the personnel department.

BA 642. Leadership in Business and Professions. 3 Hours.
This course is designed to provide graduate management students with a comprehensive review of the essentials for effective leadership. It focuses on the identification of basic leadership styles, explores the theoretical and practical findings of research in leadership development, and seeks to synthesize the student’s leadership style with the most effective working models of leadership.

BA 643. Strategic Change Management. 3 Hours.
Strategic Change Management focuses on the skills required to deal effectively with organizational change. The course addresses first the pressures in the business environment that make change a fundamental reality for managers. Particular attention is paid to change arising from public policy initiatives that impinge on business. The course then examines the manager as change agent responsible for initiating innovation and explores both the personal skills required in the role of change agent and the tools and techniques available to support the manager in that role. The course also examines the problems and opportunities of those who are the recipients of change in an organization and the skills required to cope effectively with that situation.

BA 644. The Legal Environment of Business. 3 Hours.
This course will provide an overview of the important aspects of business law for executives, managers, accountants, and other professionals. The areas of law covered include but are not limited to administrative, contract, corporate and other business organizations, employment relations, real estate, taxes, and UCC sales.

BA 646. Current Issues in Business. 3 Hours.
This course, conducted in seminar fashion, draws on current literature to analyze contemporary and emerging issues facing management in the late twentieth century. Content will vary.
BA 700. Health Care Management. 3 Hours.
This course examines management problems and policy-making in the health care industry. Several areas are considered including: (1) the functions of the health care manager, (2) the types of health care delivery systems, (3) the administration of hospitals, (4) the financing of medical care, and (5) the role of government. Through readings, lectures, discussions, and projects, students clarify their own role in the delivery of health services. The course regularly draws on experts in health planning and health care administration.

BA 701. Legal Environment of Health Care Management. 3 Hours.
The course provides a foundation in the legal and regulatory framework in which health care institutions operate. Students will also examine the legal issues confronting health care managers including director and administrative liability, malpractice, negligence, patient rights and confidentiality, licensure requirements, and the like.

BA 702. Health Care Economics. 3 Hours.
In this course, the principles and tools of economic decision-making are applied to management in the health care sector. The course explores the application to health care management functions of such concepts and processes as supply and demand, resource allocation and utilization, costing and pricing, resource productivity, forecasting and economic aspects of planning, and utilization review. While the principal emphasis in the course is on micro-economic analysis, some consideration is also given to an economic analysis of public policy alternatives for the delivery of health care service. Prerequisite(s): BA 601.

BA 703. Financial Management in Healthcare Organizations. 3 Hours.
This course applies the perspectives and tools of financial analysis to the management of health care organizations and evaluation of organizational performance. Topics covered include capital budgeting, sources of operating revenue, management of cash and inventories, risk analysis and forecasting. Particular attention is paid to cost containment regulatory strategies and their implications for financial planning and management. Prerequisite(s): BA 602.

BA 704. Managing Quality in Healthcare. 3 Hours.
This course examines methods and tools for managing quality in health facilities, physician practices, managed care, and public health. Topics include developments in quality assurance and improvement, utilization review, risk management, and patient satisfaction.

BA 705. Global Perspectives in Healthcare. 3 Hours.
This course examines the social, political, and economic aspects of global healthcare issues. Through a comparative analysis of the health systems of multiple nations, students will compare theories of health policy and priorities, healthcare system facilities, workforce, technology, cost, quality, and access. The emphasis of the course will be on health management strategies used in different countries and healthcare systems to mobilize, allocate, and maintain resources to improve the healthcare status and delivery systems.

BA 710. Law & Ethics for Non-Profit Organizations. 3 Hours.
Non-profit managers and supervisors are held to a higher standard of ethical behavior due to the nature of their funding sources and their mission. This course is designed to develop in the student a basic understanding of the laws governing non-profit organizations, the practical applications of these laws and the ethics that are demanded of non-profit managers.

BA 711. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics covered include: leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 712. Strategic Marketing for Nonprofit Organizations. 3 Hours.
This course applies the concepts of marketing and strategy to the management of non-profit organizations. Through class lectures, discussion, case studies, and applied projects, students will build an understanding of the marketing process in the non-profit environment in order to be able to design, implement, and evaluate an organization’s approach to marketing and strategic positioning.

BA 713. Fundraising. 3 Hours.
This course takes a systems approach to the process of fund-raising. Topics covered include: donor cultivation, use of the annual fund, major gifts, corporate giving, and grant writing.

BA 720. Advanced Sales and Marketing in Hospitality. 3 Hours.
This course focuses on difficult problems and issues facing sales and marketing personnel in the hospitality industry. Students will make use of case studies in order to develop their decision-making process including the use of marketing research and analysis.

BA 721. Convention Planning and Events Planning. 3 Hours.
This course focuses on the rapidly growing convention sales and events planning industries. The student will learn how to design, plan, market and manage meetings and events.

BA 722. Advanced Front Office Operations. 3 Hours.
This course begins with detailed introduction about numerous aspects of front office operations and management. The next section of the course examines the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.

BA 723. Legal Issues in Hospitality Management. 3 Hours.
This course will provide the student an overview of the important aspects of Hospitality Law for Managers, and other professionals. Some of the areas of study include and are not limited to Torts, Products Liability, Constitutional Law and Criminal Law and many other subjects.

BA 724. Managing Service. 3 Hours.
This course begins with an introduction to the framework for providing quality service to customers and guests. Next we will discuss the needs of the customer/guest and proceed to develop our menu and/or product accordingly. Finally, we will learn how management and staff create loyal customers and guests by delivering service that exceeds their expectations.

BA 729. Hospitality Graduate Directed Practicum. 3 Hours.
Each student will find, will choose or will be provided with an internship site. The site chosen will be based on; and interview conducted by the management of the internship site and the student’s preference of location based on those available. The Coordinator of Hospitality Management will have the final decision on all internship site placements. The Coordinator’s decision will be based on his or her interaction with the student during previous course work, his or her understanding of the student and the internship properties requirements. Every consideration will be given to the student’s personal preferences with regard to location and types of property. However, the student’s preferences will not be the only consideration for placement. Prerequisite(s): BA 720 and BA 722 and BA 724.
BA 731. Business and Information Technology. 3 Hours.
This graduate course approaches Information Technology from the perspective of information consumers as opposed to technology implementers. During this course, students will examine various technologies and their application within modern organizations. The course has two primary goals. (1) The course will explain information technologies in non-technical terms so that students can evaluate a technology’s effectiveness relative to any existing alternatives and the overall organizational needs. (2) This course should increase student awareness regarding how they interact with technology in a personal or business setting. Business leaders are constantly bombarded with technology. This course addresses the need to sift through that information in an intelligent manner and make smart business decisions.

BA 741. Staffing & Selection. 3 Hours.
A source of competitive advantage for any organization is its talent. The effectiveness of an organization depends on the performance of each individual in that organization. Hence, one of the most important human resource functions is that of staffing the organization. This course is essential for line managers, supervisors, team leaders, and hiring managers who are involved in recruiting, making promotions, succession, or any other workforce decisions. An examination of the scientific, legal, and administrative issues associated with the recruitment, selection, employment and retention of individuals by organizations augments the study. Specific attention will be given to the current challenges of an increasingly dynamic workplace and diverse workforce.

BA 742. Training & Development. 3 Hours.
The effective training and development of human resources creates tremendous and unique value for an organization. This course examines how organizations can develop and manage the talents and skillset of human capital. The course explores topics such as training needs analysis, formulating training objectives, and the design, implementation, and evaluation of training and development programs.

BA 745. Innovative Global Strategy. 3 Hours.
This course will build students' awareness of the challenges that must be addressed and the opportunities that may be present when competing in the global marketplace. The course focuses on how firms apply innovative strategies to create a sustainable competitive advantage in the global arena. Course content will be drawn from readings, case analysis, online content and discussions. The course requires students to analyze and understand real world examples of both successful and unsuccessful global strategy implementation.

BA 750. Fundamentals of Risk Management. 3 Hours.
This course explores the fundamentals of risk management. After discussion of the importance of risk and the rationale for its management in organizations, the remainder of the course will analyze the process of and methods for managing risk.

BA 751. Employee Benefits. 3 Hours.
This course explores the nature and operation of employer-sponsored benefit plans. Emphasis is placed on plan design, administration, funding, and regulation. The course also addresses organizational characteristics, benefit structure, and pricing of risk transfer schemes for groups.

BA 752. Crisis Management. 3 Hours.
Crisis Management can be defined as a communications response to an event that has a negative impact on an audience - the public, customers/clients, employees, shareholders, etc. Examples of such events could include tainted food, a corporate leak, a political scandal, an entertainment or athletic scandal, damaged products that cause or could potentially cause life-threatening situations, natural disasters, terrorism, and financial disasters. In this course, students will analyze and critique high-profile cases and learn how to effectively respond to crises.

BA 753. Corporate Risk Management. 3 Hours.
Corporate risk is analyzed through the lens of enterprise risk management. This course explores the operational and financial risks faced by firms and the study of various methods of handling these risks.

BA 754. Strategic Selling. 3 Hours.
The focus of this course is on key, strategic customer selling approaches. The process of sales planning and strategy development for these types of customers will be emphasized. The objective of this course is to understand and execute sales strategies for managing major and large customers.

BA 760. Technology & Innovation. 3 Hours.
BA 760 Technology & Innovation offers a research approach to identifying, analyzing, and creating technological advantage in nascent and mature industries. Students will apply the methodologies of innovation and discovery to business settings and markets, seeking to create competitive advantage and achieve market transformation through strategic initiatives that redefine consumer expectations and industry practices and reframe organizations to embrace innovative practices and processes.

BA 761. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 762. Groupthink. 3 Hours.
This course explores the origin of groupthink. Groupthink is a term first used by social psychologist Irving L. Janis (1972) that refers to a psychological phenomenon in which people strive for consensus within a group. This course explores groupthink as a phenomenon where people set aside their own personal beliefs or adopt the opinion of the rest of the group.

BA 763. Biotechnology & Innovation: Intellectual Property. 3 Hours.
This course focuses on the protection of proprietary and intellectual rights in inventions, writings, creative works, software, industry trade secrets, industry trade designations, and other intellectual assets at the international, Federal, and State Levels. The course will give special consideration to the emergence of new areas of patent law in Biotechnology and Pharmaceutical fields, examining not only the patentability of intellectual assets, but also the discovery process, particularly in collaborative environments involving multiple organizations and institutions, and the qualifying distinctions between collaborative and competitive research.
BA 790. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.*

BA 791. Professional Project. 3-6 Hours.
This course is used to award graduate credit for prior learning and educational experience obtained outside of the traditional classroom. Through the preparation of a professional project, students provide formal documentation of the specific graduate-level learning competencies which they have acquired through prior experience. A maximum of six (6) credit hours may be earned.

BA 792. Graduate Internship I. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 792.

BA 793. Graduate Internship II. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization’s supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.

BA 794. Graduate Internship III. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.

BA 796. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 798. Thesis. 6 Hours.
The thesis may be library-oriented research with extensive reliance on documents and a relatively limited amount of primary field research, or it may be action-oriented field research with relevant documentation from the literature. The title of the thesis topic must be filed with the graduate committee. A student, with the approval of his/her advisory committee, may register for the thesis after completion of twenty-four (24) semester hours.

BA 799. Topic/. 3 Hours.
Students work together in a seminar setting under the direction of a member of the graduate faculty. The content of the seminar will vary according to the interests of students and faculty involved.

B.S. Business Administration - Entrepreneurship & Small Business Management

Students in the Entrepreneurship and Small Business Management concentration study the essential concepts of starting and operating small businesses through a series of eight classes. Topics covered include: environment and management of small business enterprise, problems in starting small businesses, principles of accounting, financial and administrative control, and management of business operations.

Students will also learn the practical application of classic and contemporary business theory as it applies to the early stages of entrepreneurship and intrapreneurship, opportunity recognition, innovation, and new venture development. Topics include: types of entrepreneurs, opportunity recognition, marketing, cash and other resource requirements, financial statements, planning, franchising, intellectual property, success/failure/resilience, and growth.

In addition to the program objectives of the B.S. Business Administration degree, this concentration requires students to demonstrate subject matter knowledge and competence as applied to a smaller company or family business.

Total Hours 24

Courses

BA 101. Introduction to Business. 3 Hours.
This course introduces students to the general nature of functional areas in business such as marketing, management, accounting, finance, research and development, and risk management. The relationship between business, the government, the economy, and the environment is examined.
BA 111. Economic Geography. 3 Hours.
This course is an introduction to the principles of economic geography, ranging from physical and biological geography to cultural and political factors. The decision making processes, both local and global, for different types of service oriented, manufacturing, transportation, and resource based businesses will be examined. The relationship of natural resources, population, and culture, and how such factors affect economic activity will be emphasized.

BA 201. Business Law I. 3 Hours.
This course provides students with a basic knowledge of the law of contracts, personal property and real property.

BA 202. Business Law II. 3 Hours.
This course is intended to augment BA 201 with in depth analysis of the law in Contracts, UCC, Corporations, Principal Agency Law, Advanced Tort Law, Environmental Law, Real Property Law, Securities Law and Employment Law.

BA 204. Franchise Formation and Management. 3 Hours.
This class will discuss franchise formation and management with particular emphasis on the discovery and evaluation of the franchisor and the feasibility of entrepreneurs converting an existing business into a franchise chain or creating and selling new franchises, domestic and international. Franchise accounting and finance (borrowing or leveraging) will be covered, as well as, taking the franchise to the stock market or going public (IPO) and raising investment capital. Prerequisite(s): BA 401.

BA 205. Real Estate Law. 3 Hours.
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

BA 210. Economics Overview for Non-Business Majors. 3 Hours.
This is an overview of microeconomic and macroeconomic concepts for non-business majors. It will include an introduction to American capitalism including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of competitive firms. It will also be an introduction to national income accounts, unemployment, inflation, government fiscal policy and monetary policy.

BA 211. Microeconomics. 3 Hours.
This is an introduction to American capitalism and microeconomic concepts including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of purely and impurely competitive firms.

BA 212. Macroeconomics. 3 Hours.
This is an introduction to macroeconomics in the American economy: national income accounts, unemployment, inflation, government fiscal policy, monetary policy and economic growth.

BA 220. Real Estate Principles and Practices. 3 Hours.
This course will provide students with methods of analyzing acquisition and retention of Real Estate. Also, there will be a focus on the skills and techniques required to operate a real estate business, including trust accounts, risk management, and property management.

BA 243. The Business of Innovation. 3 Hours.
This is a cross-disciplinary class that will introduce students to the Lean Startup Scientific Method for developing and commercializing ideas for new ventures or else innovating and developing new products or business models within existing companies. Topics include marketplace innovations, technology and science based innovations, marketplace hypothesis development and testing, frugal and agile engineering, business models, intellectual property, prototyping, exit strategies, and fundraising. Lab component is integrated within module deliverables.

BA 271. Risk Management. 3 Hours.
A study is made of the risks encountered by individuals and business firms. A presentation is made of the basic principles and institutions, which have been developed in risk management. This material is treated primarily from the consumer point of view.

BA 299. Topic/. 1 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 300. Business Presentations. 3 Hours.
Communication is a vital function of any business. Managers at all levels must be able to communicate effectively to advance their career and ensure the success of their organization. This course will give students a working knowledge of how to create, brief, and present information across the organizational communications spectrum. Students will learn how to think critically and apply problem solving skills across a variety of historical and contemporary business topics. Students will learn how to collect, analyze, synthesize, and present information in a professional manner to assorted audiences in different venues. The foundational skill set developed in this course is the ability for students to articulate their ideas in a professional manner within a variety of business settings. Prerequisite(s): EH 124.

BA 302. Business Ethics. 3 Hours.
This course is designed to raise a moral consciousness and sensitivity within the various disciplines of the business curriculum. The disciplines focused on here are business, accounting, marketing, multinational corporations, and those areas of human resource management inclusive of diversity in the workplace within the context of environmental and social responsibility.

BA 306. Franchise Law. 3 Hours.
This is a law class that analyzes all the issues of Franchise Law with a particular emphasis on Contracts, Principal/Agent Franchise Relations, Corporate Formation of Franchises, and Securities Law. Prerequisite(s): BA 201 and BA 202.

BA 310. Organization and Management. 3 Hours.
This course focuses on how to design organization systems and effectively manage them. Students completing the course should understand the universal process of management and key terminology in the language of management. Students are encouraged conceptually to blend contributions from the various schools of management thought into an integrated perspective of what managers do and why.

BA 311. Human Resource Management. 3 Hours.
This course addresses traditional personnel administration issues. Emphasis in the course is on how to manage the major human resource administration functions of job design, reward system design, staffing, training and performance control, to achieve maximum employee performance and satisfaction. Prerequisite(s): BA 310 or ( Major=BS Criminal Justice or Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Paralegal or Major=BS English - Prelaw).
BA 312. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics include leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 321. Marketing Principles. 3 Hours.
The course covers the language and issues of marketing with an emphasis on developing responsive marketing strategies that meet customer needs. The course focuses on marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing. Other topics will be incorporated into the course including the external environment (focus on integrative topics within marketing, such as economics, politics, government, and nature), marketing research, international/global marketing with relevance to cultural diversity, ethics, the impact of technology on marketing, and careers in marketing.

BA 334. International Economics. 3 Hours.
This applied economics course will emphasize the use of cases to study topics such as comparative advantage, treaties, tariffs, non-tariff trade barriers, and trade blocks among developed and developing nations. Prerequisite(s): BA 211 and BA 212.

BA 344. Personal Financial Planning. 3 Hours.
This course provides comprehensive coverage of personal financial planning in the areas of money management, axes, consumer credit, housing and other consumer decisions, legal protection, insurance, retirement planning, and estate planning. Prerequisite(s): MS 141 or MS 111 or MS 242 or MS 180 or MS 181.

BA 351. Internship. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 352. Internship II. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 353. Internship III. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 354. Internship IV. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 355. Internship V. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 356. Internship I. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 361. Managerial Economics. 3 Hours.
This course is designed to close the gap between economic theory and business application. It reviews traditional analysis and shows its application to the understanding and solution of economic problems of the firm and industry. Prerequisite(s): BA 211 and BA 212.

BA 362. Financial Management I. 3 Hours.
The course addresses core financial management concepts such as cash flow, capital structure, financial ratios, capital budgeting, financial forecasting, and financial statements. Prerequisite(s): AC 121 and (AC 122 or AC 211) and MS 141 or MS 111 or MS 242 or MS 180 or MS 181.

BA 364. Financial Management II. 3 Hours.
This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategies to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.

BA 375. Supply Chain Management. 3 Hours.
This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategies to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.
BA 414. Business Strategy. 3 Hours.
This Business Administration senior seminar focuses on decision making at the executive management level, the formulation of strategy, and its implementation in the organization. The course will employ case studies, laboratory simulation techniques, and computer spreadsheet analysis. Prerequisite(s): College Level=Senior.

BA 421. Integrated Marketing Communication and Advertising. 3 Hours.
An introduction into the world of advertising: Students will plan and design Ad campaigns, write copy and design layouts for the different types/forms of advertising. The students will work with local companies and assist them in redesign of their ad campaigns. Prerequisite(s): BA 321.

BA 422. Sales and Sales Management. 3 Hours.
This course provides students with the fundamentals of good salesmanship and sales management. Prior to studying management principles students practice sales techniques in simulations. Cases are used to illustrate and evaluate principles of sales management. Prerequisite(s): BA 321.

BA 423. Retail Management. 3 Hours.
The purpose of this course is to provide students with an understanding of the fundamentals of successful retail operations. Topics included are the market concept in retailing, factors of area and market analysis, and aspects of organizational structure, layout, and personnel planning. Also covered are methods of pricing, merchandising planning, inventory, expense control and sales promotion techniques. Prerequisite(s): BA 321.

BA 424. Marketing Research. 3 Hours.
The basic research concepts and practices as applied to the analysis of marketing problems are examined. Topics include sources of data, collecting data, sampling, questionnaire construction, tabulating data, and report preparation; computerized statistical software is used. Prerequisite(s): BA 321 and MS 132.

BA 425. Marketing Management. 3 Hours.
This is the capstone course for marketing majors. Students apply concepts learned in other courses to marketing problems of business and nonprofit organizations. Cases and business simulations are used to teach decision-making in the complex environment of business. A complete marketing plan for a simulated company of the student’s choice summarizes the student's knowledge of the field. Prerequisite(s): BA 321.

BA 426. Real Estate Market, Research and Analysis. 3 Hours.
This course will discuss market research, real estate sales, property valuations and analysis. Students will examine market research reports to gain insight into product and market trends, opportunities, projections, and growth in the Maine, the US and global real estate markets. Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 427. Franchise Market Research and Analysis. 3 Hours.
This class will focus on analysis of market demographics, feasibility studies, product pricing, promotion and distribution, franchise broker contacts, extrapolation of sales and expenses, and the projection of costs and net profits, emerging markets and capital expansion. Prerequisite(s): BA 401 and MS 132 and MS 232 and BA 362.

BA 428. Strategic Selling. 3 Hours.
This course builds on the fundamentals of selling. The student will understand how to advance sales in light of complex business environments consisting of layers of buyers, decision makers and those who influence purchasing decisions. A strategic account planning process will be analyzed and applied to real companies by way of case studies. The art and skill of negotiating will be studied and learned through role play. Prerequisite(s): BA 422.

BA 434. International Finance. 3 Hours.
The factors affecting exchange rates are discussed, as well as different types of exchange rate systems and how governments attempt to influence exchange rates. The relationships among interest rate parity, purchasing power parity, the Fisher effect and International Fisher effect and exchange rates are analyzed. Students learn how currency futures, currency options and money market hedges are used to hedge exchange rate risk. Prerequisite(s): BA 362.

BA 437. International Marketing. 3 Hours.
The basics of international marketing will be taught including the foundations of culture, cultural understanding, business customs and practices in global marketing, assessing global markets, and developing international marketing strategy. Prerequisite(s): BA 321.

BA 438. Export-Import Procedures. 3 Hours.
The basics of export-import procedures will be taught including justification for exporting/importing, market planning methods, selection of appropriate marketing mix variables, and regulation. Prerequisite(s): BA 321.

BA 439. International Franchising Management. 3 Hours.
This course will focus on international expansion of franchises, learning the culture, monetary exchanges, imports and exports, local international market analysis and much more. Prerequisite(s): BA 204 and BA 306 and BA 427.

BA 440. Small Business Management I. 3 Hours.
This course supplies prospective and current small business managers with the essential concepts of starting and operating small businesses. Topics covered include: environment and management of small business enterprise, problems in starting small businesses, financial and administrative control, and management of business operations. Particular emphasis is placed on the interrelated nature of the components, particularly as they affect the financial picture of the firm. Through a lecture and discussion format, students are expected to share their own experiences in small businesses with their fellow students. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 441. Entrepreneurship I- New Venture Development. 3 Hours.
Students will be introduced to the practical application of classic and contemporary business theory as it applies to the early stages of entrepreneurship and intrapreneurship, opportunity recognition, innovation, and new venture development. Course topics include types of entrepreneurs, opportunity recognition, marketing, cash and other resource requirements, financial statements, planning, franchising, intellectual property, success/failure/resilience, and growth. Class will use text, cases, articles, internet sources, and guest lecturers. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 442. Applied Small Business Management. 3 Hours.
This is an advanced course which focuses on real problems in Small Business Management, using the case approach. Cases are drawn from the text, from actual local small businesses, and from the practical experience of students in the class. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 443. Entrepreneurship II: Business Plans. 3 Hours.
This class builds on BA 441, New Venture Development. The focus of this class is on the early stages of formalizing and growing a venture. Topics include business plan writing, fund raising and cash flow, measuring and conveying financial position, core strategy development and competitive advantage, sustainability, international entrepreneurship, supply chain, growth, and exit. Prerequisite(s): College Level=Junior or College Level=Senior.
BA 460. Investments. 3 Hours.
Beginning with an introduction to financial markets and investment instruments, topics include stock and bond quotations and trading procedures, rate of return, margin trading, stock indexes, stock and bond valuation, risk and return, portfolio theory, active and passive portfolio management, and investment performance evaluation. Prerequisite(s): BA 362.

BA 464. Bank & Financial Services Management. 3 Hours.
This course will introduce students to the specific issues in the financial management of a banking firm and, to a smaller degree, of other financial intermediaries. Emphasis will be on products, roles, regulatory framework, and risk management. Prerequisite(s): BA 362.

BA 465. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 471. Life and Health Insurance. 3 Hours.
This course is intended to provide background knowledge for personal application and for those responsible for administering benefit plans for employees; it provides the necessary information required to pass the State of Maine license examination. Prerequisite(s): BA 271.

BA 472. Casualty and Property Insurance. 3 Hours.
The first part of the course introduces the basics of the entire insurance business, including a summary of legal aspects, types of insurers and principles of reinsurance; next, each type of insurance is studied in detail. Topics covered are fire, consequential loss, inland marine, ocean marine, theft and surety, liability and miscellaneous property insurance. Prerequisite(s): BA 271.

BA 473. Real Estate Appraisal. 3 Hours.
This course familiarizes the student with the foundation and principles of the appraisal process. The student will become familiar with the three approaches to value. Site valuation, construction costs, depreciation; comparables selection and adjustments; rental multipliers; and reconciliation will be discussed. The student will focus on the elements making up the standards for professional appraisal practice. These elements, i.e., Definitions, Rules, Standards and Standard Rules, Statements and advisory opinions are discussed in detail along with the philosophy and history of USPAP. Prerequisite(s): BA 401 and MS 132 and BA 362.

BA 475. E-Business and E-Commerce for Managers. 3 Hours.
This course teaches the basic e-business and e-commerce theory. The students will apply the theory through the development of a website for the purpose of marketing a product or service or idea online.

BA 490. International Business. 3 Hours.
This course covers the international dimensions of managerial decision-making including: world economies, international trade theories, tariffs, quotas and other trade issues, global strategic planning, cross-cultural management, international market entry, international human resource management, international organization strategy, international logistics, import/export operations, currency exchange, international financial management. Current developments in global economic and business are emphasized; students participate in a computerized simulation throughout the semester. Prerequisite(s): BA 310 and BA 321.

BA 495. Senior Management Project. 3 Hours.
An experiential course that gives seniors the opportunity to apply what they have learned in class to a real business situation. Prerequisite(s): College Level=Senior.

BA 496. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 497. Business and Culture Travel Study Course. 3 Hours.
Business and Culture Travel Study course is designed to expose students to economies across the world. During the course students will travel to important commercial, cultural and governmental cities. Through a combination of readings students will be exposed to 20th and 21st century history, economics, culture political and business philosophy. The course will also involve visits to major multinational corporations, cultural activities and lectures from University business faculty when available. The course will also have two pre-trip class sessions with readings and one post course session to wrap up the experience and discuss the student travel logs.

BA 498. Business Seminar. 3 Hours.
This honors course requires the study of various business problems under the supervision of members of the Department of Business Administration. A paper is required. An oral examination is scheduled as the final examination in the course. Prerequisite(s): College Level=Senior.

BA 499. Topic/. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 600. Research Methods in Business and Education. 3 Hours.
This course is designed for beginning graduate students who have little or no formal preparation in those areas of research and problem-solving essential for a comprehensive study of business and education at the graduate level. Emphasis is placed on the identification of common problem types and the selection and use of appropriate methods of analysis (primarily statistical in nature).

BA 601. Managerial Economics. 3 Hours.
This course begins with a comprehensive overview of micro- and macroeconomic concepts with the aim of developing within students a picture of how business and nonprofit organizations relate to the economy as a whole. The course then focuses on practical applications of economic analysis to problems of concern to managers. Case studies and projects are used to demonstrate the methods used to determine economic feasibility and cost-effectiveness of products, services, and programs.

BA 602. Managerial Accounting. 3 Hours.
This is an accelerated accounting course for those with little or no formal accounting background. The emphasis is on concepts which managers need to know in order to be effective. Topics include the preparation and interpretation of financial statements, cost planning and control, cost-volume-profit analysis, decision-making models, master budgeting and variances, and evaluation of capital projects.
BA 605. Management Communications. 3 Hours.
This is an advanced communications course that builds upon a student's experience and prior undergraduate coursework in writing and oral communications. Topics include: advanced business writing, use of visual materials, selection of secondary sources of information, report preparation, and presentations to small and large groups.

BA 611. Organizational Behavior. 3 Hours.
This course surveys the major field of management, examining structures and processes on both group and organizational levels. Both traditional and contemporary theories are analyzed and applied to business operations.

BA 620. Financial Management. 3 Hours.
Topics considered include financial planning, operating and capital budgets, cash flow, purchasing and accounting procedures, the sources and uses of corporate and institutional funds, and financial analysis for evaluation and control. Students develop projects specifically related to their needs in educational administration, small business, or corporate management. Prerequisite(s): BA 602 or AC 301.

BA 621. Marketing Management. 3 Hours.
This course focuses on complex problems facing decision-makers in the marketing of goods and services. Emphasis is placed on the decision-making process, including assessment of the social, economic, and political environment in which the organization operates; problem definition; development and evaluation of alternatives, and the implementation of the best alternative. Cases in advertising, sales, marketing research, and strategic marketing management provide practice in marketing analysis and decision-making.

BA 622. Production Management. 3 Hours.
Emphasis is placed on the use of quantitative techniques for solving manufacturing problems. The student is given an opportunity to practice mathematical model-building and manipulation. Other topics considered include queuing system design, plant layout, statistical quality control, inventory modeling, Program Evaluation and Review Technique (PERT), linear and nonlinear programming, and control theory.

BA 625. Global Strategic Management. 3 Hours.
This course focuses on the strategic challenges and opportunities confronting firms that undertake to create value and to compete in the global economy. Successful companies develop strategies for doing business in emerging markets that are different from those they use at home and often find novel ways of implementing them too. The class will make extensive use of case analysis and discussion to evaluate and understand the strategic issues that confront firms operating internationally, as well as to appreciate the importance of values and ethics in organization decisions and actions. In this course we will probe the workings of business strategies in transition and emerging economies, gain an understanding of the strategies of local firms, and analyze the international success and failure of companies. Prerequisite(s): BA 600 and 15 Credits From Range [BA 600 To BA 799].

BA 626. Accounting in Planning, Budgeting and Control. 3 Hours.
This course examines the role of accounting in the planning, budgeting, and control process of a business in a dynamic environment. The integration of measuring and analyzing (planning), short-term decisions and managing organizations (control), and preparing various budgets (budgeting) are emphasized. This course is designed as a continuation of BA602 Managerial Accounting. Numerical problems, as well as case studies, are utilized as methods of study. Prerequisite(s): BA 602 or AC 211.

BA 627. Investment Analysis. 3 Hours.
This course provides a detailed description of securities market organization and approaches to investment opportunities. Students will examine theories used in the valuation of financial securities and employ projects and applications to develop a real world understanding of portfolio management. Prerequisite(s): BA 602.

BA 628. New Venture Planning and Management. 3 Hours.
This course deals with the foundation of new ventures and related aspects of managing the small growing enterprise. Techniques taught in this course are equally applicable to small businesses, nonprofit organizations, and new ventures of larger organizations. Topics include: use of scarce resources, such as money, talent and technological expertise; identification of environmental threats and opportunities; and operational considerations such as organizational structure, legal requirements, financing, and accounting procedures.

BA 641. Human Resource Management. 3 Hours.
This course explores human resource management as an integrated process of planning and control designed to achieve high employee productivity and job satisfaction. The course focuses on the essential functions of human resource management as they apply both to the general supervisory responsibilities of every manager and to the specific operations of the personnel department.

BA 642. Leadership in Business and Professions. 3 Hours.
This course is designed to provide graduate management students with a comprehensive review of the essentials for effective leadership. It focuses on the identification of basic leadership styles, explores the theoretical and practical findings of research in leadership development, and seeks to synthesize the student's leadership style with the most effective working models of leadership.

BA 643. Strategic Change Management. 3 Hours.
Strategic Change Management focuses on the skills required to deal effectively with organizational change. The course addresses first the pressures in the business environment that make change a fundamental reality for managers. Particular attention is paid to change arising from public policy initiatives that impinge on business. The course then examines the manager as change agent responsible for initiating innovation and explores both the personal skills required in the role of change agent and the tools and techniques available to support the manager in that role. The course also examines the problems and opportunities of those who are the recipients of change in an organization and the skills required to cope effectively with that situation.

BA 644. The Legal Environment of Business. 3 Hours.
This course will provide an overview of the important aspects of business law for executives, managers, accountants, and other professionals. The areas of law covered include but are not limited to administrative, contract, corporate and other business organizations, employment relations, real estate, taxes, and UCC sales.

BA 646. Current Issues in Business. 3 Hours.
This course, conducted in seminar fashion, draws on current literature to analyze contemporary and emerging issues facing management in the late twentieth century. Content will vary.
BA 700. Health Care Management. 3 Hours.
This course examines management problems and policy-making in the health care industry. Several areas are considered including: (1) the functions of the health care manager, (2) the types of health care delivery systems, (3) the administration of hospitals, (4) the financing of medical care, and (5) the role of government. Through readings, lectures, discussions, and projects, students clarify their own role in the delivery of health services. The course regularly draws on experts in health planning and health care administration.

BA 701. Legal Environment of Health Care Management. 3 Hours.
The course provides a foundation in the legal and regulatory framework in which health care institutions operate. Students will also examine the legal issues confronting health care managers including director and administrative liability, malpractice, negligence, patient rights and confidentiality, licensure requirements, and the like.

BA 702. Health Care Economics. 3 Hours.
In this course, the principles and tools of economic decision-making are applied to management in the health care sector. The course explores the application to health care management functions of such concepts and processes as supply and demand, resource allocation and utilization, costing and pricing, resource productivity, forecasting and economic aspects of planning, and utilization review. While the principal emphasis in the course is on micro-economic analysis, some consideration is also given to an economic analysis of public policy alternatives for the delivery of health care service. Prerequisite(s): BA 601.

BA 703. Financial Management in Healthcare Organizations. 3 Hours.
This course applies the perspectives and tools of financial analysis to the management of health care organizations and evaluation of organizational performance. Topics covered include capital budgeting, sources of operating revenue, management of cash and inventories, risk analysis and forecasting. Particular attention is paid to cost containment regulatory strategies and their implications for financial planning and management. Prerequisite(s): BA 602.

BA 704. Managing Quality in Healthcare. 3 Hours.
This course examines methods and tools for managing quality in health facilities, physician practices, managed care, and public health. Topics include developments in quality assurance and improvement, utilization review, risk management, and patient satisfaction.

BA 705. Global Perspectives in Healthcare. 3 Hours.
This course examines the social, political, and economic aspects of global healthcare issues. Through a comparative analysis of the health systems of multiple nations, students will compare theories of health policy and priorities, healthcare system facilities, workforce, technology, cost, quality, and access. The emphasis of the course will be on health management strategies used in different countries and healthcare systems to mobilize, allocate, and maintain resources to improve the healthcare status and delivery systems.

BA 710. Law & Ethics for Non-Profit Organizations. 3 Hours.
Non-profit managers and supervisors are held to a higher standard of ethical behavior due to the nature of their funding sources and their mission. This course is designed to develop in the student a basic understanding of the laws governing non-profit organizations, the practical applications of these laws and the ethics that are demanded of non-profit managers.

BA 711. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics covered include: leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 712. Strategic Marketing for Nonprofit Organizations. 3 Hours.
This course applies the concepts of marketing and strategy to the management of non-profit organizations. Through class lectures, discussion, case studies, and applied projects, students will build an understanding of the marketing process in the non-profit environment in order to be able to design, implement, and evaluate an organization’s approach to marketing and strategic positioning.

BA 713. Fundraising. 3 Hours.
This course takes a systems approach to the process of fund-raising. Topics covered include: donor cultivation, use of the annual fund, major gifts, corporate giving, and grant writing.

BA 720. Advanced Sales and Marketing in Hospitality. 3 Hours.
This course focuses on difficult problems and issues facing sales and marketing personnel in the hospitality industry. Students will make use of case studies in order to develop their decision-making process including the use of marketing research and analysis.

BA 721. Convention Planning and Events Planning. 3 Hours.
This course focuses on the rapidly growing convention sales and events planning industries. The student will learn how to design, plan, market and manage meetings and events.

BA 722. Advanced Front Office Operations. 3 Hours.
This course begins with detailed introduction about numerous aspects of front office operations and management. The next section of the course examines the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.

BA 723. Legal Issues in Hospitality Management. 3 Hours.
This course will provide the student an overview of the important aspects of Hospitality Law for Managers, and other professionals. Some of the areas of study include and are not limited to Torts, Products Liability, Constitutional Law and Criminal Law and many other subjects.

BA 724. Managing Service. 3 Hours.
This course begins with an introduction to the framework for providing quality service to customers and guests. Next we will discuss the needs of the customer/guest and proceed to develop our menu and/or product accordingly. Finally, we will learn how management and staff create loyal customers and guests by delivering service that exceeds their expectations.

BA 729. Hospitality Graduate Directed Practicum. 3 Hours.
Each student will find, will choose or will be provided with an internship site. The site chosen will be based on; and interview conducted by the management of the internship site and the student’s preference of location based on those available. The Coordinator of Hospitality Management will have the final decision on all internship site placements. The Coordinator’s decision will be based on his or her interaction with the student during previous course work, his or her understanding of the student and the internship properties requirements. Every consideration will be given to the student’s personal preferences with regard to location and types of property. However, the student’s preferences will not be the only consideration for placement. Prerequisite(s): BA 720 and BA 722 and BA 724.
BA 731. Business and Information Technology. 3 Hours.
This graduate course approaches Information Technology from the perspective of information consumers as opposed to technology implementers. During this course, students will examine various technologies and their application within modern organizations. The course has two primary goals. (1) The course will explain information technologies in non-technical terms so that students can evaluate a technology’s effectiveness relative to any existing alternatives and the overall organizational needs. (2) This course should increase student awareness regarding how they interact with technology in a personal or business setting. Business leaders are constantly bombarded with technology. This course addresses the need to sift through that information in an intelligent manner and make smart business decisions.

BA 741. Staffing & Selection. 3 Hours.
A source of competitive advantage for any organization is its talent. The effectiveness of an organization depends on the performance of each individual in that organization. Hence, one of the most important human resource functions is that of staffing the organization. This course is essential for HR professionals who are responsible for recruiting, screening, hiring, promoting, and outplacing employees. It is also very crucial for any line managers, supervisors, team leaders, and hiring managers who are involved in recruiting, making promotions, succession, or any other workforce decisions. An examination of the scientific, legal, and administrative issues associated with the recruitment, selection, employment and retention of individuals by organizations augments the study. Specific attention will be given to the current challenges of an increasingly dynamic workplace and diverse workforce.

BA 742. Training & Development. 3 Hours.
The effective training and development of human resources creates tremendous and unique value for an organization. This course examines how organizations can develop and manage the talents and skillset of human capital. The course explores topics such as training needs analysis, formulating training objectives, and the design, implementation, and evaluation of training and development programs.

BA 745. Innovative Global Strategy. 3 Hours.
This course will build students’ awareness of the challenges that must be addressed and the opportunities that may be present when competing in the global marketplace. The course focuses on how firms apply innovative strategies to create a sustainable competitive advantage in the global arena. Course content will be drawn from readings, case analysis, online content and discussions. The course requires students to analyze and understand real world examples of both successful and unsuccessful global strategy implementation.

BA 750. Fundamentals of Risk Management. 3 Hours.
This course explores the fundamentals of risk management. After discussion of the importance of risk and the rationale for its management in organizations, the remainder of the course will analyze the process of and methods for managing risk.

BA 751. Employee Benefits. 3 Hours.
This course explores the nature and operation of employer-sponsored benefit plans. Emphasis is placed on plan design, administration, funding, and regulation. The course also addresses organizational characteristics, benefit structure, and pricing of risk transfer schemes for groups.

BA 752. Crisis Management. 3 Hours.
Crisis Management can be defined as a communications response to an event that has a negative impact on an audience - the public, customers/clients, employees, shareholders, etc. Examples of such events could include tainted food, a corporate leak, a political scandal, an entertainment or athletic scandal, damaged products that cause or could potentially cause life-threatening situations, natural disasters, terrorism, and financial disasters. In this course, students will analyze and critique high-profile cases and learn how to effectively respond to crises.

BA 753. Corporate Risk Management. 3 Hours.
Corporate risk is analyzed through the lens of enterprise risk management. This course explores the operational and financial risks faced by firms and the study of various methods of handling these risks.

BA 754. Strategic Selling. 3 Hours.
The focus of this course is on key, strategic customer selling approaches. The process of sales planning and strategy development for these types of customers will be emphasized. The objective of this course is to understand and execute sales strategies for managing major and large customers.

BA 760. Technology & Innovation. 3 Hours.
BA 760 Technology & Innovation offers a research approach to identifying, analyzing, and creating technological advantage in nascent and mature industries. Students will apply the methodologies of innovation and discovery to business settings and markets, seeking to create competitive advantage and achieve market transformation through strategic initiatives that redefine consumer expectations and industry practices and reframe organizations to embrace innovative practices and processes.

BA 761. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 762. Groupthink. 3 Hours.
This course explores the origin of groupthink. Groupthink is a term first used by social psychologist Irving L. Janis (1972) that refers to a psychological phenomenon in which people strive for consensus within a group. This course explores groupthink as a phenomenon where people set aside their own personal beliefs or adopt the opinion of the rest of the group.

BA 763. Biotechnology & Innovation: Intellectual Property. 3 Hours.
This course focuses on the protection of proprietary and intellectual rights in inventions, writings, creative works, software, industry trade secrets, industry trade designations, and other intellectual assets at the international, Federal, and State Levels. The course will give special consideration to the emergence of new areas of patent law in Biotechnology and Pharmaceutical fields, examining not only the patentability of intellectual assets, but also the discovery process, particularly in collaborative environments involving multiple organizations and institutions, and the qualifying distinctions between collaborative and competitive research.
BA 790. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.*

BA 791. Professional Project. 3-6 Hours.
This course is used to award graduate credit for prior learning and educational experience obtained outside of the traditional classroom. Through the preparation of a professional project, students provide formal documentation of the specific graduate-level learning competencies which they have acquired through prior experience. A maximum of six (6) credit hours may be earned.

BA 792. Graduate Internship I. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 793. Graduate Internship II. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization’s supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 792.

BA 794. Graduate Internship III. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.

BA 796. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 798. Thesis. 6 Hours.
The thesis may be library-oriented research with extensive reliance on documents and a relatively limited amount of primary field research, or it may be action-oriented field research with relevant documentation from the literature. The title of the thesis topic must be filed with the graduate committee. A student, with the approval of his/her advisory committee, may register for the thesis after completion of twenty-four (24) semester hours.

BA 799. Topic. 3 Hours.
Students work together in a seminar setting under the direction of a member of the graduate faculty. The content of the seminar will vary according to the interests of students and faculty involved.

B.S. in Business Administration
Concentration in Financial Management

Students in the Financial Management concentration study personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management in the first part of the program followed by real options, sensitivity, scenario and break-even analysis, basic issues regarding stocks and bonds, risk/return and cost of capital, capital structure and limits to the use of debt. Students take 7 required courses focusing on national and international perspectives of financial management, investments, risk management and personal financial planning.

In addition to the program objectives of the B.S. Business Administration degree, this concentration requires students to:

• Demonstrate knowledge of present value principles and capital budgeting decisions
• Utilize information and skill to make financing and capital structure decisions relating to long-term investments
• Apply international finance decision making and calculate hedge exchange rate risks

Total Hours 21

Courses

BA 101. Introduction to Business. 3 Hours.
This course introduces students to the general nature of functional areas in business such as marketing, management, accounting, finance, research and development, and risk management. The relationship between business, the government, the economy, and the environment is examined.

BA 111. Economic Geography. 3 Hours.
This course is an introduction to the principles of economic geography, ranging from physical and biological geography to cultural and political factors. The decision making processes, both local and global, for different types of service oriented, manufacturing, transportation, and resource based businesses will be examined. The relationship of natural resources, population, and culture, and how such factors affect economic activity will be emphasized.
BA 201. Business Law I. 3 Hours.
This course provides students with a basic knowledge of the law of contracts, personal property and real property.

BA 202. Business Law II. 3 Hours.
This course is intended to augment BA 201 with in depth analysis of the law in Contracts, UCC, Corporations, Principal Agency Law, Advanced Tort Law, Environmental Law, Real Property Law, Securities Law and Employment Law.

BA 204. Franchise Formation and Management. 3 Hours.
This class will discuss franchise formation and management with particular emphasis on the discovery and evaluation of the franchisor and the feasibility of entrepreneurs converting an existing business into a franchise chain or creating and selling new franchises, domestic and international. Franchise accounting and finance (borrowing or leveraging) will be covered, as well as, taking the franchise to the stock market or going public (IPO) and raising investment capital. Prerequisite(s): BA 401.

BA 205. Real Estate Law. 3 Hours.
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

BA 210. Economics Overview for Non-Business Majors. 3 Hours.
This is an overview of microeconomic and macroeconomic concepts for non-business majors. It will include an introduction to American capitalism including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of competitive firms. It will also be an introduction to national income accounts, unemployment, inflation, government fiscal policy and monetary policy.

BA 211. Microeconomics. 3 Hours.
This is an introduction to American capitalism and microeconomic concepts including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of purely and impurely competitive firms.

BA 212. Macroeconomics. 3 Hours.
This is an introduction to macroeconomics in the American economy: national income accounts, unemployment, inflation, government fiscal policy, monetary policy and economic growth.

BA 220. Real Estate Principles and Practices. 3 Hours.
This course will provide students with methods of analyzing acquisition and retention of Real Estate. Also, there will be a focus on the skills and techniques required to operate a real estate business, including trust accounts, risk management, and property management.

BA 243. The Business of Innovation. 3 Hours.
This is a cross-disciplinary class that will introduce students to the Lean Startup Scientific Method for developing and commercializing ideas for new ventures or else innovating and developing new products or business models within existing companies. Topics include marketplace innovations, technology and science based innovations, marketplace hypothesis development and testing, frugal and agile engineering, business models, intellectual property, prototyping, exit strategies, and fundraising. Lab component is integrated within module deliverables.

BA 271. Risk Management. 3 Hours.
A study is made of the risks encountered by individuals and business firms. A presentation is made of the basic principles and institutions, which have been developed in risk management. This material is treated primarily from the consumer point of view.
BA 321. Marketing Principles. 3 Hours.
The course covers the language and issues of marketing with an emphasis on developing responsive marketing strategies that meet customer needs. The course focuses on marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing. Other topics will be incorporated into the course including the external environment (focus on integrative topics within marketing, such as economics, politics, government, and nature), marketing research, international/global marketing with relevance to cultural diversity, ethics, the impact of technology on marketing, and careers in marketing.

BA 334. International Economics. 3 Hours.
This applied economics course will emphasize the use of cases to study topics such as comparative advantage, treaties, tariffs, non-tariff trade barriers, and trade blocks among developed and developing nations. Prerequisite(s): BA 211 and BA 212.

BA 344. Personal Financial Planning. 3 Hours.
This course provides comprehensive coverage of personal financial planning in the areas of money management, axes, consumer credit, housing and other consumer decisions, legal protection, insurance, retirement planning, and estate planning. Prerequisite(s): MS 141 or MS 111 or MS 242 or MS 180 or MS 181.

BA 351. Internship. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 352. Internship II. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 353. Internship III. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 354. Internship IV. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 355. Internship V. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 351 and BA 352 and BA 353 and BA 354.

BA 362. Financial Management I. 3 Hours.
The foundation finance course covers basic personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management. Students are expected to become proficient in financial analysis of a corporation and in various aspects of corporate financial management. Prerequisite(s): AC 121 and (AC 122 or AC 211) and BA 211 and (MS 141 or MS 111 or MS 242 or MS 180 or MS 181).

BA 364. Financial Management II. 3 Hours.
The course is a continuation of Financial Management I and will cover such topics as real options, sensitivity, scenario and break-even analysis, basic issues regarding stocks and bonds, risk/return and cost of capital, capital structure and limits to the use of debt. Prerequisite(s): BA 362.

BA 375. Supply Chain Management. 3 Hours.
This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategy to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.

BA 401. Managerial Economics. 3 Hours.
This course is designed to close the gap between economic theory and business application. It reviews traditional analysis and shows its application to the understanding and solution of economic problems of the firm and industry. Prerequisite(s): BA 211 and BA 212.

BA 411. Organizational Behavior. 3 Hours.
This course is highly experiential in its approach to helping students understand and appreciate why people behave the way they do in an organizational context. Students learn how to manage employee behavior by analysis of real world phenomena and by application of principles in the areas of human perception and communication, leadership and motivation, small group dynamics, organizational culture, and organizational change. Prerequisite(s): BA 310.

BA 413. Operations Management. 3 Hours.
Quantitative model building and manipulation are a means of analyzing and synthesizing the elements of productions management. Both deterministic and stochastic modeling are emphasized in the areas of work systems design, queuing, PERT, SQC, inventory control, forecasting, and linear and nonlinear programming. Prerequisite(s): BA 310 and MS 132.

BA 414. Business Strategy. 3 Hours.
This Business Administration senior seminar focuses on decision making at the executive management level, the formulation of strategy, and its implementation in the organization. The course will employ case studies, laboratory simulation techniques, and computer spreadsheet analysis. Prerequisite(s): College Level=Senior.
BA 421. Integrated Marketing Communication and Advertising. 3 Hours.
An introduction into the world of advertising: Students will plan and
design Ad campaigns, write copy and design layouts for the different
types/forms of advertising. The students will work with local companies
and assist them in redesign of their ad campaigns. Prerequisite(s):
BA 321.

BA 422. Sales and Sales Management. 3 Hours.
This course provides students with the fundamentals of good
salesmanship and sales management. Prior to studying management
principles students practice sales techniques in simulations. Cases
are used to illustrate and evaluate principles of sales management.
Prerequisite(s): BA 321.

BA 423. Retail Management. 3 Hours.
The purpose of this course is to provide students with an understanding
of the fundamentals of successful retail operations. Topics included
are the market concept in retailing, factors of area and market analysis,
and aspects of organizational structure, layout, and personnel planning.
Also covered are methods of pricing, merchandising planning, inventory,
expense control and sales promotion techniques. Prerequisite(s): BA 321.

BA 424. Marketing Research. 3 Hours.
The basic research concepts and practices as applied to the analysis
of marketing problems are examined. Topics include sources of data,
collecting data, sampling, questionnaire construction, tabulating data,
and report preparation; computerized statistical software is used.
Prerequisite(s): BA 321 and MS 132.

BA 425. Marketing Management. 3 Hours.
This is the capstone course for marketing majors. Students apply
concepts learned in other courses to marketing problems of business
and nonprofit organizations. Cases and business simulations are used
to teach decision-making in the complex environment of business. A
complete marketing plan for a simulated company of the student’s choice
summarizes the student’s knowledge of the field. Prerequisite(s): BA 321.

BA 426. Real Estate Market, Research and Analysis. 3 Hours.
This course will discuss market research, real estate sales, property
valuations and analysis. Students will examine market research reports
to gain insight into product and market trends, opportunities, projections,
and growth in the Maine, the US and global real estate markets.
Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 427. Franchise Market Research and Analysis. 3 Hours.
This class will focus on analysis of market demographics, feasibility
studies, product pricing, promotion and distribution, franchise broker
contacts, extrapolation of sales and expenses, and the projection of costs
and net profits, emerging markets and capital expansion. Prerequisite(s):
BA 401 and MS 132 and MS 232 and BA 362.

BA 428. Strategic Selling. 3 Hours.
This course builds on the fundamentals of selling. The student
will understand how to advance sales in light of complex business
environments consisting of layers of buyers, decision makers and those
who influence purchasing decisions. A strategic account planning
process will be analyzed and applied to real companies by way of case
studies. The art and skill of negotiating will be studied and learned
through role play. Prerequisite(s): BA 422.

BA 429. Entrepreneurship I- New Venture Development. 3 Hours.
Students will be introduced to the practical application of classic
and contemporary business theory as it applies to the early stages
of entrepreneurship and intrapreneurship, opportunity recognition,
innovation, and new venture development. Course topics include types
of entrepreneurs, opportunity recognition, marketing, cash and other
resource requirements, financial statements, planning, franchising,
intellectual property, success/failure/resilience, and growth. Class
will use text, cases, articles, internet sources, and guest lecturers.
Prerequisite(s): College Level=Senior or College Level=Junior.

BA 440. Small Business Management I. 3 Hours.
This course supplies prospective and current small business managers
with the essential concepts of starting and operating small businesses.
Topics covered include: environment and management of small
business enterprise, problems in starting small businesses, financial
and administrative control, and management of business operations.
Particular emphasis is placed on the interrelated nature of the
components, particularly as they affect the financial picture of the firm.
Through a lecture and discussion format, students are expected to share
their own experiences in small businesses with their fellow students.
Prerequisite(s): College Level=Senior or College Level=Junior.

BA 441. Entrepreneurship II: Business Plans. 3 Hours.
This course builds on BA 441, New Venture Development. The focus of this
class is on the early stages of formalizing and growing a venture. Topics
include business plan writing, fund raising and cash flow, measuring
and conveying financial position, core strategy development and
competitive advantage, sustainability, international entrepreneurship,
supply chain, growth, and exit. Prerequisite(s): College Level=Junior or
College Level=Senior.
BA 460. Investments. 3 Hours.
Beginning with an introduction to financial markets and investment instruments, topics include stock and bond quotations and trading procedures, rate of return, margin trading, stock indexes, stock and bond valuation, risk and return, portfolio theory, active and passive portfolio management, and investment performance evaluation. Prerequisite(s): BA 362.

BA 464. Bank & Financial Services Management. 3 Hours.
This course will introduce students to the specific issues in the financial management of a banking firm and, to a smaller degree, of other financial intermediaries. Emphasis will be on products, roles, regulatory framework, and risk management. Prerequisite(s): BA 362.

BA 465. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 471. Life and Health Insurance. 3 Hours.
This course is intended to provide background knowledge for personal application and for those responsible for administering benefit plans for employees; it provides the necessary information required to pass the State of Maine license examination. Prerequisite(s): BA 271.

BA 472. Casualty and Property Insurance. 3 Hours.
The first part of the course introduces the basics of the entire insurance business, including a summary of legal aspects, types of insurers and principles of reinbursement; next, each type of insurance is studied in detail. Topics covered are fire, consequential loss, inland marine, ocean marine, theft and surety, liability and miscellaneous property insurance. Prerequisite(s): BA 271.

BA 473. Real Estate Appraisal. 3 Hours.
This course familiarizes the student with the foundation and principles of the appraisal process. The student will become familiar with the three approaches to value. Site valuation, construction costs, depreciation; comparables selection and adjustments; rental multipliers; and reconciliation will be discussed. The student will focus on the elements making up the standards for professional appraisal practice. These elements, i.e., Definitions, Rules, Standards and Standard Rules, Statements and advisory opinions are discussed in detail along with the philosophy and history of USPAP. Prerequisite(s): BA 401 and MS 132 and BA 362.

BA 475. E-Business and E-Commerce for Managers. 3 Hours.
This course teaches the basic e-business and e-commerce theory. The students will apply the theory through the development of a website for the prime purpose of marketing a product or service idea online.

BA 490. International Business. 3 Hours.
This course covers the international dimensions of managerial decision-making including: world economies, international trade theories, tariffs, quotas and other trade issues, global strategic planning, cross-cultural management, international market entry, international human resource management, international organization strategy, international logistics, import/export operations, currency exchange, international financial management. Current developments in global economic and business are emphasized; students participate in a computerized simulation throughout the semester. Prerequisite(s): BA 310 and BA 321.

BA 495. Senior Management Project. 3 Hours.
An experiential course that gives seniors the opportunity to apply what they have learned in class to a real business situation. Prerequisite(s): College Level=Senior.

BA 496. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 497. Business and Culture Travel Study Course. 3 Hours.
Business and Culture Travel Study course is designed to expose students to economies across the world. During the course students will travel to important commercial, cultural and governmental cities. Through a combination of readings students will be exposed to 20th and 21st century history, economics, culture political and business philosophy. The course will also involve visits to major multinational corporations, cultural activities and lectures from University business faculty when available. The course will also have two pre-trip class sessions with readings and one post course session to wrap up the experience and discuss the student travel logs.

BA 498. Business Seminar. 3 Hours.
This honors course requires the study of various business problems under the supervision of members of the Department of Business Administration. A paper is required. An oral examination is scheduled as the final examination in the course. Prerequisite(s): College Level=Senior.

BA 499. Topic/. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 600. Research Methods in Business and Education. 3 Hours.
This course is designed for beginning graduate students who have little or no formal preparation in those areas of research and problem-solving essential for a comprehensive study of business and education at the graduate level. Emphasis is placed on the identification of common problem types and the selection and use of appropriate methods of analysis (primarily statistical in nature).

BA 601. Managerial Economics. 3 Hours.
This course begins with a comprehensive overview of micro- and macroeconomic concepts with the aim of developing within students a picture of how business and nonprofit organizations relate to the economy as a whole. The course then focuses on practical applications of economic analysis to problems of concern to managers. Case studies and projects are used to demonstrate the methods used to determine economic feasibility and cost-effectiveness of products, services, and programs.

BA 602. Managerial Accounting. 3 Hours.
This is an accelerated accounting course for those with little or no formal accounting background. The emphasis is on concepts which managers need to know in order to be effective. Topics include the preparation and interpretation of financial statements, cost planning and control, cost-volume-profit analysis, decision-making models, master budgeting and variances, and evaluation of capital projects.
BA 605. Management Communications. 3 Hours.
This is an advanced communications course that builds upon a student's experience and prior undergraduate coursework in writing and oral communications. Topics include: advanced business writing, use of visual materials, selection of secondary sources of information, report preparation, and presentations to small and large groups.

BA 611. Organizational Behavior. 3 Hours.
This course surveys the major field of management, examining structures and processes on both group and organizational levels. Both traditional and contemporary theories are analyzed and applied to business operations.

BA 620. Financial Management. 3 Hours.
Topics considered include financial planning, operating and capital budgets, cash flow, purchasing and accounting procedures, the sources and uses of corporate and institutional funds, and financial analysis for evaluation and control. Students develop projects specifically related to their needs in educational administration, small business, or corporate management. Prerequisite(s): BA 602 or AC 301.

BA 621. Marketing Management. 3 Hours.
This course focuses on complex problems facing decision-makers in the marketing of goods and services. Emphasis is placed on the decision-making process, including assessment of the social, economic, and political environment in which the organization operates; problem definition; development and evaluation of alternatives, and the implementation of the best alternative. Cases in advertising, sales, marketing research, and strategic marketing management provide practice in marketing analysis and decision-making.

BA 622. Production Management. 3 Hours.
Emphasis is placed on the use of quantitative techniques for solving manufacturing problems. The student is given an opportunity to practice mathematical model-building and manipulation. Other topics considered include queuing system design, plant layout, statistical quality control, inventory modeling, Program Evaluation and Review Technique (PERT), linear and nonlinear programming, and control theory.

BA 625. Global Strategic Management. 3 Hours.
This course focuses on the strategic challenges and opportunities confronting firms that undertake to create value and to compete in the global economy. Successful companies develop strategies for doing business in emerging markets that are different from those they use at home and often find novel ways of implementing them too. The class will make extensive use of case analysis and discussion to evaluate and understand the strategic issues that confront firms operating internationally, as well as to appreciate the importance of values and ethics in organization decisions and actions. In this course we will probe the workings of business strategies in transition and emerging economies, gain an understanding of the strategies of local enterprises, and analyze the international success and failure of companies. Prerequisite(s): BA 600 and 15 Credits From Range [BA 600 To BA 799].

BA 626. Accounting in Planning, Budgeting and Control. 3 Hours.
This course examines the role of accounting in the planning, budgeting, and control process of a business in a dynamic environment. The integration of measuring and analyzing (planning), short-term decisions and managing organizations (control), and preparing various budgets (budgeting) are emphasized. This course is designed as a continuation of BA602 Managerial Accounting. Numerical problems, as well as case studies, are utilized as methods of study. Prerequisite(s): BA 602 or AC 211.

BA 627. Investment Analysis. 3 Hours.
This course provides a detailed description of securities market organization and approaches to investment opportunities. Students will examine theories used in the valuation of financial securities and employ projects and applications to develop a real world understanding of portfolio management. Prerequisite(s): BA 602.

BA 628. New Venture Planning and Management. 3 Hours.
This course deals with the foundation of new ventures and related aspects of managing the small growing enterprise. Techniques taught in this course are equally applicable to small businesses, nonprofit organizations, and new ventures of larger organizations. Topics include: use of scarce resources, such as money, talent and technological expertise; identification of environmental threats and opportunities; and operational considerations such as organizational structure, legal requirements, financing, and accounting procedures.

BA 641. Human Resource Management. 3 Hours.
This course explores human resource management as an integrated process of planning and control designed to achieve high employee productivity and job satisfaction. The course focuses on the essential functions of human resource management as they apply both to the general supervisory responsibilities of every manager and to the specific operations of the personnel department.

BA 642. Leadership in Business and Professions. 3 Hours.
This course is designed to provide graduate management students with a comprehensive review of the essentials for effective leadership. It focuses on the identification of basic leadership styles, explores the theoretical and practical findings of research in leadership development, and seeks to synthesize the student’s leadership style with the most effective working models of leadership.

BA 643. Strategic Change Management. 3 Hours.
Strategic Change Management focuses on the skills required to deal effectively with organizational change. The course addresses first the pressures in the business environment that make change a fundamental reality for managers. Particular attention is paid to change arising from public policy initiatives that impinge on business. The course then examines the manager as change agent responsible for initiating innovation and explores both the personal skills required in the role of change agent and the tools and techniques available to support the manager in that role. The course also examines the problems and opportunities of those who are the recipients of change in an organization and the skills required to cope effectively with that situation.

BA 644. The Legal Environment of Business. 3 Hours.
This course will provide an overview of the important aspects of business law for executives, managers, accountants, and other professionals. The areas of law covered include but are not limited to administrative, contract, corporate and other business organizations, employment relations, real estate, taxes, and UCC sales.

BA 646. Current Issues in Business. 3 Hours.
This course, conducted in seminar fashion, draws on current literature to analyze contemporary and emerging issues facing management in the late twentieth century. Content will vary.
BA 700. Health Care Management. 3 Hours.
This course examines management problems and policy-making in the health care industry. Several areas are considered including: (1) the functions of the health care manager, (2) the types of health care delivery systems, (3) the administration of hospitals, (4) the financing of medical care, and (5) the role of government. Through readings, lectures, discussions, and projects, students clarify their own role in the delivery of health services. The course regularly draws on experts in health planning and health care administration.

BA 701. Legal Environment of Health Care Management. 3 Hours.
The course provides a foundation in the legal and regulatory framework in which health care institutions operate. Students will also examine the legal issues confronting health care managers including director and administrative liability, malpractice, negligence, patient rights and confidentiality, licensure requirements, and the like.

BA 702. Health Care Economics. 3 Hours.
In this course, the principles and tools of economic decision-making are applied to management in the health care sector. The course explores the application to health care management functions of such concepts and processes as supply and demand, resource allocation and utilization, costing and pricing, resource productivity, forecasting and economic aspects of planning, and utilization review. While the principal emphasis in the course is on micro-economic analysis, some consideration is also given to an economic analysis of public policy alternatives for the delivery of health care service. Prerequisite(s): BA 601.

BA 703. Financial Management in Healthcare Organizations. 3 Hours.
This course applies the perspectives and tools of financial analysis to the management of health care organizations and evaluation of organizational performance. Topics covered include capital budgeting, sources of operating revenue, management of cash and inventories, risk analysis and forecasting. Particular attention is paid to cost containment regulatory strategies and their implications for financial planning and management. Prerequisite(s): BA 602.

BA 704. Managing Quality in Healthcare. 3 Hours.
This course examines methods and tools for managing quality in health facilities, physician practices, managed care, and public health. Topics include developments in quality assurance and improvement, utilization review, risk management, and patient satisfaction.

BA 705. Global Perspectives in Healthcare. 3 Hours.
This course examines the social, political, and economic aspects of global healthcare issues. Through a comparative analysis of the health systems of multiple nations, students will compare theories of health policy and priorities, healthcare system facilities, workforce, technology, cost, quality, and access. The emphasis of the course will be on health management strategies used in different countries and healthcare systems to mobilize, allocate, and maintain resources to improve the healthcare status and delivery systems.

BA 710. Law & Ethics for Non-Profit Organizations. 3 Hours.
Non-profit managers and supervisors are held to a higher standard of ethical behavior due to the nature of their funding sources and their mission. This course is designed to develop in the student a basic understanding of the laws governing non-profit organizations, the practical applications of these laws and the ethics that are demanded of non-profit managers.

BA 711. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics covered include: leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 712. Strategic Marketing for Nonprofit Organizations. 3 Hours.
This course applies the concepts of marketing and strategy to the management of non-profit organizations. Through class lectures, discussion, case studies, and applied projects, students will build an understanding of the marketing process in the non-profit environment in order to be able to design, implement, and evaluate an organization's approach to marketing and strategic positioning.

BA 713. Fundraising. 3 Hours.
This course takes a systems approach to the process of fund-raising. Topics covered include: donor cultivation, use of the annual fund, major gifts, corporate giving, and grant writing.

BA 720. Advanced Sales and Marketing in Hospitality. 3 Hours.
This course focuses on difficult problems and issues facing sales and marketing personnel in the hospitality industry. Students will make use of case studies in order to develop their decision-making process including the use of marketing research and analysis.

BA 721. Convention Planning and Events Planning. 3 Hours.
This course focuses on the rapidly growing convention sales and events planning industries. The student will learn how to design, plan, market and manage meetings and events.

BA 722. Advanced Front Office Operations. 3 Hours.
This course begins with detailed introduction about numerous aspects of front office operations and management. The next section of the course examines the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.

BA 723. Legal Issues in Hospitality Management. 3 Hours.
This course will provide the student an overview of the important aspects of Hospitality Law for Managers, and other professionals. Some of the areas of study include and are not limited to Torts, Products Liability, Constitutional Law and Criminal Law and many other subjects.

BA 724. Managing Service. 3 Hours.
This course begins with an introduction to the framework for providing quality service to customers and guests. Next we will discuss the needs of the customer/guest and proceed to develop our menu and/or product offering. We will also examine the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.

BA 725. Hospitality Graduate Directed Practicum. 3 Hours.
Each student will find, will choose or will be provided with an internship site. The site chosen will be based on the student's preferences with regard to location and types of property. However, the student's preferences will not be the only consideration for placement. Prerequisite(s): BA 720 and BA 722 and BA 724.
BA 731. Business and Information Technology. 3 Hours.
This graduate course approaches Information Technology from the perspective of information consumers as opposed to technology implementers. During this course, students will examine various technologies and their application within modern organizations. The course has two primary goals. (1) The course will explain information technologies in non-technical terms so that students can evaluate a technology’s effectiveness relative to any existing alternatives and the overall organizational needs. (2) This course should increase student awareness regarding how they interact with technology in a personal or business setting. Business leaders are constantly bombarded with technology. This course addresses the need to sift through that information in an intelligent manner and make smart business decisions.

BA 741. Staffing & Selection. 3 Hours.
A source of competitive advantage for any organization is its talent. The effectiveness of an organization depends on the performance of each individual in that organization. Hence, one of the most important human resource functions is that of staffing the organization. This course is essential for HR professionals who are responsible for recruiting, screening, hiring, promoting, and outplacing employees. It is also very crucial for any line managers, supervisors, team leaders, and hiring managers who are involved in recruiting, making promotions, succession, or any other workforce decisions. An examination of the scientific, legal, and administrative issues associated with the recruitment, selection, employment and retention of individuals by organizations augments the study. Specific attention will be given to the current challenges of an increasingly dynamic workplace and diverse workforce.

BA 742. Training & Development. 3 Hours.
The effective training and development of human resources creates tremendous and unique value for an organization. This course examines how organizations can develop and manage the talents and skillset of human capital. The course explores topics such as training needs analysis, formulating training objectives, and the design, implementation, and evaluation of training and development programs.

BA 745. Innovative Global Strategy. 3 Hours.
This course will build students’ awareness of the challenges that must be addressed and the opportunities that may be present when competing in the global marketplace. The course focuses on how firms apply innovative strategies to create a sustainable competitive advantage in the global arena. Course content will be drawn from readings, case analysis, online content and discussions. The course requires students to analyze and understand real world examples of both successful and unsuccessful global strategy implementation.

BA 750. Fundamentals of Risk Management. 3 Hours.
This course explores the fundamentals of risk management. After discussion of the importance of risk and the rationale for its management in organizations, the remainder of the course will analyze the process of and methods for managing risk.

BA 751. Employee Benefits. 3 Hours.
This course explores the nature and operation of employer-sponsored benefit plans. Emphasis is placed on plan design, administration, funding, and regulation. The course also addresses organizational characteristics, benefit structure, and pricing of risk transfer schemes for groups.

BA 752. Crisis Management. 3 Hours.
Crisis Management can be defined as a communications response to an event that has a negative impact on an audience - the public, customers/clients, employees, shareholders, etc. Examples of such events could include tainted food, a corporate leak, a political scandal, an entertainment or athletic scandal, damaged products that cause or could potentially cause life-threatening situations, natural disasters, terrorism, and financial disasters. In this course, students will analyze and critique high-profile cases and learn how to effectively respond to crises.

BA 753. Corporate Risk Management. 3 Hours.
Corporate risk is analyzed through the lens of enterprise risk management. This course explores the operational and financial risks faced by firms and the study of various methods of handling these risks.

BA 754. Strategic Selling. 3 Hours.
The focus of this course is on key, strategic customer selling approaches. The process of sales planning and strategy development for these types of customers will be emphasized. The objective of this course is to understand and execute sales strategies for managing major and large customers.

BA 760. Technology & Innovation. 3 Hours.
BA 760 Technology & Innovation offers a research approach to identifying, analyzing, and creating technological advantage in nascent and mature industries. Students will apply the methodologies of innovation and discovery to business settings and markets, seeking to create competitive advantage and achieve market transformation through strategic initiatives that redefine consumer expectations and industry practices and reframe organizations to embrace innovative practices and processes.

BA 761. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 762. Groupthink. 3 Hours.
This course explores the origin of groupthink. Groupthink is a term first used by social psychologist Irving L. Janis (1972) that refers to a psychological phenomenon in which people strive for consensus within a group. This course explores groupthink as a phenomenon where people set aside their own personal beliefs or adopt the opinion of the rest of the group.

BA 763. Biotechnology & Innovation: Intellectual Property. 3 Hours.
This course focuses on the protection of proprietary and intellectual rights in inventions, writings, creative works, software, industry trade secrets, industry trade designations, and other intellectual assets at the international, Federal, and State Levels. The course will give special consideration to the emergence of new areas of patent law in Biotechnology and Pharmaceutical fields, examining not only the patentability of intellectual assets, but also the discovery process, particularly in collaborative environments involving multiple organizations and institutions, and the qualifying distinctions between collaborative and competitive research.
BA 790. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.*

BA 791. Professional Project. 3-6 Hours.
This course is used to award graduate credit for prior learning and educational experience obtained outside of the traditional classroom. Through the preparation of a professional project, students provide formal documentation of the specific graduate-level learning competencies which they have acquired through prior experience. A maximum of six (6) credit hours may be earned.

BA 792. Graduate Internship I. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 793. Graduate Internship II. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization’s supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 792.

BA 794. Graduate Internship III. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.

BA 796. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 798. Thesis. 6 Hours.
The thesis may be library-oriented research with extensive reliance on documents and a relatively limited amount of primary field research, or it may be action-oriented field research with relevant documentation from the literature. The title of the thesis topic must be filed with the graduate committee. A student, with the approval of his/her advisory committee, may register for the thesis after completion of twenty-four (24) semester hours.

BA 799. Topic/. 3 Hours.
Students work together in a seminar setting under the direction of a member of the graduate faculty. The content of the seminar will vary according to the interests of students and faculty involved.

B.S. Business Administration - Healthcare Management

Healthcare Agencies nationwide have increased their demand for astute, well-rounded individuals to effectively manage day-to-day needs. The B.S. Business Administration - Healthcare Management concentration degree can challenge students to explore the organizational structure of healthcare institutions and develop an understanding of the interrelatedness of psychological, social, cultural and political factors in healthcare delivery, organizational culture and healthcare management. Further, organizations need employees with an understanding of financial reimbursement, human resources, and law. Many of the healthcare related classes are listed below and additional specialized topics classes will be offered that can be approved by a student’s Advisor to fulfill the Healthcare Electives.

In addition to the program objectives of the B.S. Business Administration degree, this concentration requires students to demonstrate an understanding of current healthcare financing, important healthcare management concepts, and national healthcare policy issues.

BA Courses

BA 101. Introduction to Business. 3 Hours.
This course introduces students to the general nature of functional areas in business such as marketing, management, accounting, finance, research and development, and risk management. The relationship between business, the government, the economy, and the environment is examined.

BA 111. Economic Geography. 3 Hours.
This course is an introduction to the principles of economic geography, ranging from physical and biological geography to cultural and political factors. The decision making processes, both local and global, for different types of service oriented, manufacturing, transportation, and resource based businesses will be examined. The relationship of natural resources, population, and culture, and how such factors affect economic activity will be emphasized.

BA 201. Business Law I. 3 Hours.
This course provides students with a basic knowledge of the law of contracts, personal property and real property.
BA 202. Business Law II. 3 Hours.
This course is intended to augment BA 201 with in depth analysis of the law in Contracts, UCC, Corporations, Principal Agency Law, Advanced Tort Law, Environmental Law, Real Property Law, Securities Law and Employment Law.

BA 204. Franchise Formation and Management. 3 Hours.
This class will discuss franchise formation and management with particular emphasis on the discovery and evaluation of the franchisor and the feasibility of entrepreneurs converting an existing business into a franchise chain or creating and selling new franchises, domestic and international. Franchise accounting and finance (borrowing or leveraging) will be covered, as well as, taking the franchise to the stock market or going public (IPO) and raising investment capital. Prerequisite(s): BA 401.

BA 205. Real Estate Law. 3 Hours.
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

BA 210. Economics Overview for Non-Business Majors. 3 Hours.
This is an overview of microeconomic and macroeconomic concepts for non-business majors. It will include an introduction to American capitalism including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of competitive firms. It will also be an introduction to national income accounts, unemployment, inflation, government fiscal policy and monetary policy.

BA 211. Microeconomics. 3 Hours.
This is an introduction to American capitalism and microeconomic concepts including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of purely and impurely competitive firms.

BA 212. Macroeconomics. 3 Hours.
This is an introduction to macroeconomics in the American economy: national income accounts, unemployment, inflation, government fiscal policy, monetary policy and economic growth.

BA 220. Real Estate Principles and Practices. 3 Hours.
This course will provide students with methods of analyzing acquisition and retention of Real Estate. Also, there will be a focus on the skills and techniques required to operate a real estate business, including trust accounts, risk management, and property management.

BA 243. The Business of Innovation. 3 Hours.
This is a cross-disciplinary class that will introduce students to the Lean Startup Scientific Method for developing and commercializing ideas for new ventures or else innovating and developing new products or business models within existing companies. Topics include marketplace innovations, technology and science based innovations, marketplace hypothesis development and testing, frugal and agile engineering, business models, intellectual property, prototyping, exit strategies, and fundraising. Lab component is integrated within module deliverables.

BA 271. Risk Management. 3 Hours.
A study is made of the risks encountered by individuals and business firms. A presentation is made of the basic principles and institutions, which have been developed in risk management. This material is treated primarily from the consumer point of view.

BA 299. Topic/. 1 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 300. Business Presentations. 3 Hours.
Communication is a vital function of any business. Managers at all levels must be able to communicate effectively to advance their career and ensure the success of their organization. This course will give students a working knowledge of how to create, brief, and present information across the organizational communications spectrum. Students will learn how to think critically and apply problem solving skills across a variety of historical and contemporary business topics. Students will learn how to collect, analyze, synthesize, and present information in a professional manner to assorted audiences in different venues. The foundational skill set developed in this course is the ability for students to articulate their ideas in a professional manner within a variety of business settings. Prerequisite(s): EH 124.

BA 302. Business Ethics. 3 Hours.
This course is designed to raise a moral consciousness and sensitivity within the various disciplines of the business curriculum. The disciplines focused on here are business, accounting, marketing, multinational corporations, and those areas of human resource management inclusive of diversity in the workplace within the context of environmental and social responsibility.

BA 306. Franchise Law. 3 Hours.
This is a law class that analyzes all the issues of Franchise Law with a particular emphasis on Contracts, Principal/Agent Franchise Relations, Corporate Formation of Franchises, and Securities Law. Prerequisite(s): BA 201 and BA 202.

BA 310. Organization and Management. 3 Hours.
This course focuses on how to design organization systems and effectively manage them. Students completing the course should understand the universal process of management and key terminology in the language of management. Students are encouraged conceptually to blend contributions from the various schools of management thought into an integrated perspective of what managers do and why.

BA 311. Human Resource Management. 3 Hours.
This course addresses traditional personnel administration issues. Emphasis in the course is on how to manage the major human resource administration functions of job design, reward system design, staffing, training and performance control, to achieve maximum employee performance and satisfaction. Prerequisite(s): BA 310 or ( Major=BS Criminal Justice or Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Paralegal or Major=BS English - Prelaw).

BA 312. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics include leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.
BA 321. Marketing Principles. 3 Hours.
The course covers the language and issues of marketing with an emphasis on developing responsive marketing strategies that meet customer needs. The course focuses on marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing. Other topics will be incorporated into the course including the external environment (focus on integrative topics within marketing, such as economics, politics, government, and nature), marketing research, international/global marketing with relevance to cultural diversity, ethics, the impact of technology on marketing, and careers in marketing.

BA 334. International Economics. 3 Hours.
This applied economics course will emphasize the use of cases to study topics such as comparative advantage, treaties, tariffs, non-tariff trade barriers, and trade among developed and developing nations. Prerequisite(s): BA 211 and BA 212.

BA 344. Personal Financial Planning. 3 Hours.
This course provides comprehensive coverage of personal financial planning in the areas of money management, axes, consumer credit, housing and other consumer decisions, legal protection, insurance, retirement planning, and estate planning. Prerequisite(s): MS 141 or MS 111 or MS 242 or MS 180 or MS 181.

BA 351. Internship. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 352. Internship II. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 353. Internship III. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 354. Internship IV. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 355. Internship V. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 351 and BA 352 and BA 353 and BA 354.

BA 362. Financial Management I. 3 Hours.
The foundation finance course covers basic personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management. Students are expected to become proficient in financial analysis of a corporation and in various aspects of corporate financial management. Prerequisite(s): AC 121 and (AC 122 or AC 211) and BA 211 and (MS 141 or MS 111 or MS 242 or MS 180 or MS 181).

BA 364. Financial Management II. 3 Hours.
The course is a continuation of Financial Management I and will cover such topics as real options, sensitivity, scenario and break-even analysis, basic issues regarding stocks and bonds, risk/return and cost of capital, capital structure and limits to the use of debt. Prerequisite(s): BA 362.

BA 375. Supply Chain Management. 3 Hours.
This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategies to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.

BA 401. Managerial Economics. 3 Hours.
This course is designed to close the gap between economic theory and business application. It reviews traditional analysis and shows its application to the understanding and solution of economic problems of the firm and industry. Prerequisite(s): BA 211 and BA 212.

BA 411. Organizational Behavior. 3 Hours.
This course is highly experiential in its approach to helping students understand and appreciate why people behave the way they do in an organizational context. Students learn how to manage employee behavior by analysis of real world phenomena and by application of principles in the areas of human perception and communication, leadership and motivation, small group dynamics, organizational culture, and organizational change. Prerequisite(s): BA 310.

BA 413. Operations Management. 3 Hours.
Quantitative model building and manipulation are a means of analyzing and synthesizing the elements of productions management. Both deterministic and stochastic modeling are emphasized in the areas of work systems design, queuing, PERT, SQC, inventory control, forecasting, and linear and nonlinear programming. Prerequisite(s): BA 310 and MS 132.

BA 414. Business Strategy. 3 Hours.
This Business Administration senior seminar focuses on decision making at the executive management level, the formulation of strategy, and its implementation in the organization. The course will employ case studies, laboratory simulation techniques, and computer spreadsheet analysis. Prerequisite(s): College Level=Senior.
BA 421. Integrated Marketing Communication and Advertising. 3 Hours.
An introduction into the world of advertising: Students will plan and
design Ad campaigns, write copy and design layouts for the different
types/forms of advertising. The students will work with local companies
and assist them in redesign of their ad campaigns. Prerequisite(s):
BA 321.

BA 422. Sales and Sales Management. 3 Hours.
This course provides students with the fundamentals of good
salesmanship and sales management. Prior to studying management
principles students practice sales techniques in simulations. Cases
are used to illustrate and evaluate principles of sales management.
Prerequisite(s): BA 321.

BA 423. Retail Management. 3 Hours.
The purpose of this course is to provide students with an understanding
of the fundamentals of successful retail operations. Topics included
are the market concept in retailing, factors of area and market analysis,
and aspects of organizational structure, layout, and personnel planning.
Also covered are methods of pricing, merchandising planning, inventory,
expense control and sales promotion techniques. Prerequisite(s): BA 321.

BA 424. Marketing Research. 3 Hours.
The basic research concepts and practices as applied to the analysis
of marketing problems are examined. Topics include sources of data,
collecting data, sampling, questionnaire construction, tabulating data,
and report preparation; computerized statistical software is used.
Prerequisite(s): BA 321 and MS 132.

BA 425. Marketing Management. 3 Hours.
This is the capstone course for marketing majors. Students apply
courses to business problems of business
and nonprofit organizations. Cases and business simulations are used
to teach decision-making in the complex environment of business. A
complete marketing plan for a simulated company of the student’s choice
summarizes the student’s knowledge of the field. Prerequisite(s): BA 321.

BA 426. Real Estate Market, Research and Analysis. 3 Hours.
This course will discuss market research, real estate sales, property
valuations and analysis. Students will examine market research reports
to gain insight into market trends, opportunities, projections,
and growth in the Maine, the US and global real estate markets.
Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 427. Franchise Market Research and Analysis. 3 Hours.
This course will focus on analysis of market demographics, feasibility
studies, product pricing, promotion and distribution, franchise broker
contacts, extrapolation of sales and expenses, and the projection of costs
and net profits, emerging markets and capital expansion. Prerequisite(s):
BA 401 and MS 132 and MS 232 and BA 362.

BA 428. Strategic Selling. 3 Hours.
This course builds on the fundamentals of selling. The student
will understand how to advance sales in light of complex business
environments consisting of layers of buyers, decision makers and those
who influence purchasing decisions. A strategic account planning
process will be analyzed and applied to real companies by way of case
studies. The art and skill of negotiating will be studied and learned
through role play. Prerequisite(s): BA 422.

BA 434. International Finance. 3 Hours.
The factors affecting exchange rates are discussed, as well as different
types of exchange rate systems and how governments attempt to
influence exchange rates. The relationships among interest rate parity,
purchasing power parity, the Fisher effect and International Fisher effect
and exchange rates are analyzed. Students learn how currency futures,
currency options and money market hedges are used to hedge exchange
rate risk. Prerequisite(s): BA 362.

BA 437. International Marketing. 3 Hours.
The basics of international marketing will be taught including the
foundations of culture, cultural understanding, business customs and
practices in global marketing, assessing global markets, and developing
international marketing strategy. Prerequisite(s): BA 321.

BA 438. Export-Import Procedures. 3 Hours.
The basics of export-import procedures will be taught including
justification for exporting/importing, market planning methods, selection
of appropriate marketing mix variables, and regulation. Prerequisite(s):
BA 321.

BA 439. International Franchising Management. 3 Hours.
This course will focus on international expansion of franchises, learning
the culture, monetary exchanges, imports and exports, local international
market analysis and much more. Prerequisite(s): BA 204 and BA 306
and BA 427.

BA 440. Small Business Management I. 3 Hours.
This course supplies prospective and current small business managers
with the essential concepts of starting and operating small businesses.
Topics covered include: environment and management of small
business enterprise, problems in starting small businesses, financial
and administrative control, and management of business operations.
Particular emphasis is placed on the interrelated nature of the
components, particularly as they affect the financial picture of the firm.
Through a lecture and discussion format, students are expected to share
their own experiences in small businesses with their fellow students.
Prerequisite(s): College Level=Senior or College Level=Junior.

BA 441. Entrepreneurship I- New Venture Development. 3 Hours.
Students will be introduced to the practical application of classic
and contemporary business theory as it applies to the early stages
of entrepreneurship and intrapreneurship, opportunity recognition,
innovation, and new venture development. Course topics include types
of entrepreneurs, opportunity recognition, marketing, cash and other
resource requirements, financial statements, planning, franchising,
intellectual property, success/failure/resilience, and growth. Class
will use text, cases, articles, internet sources, and guest lecturers.
Prerequisite(s): College Level=Senior or College Level=Junior.

BA 442. Applied Small Business Management. 3 Hours.
This is an advanced course which focuses on real problems in Small
Business Management, using the case approach. Cases are drawn from
the text, from actual local small businesses, and from the practical
experience of students in the class. Prerequisite(s): College Level=Junior
or College Level=Senior.

BA 443. Entrepreneurship II: Business Plans. 3 Hours.
This course builds on BA 441, New Venture Development. The focus of this
course is on the early stages of formalizing and growing a venture. Topics
include business plan writing, fund raising and cash flow, measuring
and conveying financial position, core strategy development and
competitive advantage, sustainability, international entrepreneurship,
supply chain, growth, and exit. Prerequisite(s): College Level=Junior or
College Level=Senior.
BA 460. Investments. 3 Hours.
Beginning with an introduction to financial markets and investment instruments, topics include stock and bond quotations and trading procedures, rate of return, margin trading, stock indexes, stock and bond valuation, risk and return, portfolio theory, active and passive portfolio management, and investment performance evaluation. Prerequisite(s): BA 362.

BA 464. Bank & Financial Services Management. 3 Hours.
This course will introduce students to the specific issues in the financial management of a banking firm and, to a smaller degree, of other financial intermediaries. Emphasis will be on products, roles, regulatory framework, and risk management. Prerequisite(s): BA 362.

BA 465. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 471. Life and Health Insurance. 3 Hours.
This course is intended to provide background knowledge for personal application and for those responsible for administering benefit plans for employees; it provides the necessary information required to pass the State of Maine license examination. Prerequisite(s): BA 271.

BA 472. Casualty and Property Insurance. 3 Hours.
The first part of the course introduces the basics of the entire insurance business, including a summary of legal aspects, types of insurers and principles of reinsurance; next, each type of insurance is studied in detail. Topics covered are fire, consequential loss, inland marine, ocean marine, theft and surety, liability and miscellaneous property insurance. Prerequisite(s): BA 271.

BA 473. Real Estate Appraisal. 3 Hours.
This course familiarizes the student with the foundation and principles of the appraisal process. The student will become familiar with the three approaches to value. Site valuation, construction costs, depreciation; comparables selection and adjustments; rental multipliers; and reconciliation will be discussed. The student will focus on the elements making up the standards for professional appraisal practice. These elements, i.e., Definitions, Rules, Standards and Standard Rules, Statements and advisory opinions are discussed in detail along with the philosophy and history of USPAP. Prerequisite(s): BA 401 and MS 132 and BA 362.

BA 475. Senior Management Project. 3 Hours.
An experiential course that gives seniors the opportunity to apply what they have learned in class to a real business situation. Prerequisite(s): College Level=Senior.

BA 496. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRILI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 477. Business and Culture Travel Study Course. 3 Hours.
Business and Culture Travel Study course is designed to expose students to economies across the world. During the course students will travel to important commercial, cultural and governmental cities. Through a combination of readings students will be exposed to 20th and 21st century history, economics, culture political and business philosophy. The course will also involve visits to major multinational corporations, cultural activities and lectures from University business faculty when available. The course will also have two pre-trip class sessions with readings and one post course session to wrap up the experience and discuss the student travel logs.

BA 498. Business Seminar. 3 Hours.
This honors course requires the study of various business problems under the supervision of members of the Department of Business Administration. A paper is required. An oral examination is scheduled as the final examination in the course. Prerequisite(s): College Level=Senior.

BA 499. Topic/. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 600. Research Methods in Business and Education. 3 Hours.
This course is designed for beginning graduate students who have little or no formal preparation in those areas of research and problem-solving essential for a comprehensive study of business and education at the graduate level. Emphasis is placed on the identification of common problem types and the selection and use of appropriate methods of analysis (primarily statistical in nature).

BA 601. Managerial Economics. 3 Hours.
This course begins with a comprehensive overview of micro- and macroeconomic concepts with the aim of developing within students a picture of how business and nonprofit organizations relate to the economy as a whole. The course then focuses on practical applications of economic analysis to problems of concern to managers. Case studies and projects are used to demonstrate the methods used to determine economic feasibility and cost-effectiveness of products, services, and programs.

BA 602. Managerial Accounting. 3 Hours.
This is an accelerated accounting course for those with little or no formal accounting background. The emphasis is on concepts which managers need to know in order to be effective. Topics include the preparation and interpretation of financial statements, cost planning and control, cost-volume-profit analysis, decision-making models, master budgeting and variances, and evaluation of capital projects.
BA 605. Management Communications. 3 Hours.
This is an advanced communications course that builds upon a student's experience and prior undergraduate coursework in writing and oral communications. Topics include: advanced business writing, use of visual materials, selection of secondary sources of information, report preparation, and presentations to small and large groups.

BA 611. Organizational Behavior. 3 Hours.
This course surveys the major field of management, examining structures and processes on both group and organizational levels. Both traditional and contemporary theories are analyzed and applied to business operations.

BA 620. Financial Management. 3 Hours.
Topics considered include financial planning, operating and capital budgets, cash flow, purchasing and accounting procedures, the sources and uses of corporate and institutional funds, and financial analysis for evaluation and control. Students develop projects specifically related to their needs in educational administration, small business, or corporate management. Prerequisite(s): BA 602 or AC 301.

BA 621. Marketing Management. 3 Hours.
This course focuses on complex problems facing decision-makers in the marketing of goods and services. Emphasis is placed on the decision-making process, including assessment of the social, economic, and political environment in which the organization operates; problem definition; development and evaluation of alternatives, and the implementation of the best alternative. Cases in advertising, sales, marketing research, and strategic marketing management provide practice in marketing analysis and decision-making.

BA 622. Production Management. 3 Hours.
Emphasis is placed on the use of quantitative techniques for solving manufacturing problems. The student is given an opportunity to practice mathematical model-building and manipulation. Other topics considered include queuing system design, plant layout, statistical quality control, inventory modeling, Program Evaluation and Review Technique (PERT), linear and nonlinear programming, and control theory.

BA 625. Global Strategic Management. 3 Hours.
This course focuses on the strategic challenges and opportunities confronting firms that undertake to create value and to compete in the global economy. Successful companies develop strategies for doing business in emerging markets that are different from those they use at home and often find novel ways of implementing them too. The class will make extensive use of case analysis and discussion to evaluate and understand the strategic issues that confront firms operating internationally, as well as to appreciate the importance of values and ethics in organization decisions and actions. In this course we will probe the workings of business strategies in transition and emerging economies, gain an understanding of the strategies of local firms, and analyze the international success and failure of companies. Prerequisite(s): BA 600 and 15 Credits From Range [BA 600 To BA 799].

BA 626. Accounting in Planning, Budgeting and Control. 3 Hours.
This course examines the role of accounting in the planning, budgeting, and control process of a business in a dynamic environment. The integration of measuring and analyzing (planning), short-term decisions and managing organizations (control), and preparing various budgets (budgeting) are emphasized. This course is designed as a continuation of BA602 Managerial Accounting. Numerical problems, as well as case studies, are utilized as methods of study. Prerequisite(s): BA 602 or AC 211.

BA 627. Investment Analysis. 3 Hours.
This course provides a detailed description of securities market organization and approaches to investment opportunities. Students will examine theories used in the valuation of financial securities and employ projects and applications to develop a real world understanding of portfolio management. Prerequisite(s): BA 602.

BA 628. New Venture Planning and Management. 3 Hours.
This course deals with the foundation of new ventures and related aspects of managing the small growing enterprise. Techniques taught in this course are equally applicable to small businesses, nonprofit organizations, and new ventures of larger organizations. Topics include: use of scarce resources, such as money, talent and technological expertise; identification of environmental threats and opportunities; and operational considerations such as organizational structure, legal requirements, financing, and accounting procedures.

BA 641. Human Resource Management. 3 Hours.
This course explores human resource management as an integrated process of planning and control designed to achieve high employee productivity and job satisfaction. The course focuses on the essential functions of human resource management as they apply both to the general supervisory responsibilities of every manager and to the specific operations of the personnel department.

BA 642. Leadership in Business and Professions. 3 Hours.
This course is designed to provide graduate management students with a comprehensive review of the essentials for effective leadership. It focuses on the identification of basic leadership styles, explores the theoretical and practical findings of research in leadership development, and seeks to synthesize the student’s leadership style with the most effective working models of leadership.

BA 643. Strategic Change Management. 3 Hours.
Strategic Change Management focuses on the skills required to deal effectively with organizational change. The course addresses first the pressures in the business environment that make change a fundamental reality for managers. Particular attention is paid to change arising from public policy initiatives that impinge on business. The course then examines the manager as change agent responsible for initiating innovation and explores both the personal skills required in the role of change agent and the tools and techniques available to support the manager in that role. The course also examines the problems and opportunities of those who are the recipients of change in an organization and the skills required to cope effectively with that situation.

BA 644. The Legal Environment of Business. 3 Hours.
This course will provide an overview of the important aspects of business law for executives, managers, accountants, and other professionals. The areas of law covered include but are not limited to administrative, contract, corporate and other business organizations, employment relations, real estate, taxes, and UCC sales.

BA 646. Current Issues in Business. 3 Hours.
This course, conducted in seminar fashion, draws on current literature to analyze contemporary and emerging issues facing management in the late twentieth century. Content will vary.
BA 700. Health Care Management. 3 Hours.
This course examines management problems and policy-making in the health care industry. Several areas are considered including: (1) the functions of the health care manager, (2) the types of health care delivery systems, (3) the administration of hospitals, (4) the financing of medical care, and (5) the role of government. Through readings, lectures, discussions, and projects, students clarify their own role in the delivery of health services. The course regularly draws on experts in health planning and health care administration.

BA 701. Legal Environment of Health Care Management. 3 Hours.
The course provides a foundation in the legal and regulatory framework in which health care institutions operate. Students will also examine the legal issues confronting health care managers including director and administrative liability, malpractice, negligence, patient rights and confidentiality, licensure requirements, and the like.

BA 702. Health Care Economics. 3 Hours.
In this course, the principles and tools of economic decision-making are applied to management in the health care sector. The course explores the application to health care management functions of such concepts and processes as supply and demand, resource allocation and utilization, costing and pricing, resource productivity, forecasting and economic aspects of planning, and utilization review. While the principal emphasis in the course is on micro-economic analysis, some consideration is also given to an economic analysis of public policy alternatives for the delivery of health care service. Prerequisite(s): BA 601.

BA 703. Financial Management in Healthcare Organizations. 3 Hours.
This course applies the perspectives and tools of financial analysis to the management of health care organizations and evaluation of organizational performance. Topics covered include capital budgeting, sources of operating revenue, management of cash and inventories, risk analysis and forecasting. Particular attention is paid to cost containment regulatory strategies and their implications for financial planning and management. Prerequisite(s): BA 602.

BA 704. Managing Quality in Healthcare. 3 Hours.
This course examines methods and tools for managing quality in health facilities, physician practices, managed care, and public health. Topics include developments in quality assurance and improvement, utilization review, risk management, and patient satisfaction.

BA 705. Global Perspectives in Healthcare. 3 Hours.
This course examines the social, political, and economic aspects of global healthcare issues. Through a comparative analysis of the health systems of multiple nations, students will compare theories of health policy and priorities, healthcare system facilities, workforce, technology, cost, quality, and access. The emphasis of the course will be on health management strategies used in different countries and healthcare systems to mobilize, allocate, and maintain resources to improve the healthcare status and delivery systems.

BA 710. Law & Ethics for Non-Profit Organizations. 3 Hours.
Non-profit managers and supervisors are held to a higher standard of ethical behavior due to the nature of their funding sources and their mission. This course is designed to develop in the student a basic understanding of the laws governing non-profit organizations, the practical applications of these laws and the ethics that are demanded of non-profit managers.

BA 711. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics covered include: leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 712. Strategic Marketing for Nonprofit Organizations. 3 Hours.
This course applies the concepts of marketing and strategy to the management of non-profit organizations. Through class lectures, discussion, case studies, and applied projects, students will build an understanding of the marketing process in the non-profit environment in order to be able to design, implement, and evaluate an organization’s approach to marketing and strategic positioning.

BA 713. Fundraising. 3 Hours.
This course takes a systems approach to the process of fund-raising. Topics covered include: donor cultivation, use of the annual fund, major gifts, corporate giving, and grant writing.

BA 720. Advanced Sales and Marketing in Hospitality. 3 Hours.
This course focuses on difficult problems and issues facing sales and marketing personnel in the hospitality industry. Students will make use of case studies in order to develop their decision-making process including the use of marketing research and analysis.

BA 721. Convention Planning and Events Planning. 3 Hours.
This course focuses on the rapidly growing convention sales and events planning industries. The student will learn how to design, plan, market and manage meetings and events.

BA 722. Advanced Front Office Operations. 3 Hours.
This course begins with detailed introduction about numerous aspects of front office operations and management. The next section of the course examines the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.

BA 723. Legal Issues in Hospitality Management. 3 Hours.
This course will provide the student an overview of the important aspects of Hospitality Law for Managers, and other professionals. Some of the areas of study include and are not limited to Torts, Products Liability, Constitutional Law and Criminal Law and many other subjects.

BA 724. Managing Service. 3 Hours.
This course begins with an introduction to the framework for providing quality service to customers and guests. Next we will discuss the needs of the customer/guest and proceed to develop our menu and/or product accordingly. Finally, we will learn how management and staff create loyal customers and guests by delivering service that exceeds their expectations.

BA 729. Hospitality Graduate Directed Practicum. 3 Hours.
Each student will find, will choose or will be provided with an internship site. The site chosen will be based on; and interview conducted by the management of the internship site and the student’s preference of location based on those available. The Coordinator of Hospitality Management will have the final decision on all internship site placements. The Coordinator’s decision will be based on his or her interaction with the student during previous course work, his or her understanding of the student and the internship properties requirements. Every consideration will be given to the student’s personal preferences with regard to location and types of property. However, the student’s preferences will not be the only consideration for placement. Prerequisite(s): BA 720 and BA 722 and BA 724.
BA 731. Business and Information Technology. 3 Hours.
This graduate course approaches Information Technology from the perspective of information consumers as opposed to technology implementers. During this course, students will examine various technologies and their application within modern organizations. The course has two primary goals. (1) The course will explain information technologies in non-technical terms so that students can evaluate a technology’s effectiveness relative to any existing alternatives and the overall organizational needs. (2) This course should increase student awareness regarding how they interact with technology in a personal or business setting. Business leaders are constantly bombarded with technology. This course addresses the need to sift through that information in an intelligent manner and make smart business decisions.

BA 741. Staffing & Selection. 3 Hours.
A source of competitive advantage for any organization is its talent. The effectiveness of an organization depends on the performance of each individual in that organization. Hence, one of the most important human resource functions is that of staffing the organization. This course is essential for HR professionals who are responsible for recruiting, screening, hiring, promoting, and outplacing employees. It is also very crucial for any line managers, supervisors, team leaders, and hiring managers who are involved in recruiting, making promotions, succession, or any other workforce decisions. An examination of the scientific, legal, and administrative issues associated with the recruitment, selection, employment and retention of individuals by organizations augments the study. Specific attention will be given to the current challenges of an increasingly dynamic workplace and diverse workforce.

BA 742. Training & Development. 3 Hours.
The effective training and development of human resources creates tremendous and unique value for an organization. This course examines how organizations can develop and manage the talents and skillset of human capital. The course explores topics such as training needs analysis, formulating training objectives, and the design, implementation, and evaluation of training and development programs.

BA 745. Innovative Global Strategy. 3 Hours.
This course will build students’ awareness of the challenges that must be addressed and the opportunities that may be present when competing in the global marketplace. The course focuses on how firms apply innovative strategies to create a sustainable competitive advantage in the global arena. Course content will be drawn from readings, case analysis, online content and discussions. The course requires students to analyze and understand real world examples of both successful and unsuccessful global strategy implementation.

BA 750. Fundamentals of Risk Management. 3 Hours.
This course explores the fundamentals of risk management. After discussion of the importance of risk and the rationale for its management in organizations, the remainder of the course will analyze the process of and methods for managing risk.

BA 751. Employee Benefits. 3 Hours.
This course explores the nature and operation of employer-sponsored benefit plans. Emphasis is placed on plan design, administration, funding, and regulation. The course also addresses organizational characteristics, benefit structure, and pricing of risk transfer schemes for groups.

BA 752. Crisis Management. 3 Hours.
Crisis Management can be defined as a communications response to an event that has a negative impact on an audience - the public, customers/clients, employees, shareholders, etc. Examples of such events could include tainted food, a corporate leak, a political scandal, an entertainment or athletic scandal, damaged products that cause or could potentially cause life-threatening situations, natural disasters, terrorism, and financial disasters. In this course, students will analyze and critique high-profile cases and learn how to effectively respond to crises.

BA 753. Corporate Risk Management. 3 Hours.
Corporate risk is analyzed through the lens of enterprise risk management. This course explores the operational and financial risks faced by firms and the study of various methods of handling these risks.

BA 754. Strategic Selling. 3 Hours.
The focus of this course is on key, strategic customer selling approaches. The process of sales planning and strategy development for these types of customers will be emphasized. The objective of this course is to understand and execute sales strategies for managing major and large customers.

BA 760. Technology & Innovation. 3 Hours.
BA 760 Technology & Innovation offers a research approach to identifying, analyzing, and creating technological advantage in nascent and mature industries. Students will apply the methodologies of innovation and discovery to business settings and markets, seeking to create competitive advantage and achieve market transformation through strategic initiatives that redefine consumer expectations and industry practices and refocus organizations to embrace innovative practices and processes.

BA 761. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 762. Groupthink. 3 Hours.
This course explores the origin of groupthink. Groupthink is a term first used by social psychologist Irving L. Janis (1972) that refers to a psychological phenomenon in which people strive for consensus within a group. This course explores groupthink as a phenomenon where people set aside their own personal beliefs or adopt the opinion of the rest of the group.

BA 763. Biotechnology & Innovation: Intellectual Property. 3 Hours.
This course focuses on the protection of proprietary and intellectual rights in inventions, writings, creative works, software, industry trade secrets, industry trade designations, and other intellectual assets at the international, Federal, and State Levels. The course will give special consideration to the emergence of new areas of patent law in Biotechnology and Pharmaceutical fields, examining not only the patentability of intellectual assets, but also the discovery process, particularly in collaborative environments involving multiple organizations and institutions, and the qualifying distinctions between collaborative and competitive research.
BA 790. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.*.

BA 791. Professional Project. 3-6 Hours.
This course is used to award graduate credit for prior learning and educational experience obtained outside of the traditional classroom. Through the preparation of a professional project, students provide formal documentation of the specific graduate-level learning competencies which they have acquired through prior experience. A maximum of six (6) credit hours may be earned.

BA 792. Graduate Internship I. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 793. Graduate Internship II. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization’s supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 792.

BA 794. Graduate Internship III. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.

BA 796. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 798. Thesis. 6 Hours.
The thesis may be library-oriented research with extensive reliance on documents and a relatively limited amount of primary field research, or it may be action-oriented field research with relevant documentation from the literature. The title of the thesis topic must be filed with the graduate committee. A student, with the approval of his/her advisory committee, may register for the thesis after completion of twenty-four (24) semester hours.

BA 799. Topic. 3 Hours.
Students work together in a seminar setting under the direction of a member of the graduate faculty. The content of the seminar will vary according to the interests of students and faculty involved.

HS Courses

HS 100. Overview of Careers in Health Care. 1 Hour.
This course introduces the students to the different employment possibilities for a Health Care Studies graduate. Seminars will feature invited speakers to discuss how their company works and what positions they might have for a graduate in Health Care Studies. In addition Students can visit different facilities to see first-hand how their studies in Health Care can be applied to different job settings through virtual tours.

HS 101. Introduction to Health Care Studies. 3 Hours.
This course will introduce the students to the health care industry, and will consist of lectures, readings, discussions, and visiting professionals. While the principal goal will be to inform students of the necessary skills needed to succeed in the health care field, a secondary goal will have the student be able to articulate a description of the background to almost any article relating to the challenges of national health care.

HS 121. Medical Terminology. 3 Hours.
This course introduces students to the language used in describing and coding of clinical visits, medical procedures and on medical forms. The ability to understand complex medical terms will be gained by the analysis of prefixes, word roots and suffixes. Coding of diseases (ICD-9) and medical insurance language will also be emphasized.

HS 299. Topic. 1-3 Hour.
This course is intended to provide the opportunity to offer courses in health care studies that would not normally be a part of the Husson curriculum. As such the topics will depend upon the interests of students and faculty.

HS 301. Introduction to Public Health. 3 Hours.
This course is an introductory overview of the U.S. Public Health System with an emphasis on the core areas of public health, challenges and strategies for working with communities, and specific health issues that impact the health of the population. We will look at environmental and behavior factors associated with health promotion and disease prevention and view different national programs and programs going on in Maine.

HS 311. Healthcare Management and Organization. 3 Hours.
This course will introduce junior year students to the complexity of healthcare organizations and how they are managed. An overview of the historical development of the modern healthcare organization, as well as the contemporary management roles and functions within them, will be reviewed. Measuring performance and quality improvement will also be taught. The importance of the roles of physicians, nurses, as well as other professionals and support staff will be highlighted. Theories of healthcare leadership will also be explored. Prerequisite(s): (HS 101) or ( Major=MS Occupational Therapy and ( College Level=Grad Freshman or College Level=Grad Sophomore or College Level=Grad Junior or College Level=Grad Senior)).

HS 321. Healthcare Law and Ethics. 3 Hours.
This course is a summation and integration of Ethics and Law within the context of healthcare delivery. The class will be introduced to the ethical and moral considerations of the healthcare professions by exploring their historical development. Students will also discover how the law influences the healthcare profession and be introduced to our complex legal structure through exposure to case law and regulations. Prerequisite(s): HS 101 and HS 121 and PH 110.
**HS 401. Medical Databases. 3 Hours.**
This course is designed as a continuation of HS 121 (medical terminology) and MI 214. Students will learn about and contrast different types of electronic medical records systems. They will learn how to transfer and share data with people from same clinics to people outside of the system and learn about the ethical and legal issues of sharing data. Prerequisite(s): HS 121 and (MI 111 or MI 214).

**HS 411. Health Economics and Policy. 3 Hours.**
This course will introduce senior Health Care Studies students to beginning healthcare economics and its influence on health policy. The course will emphasize the economic issues of scarcity, choice, supply and demand, marginal analysis, substitutes, and externalities as they relate to health care policies. National health insurance, as a rapidly evolving idea for the future, will also be analyzed and evaluated. Prerequisite(s): HS 101 and HS 311.

**HS 421. Health Care Studies Senior Experience. 3 Hours.**
This course combines students past course work into one research project. Each student will be required to plan and carry out an investigation into some health area of interest and write-up and report their experiences and results to the whole class. In addition they will put together a portfolio, resume and cover letter for a job of their choice. Prerequisite(s): Major=BS Health Care Studies.

**HS 499. Topic/. 1-6 Hour.**
This course offers the students experiences in a work and/or research environment dedicated to health care or public health. Each student chooses and contacts a hospital, clinic, health center, public health department or health care business and spends a total of 100 hours in that setting. Activities will include training/orientation, work on projects relevant to the mission of the agency, observation of agency work processes, and other assigned work from the site liaison. Students keep daily journals and meet three times during the semester for training and to share their experiences. Prerequisite(s): Major=BS Health Care Studies and (College Level=Junior or College Level=Senior).

**All approved IPS programs leading to the degree of Bachelor's of Business Administration will incorporate the following features, including:**

1. All required General Education requirements;
2. All general business courses;
3. Business electives as necessary to support the development of at least two (2) areas of concentration totaling 30 credit hours (including at least 15 hours completed at Husson with a 2.0 grade point average or better among these courses), resulting in a comprehensive program of study totaling not less than 124 credit hours.

In addition to the program objectives of the B.S. Business Administration degree, this concentration requires students to demonstrate the learning outcomes for the two relative concentrations chosen from the College of Business. Thus, students should refer to the corresponding learning outcomes for those concentrations.

The following curriculum should be followed by the Advisor and student to ensure that all degree requirements are met.

**B.S. Business Administration - Interdisciplinary Program of Study (IPS)**

**The Program**

Students must complete an approved program of study having no fewer than 124 credit hours of college level work that demonstrates a broad base in business administration, and also demonstrates a significant concentration of study in two or more distinct business concentrations.

It is expected that the approved program of study be filed with the Dean of Business as soon as possible but preferably prior to beginning course work as a third year student (> 60 credit hours). In the event that program approval is sought after beginning the third year’s work, an academic program totaling more than 124 credit hours may be required in order to satisfy all requirements.

**Basic Guidelines**
AREAS OF CONCENTRATION

First Concentration (15 credits minimum) 15
Second Concentration (15 credits minimum) 15
Total Hours 125

*** Credit may not be required for degree completion.

Courses

BA 101. Introduction to Business. 3 Hours.
This course introduces students to the general nature of functional areas in business such as marketing, management, accounting, finance, research and development, and risk management. The relationship between business, the government, the economy, and the environment is examined.

BA 111. Economic Geography. 3 Hours.
This course is an introduction to the principles of economic geography, ranging from physical and biological geography to cultural and political factors. The decision making processes, both local and global, for different types of service oriented, manufacturing, transportation, and resource based businesses will be examined. The relationship of natural resources, population, and culture, and how such factors affect economic activity will be emphasized.

BA 201. Business Law I. 3 Hours.
This course provides students with a basic knowledge of the law of contracts, personal property and real property.

BA 202. Business Law II. 3 Hours.
This course is intended to augment BA 201 with in depth analysis of the law in Contracts, UCC, Corporations, Principal Agency Law, Advanced Tort Law, Environmental Law, Real Property Law, Securities Law and Employment Law.

BA 204. Franchise Formation and Management. 3 Hours.
This class will discuss franchise formation and management with particular emphasis on the discovery and evaluation of the franchisor and the feasibility of entrepreneurs converting an existing business into a franchise chain or creating and selling new franchises, domestic and international. Franchise accounting and finance (borrowing or leveraging) will be covered, as well as, taking the franchise to the stock market or going public (IPO) and raising investment capital. Prerequisite(s): BA 401.

BA 205. Real Estate Law. 3 Hours.
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

BA 210. Economics Overview for Non-Business Majors. 3 Hours.
This is an overview of microeconomic and macroeconomic concepts for non-business majors. It will include an introduction to American capitalism including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of competitive firms. It will also be an introduction to national income accounts, unemployment, inflation, government fiscal policy and monetary policy.

BA 211. Microeconomics. 3 Hours.
This is an introduction to American capitalism and microeconomic concepts including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of purely and impurely competitive firms.

BA 212. Macroeconomics. 3 Hours.
This is an introduction to macroeconomics in the American economy: national income accounts, unemployment, inflation, government fiscal policy, monetary policy and economic growth.

BA 220. Real Estate Principles and Practices. 3 Hours.
This course will provide students with methods of analyzing acquisition and retention of Real Estate. Also, there will be a focus on the skills and techniques required to operate a real estate business, including trust accounts, risk management, and property management.

BA 243. The Business of Innovation. 3 Hours.
This is a cross-disciplinary class that will introduce students to the Lean Startup Scientific Method for developing and commercializing ideas for new ventures or else innovating and developing new products or business models within existing companies. Topics include marketplace innovations, technology and science based innovations, marketplace hypothesis development and testing, frugal and agile engineering, business models, intellectual property, prototyping, exit strategies, and fundraising. Lab component is integrated within module deliverables.

BA 271. Risk Management. 3 Hours.
A study is made of the risks encountered by individuals and business firms. A presentation is made of the basic principles and institutions, which have been developed in risk management. This material is treated primarily from the consumer point of view.

BA 299. Topic/. 1 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 300. Business Presentations. 3 Hours.
Communication is a vital function of any business. Managers at all levels must be able to communicate effectively to advance their career and ensure the success of their organization. This course will give students a working knowledge of how to create, brief, and present information across the organizational communications spectrum. Students will learn how to think critically and apply problem solving skills across a variety of historical and contemporary business topics. Students will learn how to collect, analyze, synthesize, and present information in a professional manner to assorted audiences in different venues. The foundational skill set developed in this course is the ability for students to articulate their ideas in a professional manner within a variety of business settings. Prerequisite(s): EH 124.

BA 302. Business Ethics. 3 Hours.
This course is designed to raise a moral consciousness and sensitivity within the various disciplines of the business curriculum. The disciplines focused on here are business, accounting, marketing, multinational corporations, and those areas of human resource management inclusive of diversity in the workplace within the context of environmental and social responsibility.

BA 306. Franchise Law. 3 Hours.
This is a law class that analyzes all the issues of Franchise Law with a particular emphasis on Contracts, Principal-Agent Franchise Relations, Corporate Formation of Franchises, and Securities Law. Prerequisite(s): BA 201 and BA 202.
BA 310. Organization and Management. 3 Hours.
This course focuses on how to design organization systems and effectively manage them. Students completing the course should understand the universal process of management and key terminology in the language of management. Students are encouraged conceptually to blend contributions from the various schools of management thought into an integrated perspective of what managers do and why.

BA 311. Human Resource Management. 3 Hours.
This course addresses traditional personnel administration issues. Emphasis in the course is on how to manage the major human resource administration functions of job design, reward system design, staffing, training and performance control, to achieve maximum employee performance and satisfaction. Prerequisite(s): BA 310 or ( Major=BS Criminal Justice or Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Paralegal or Major=BS English - Prelaw).

BA 312. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics include leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 321. Marketing Principles. 3 Hours.
The course covers the language and issues of marketing with an emphasis on developing responsive marketing strategies that meet customer needs. The course focuses on marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing. Other topics will be incorporated into the course including the external environment (focus on integrative topics within marketing, such as economics, politics, government, and nature), marketing research, international/global marketing with relevance to cultural diversity, ethics, the impact of technology on marketing, and careers in marketing.

BA 334. International Economics. 3 Hours.
This applied economics course will emphasize the use of cases to study topics such as comparative advantage, treaties, tariffs, non-tariff trade barriers, and trade blocks among developed and developing nations. Prerequisite(s): BA 211 and BA 212.

BA 344. Personal Financial Planning. 3 Hours.
This course provides comprehensive coverage of personal financial planning in the areas of money management, axes, consumer credit, housing and other consumer decisions, legal protection, insurance, retirement planning, and estate planning. Prerequisite(s): MS 141 or MS 111 or MS 242 or MS 180 or MS 181.

BA 351. Internship. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 352. Internship II. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 353. Internship III. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 354. Internship IV. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 355. Internship V. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 351 and BA 352 and BA 353 and BA 354.

BA 362. Financial Management I. 3 Hours.
The foundation finance course covers basic personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management. Students are expected to become proficient in financial analysis of a corporation and in various aspects of corporate financial management. Prerequisite(s): AC 121 and (AC 122 or AC 211) and BA 211 and (MS 141 or MS 111 or MS 242 or MS 180 or MS 181).

BA 364. Financial Management II. 3 Hours.
The course is a continuation of Financial Management I and will cover such topics as real options, sensitivity, scenario and break-even analysis, basic issues regarding stocks and bonds, risk/return and cost of capital, capital structure and limits to the use of debt. Prerequisite(s): BA 362.

BA 375. Supply Chain Management. 3 Hours.
This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategies to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.
BA 401. Managerial Economics. 3 Hours.
This course is designed to close the gap between economic theory and business application. It reviews traditional analysis and shows its application to the understanding and solution of economic problems of the firm and industry. Prerequisite(s): BA 211 and BA 212.

BA 411. Organizational Behavior. 3 Hours.
This course is highly experimental in its approach to helping students understand and appreciate why people behave the way they do in an organizational context. Students learn how to manage employee behavior by analysis of real world phenomena and by application of principles in the areas of human perception and communication, leadership and motivation, small group dynamics, organizational culture, and organizational change. Prerequisite(s): BA 310.

BA 413. Operations Management. 3 Hours.
Quantitative model building and manipulation are a means of analyzing and synthesizing the elements of productions management. Both deterministic and stochastic modeling are emphasized in the areas of work systems design, queuing, PERT, SQC, inventory control, forecasting, and linear and nonlinear programming. Prerequisite(s): BA 310 and MS 132.

BA 414. Business Strategy. 3 Hours.
This Business Administration senior seminar focuses on decision making at the executive management level, the formulation of strategy, and its implementation in the organization. The course will employ case studies, laboratory simulation techniques, and computer spreadsheet analysis. Prerequisite(s): College Level=Senior.

BA 421. Integrated Marketing Communication and Advertising. 3 Hours.
An introduction into the world of advertising: Students will plan and design Ad campaigns, write copy and design layouts for the different types/forms of advertising. The students will work with local companies and assist them in redesign of their ad campaigns. Prerequisite(s): BA 321.

BA 422. Sales and Sales Management. 3 Hours.
This course provides students with the fundamentals of good salesmanship and sales management. Prior to studying management principles students practice sales techniques in simulations. Cases are used to illustrate and evaluate principles of sales management. Prerequisite(s): BA 321.

BA 423. Retail Management. 3 Hours.
The purpose of this course is to provide students with an understanding of the fundamentals of successful retail operations. Topics included are the market concept in retailing, factors of area and market analysis, and aspects of organizational structure, layout, and personnel planning. Also covered are methods of pricing, merchandising planning, inventory, expense control and sales promotion techniques. Prerequisite(s): BA 321.

BA 424. Marketing Research. 3 Hours.
The basic research concepts and practices as applied to the analysis of marketing problems are examined. Topics include sources of data, collecting data, sampling, questionnaire construction, tabulating data, and report preparation; computerized statistical software is used. Prerequisite(s): BA 321 and MS 132.

BA 425. Marketing Management. 3 Hours.
This is the capstone course for marketing majors. Students apply concepts learned in other courses to marketing problems of business and nonprofit organizations. Cases and business simulations are used to teach decision-making in the complex environment of business. A complete marketing plan for a simulated company of the student’s choice summarizes the student’s knowledge of the field. Prerequisite(s): BA 321.

BA 426. Real Estate Market, Research and Analysis. 3 Hours.
This course will discuss market research, real estate sales, property valuations and analysis. Students will examine market research reports to gain insight into product and market trends, opportunities, projections, and growth in the Maine, the US and global real estate markets. Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 427. Franchise Market Research and Analysis. 3 Hours.
This class will focus on analysis of market demographics, feasibility studies, product pricing, promotion and distribution, franchise broker contacts, extrapolation of sales and expenses, and the projection of costs and net profits, emerging markets and capital expansion. Prerequisite(s): BA 401 and MS 132 and MS 232 and BA 362.

BA 428. Strategic Selling. 3 Hours.
This course builds on the fundamentals of selling. The student will understand how to advance sales in light of complex business environments consisting of layers of buyers, decision makers and those who influence purchasing decisions. A strategic account planning process will be analyzed and applied to real companies by way of case studies. The art and skill of negotiating will be studied and learned through role play. Prerequisite(s): BA 422.

BA 434. International Finance. 3 Hours.
The factors affecting exchange rates are discussed, as well as different types of exchange rate systems and how governments attempt to influence exchange rates. The relationships among interest rate parity, purchasing power parity, the Fisher effect and International Fisher effect and exchange rates are analyzed. Students learn how currency futures, currency options and money market hedges are used to hedge exchange rate risk. Prerequisite(s): BA 362.

BA 437. International Marketing. 3 Hours.
The basics of international marketing will be taught including the foundations of culture, cultural understanding, business customs and practices in global marketing, assessing global markets, and developing international marketing strategy. Prerequisite(s): BA 321.

BA 438. Export-Import Procedures. 3 Hours.
The basics of export-import procedures will be taught including justification for exporting/importing, market planning methods, selection of appropriate marketing mix variables, and regulation. Prerequisite(s): BA 321.

BA 439. International Franchising Management. 3 Hours.
This course will focus on international expansion of franchises, learning the culture, monetary exchanges, imports and exports, local international market analysis and much more. Prerequisite(s): BA 204 and BA 306 and BA 427.

BA 440. Small Business Management I. 3 Hours.
This course supplies prospective and current small business managers with the essential concepts of starting and operating small businesses. Topics covered include: environment and management of small business enterprise, problems in starting small businesses, financial and administrative control, and management of business operations. Particular emphasis is placed on the interrelated nature of the components, particularly as they affect the financial picture of the firm. Through a lecture and discussion format, students are expected to share their own experiences in small businesses with their fellow students. Prerequisite(s): College Level=Senior or College Level=Junior.
BA 441. Entrepreneurship I- New Venture Development. 3 Hours.
Students will be introduced to the practical application of classic and contemporary business theory as it applies to the early stages of entrepreneurship and intrapreneurship, opportunity recognition, innovation, and new venture development. Course topics include types of entrepreneurs, opportunity recognition, marketing, cash and other resource requirements, financial statements, planning, franchising, intellectual property, success/failure/resilience, and growth. Class will use text, cases, articles, internet sources, and guest lecturers. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 442. Applied Small Business Management. 3 Hours.
This is an advanced course which focuses on real problems in Small Business Management, using the case approach. Cases are drawn from the text, from actual local small businesses, and from practical experience of students in the class. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 443. Entrepreneurship II: Business Plans. 3 Hours.
This class builds on BA 441, New Venture Development. The focus of this class is on the early stages of formalizing and growing a venture. Topics include business plan writing, fund raising and cash flow, measuring and conveying financial position, core strategy development and competitive advantage, sustainability, international entrepreneurship, supply chain, growth, and exit. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 460. Investments. 3 Hours.
Beginning with an introduction to financial markets and investment instruments, topics include stock and bond quotations and trading procedures, rate of return, margin trading, stock indexes, stock and bond valuation, risk and return, portfolio theory, active and passive portfolio management, and investment performance evaluation. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 464. Bank & Financial Services Management. 3 Hours.
This course will introduce students to the specific issues in the financial management of a banking firm and, to a smaller degree, of other financial intermediaries. Emphasis will be on products, roles, regulatory framework, and risk management. Prerequisite(s): BA 362.

BA 465. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 471. Life and Health Insurance. 3 Hours.
This course is intended to provide background knowledge for personal application and for those responsible for administering benefit plans for employees; it provides the necessary information required to pass the State of Maine license examination. Prerequisite(s): BA 271.

BA 472. Casualty and Property Insurance. 3 Hours.
The first part of the course introduces the basics of the entire insurance business, including a summary of legal aspects, types of insurers and principles of reinsurance; next, each type of insurance is studied in detail. Topics covered are fire, consequential loss, inland marine, ocean marine, theft and surety, liability and miscellaneous property insurance. Prerequisite(s): BA 271.

BA 473. Real Estate Appraisal. 3 Hours.
This course familiarizes the student with the foundation and principles of the appraisal process. The student will become familiar with the three approaches to value. Site valuation, construction costs, depreciation; comparables selection and adjustments; rental multipliers; and reconciliation will be discussed. The student will focus on the elements making up the standards for professional appraisal practice. These elements, i.e., Definitions, Rules, Standards and Standard Rules, Statements and advisory opinions are discussed in detail along with the philosophy and history of USPAP. Prerequisite(s): BA 401 and MS 132 and BA 362.

BA 475. E-Business and E-Commerce for Managers. 3 Hours.
This course teaches the basic e-business and e-commerce theory. The students will apply the theory through the development of a website for the prime purpose of marketing a product or service or idea online.

BA 490. International Business. 3 Hours.
This course covers the international dimensions of managerial decision-making including: world economies, international trade theories, tariffs, quotas and other trade issues, global strategic planning, cross-cultural management, international market entry, international human resource management, international organization strategy, international logistics, import/export operations, currency exchange, international financial management. Current developments in global economic and business are emphasized; students participate in a computerized simulation throughout the semester. Prerequisite(s): BA 310 and BA 321.

BA 495. Senior Management Project. 3 Hours.
An experiential course that gives seniors the opportunity to apply what they have learned in class to a real business situation. Prerequisite(s): College Level=Senior.

BA 496. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 497. Business and Culture Travel Study Course. 3 Hours.
Business and Culture Travel Study course is designed to expose students to economies across the world. During the course students will travel to important commercial, cultural and governmental cities. Through a combination of readings students will be exposed to 20th and 21st century history, economics, culture political and business philosophy. The course will also involve visits to major multinational corporations, cultural activities and lectures from University business faculty when available. The course will also have two pre-trip class sessions with readings and one post course session to wrap up the experience and discuss the student travel logs.

BA 498. Business Seminar. 3 Hours.
This honors course requires the study of various business problems under the supervision of members of the Department of Business Administration. A paper is required. An oral examination is scheduled as the final examination in the course. Prerequisite(s): College Level=Senior.

BA 499. Topic/. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.
BA 600. Research Methods in Business and Education. 3 Hours.
This course is designed for beginning graduate students who have little or no formal preparation in those areas of research and problem-solving essential for a comprehensive study of business and education at the graduate level. Emphasis is placed on the identification of common problem types and the selection and use of appropriate methods of analysis (primarily statistical in nature).

BA 601. Managerial Economics. 3 Hours.
This course begins with a comprehensive overview of micro- and macroeconomic concepts with the aim of developing within students a picture of how business and nonprofit organizations relate to the economy as a whole. The course then focuses on practical applications of economic analysis to problems of concern to managers. Case studies and projects are used to demonstrate the methods used to determine economic feasibility and cost-effectiveness of products, services, and programs.

BA 602. Managerial Accounting. 3 Hours.
This is an accelerated accounting course for those with little or no formal accounting background. The emphasis is on concepts which managers need to know in order to be effective. Topics include the preparation and interpretation of financial statements, cost planning and control, cost-volume-profit analysis, decision-making models, master budgeting and variances, and evaluation of capital projects.

BA 605. Management Communications. 3 Hours.
This is an advanced communications course that builds upon a student’s experience and prior undergraduate coursework in writing and oral communications. Topics include: advanced business writing, use of visual materials, selection of secondary sources of information, report preparation, and presentations to small and large groups.

BA 611. Organizational Behavior. 3 Hours.
This course surveys the major field of management, examining structures and processes on both group and organizational levels. Both traditional and contemporary theories are analyzed and applied to business operations.

BA 620. Financial Management. 3 Hours.
Topics considered include financial planning, operating and capital budgets, cash flow, purchasing and accounting procedures, the sources and uses of corporate and institutional funds, and financial analysis for evaluation and control. Students develop projects specifically related to their needs in educational administration, small business, or corporate management. Prerequisite(s): BA 602 or AC 301.

BA 621. Marketing Management. 3 Hours.
This course focuses on complex problems facing decision-makers in the marketing of goods and services. Emphasis is placed on the decision-making process, including assessment of the social, economic, and political environment in which the organization operates; problem definition; development and evaluation of alternatives, and the implementation of the best alternative. Cases in advertising, sales, marketing research, and strategic marketing management provide practice in marketing analysis and decision-making.

BA 622. Production Management. 3 Hours.
Emphasis is placed on the use of quantitative techniques for solving manufacturing problems. The student is given an opportunity to practice mathematical model-building and manipulation. Other topics considered include queuing system design, plant layout, statistical quality control, inventory modeling, Program Evaluation and Review Technique (PERT), linear and nonlinear programming, and control theory.

BA 625. Global Strategic Management. 3 Hours.
This course focuses on the strategic challenges and opportunities confronting firms that undertake to create value and to compete in the global economy. Successful companies develop strategies for doing business in emerging markets that are different from those they use at home and often find novel ways of implementing them too. The class will make extensive use of case analysis and discussion to evaluate and understand the strategic issues that confront firms operating internationally, as well as to appreciate the importance of values and ethics in organization decisions and actions. In this course we will probe the workings of business strategies in transition and emerging economies, gain an understanding of the strategies of local firms, and analyze the international success and failure of companies. Prerequisite(s): BA 600 and 15 Credits From Range [BA 600 To BA 799].

BA 626. Accounting in Planning, Budgeting and Control. 3 Hours.
This course examines the role of accounting in the planning, budgeting, and control process of a business in a dynamic environment. The integration of measuring and analyzing (planning), short-term decisions and managing organizations (control), and preparing various budgets (budgeting) are emphasized. This course is designed as a continuation of BA 602 Managerial Accounting. Numerical problems, as well as case studies, are utilized as methods of study. Prerequisite(s): BA 602 or AC 211.

BA 627. Investment Analysis. 3 Hours.
This course provides a detailed description of securities market organization and approaches to investment opportunities. Students will examine theories used in the valuation of financial securities and employ projects and applications to develop a real world understanding of portfolio management. Prerequisite(s): BA 602.

BA 628. New Venture Planning and Management. 3 Hours.
This course deals with the foundation of new ventures and related aspects of managing the small growing enterprise. Techniques taught in this course are equally applicable to small businesses, nonprofit organizations, and new ventures of larger organizations. Topics include: the use of scarce resources, such as money, talent and technological expertise; identification of environmental threats and opportunities; and operational considerations such as organizational structure, legal requirements, financing, and accounting procedures.

BA 641. Human Resource Management. 3 Hours.
This course explores human resource management as an integrated process of planning and control designed to achieve high employee productivity and job satisfaction. The course focuses on the essential functions of human resource management as they apply both to the general supervisory responsibilities of every manager and to the specific operations of the personnel department.

BA 642. Leadership in Business and Professions. 3 Hours.
This course is designed to provide graduate management students with a comprehensive review of the essentials for effective leadership. It focuses on the identification of basic leadership styles, explores the theoretical and practical findings of research in leadership development, and seeks to synthesize the student’s leadership style with the most effective working models of leadership.
BA 643. Strategic Change Management. 3 Hours.
Strategic Change Management focuses on the skills required to deal effectively with organizational change. The course addresses first the pressures in the business environment that make change a fundamental reality for managers. Particular attention is paid to change arising from public policy initiatives that impinge on business. The course then examines the manager as change agent responsible for initiating innovation and explores both the personal skills required in the role of change agent and the tools and techniques available to support the manager in that role. The course also examines the problems and opportunities of those who are the recipients of change in an organization and the skills required to cope effectively with that situation.

BA 644. The Legal Environment of Business. 3 Hours.
This course will provide an overview of the important aspects of business law for executives, managers, accountants, and other professionals. The areas of law covered include but are not limited to administrative, contract, corporate and other business organizations, employment relations, real estate, taxes, and UCC sales.

BA 646. Current Issues in Business. 3 Hours.
This course, conducted in seminar fashion, draws on current literature to analyze contemporary and emerging issues facing management in the late twentieth century. Content will vary.

BA 700. Health Care Management. 3 Hours.
This course examines management problems and policy-making in the health care industry. Several areas are considered including: (1) the functions of the health care manager, (2) the types of health care delivery systems, (3) the administration of hospitals, (4) the financing of medical care, and (5) the role of government. Through readings, lectures, discussions, and projects, students clarify their own role in the delivery of health services. The course regularly draws on experts in health planning and health care administration.

BA 701. Legal Environment of Health Care Management. 3 Hours.
The course provides a foundation in the legal and regulatory framework in which health care institutions operate. Students will also examine the legal issues confronting health care managers including director and administrative liability, malpractice, negligence, patient rights and confidentiality, licensure requirements, and the like.

BA 702. Health Care Economics. 3 Hours.
In this course, the principles and tools of economic decision-making are applied to management in the health care sector. The course explores the application to health care management functions of such concepts and processes as supply and demand, resource allocation and utilization, costing and pricing, resource productivity, forecasting and economic aspects of planning, and utilization review. While the principal emphasis in the course is on micro-economic analysis, some consideration is also given to an economic analysis of public policy alternatives for the delivery of health care service. Prerequisite(s): BA 601.

BA 703. Financial Management in Healthcare Organizations. 3 Hours.
This course applies the perspectives and tools of financial analysis to the management of health care organizations and evaluation of organizational performance. Topics covered include capital budgeting, sources of operating revenue, management of cash and inventories, risk analysis and forecasting. Particular attention is paid to cost containment regulatory strategies and their implications for financial planning and management. Prerequisite(s): BA 602.

BA 704. Managing Quality in Healthcare. 3 Hours.
This course examines methods and tools for managing quality in health facilities, physician practices, managed care, and public health. Topics include developments in quality assurance and improvement, utilization review, risk management, and patient satisfaction.

BA 705. Global Perspectives in Healthcare. 3 Hours.
This course examines the social, political, and economic aspects of global healthcare issues. Through a comparative analysis of the health systems of multiple nations, students will compare theories of health policy and priorities, healthcare system facilities, workforce, technology, cost, quality, and access. The emphasis of the course will be on health management strategies used in different countries and healthcare systems to mobilize, allocate, and maintain resources to improve the healthcare status and delivery systems.

BA 710. Law & Ethics for Non-Profit Organizations. 3 Hours.
Non-profit managers and supervisors are held to a higher standard of ethical behavior due to the nature of their funding sources and their mission. This course is designed to develop in the student a basic understanding of the laws governing non-profit organizations, the practical applications of these laws and the ethics that are demanded of non-profit managers.

BA 711. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics covered include: leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 712. Strategic Marketing for Nonprofit Organizations. 3 Hours.
This course applies the concepts of marketing and strategy to the management of non-profit organizations. Through class lectures, discussion, case studies, and applied projects, students will build an understanding of the marketing process in the non-profit environment in order to be able to design, implement, and evaluate an organization's approach to marketing and strategic positioning.

BA 713. Fundraising. 3 Hours.
This course takes a systems approach to the process of fund-raising. Topics covered include: donor cultivation, use of the annual fund, major gifts, corporate giving, and grant writing.

BA 720. Advanced Sales and Marketing in Hospitality. 3 Hours.
This course focuses on difficult problems and issues facing sales and marketing personnel in the hospitality industry. Students will make use of case studies in order to develop their decision-making process including the use of marketing research and analysis.

BA 721. Convention Planning and Events Planning. 3 Hours.
This course focuses on the rapidly growing convention sales and events planning industries. The student will learn how to design, plan, market and manage meetings and events.

BA 722. Advanced Front Office Operations. 3 Hours.
This course begins with detailed introduction about numerous aspects of front office operations and management. The next section of the course examines the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.
BA 723. Legal Issues in Hospitality Management. 3 Hours.
This course will provide the student an overview of the important aspects of Hospitality Law for Managers, and other professionals. Some of the areas of study include and are not limited to Torts, Products Liability, Constitutional Law and Criminal Law and many other subjects.

BA 724. Managing Service. 3 Hours.
This course begins with an introduction to the framework for providing quality service to customers and guests. Next we will discuss the needs of the customer/guest and proceed to develop our menu and/or product accordingly. Finally, we will learn how management and staff create loyal customers and guests by delivering service that exceeds their expectations.

BA 729. Hospitality Graduate Directed Practicum. 3 Hours.
Each student will find, will choose or will be provided with an internship site. The site chosen will be based on; and interview conducted by the management of the internship site and the student's preference of location based on those available. The Coordinator of Hospitality Management will have the final decision on all internship site placements. The Coordinator's decision will be based on his or her interaction with the student during previous course work, his or her understanding of the student and the internship properties requirements. Every consideration will be given to the student's personal preferences with regard to location and types of property. However, the student's preferences will not be the only consideration for placement. Prerequisite(s): BA 720 and BA 722 and BA 724.

BA 731. Business and Information Technology. 3 Hours.
This graduate course approaches Information Technology from the perspective of information consumers as opposed to technology implementers. During this course, students will examine various technologies and their application within modern organizations. The course has two primary goals. (1) The course will explain information technologies in non-technical terms so that students can evaluate a technology’s effectiveness relative to any existing alternatives and the overall organizational needs. (2) This course should increase student awareness regarding how they interact with technology in a personal or business setting. Business leaders are constantly bombarded with technology. This course addresses the need to sift through that information in an intelligent manner and make smart business decisions.

BA 741. Staffing & Selection. 3 Hours.
A source of competitive advantage for any organization is its talent. The effectiveness of an organization depends on the performance of each individual in that organization. Hence, one of the most important human resource functions is that of staffing the organization. This course is essential for HR professionals who are responsible for recruiting, screening, hiring, promoting, and outplacing employees. It is also very crucial for any line managers, supervisors, team leaders, and hiring managers who are involved in recruiting, making promotions, succession, or any other workforce decisions. An examination of the scientific, legal, and administrative issues associated with the recruitment, selection, employment and retention of individuals by organizations augments the study. Specific attention will be given to the current challenges of an increasingly dynamic workplace and diverse workforce.

BA 742. Training & Development. 3 Hours.
The effective training and development of human resources creates tremendous and unique value for an organization. This course examines how organizations can develop and manage the talents and skillset of human capital. The course explores topics such as training needs analysis, formulating training objectives, and the design, implementation, and evaluation of training and development programs.

BA 745. Innovative Global Strategy. 3 Hours.
This course will build students’ awareness of the challenges that must be addressed and the opportunities that may be present when competing in the global marketplace. The course focuses on how firms apply innovative strategies to create a sustainable competitive advantage in the global arena. Course content will be drawn from readings, case analysis, online content and discussions. The course requires students to analyze and understand real world examples of both successful and unsuccessful global strategy implementation.

BA 750. Fundamentals of Risk Management. 3 Hours.
This course explores the fundamentals of risk management. After discussion of the importance of risk and the rationale for its management in organizations, the remainder of the course will analyze the process of and methods for managing risk.

BA 751. Employee Benefits. 3 Hours.
This course explores the nature and operation of employer-sponsored benefit plans. Emphasis is placed on plan design, administration, funding, and regulation. The course also addresses organizational characteristics, benefit structure, and pricing of risk transfer schemes for groups.

BA 752. Crisis Management. 3 Hours.
Crisis Management can be defined as a communications response to an event that has a negative impact on an audience - the public, customers/clients, employees, shareholders, etc. Examples of such events could include tainted food, a corporate leak, a political scandal, an entertainment or athletic scandal, damaged products that cause or could potentially cause life-threatening situations, natural disasters, terrorism, and financial disasters. In this course, students will analyze and critique high-profile cases and learn how to effectively respond to crises.

BA 753. Corporate Risk Management. 3 Hours.
Corporate risk is analyzed through the lens of enterprise risk management. This course explores the operational and financial risks faced by firms and the study of various methods of handling these risks.

BA 754. Strategic Selling. 3 Hours.
The focus of this course is on key, strategic customer selling approaches. The process of sales planning and strategy development for these types of customers will be emphasized. The objective of this course is to understand and execute sales strategies for managing major and large customers.

BA 760. Technology & Innovation. 3 Hours.
BA 760 Technology & Innovation offers a research approach to identifying, analyzing, and creating technological advantage in nascent and mature industries. Students will apply the methodologies of innovation and discovery to business settings and markets, seeking to create competitive advantage and achieve market transformation through strategic initiatives that redefine consumer expectations and industry practices and reframe organizations to embrace innovative practices and processes.

BA 761. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.
BA 762. Groupthink. 3 Hours.
This course explores the origin of groupthink. Groupthink is a term first used by social psychologist Irving L. Janis (1972) that refers to a psychological phenomenon in which people strive for consensus within a group. This course explores groupthink as a phenomenon where people set aside their own personal beliefs or adopt the opinion of the rest of the group.

BA 763. Biotechnology & Innovation: Intellectual Property. 3 Hours.
This course focuses on the protection of proprietary and intellectual rights in inventions, writings, creative works, software, industry trade secrets, industry trade designations, and other intellectual assets at the international, Federal, and State Levels. The course will give special consideration to the emergence of new areas of patent law in Biotechnology and Pharmaceutical fields, examining not only the patentability of intellectual assets, but also the discovery process, particularly in collaborative environments involving multiple organizations and institutions, and the qualifying distinctions between collaborative and competitive research.

BA 790. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.*

BA 791. Professional Project. 3-6 Hours.
This course is used to award graduate credit for prior learning and educational experience obtained outside of the traditional classroom. Through the preparation of a professional project, students provide formal documentation of the specific graduate-level learning competencies which they have acquired through prior experience. A maximum of six (6) credit hours may be earned.

BA 792. Graduate Internship I. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 793. Graduate Internship II. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization’s supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 792.

BA 794. Graduate Internship III. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.

BA 796. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 798. Thesis. 6 Hours.
The thesis may be library-oriented research with extensive reliance on documents and a relatively limited amount of primary field research, or it may be action-oriented field research with relevant documentation from the literature. The title of the thesis topic must be filed with the graduate committee. A student, with the approval of his/her advisory committee, may register for the thesis after completion of twenty-four (24) semester hours.

BA 799. Topic/. 3 Hours.
Students work together in a seminar setting under the direction of a member of the graduate faculty. The content of the seminar will vary according to the interests of students and faculty involved.

### B.S. Business Administration Concentration in International Business

Students in the International Business concentration study the international dimensions of managerial decision-making including: world economies, international trade theories, tariffs, quotas and other trade issues, global strategic planning, cross-cultural management, international market entry, international human resource management, international organization strategy, international logistics, import/export operations, currency exchange, international financial management. Current developments in global economics, finance, marketing and exporting-importing are emphasized.

As part of a capstone experience, students participate in a computerized simulation which provides experiential learning incorporating all areas of international business and business administration studies. Further, experience with hands-on micro-lending prepares students beyond the traditional classroom education.

In addition to the program objectives of the B.S. Business Administration degree, this concentration requires students to utilize cross cultural literacy in the analysis of foreign political, economic, and legal systems.

Total Hours 24
Courses

BA 101. Introduction to Business. 3 Hours.
This course introduces students to the general nature of functional areas in business such as marketing, management, accounting, finance, research and development, and risk management. The relationship between business, the government, the economy, and the environment is examined.

BA 111. Economic Geography. 3 Hours.
This course is an introduction to the principles of economic geography, ranging from physical and biological geography to cultural and political factors. The decision making processes, both local and global, for different types of service oriented, manufacturing, transportation, and resource based businesses will be examined. The relationship of natural resources, population, and culture, and how such factors affect economic activity will be emphasized.

BA 201. Business Law I. 3 Hours.
This course provides students with a basic knowledge of the law of contracts, personal property and real property.

BA 202. Business Law II. 3 Hours.
This course is intended to augment BA 201 with in depth analysis of the law in Contracts, UCC, Corporations, Principal Agency Law, Advanced Tort Law, Environmental Law, Real Property Law, Securities Law and Employment Law.

BA 204. Franchise Formation and Management. 3 Hours.
This class will discuss franchise formation and management with particular emphasis on the discovery and evaluation of the franchisor and the feasibility of entrepreneurs converting an existing business into a franchise chain or creating and selling new franchises, domestic and international. Franchise accounting and finance (borrowing or leveraging) will be covered, as well as, taking the franchise to the stock market or going public (IPO) and raising investment capital. Prerequisite(s): BA 401.

BA 205. Real Estate Law. 3 Hours.
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

BA 210. Economics Overview for Non-Business Majors. 3 Hours.
This is an overview of microeconomic and macroeconomic concepts for non-business majors. It will include an introduction to American capitalism including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of competitive firms. It will also be an introduction to national income accounts, unemployment, inflation, government fiscal policy and monetary policy.

BA 211. Microeconomics. 3 Hours.
This is an introduction to American capitalism and microeconomic concepts including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of purely and impurely competitive firms.

BA 212. Macroeconomics. 3 Hours.
This is an introduction to macroeconomics in the American economy: national income accounts, unemployment, inflation, government fiscal policy, monetary policy and economic growth.

BA 220. Real Estate Principles and Practices. 3 Hours.
This course will provide students with methods of analyzing acquisition and retention of Real Estate. Also, there will be a focus on the skills and techniques required to operate a real estate business, including trust accounts, risk management, and property management.

BA 243. The Business of Innovation. 3 Hours.
This is a cross-disciplinary class that will introduce students to the Lean Startup Scientific Method for developing and commercializing ideas for new ventures or else innovating and developing new products or business models within existing companies. Topics include marketplace innovations, technology and science based innovations, marketplace hypothesis development and testing, frugal and agile engineering, business models, intellectual property, prototyping, exit strategies, and fundraising. Lab component is integrated within module deliverables.

BA 271. Risk Management. 3 Hours.
A study is made of the risks encountered by individuals and business firms. A presentation is made of the basic principles and institutions, which have been developed in risk management. This material is treated primarily from the consumer point of view.

BA 299. Topic/. 1 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 300. Business Presentations. 3 Hours.
Communication is a vital function of any business. Managers at all levels must be able to communicate effectively to advance their career and ensure the success of their organization. This course will give students a working knowledge of how to create, brief, and present information across the organizational communications spectrum. Students will learn how to think critically and apply problem solving skills across a variety of historical and contemporary business topics. Students will learn how to collect, analyze, synthesize, and present information in a professional manner to assorted audiences in different venues. The foundational skill set developed in this course is the ability for students to articulate their ideas in a professional manner within a variety of business settings. Prerequisite(s): EH 124.

BA 302. Business Ethics. 3 Hours.
This course is designed to raise a moral consciousness and sensitivity within the various disciplines of the business curriculum. The disciplines focused on here are business, accounting, marketing, multinational corporations, and those areas of human resource management inclusive of diversity in the workplace within the context of environmental and social responsibility.

BA 306. Franchise Law. 3 Hours.
This is a law class that analyzes all the issues of Franchise Law with a particular emphasis on Contracts, Principal/Agent Franchise Relations, Corporate Formation of Franchises, and Securities Law. Prerequisite(s): BA 201 and BA 202.

BA 310. Organization and Management. 3 Hours.
This course focuses on how to design organization systems and effectively manage them. Students completing the course should understand the universal process of management and key terminology in the language of management. Students are encouraged conceptually to blend contributions from the various schools of management thought into an integrated perspective of what managers do and why.
BA 311. Human Resource Management. 3 Hours.
This course addresses traditional personnel administration issues. Emphasis in the course is on how to manage the major human resource administration functions of job design, reward system design, staffing, training and performance control, to achieve maximum employee performance and satisfaction. Prerequisite(s): BA 310 or ( Major=BS Criminal Justice or Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Paralegal or Major=BS English - Prelaw).

BA 312. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics include leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 321. Marketing Principles. 3 Hours.
The course covers the language and issues of marketing with an emphasis on developing responsive marketing strategies that meet customer needs. The course focuses on marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing. Other topics will be incorporated into the course including the external environment (focus on integrative topics within marketing, such as economics, politics, government, and nature), marketing research, international/global marketing with relevance to cultural diversity, ethics, the impact of technology on marketing, and careers in marketing.

BA 334. International Economics. 3 Hours.
This applied economics course will emphasize the use of cases to study topics such as comparative advantage, treaties, tariffs, non-tariff trade barriers, and trade blocks among developed and developing nations. Prerequisite(s): BA 211 and BA 212.

BA 344. Personal Financial Planning. 3 Hours.
This course provides comprehensive coverage of personal financial planning in the areas of money management, axes, consumer credit, housing and other consumer decisions, legal protection, insurance, retirement planning, and estate planning. Prerequisite(s): MS 141 or MS 111 or MS 242 or MS 180 or MS 181.

BA 351. Internship. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 352. Internship II. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 353. Internship III. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 354. Internship IV. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 355. Internship V. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 356. Financial Management I. 3 Hours.
The foundation finance course covers basic personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management. Students are expected to become proficient in financial analysis of a corporation and in various aspects of corporate financial management. Prerequisite(s): AC 121 and (AC 122 or AC 211) and BA 211 and (MS 141 or MS 111 or MS 242 or MS 180 or MS 181).

BA 357. Supply Chain Management. 3 Hours.
This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategies to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.

BA 401. Managerial Economics. 3 Hours.
This course is designed to close the gap between economic theory and business application. It reviews traditional analysis and shows its application to the understanding and solution of economic problems of the firm and industry. Prerequisite(s): BA 211 and BA 212.
BA 411. Organizational Behavior. 3 Hours.
This course is highly experiential in its approach to helping students understand and appreciate why people behave the way they do in an organizational context. Students learn how to manage employee behavior by analysis of real world phenomena and by application of principles in the areas of human perception and communication, leadership and motivation, small group dynamics, organizational culture, and organizational change. Prerequisite(s): BA 310.

BA 413. Operations Management. 3 Hours.
Quantitative model building and manipulation are a means of analyzing and synthesizing the elements of productions management. Both deterministic and stochastic modeling are emphasized in the areas of work systems design, queuing, PERT, SQC, inventory control, forecasting, and linear and nonlinear programming. Prerequisite(s): BA 310 and MS 132.

BA 414. Business Strategy. 3 Hours.
This Business Administration senior seminar focuses on decision making at the executive management level, the formulation of strategy, and its implementation in the organization. The course will employ case studies, laboratory simulation techniques, and computer spreadsheet analysis. Prerequisite(s): College Level=Senior.

BA 421. Integrated Marketing Communication and Advertising. 3 Hours.
An introduction into the world of advertising: Students will plan and design Ad campaigns, write copy and design layouts for the different types/forms of advertising. The students will work with local companies and assist them in redesign of their ad campaigns. Prerequisite(s): BA 321.

BA 422. Sales and Sales Management. 3 Hours.
This course provides students with the fundamentals of good salesmanship and sales management. Prior to studying management principles students practice sales techniques in simulations. Cases are used to illustrate and evaluate principles of sales management. Prerequisite(s): BA 321.

BA 423. Retail Management. 3 Hours.
The purpose of this course is to provide students with an understanding of the fundamentals of successful retail operations. Topics include the market concept in retailing, factors of area and market analysis, and aspects of organizational structure, layout, and personnel planning. Also covered are methods of pricing, merchandising planning, inventory, expense control and sales promotion techniques. Prerequisite(s): BA 321.

BA 424. Marketing Research. 3 Hours.
The basic research concepts and practices as applied to the analysis of marketing problems are examined. Topics include sources of data, collecting data, sampling, questionnaire construction, tabulating data, and report preparation; computerized statistical software is used. Prerequisite(s): BA 321 and MS 132.

BA 425. Marketing Management. 3 Hours.
This is the capstone course for marketing majors. Students apply concepts learned in other courses to marketing problems of business and nonprofit organizations. Cases and business simulations are used to teach decision-making in the complex environment of business. A complete marketing plan for a simulated company of the student's choice summarizes the student's knowledge of the field. Prerequisite(s): BA 321.

BA 426. Real Estate Market, Research and Analysis. 3 Hours.
This course will discuss market research, real estate sales, property valuations and analysis. Students will examine market research reports to gain insight into product and market trends, opportunities, projections, and growth in the Maine, the US and global real estate markets. Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 427. Franchise Market Research and Analysis. 3 Hours.
This class will focus on analysis of market demographics, feasibility studies, product pricing, promotion and distribution, franchise broker contacts, extrapolation of sales and expenses, and the projection of costs and net profits, emerging markets and capital expansion. Prerequisite(s): BA 401 and MS 132 and MS 232 and BA 362.

BA 428. Strategic Selling. 3 Hours.
This course builds on the fundamentals of selling. The student will understand how to advance sales in light of complex business environments consisting of layers of buyers, decision makers and those who influence purchasing decisions. A strategic account planning process will be analyzed and applied to real companies by way of case studies. The art and skill of negotiating will be studied and learned through role play. Prerequisite(s): BA 422.

BA 434. International Finance. 3 Hours.
The factors affecting exchange rates are discussed, as well as different types of exchange rate systems and how governments attempt to influence exchange rates. The relationships among interest rate parity, purchasing power parity, the Fisher effect and International Fisher effect and exchange rates are analyzed. Students learn how currency futures, currency options and money market hedges are used to hedge exchange rate risk. Prerequisite(s): BA 362.

BA 437. International Marketing. 3 Hours.
The basics of international marketing will be taught including the foundations of culture, cultural understanding, business customs and practices in global marketing, assessing global markets, and developing international marketing strategy. Prerequisite(s): BA 321.

BA 438. Export-Import Procedures. 3 Hours.
The basics of export-import procedures will be taught including justification for exporting/importing, market planning methods, selection of appropriate marketing mix variables, and regulation. Prerequisite(s): BA 321.

BA 439. International Franchising Management. 3 Hours.
This course will focus on international expansion of franchises, learning the culture, monetary exchanges, imports and exports, local international market analysis and much more. Prerequisite(s): BA 204 and BA 306 and BA 427.

BA 440. Small Business Management I. 3 Hours.
This course supplies prospective and current small business managers with the essential concepts of starting and operating small businesses. Topics covered include: environment and management of small business enterprise, problems in starting small businesses, financial and administrative control, and management of business operations. Particular emphasis is placed on the interrelated nature of the components, particularly as they affect the financial picture of the firm. Through a lecture and discussion format, students are expected to share their own experiences in small businesses with their fellow students. Prerequisite(s): College Level=Senior or College Level=Junior.
BA 441. Entrepreneurship I- New Venture Development. 3 Hours.
Students will be introduced to the practical application of classic and contemporary business theory as it applies to the early stages of entrepreneurship and intrapreneurship, opportunity recognition, innovation, and new venture development. Course topics include types of entrepreneurs, opportunity recognition, marketing, cash and other resource requirements, financial statements, planning, franchising, intellectual property, success/failure/resilience, and growth. Class will use text, cases, articles, internet sources, and guest lecturers. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 442. Applied Small Business Management. 3 Hours.
This is an advanced course which focuses on real problems in Small Business Management, using the case approach. Cases are drawn from the text, from actual local small businesses, and from the practical experience of students in the class. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 443. Entrepreneurship II: Business Plans. 3 Hours.
This class builds on BA 441, New Venture Development. The focus of this class is on the early stages of formalizing and growing a venture. Topics include business plan writing, fund raising and cash flow, measuring and conveying financial position, core strategy development and competitive advantage, sustainability, international entrepreneurship, supply chain, growth, and exit. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 460. Investments. 3 Hours.
Beginning with an introduction to financial markets and investment instruments, topics include stock and bond quotations and trading procedures, rate of return, margin trading, stock indexes, stock and bond valuation, risk and return, portfolio theory, active and passive portfolio management, and investment performance evaluation. Prerequisite(s): BA 362.

BA 463. Bank & Financial Services Management. 3 Hours.
This course will introduce students to the specific issues in the financial management of a banking firm and, to a smaller degree, of other financial intermediaries. Emphasis will be on products, roles, regulatory framework, and risk management. Prerequisite(s): BA 362.

BA 464. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 471. Life and Health Insurance. 3 Hours.
This course is intended to provide background knowledge for personal application and for those responsible for administering benefit plans for employees; it provides the necessary information required to pass the State of Maine license examination. Prerequisite(s): BA 271.

BA 472. Casualty and Property Insurance. 3 Hours.
The first part of the course introduces the basics of the entire insurance business, including a summary of legal aspects, types of insurers and principles of reinsurance; next, each type of insurance is studied in detail. Topics covered are fire, consequential loss, inland marine, ocean marine, theft and surety, liability and miscellaneous property insurance. Prerequisite(s): BA 271.

BA 473. Real Estate Appraisal. 3 Hours.
This course familiarizes the student with the foundation and principles of the appraisal process. The student will become familiar with the three approaches to value. Site valuation, construction costs, depreciation; comparables selection and adjustments; rental multipliers; and reconciliation will be discussed. The student will focus on the elements making up the standards for professional appraisal practice. These elements, i.e., Definitions, Rules, Standards and Standard Rules, Statements and advisory opinions are discussed in detail along with the history and philosophy of USPAP. Prerequisite(s): BA 401 and MS 132 and BA 362.

BA 475. E-Business and E-Commerce for Managers. 3 Hours.
This course teaches the basic e-business and e-commerce theory. The students will apply the theory through the development of a website for the prime purpose of marketing a product or service or idea online.

BA 490. International Business. 3 Hours.
This course covers the international dimensions of managerial decision-making including: world economies, international trade theories, tariffs, quotas and other trade issues, global strategic planning, cross-cultural management, international market entry, international human resource management, international organization strategy, international logistics, import/export operations, currency exchange, international financial management. Current developments in global economic and business are emphasized; students participate in a computerized simulation throughout the semester. Prerequisite(s): BA 310 and BA 321.

BA 495. Senior Management Project. 3 Hours.
An experiential course that gives seniors the opportunity to apply what they have learned in class to a real business situation. Prerequisite(s): College Level=Senior.

BA 496. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 497. Business and Culture Travel Study Course. 3 Hours.
Business and Culture Travel Study course is designed to expose students to economies across the world. During the course students will travel to important commercial, cultural and governmental cities. Through a combination of readings students will be exposed to 20th and 21st century history, economics, culture political and business philosophy. The course will also involve visits to major multinational corporations, cultural activities and lectures from University business faculty when available. The course will also have two pre-trip class sessions with readings and one post course session to wrap up the experience and discuss the student travel logs.

BA 498. Business Seminar. 3 Hours.
This honors course requires the study of various business problems under the supervision of members of the Department of Business Administration. A paper is required. An oral examination is scheduled as the final examination in the course. Prerequisite(s): College Level=Senior.

BA 499. Topic/. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.
BA 600. Research Methods in Business and Education. 3 Hours.
This course is designed for beginning graduate students who have little or no formal preparation in those areas of research and problem-solving essential for a comprehensive study of business and education at the graduate level. Emphasis is placed on the identification of common problem types and the selection and use of appropriate methods of analysis (primarily statistical in nature).

BA 601. Managerial Economics. 3 Hours.
This course begins with a comprehensive overview of micro- and macroeconomic concepts with the aim of developing within students a picture of how business and nonprofit organizations relate to the economy as a whole. The course then focuses on practical applications of economic analysis to problems of concern to managers. Case studies and projects are used to demonstrate the methods used to determine economic feasibility and cost-effectiveness of products, services, and programs.

BA 602. Managerial Accounting. 3 Hours.
This is an accelerated accounting course for those with little or no formal accounting background. The emphasis is on concepts which managers need to know in order to be effective. Topics include the preparation and interpretation of financial statements, cost planning and control, cost-volume-profit analysis, decision-making models, master budgeting and variances, and evaluation of capital projects.

BA 605. Management Communications. 3 Hours.
This is an advanced communications course that builds upon a student’s experience and prior undergraduate coursework in writing and oral communications. Topics include: advanced business writing, use of visual materials, selection of secondary sources of information, report preparation, and presentations to small and large groups.

BA 611. Organizational Behavior. 3 Hours.
This course surveys the major field of management, examining structures and processes on both group and organizational levels. Both traditional and contemporary theories are analyzed and applied to business operations.

BA 620. Financial Management. 3 Hours.
Topics considered include financial planning, operating and capital budgets, cash flow, purchasing and accounting procedures, the sources and uses of corporate and institutional funds, and financial analysis for evaluation and control. Students develop projects specifically related to their needs in educational administration, small business, or corporate management. Prerequisite(s): BA 602 or AC 301.

BA 621. Marketing Management. 3 Hours.
This course focuses on complex problems facing decision-makers in the marketing of goods and services. Emphasis is placed on the decision-making process, including assessment of the social, economic, and political environment in which the organization operates; problem definition; development and evaluation of alternatives, and the implementation of the best alternative. Cases in advertising, sales, marketing research, and strategic marketing management provide practice in marketing analysis and decision-making.

BA 622. Production Management. 3 Hours.
Emphasis is placed on the use of quantitative techniques for solving manufacturing problems. The student is given an opportunity to practice mathematical model-building and manipulation. Other topics considered include queuing system design, plant layout, statistical quality control, inventory modeling, Program Evaluation and Review Technique (PERT), linear and nonlinear programming, and control theory.

BA 625. Global Strategic Management. 3 Hours.
This course focuses on the strategic challenges and opportunities confronting firms that undertake to create value and to compete in the global economy. Successful companies develop strategies for doing business in emerging markets that are different from those they use at home and often find novel ways of implementing them too. The class will make extensive use of case analysis and discussion to evaluate and understand the strategic issues that confront firms operating internationally, as well as to appreciate the importance of values and ethics in organization decisions and actions. In this course we will probe the workings of business strategies in transition and emerging economies, gain an understanding of the strategies of local firms, and analyze the international success and failure of companies. Prerequisite(s): BA 600 and 15 Credits From Range [BA 600 To BA 799].

BA 626. Accounting in Planning, Budgeting and Control. 3 Hours.
This course examines the role of accounting in the planning, budgeting, and control process of a business in a dynamic environment. The integration of measuring and analyzing (planning), short-term decisions and managing organizations (control), and preparing various budgets (budgeting) are emphasized. This course is designed as a continuation of BA602 Managerial Accounting. Numerical problems, as well as case studies, are utilized as methods of study. Prerequisite(s): BA 602 or AC 211.

BA 627. Investment Analysis. 3 Hours.
This course provides a detailed description of securities market organization and approaches to investment opportunities. Students will examine theories used in the valuation of financial securities and employ projects and applications to develop a real world understanding of portfolio management. Prerequisite(s): BA 602.

BA 628. New Venture Planning and Management. 3 Hours.
This course deals with the foundation of new ventures and related aspects of managing the small growing enterprise. Techniques taught in this course are equally applicable to small businesses, nonprofit organizations, and new ventures of larger organizations. Topics include: use of scarce resources, such as money, talent and technological expertise; identification of environmental threats and opportunities; and operational considerations such as organizational structure, legal requirements, financing, and accounting procedures.

BA 641. Human Resource Management. 3 Hours.
This course explores human resource management as an integrated process of planning and control designed to achieve high employee productivity and job satisfaction. The course focuses on the essential functions of human resource management as they apply both to the general supervisory responsibilities of every manager and to the specific operations of the personnel department.

BA 642. Leadership in Business and Professions. 3 Hours.
This course is designed to provide graduate management students with a comprehensive review of the essentials for effective leadership. It focuses on the identification of basic leadership styles, explores the theoretical and practical findings of research in leadership development, and seeks to synthesize the student’s leadership style with the most effective working models of leadership.
BA 643. Strategic Change Management. 3 Hours.
Strategic Change Management focuses on the skills required to deal effectively with organizational change. The course addresses first the pressures in the business environment that make change a fundamental reality for managers. Particular attention is paid to change arising from public policy initiatives that impinge on business. The course then examines the manager as change agent responsible for initiating innovation and explores both the personal skills required in the role of change agent and the tools and techniques available to support the manager in that role. The course also examines the problems and opportunities of those who are the recipients of change in an organization and the skills required to cope effectively with that situation.

BA 644. The Legal Environment of Business. 3 Hours.
This course will provide an overview of the important aspects of business law for executives, managers, accountants, and other professionals. The areas of law covered include but are not limited to administrative, contract, corporate and other business organizations, employment relations, real estate, taxes, and UCC sales.

BA 646. Current Issues in Business. 3 Hours.
This course, conducted in seminar fashion, draws on current literature to analyze contemporary and emerging issues facing management in the late twentieth century. Content will vary.

BA 700. Health Care Management. 3 Hours.
This course examines management problems and policy-making in the health care industry. Several areas are considered including: (1) the functions of the health care manager, (2) the types of health care delivery systems, (3) the administration of hospitals, (4) the financing of medical care, and (5) the role of government. Through readings, lectures, discussions, and projects, students clarify their own role in the delivery of health services. The course regularly draws on experts in health planning and health care administration.

BA 701. Legal Environment of Health Care Management. 3 Hours.
The course provides a foundation in the legal and regulatory framework in which health care institutions operate. Students will also examine the legal issues confronting health care managers including director and administrative liability, malpractice, negligence, patient rights and confidentiality, licensure requirements, and the like.

BA 702. Health Care Economics. 3 Hours.
In this course, the principles and tools of economic decision-making are applied to management in the health care sector. The course explores the application to health care management functions of such concepts and processes as supply and demand, resource allocation and utilization, costing and pricing, resource productivity, forecasting and economic aspects of planning, and utilization review. While the principal emphasis in the course is on micro-economic analysis, some consideration is also given to an economic analysis of public policy alternatives for the delivery of health care service. Prerequisite(s): BA 601.

BA 703. Financial Management in Healthcare Organizations. 3 Hours.
This course applies the perspectives and tools of financial analysis to the management of health care organizations and evaluation of organizational performance. Topics covered include capital budgeting, sources of operating revenue, management of cash and inventories, risk analysis and forecasting. Particular attention is paid to cost containment regulatory strategies and their implications for financial planning and management. Prerequisite(s): BA 602.

BA 704. Managing Quality in Healthcare. 3 Hours.
This course examines methods and tools for managing quality in health facilities, physician practices, managed care, and public health. Topics include developments in quality assurance and improvement, utilization review, risk management, and patient satisfaction.

BA 705. Global Perspectives in Healthcare. 3 Hours.
This course examines the social, political, and economic aspects of global healthcare issues. Through a comparative analysis of the health systems of multiple nations, students will compare theories of health policy and priorities, healthcare system facilities, workforce, technology, cost, quality, and access. The emphasis of the course will be on health management strategies used in different countries and healthcare systems to mobilize, allocate, and maintain resources to improve the healthcare status and delivery systems.

BA 710. Law & Ethics for Non-Profit Organizations. 3 Hours.
Non-profit managers and supervisors are held to a higher standard of ethical behavior due to the nature of their funding sources and their mission. This course is designed to develop in the student a basic understanding of the laws governing non-profit organizations, the practical applications of these laws and the ethics that are demanded of non-profit managers.

BA 711. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics covered include: leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 712. Strategic Marketing for Nonprofit Organizations. 3 Hours.
This course applies the concepts of marketing and strategy to the management of non-profit organizations. Through class lectures, discussion, case studies, and applied projects, students will build an understanding of the marketing process in the non-profit environment in order to be able to design, implement, and evaluate an organization's approach to marketing and strategic positioning.

BA 713. Fundraising. 3 Hours.
This course takes a systems approach to the process of fund-raising. Topics covered include: donor cultivation, use of the annual fund, major gifts, corporate giving, and grant writing.

BA 720. Advanced Sales and Marketing in Hospitality. 3 Hours.
This course focuses on difficult problems and issues facing sales and marketing personnel in the hospitality industry. Students will make use of case studies in order to develop their decision-making process including the use of marketing research and analysis.

BA 721. Convention Planning and Events Planning. 3 Hours.
This course focuses on the rapidly growing convention sales and events planning industries. The student will learn how to design, plan, market and manage meetings and events.

BA 722. Advanced Front Office Operations. 3 Hours.
This course begins with detailed introduction about numerous aspects of front office operations and management. The next section of the course examines the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.
BA 723. Legal Issues in Hospitality Management. 3 Hours.
This course will provide the student an overview of the important aspects of Hospitality Law for Managers, and other professionals. Some of the areas of study include and are not limited to Torts, Products Liability, Constitutional Law and Criminal Law and many other subjects.

BA 724. Managing Service. 3 Hours.
This course begins with an introduction to the framework for providing quality service to customers and guests. Next we will discuss the needs of the customer/guest and proceed to develop our menu and/or product accordingly. Finally, we will learn how management and staff create loyal customers and guests by delivering service that exceeds their expectations.

BA 729. Hospitality Graduate Directed Practicum. 3 Hours.
Each student will find, will choose or will be provided with an internship site. The site chosen will be based on; and interview conducted by the management of the internship site and the student's preference of location based on those available. The Coordinator of Hospitality Management will have the final decision on all internship site placements. The Coordinator’s decision will be based on his or her interaction with the student during previous course work, his or her understanding of the student and the internship properties requirements. Every consideration will be given to the student’s personal preferences with regard to location and types of property. However, the student’s preferences will not be the only consideration for placement. Prerequisite(s): BA 720 and BA 722 and BA 724.

BA 731. Business and Information Technology. 3 Hours.
This graduate course approaches Information Technology from the perspective of information consumers as opposed to technology implementers. During this course, students will examine various technologies and their application within modern organizations. The course has two primary goals. (1) The course will explain information technologies in non-technical terms so that students can evaluate a technology’s effectiveness relative to any existing alternatives and the overall organizational needs. (2) This course should increase student awareness regarding how they interact with technology in a personal or business setting. Business leaders are constantly bombarded with technology. This course addresses the need to sift through information in an intelligent manner and make smart business decisions.

BA 741. Staffing & Selection. 3 Hours.
A source of competitive advantage for any organization is its talent. The effectiveness of an organization depends on the performance of each individual in that organization. Hence, one of the most important human resource functions is that of staffing the organization. This course is essential for HR professionals who are responsible for recruiting, screening, hiring, promoting, and outplacing employees. It is also very crucial for any line managers, supervisors, team leaders, and hiring managers who are involved in recruiting, making promotions, succession, or any other workforce decisions. An examination of the scientific, legal, and administrative issues associated with the recruitment, selection, employment and retention of individuals by organizations augments the study. Specific attention will be given to the current challenges of an increasingly dynamic workplace and diverse workforce.

BA 742. Training & Development. 3 Hours.
The effective training and development of human resources creates tremendous and unique value for an organization. This course examines how organizations can develop and manage the talents and skillset of human capital. The course explores topics such as training needs analysis, formulating training objectives, and the design, implementation, and evaluation of training and development programs.

BA 745. Innovative Global Strategy. 3 Hours.
This course will build students’ awareness of the challenges that must be addressed and the opportunities that may be present when competing in the global marketplace. The course focuses on how firms apply innovative strategies to create a sustainable competitive advantage in the global arena. Course content will be drawn from readings, case analysis, online content and discussions. The course requires students to analyze and understand real world examples of both successful and unsuccessful global strategy implementation.

BA 750. Fundamentals of Risk Management. 3 Hours.
This course explores the fundamentals of risk management. After discussion of the importance of risk and the rationale for its management in organizations, the remainder of the course will analyze the process of and methods for managing risk.

BA 751. Employee Benefits. 3 Hours.
This course explores the nature and operation of employer-sponsored benefit plans. Emphasis is placed on plan design, administration, funding, and regulation. The course also addresses organizational characteristics, benefit structure, and pricing of risk transfer schemes for groups.

BA 752. Crisis Management. 3 Hours.
Crisis Management can be defined as a communications response to an event that has a negative impact on an audience - the public, customers/clients, employees, shareholders, etc. Examples of such events could include tainted food, a corporate scam, a political scandal, an entertainment or athletic scandal, damaged products that cause or could potentially cause life-threatening situations, natural disasters, terrorism, and financial disasters. In this course, students will analyze and critique high-profile cases and learn how to effectively respond to crises.

BA 753. Corporate Risk Management. 3 Hours.
Corporate risk is analyzed through the lens of enterprise risk management. This course explores the operational and financial risks faced by firms and the study of various methods of handling these risks.

BA 754. Strategic Selling. 3 Hours.
The focus of this course is on key, strategic customer selling approaches. The process of sales planning and strategy development for these types of customers will be emphasized. The objective of this course is to understand and execute sales strategies for managing major and large customers.

BA 760. Technology & Innovation. 3 Hours.
BA 760 Technology & Innovation offers a research approach to identifying, analyzing, and creating technological advantage in nascent and mature industries. Students will apply the methodologies of innovation and discovery to business settings and markets, seeking to create competitive advantage and achieve market transformation through strategic initiatives that redefine consumer expectations and industry practices and reframe organizations to embrace innovative practices and processes.

BA 761. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.
BA 762. Groupthink. 3 Hours.
This course explores the origin of groupthink. Groupthink is a term first used by social psychologist Irving L. Janis (1972) that refers to a psychological phenomenon in which people strive for consensus within a group. This course explores groupthink as a phenomenon where people set aside their own personal beliefs or adopt the opinion of the rest of the group.

BA 763. Biotechnology & Innovation: Intellectual Property. 3 Hours.
This course focuses on the protection of proprietary and intellectual rights in inventions, writings, creative works, software, industry trade secrets, industry trade designations, and other intellectual assets at the international, Federal, and State Levels. The course will give special consideration to the emergence of new areas of patent law in Biotechnology and Pharmaceutical fields, examining not only the patentability of intellectual assets, but also the discovery process, particularly in collaborative environments involving multiple organizations and institutions, and the qualifying distinctions between collaborative and competitive research.

BA 790. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.*

BA 791. Professional Project. 3-6 Hours.
This course is used to award graduate credit for prior learning and educational experience obtained outside of the traditional classroom. Through the preparation of a professional project, students provide formal documentation of the specific graduate-level learning competencies which they have acquired through prior experience. A maximum of six (6) credit hours may be earned.

BA 792. Graduate Internship I. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 793. Graduate Internship II. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization’s supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 792.

BA 794. Graduate Internship III. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.

BA 796. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 798. Thesis. 6 Hours.
The thesis may be library-oriented research with extensive reliance on documents and a relatively limited amount of primary field research, or it may be action-oriented field research with relevant documentation from the literature. The title of the thesis topic must be filed with the graduate committee. A student, with the approval of his/her advisory committee, may register for the thesis after completion of twenty-four (24) semester hours.

BA 799. Topic/. 3 Hours.
Students work together in a seminar setting under the direction of a member of the graduate faculty. The content of the seminar will vary according to the interests of students and faculty involved.

B.S. Business Administration Concentration in Management

Students in the Management concentration study organization systems and methods of management for staff, supervisors and administrators. These management theories apply to corporations, small businesses, and non-profit organizations. Students take courses that cover strategic decision making, policy, organizational theory and behavior, marketing, human resource management, sales and operations.

In addition to the program objectives of the B.S. Business Administration degree, this concentration requires students to integrate and apply administrative and organizational principles and theory to human resource management, decision making, operations management and other systems.

Total Hours: 24
Courses

BA 101. Introduction to Business. 3 Hours.
This course introduces students to the general nature of functional areas in business such as marketing, management, accounting, finance, research and development, and risk management. The relationship between business, the government, the economy, and the environment is examined.

BA 111. Economic Geography. 3 Hours.
This course is an introduction to the principles of economic geography, ranging from physical and biological geography to cultural and political factors. The decision making processes, both local and global, for different types of service oriented, manufacturing, transportation, and resource based businesses will be examined. The relationship of natural resources, population, and culture, and how such factors affect economic activity will be emphasized.

BA 201. Business Law I. 3 Hours.
This course provides students with a basic knowledge of the law of contracts, personal property and real property.

BA 202. Business Law II. 3 Hours.
This course is intended to augment BA 201 with in depth analysis of the law in Contracts, UCC, Corporations, Principal Agency Law, Advanced Tort Law, Environmental Law, Real Property Law, Securities Law and Employment Law.

BA 204. Franchise Formation and Management. 3 Hours.
This class will discuss franchise formation and management with particular emphasis on the discovery and evaluation of the franchisor and the feasibility of entrepreneurs converting an existing business into a franchise chain or creating and selling new franchises, domestic and international. Franchise accounting and finance (borrowing or leveraging) will be covered, as well as, taking the franchise to the stock market or going public (IPO) and raising investment capital. Prerequisite(s): BA 401.

BA 205. Real Estate Law. 3 Hours.
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

BA 210. Economics Overview for Non-Business Majors. 3 Hours.
This is an overview of microeconomic and macroeconomic concepts for non-business majors. It will include an introduction to American capitalism including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of competitive firms. It will also be an introduction to national income accounts, unemployment, inflation, government fiscal policy and monetary policy.

BA 211. Microeconomics. 3 Hours.
This is an introduction to American capitalism and microeconomic concepts including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of purely and impurely competitive firms.

BA 212. Macroeconomics. 3 Hours.
This is an introduction to macroeconomics in the American economy: national income accounts, unemployment, inflation, government fiscal policy, monetary policy and economic growth.

BA 220. Real Estate Principles and Practices. 3 Hours.
This course will provide students with methods of analyzing acquisition and retention of Real Estate. Also, there will be a focus on the skills and techniques required to operate a real estate business, including trust accounts, risk management, and property management.

BA 243. The Business of Innovation. 3 Hours.
This is a cross-disciplinary class that will introduce students to the Lean Startup Scientific Method for developing and commercializing ideas for new ventures or else innovating and developing new products or business models within existing companies. Topics include marketplace innovations, technology and science based innovations, marketplace hypothesis development and testing, frugal and agile engineering, business models, intellectual property, prototyping, exit strategies, and fundraising. Lab component is integrated within module deliverables.

BA 271. Risk Management. 3 Hours.
A study is made of the risks encountered by individuals and business firms. A presentation is made of the basic principles and institutions, which have been developed in risk management. This material is treated primarily from the consumer point of view.

BA 299. Topic/. 1 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 300. Business Presentations. 3 Hours.
Communication is a vital function of any business. Managers at all levels must be able to communicate effectively to advance their career and ensure the success of their organization. This course will give students a working knowledge of how to create, brief, and present information across the organizational communications spectrum. Students will learn how to think critically and apply problem solving skills across a variety of historical and contemporary business topics. Students will learn how to collect, analyze, synthesize, and present information in a professional manner to assorted audiences in different venues. The foundational skill set developed in this course is the ability for students to articulate their ideas in a professional manner within a variety of business settings. Prerequisite(s): EH 124.

BA 302. Business Ethics. 3 Hours.
This course is designed to raise a moral consciousness and sensitivity within the various disciplines of the business curriculum. The disciplines focused on here are business, accounting, marketing, multinational corporations, and those areas of human resource management inclusive of diversity in the workplace within the context of environmental and social responsibility.

BA 306. Franchise Law. 3 Hours.
This is a law class that analyzes all the issues of Franchise Law with a particular emphasis on Contracts, Principal/Agent Franchise Relations, Corporate Formation of Franchises, and Securities Law. Prerequisite(s): BA 201 and BA 202.

BA 310. Organization and Management. 3 Hours.
This course focuses on how to design organization systems and effectively manage them. Students completing the course should understand the universal process of management and key terminology in the language of management. Students are encouraged conceptually to blend contributions from the various schools of management thought into an integrated perspective of what managers do and why.
BA 311. Human Resource Management. 3 Hours.
This course addresses traditional personnel administration issues. Emphasis in the course is on how to manage the major human resource administration functions of job design, reward system design, staffing, training and performance control, to achieve maximum employee performance and satisfaction. Prerequisite(s): BA 211 or (Major=BS Criminal Justice or Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Paralegal or Major=BS English - Prelaw).

BA 312. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics include leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 321. Marketing Principles. 3 Hours.
The course covers the language and issues of marketing with an emphasis on developing responsive marketing strategies that meet customer needs. The course focuses on marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing. Other topics will be incorporated into the course including the external environment (focus on integrative topics within marketing, such as economics, politics, government, and nature), marketing research, international/global marketing with relevance to cultural diversity, ethics, the impact of technology on marketing, and careers in marketing.

BA 334. International Economics. 3 Hours.
This applied economics course will emphasize the use of cases to study topics such as comparative advantage, treaties, tariffs, non-tariff trade barriers, and trade blocks among developed and developing nations. Prerequisite(s): BA 211 and BA 212.

BA 344. Personal Financial Planning. 3 Hours.
This course provides comprehensive coverage of personal financial planning in the areas of money management, axes, consumer credit, housing and other consumer decisions, legal protection, insurance, retirement planning, and estate planning. Prerequisite(s): MS 141 or MS 111 or MS 242 or MS 180 or MS 181.

BA 351. Internship. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 352. Internship II. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 353. Internship III. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 354. Internship IV. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 355. Internship V. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 362. Financial Management I. 3 Hours.
The foundation finance course covers basic personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management. Students are expected to become proficient in financial analysis of a corporation and in various aspects of corporate financial management. Prerequisite(s): AC 121 and (AC 122 or AC 211) and BA 211 and (MS 141 or MS 111 or MS 242 or MS 180 or MS 181).

BA 364. Financial Management II. 3 Hours.
The course is a continuation of Financial Management I and will cover such topics as real options, sensitivity, scenario and break-even analysis, basic issues regarding stocks and bonds, risk/return and cost of capital, capital structure and limits to the use of debt. Prerequisite(s): BA 351 and BA 352 and BA 353 and BA 354.

BA 375. Supply Chain Management. 3 Hours.
This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategies to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.

BA 401. Managerial Economics. 3 Hours.
This course is designed to close the gap between economic theory and business application. It reviews traditional analysis and shows its application to the understanding and solution of economic problems of the firm and industry. Prerequisite(s): BA 211 and BA 212.
BA 411. Organizational Behavior. 3 Hours.
This course is highly experiential in its approach to helping students understand and appreciate why people behave the way they do in an organizational context. Students learn how to manage employee behavior by analysis of real world phenomena and by application of principles in the areas of human perception and communication, leadership and motivation, small group dynamics, organizational culture, and organizational change. Prerequisite(s): BA 310.

BA 413. Operations Management. 3 Hours.
Quantitative model building and manipulation are a means of analyzing and synthesizing the elements of productions management. Both deterministic and stochastic modeling are emphasized in the areas of work systems design, queuing, PERT, SQC, inventory control, forecasting, and linear and nonlinear programming. Prerequisite(s): BA 310 and MS 132.

BA 414. Business Strategy. 3 Hours.
This Business Administration senior seminar focuses on decision making at the executive management level, the formulation of strategy, and its implementation in the organization. The course will employ case studies, laboratory simulation techniques, and computer spreadsheet analysis. Prerequisite(s): College Level=Senior.

BA 421. Integrated Marketing Communication and Advertising. 3 Hours.
An introduction into the world of advertising: Students will plan and design Ad campaigns, write copy and design layouts for the different types/forms of advertising. The students will work with local companies and assist them in redesign of their ad campaigns. Prerequisite(s): BA 321.

BA 422. Sales and Sales Management. 3 Hours.
This course provides students with the fundamentals of good salesmanship and sales management. Prior to studying management principles students practice sales techniques in simulations. Cases are used to illustrate and evaluate principles of sales management. Prerequisite(s): BA 321.

BA 423. Retail Management. 3 Hours.
The purpose of this course is to provide students with an understanding of the fundamentals of successful retail operations. Topics include the market concept in retailing, factors of area and market analysis, and aspects of organizational structure, layout, and personnel planning. Also covered are methods of pricing, merchandising planning, inventory, expense control and sales promotion techniques. Prerequisite(s): BA 321.

BA 424. Marketing Research. 3 Hours.
The basic research concepts and practices as applied to the analysis of marketing problems are examined. Topics include sources of data, collecting data, sampling, questionnaire construction, tabulating data, and report preparation; computerized statistical software is used. Prerequisite(s): BA 321 and MS 132.

BA 425. Marketing Management. 3 Hours.
This is the capstone course for marketing majors. Students apply concepts learned in other courses to marketing problems of business and nonprofit organizations. Cases and business simulations are used to teach decision-making in the complex environment of business. A complete marketing plan for a simulated company of the student's choice summarizes the student's knowledge of the field. Prerequisite(s): BA 321.

BA 426. Real Estate Market, Research and Analysis. 3 Hours.
This course will discuss market research, real estate sales, property valuations and analysis. Students will examine market research reports to gain insight into product and market trends, opportunities, projections, and growth in the Maine, the US and global real estate markets. Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 427. Franchise Market Research and Analysis. 3 Hours.
This class will focus on analysis of market demographics, feasibility studies, product pricing, promotion and distribution, franchise broker contacts, extrapolation of sales and expenses, and the projection of costs and net profits, emerging markets and capital expansion. Prerequisite(s): BA 401 and MS 132 and MS 232 and BA 362.

BA 428. Strategic Selling. 3 Hours.
This course builds on the fundamentals of selling. The student will understand how to advance sales in light of complex business environments consisting of layers of buyers, decision makers and those who influence purchasing decisions. A strategic account planning process will be analyzed and applied to real companies by way of case studies. The art and skill of negotiating will be studied and learned through role play. Prerequisite(s): BA 422.

BA 434. International Finance. 3 Hours.
The factors affecting exchange rates are discussed, as well as different types of exchange rate systems and how governments attempt to influence exchange rates. The relationships among interest rate parity, purchasing power parity, the Fisher effect and International Fisher effect and exchange rates are analyzed. Students learn how currency futures, currency options and money market hedges are used to hedge exchange rate risk. Prerequisite(s): BA 362.

BA 437. International Marketing. 3 Hours.
The basics of international marketing will be taught including the foundations of culture, cultural understanding, business customs and practices in global marketing, assessing global markets, and developing international marketing strategy. Prerequisite(s): BA 321.

BA 438. Export-Import Procedures. 3 Hours.
The basics of export-import procedures will be taught including justification for exporting/importing, market planning methods, selection of appropriate marketing mix variables, and regulation. Prerequisite(s): BA 321.

BA 439. International Franchising Management. 3 Hours.
This course will focus on international expansion of franchises, learning the culture, monetary exchanges, imports and exports, local international market analysis and much more. Prerequisite(s): BA 204 and BA 306 and BA 427.

BA 440. Small Business Management I. 3 Hours.
This course supplies prospective and current small business managers with the essential concepts of starting and operating small businesses. Topics covered include: environment and management of small business enterprise, problems in starting small businesses, financial and administrative control, and management of business operations. Particular emphasis is placed on the interrelated nature of the components, particularly as they affect the financial picture of the firm. Through a lecture and discussion format, students are expected to share their own experiences in small businesses with their fellow students. Prerequisite(s): College Level=Senior or College Level=Junior.
BA 441. Entrepreneurship I- New Venture Development. 3 Hours.
Students will be introduced to the practical application of classic and contemporary business theory as it applies to the early stages of entrepreneurship and intrapreneurship, opportunity recognition, innovation, and new venture development. Course topics include types of entrepreneurs, opportunity recognition, marketing, cash and other resource requirements, financial statements, planning, franchising, intellectual property, success/failure/resilience, and growth. Class will use text, cases, articles, internet sources, and guest lecturers. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 442. Applied Small Business Management. 3 Hours.
This is an advanced course which focuses on real problems in Small Business Management, using the case approach. Cases are drawn from the text, from actual local small businesses, and from the practical experience of students in the class. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 443. Entrepreneurship II: Business Plans. 3 Hours.
This class builds on BA 441, New Venture Development. The focus of this class is on the early stages of formalizing and growing a venture. Topics include business plan writing, fund raising and cash flow, measuring and conveying financial position, core strategy development and competitive advantage, sustainability, international entrepreneurship, supply chain, growth, and exit. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 460. Investments. 3 Hours.
Beginning with an introduction to financial markets and investment instruments, topics include stock and bond quotations and trading procedures, rate of return, margin trading, stock indexes, stock and bond valuation, risk and return, portfolio theory, active and passive portfolio management, and investment performance evaluation. Prerequisite(s): BA 362.

BA 464. Bank & Financial Services Management. 3 Hours.
This course will introduce students to the specific issues in the financial management of a banking firm and, to a smaller degree, of other financial intermediaries. Emphasis will be on products, roles, regulatory framework, and risk management. Prerequisite(s): BA 362.

BA 465. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 471. Life and Health Insurance. 3 Hours.
This course is intended to provide background knowledge for personal application and for those responsible for administering benefit plans for employees; it provides the necessary information required to pass the State of Maine license examination. Prerequisite(s): BA 271.

BA 472. Casualty and Property Insurance. 3 Hours.
The first part of the course introduces the basics of the entire insurance business, including a summary of legal aspects, types of insurers and principles of reinsurance; next, each type of insurance is studied in detail. Topics covered are fire, consequential loss, inland marine, ocean marine, theft and surety, liability and miscellaneous property insurance. Prerequisite(s): BA 271.

BA 473. Real Estate Appraisal. 3 Hours.
This course familiarizes the student with the foundation and principles of the appraisal process. The student will become familiar with the three approaches to value. Site valuation, construction costs, depreciation; comparables selection and adjustments; rental multipliers; and reconciliation will be discussed. The student will focus on the elements making up the standards for professional appraisal practice. These elements, i.e., Definitions, Rules, Standards and Standard Rules, Statements and advisory opinions are discussed in detail along with the philosophy and history of USPAP. Prerequisite(s): BA 401 and MS 132 and BA 362.

BA 475. E-Business and E-Commerce for Managers. 3 Hours.
This course teaches the basic e-business and e-commerce theory. The students will apply the theory through the development of a website for the prime purpose of marketing a product or service or idea online.

BA 490. International Business. 3 Hours.
This course covers the international dimensions of managerial decision-making including: world economies, international trade theories, tariffs, quotas and other trade issues, global strategic planning, cross-cultural management, international market entry, international human resource management, international organization strategy, international logistics, import/export operations, currency exchange, international financial management. Current developments in global economic and business are emphasized; students participate in a computerized simulation throughout the semester. Prerequisite(s): BA 310 and BA 321.

BA 495. Senior Management Project. 3 Hours.
An experiential course that gives seniors the opportunity to apply what they have learned in class to a real business situation. Prerequisite(s): College Level=Senior.

BA 496. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 497. Business and Culture Travel Study Course. 3 Hours.
Business and Culture Travel Study course is designed to expose students to economies across the world. During the course students will travel to important commercial, cultural and governmental cities. Through a combination of readings students will be exposed to 20th and 21st century history, economics, culture political and business philosophy. The course will also involve visits to major multinational corporations, cultural activities and lectures from University business faculty when available. The course will also have two pre-trip class sessions with readings and one post course session to wrap up the experience and discuss the student travel logs.

BA 498. Business Seminar. 3 Hours.
This honors course requires the study of various business problems under the supervision of members of the Department of Business Administration. A paper is required. An oral examination is scheduled as the final examination in the course. Prerequisite(s): College Level=Senior.

BA 499. Topic/. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.
BA 600. Research Methods in Business and Education. 3 Hours.
This course is designed for beginning graduate students who have little or no formal preparation in those areas of research and problem-solving essential for a comprehensive study of business and education at the graduate level. Emphasis is placed on the identification of common problem types and the selection and use of appropriate methods of analysis (primarily statistical in nature).

BA 601. Managerial Economics. 3 Hours.
This course begins with a comprehensive overview of micro- and macroeconomic concepts with the aim of developing within students a picture of how business and nonprofit organizations relate to the economy as a whole. The course then focuses on practical applications of economic analysis to problems of concern to managers. Case studies and projects are used to demonstrate the methods used to determine economic feasibility and cost-effectiveness of products, services, and programs.

BA 602. Managerial Accounting. 3 Hours.
This is an accelerated accounting course for those with little or no formal accounting background. The emphasis is on concepts which managers need to know in order to be effective. Topics include the preparation and interpretation of financial statements, cost planning and control, cost-volume-profit analysis, decision-making models, master budgeting and variances, and evaluation of capital projects.

BA 605. Management Communications. 3 Hours.
This is an advanced communications course that builds upon a student’s experience and prior undergraduate coursework in writing and oral communications. Topics include: advanced business writing, use of visual materials, selection of secondary sources of information, report preparation, and presentations to small and large groups.

BA 611. Organizational Behavior. 3 Hours.
This course surveys the major field of management, examining structures and processes on both group and organizational levels. Both traditional and contemporary theories are analyzed and applied to business operations.

BA 620. Financial Management. 3 Hours.
Topics considered include financial planning, operating and capital budgets, cash flow, purchasing and accounting procedures, the sources and uses of corporate and institutional funds, and financial analysis for evaluation and control. Students develop projects specifically related to their needs in educational administration, small business, or corporate management. Prerequisite(s): BA 602 or AC 301.

BA 621. Marketing Management. 3 Hours.
This course focuses on complex problems facing decision-makers in the marketing of goods and services. Emphasis is placed on the decision-making process, including assessment of the social, economic, and political environment in which the organization operates; problem definition; development and evaluation of alternatives, and the implementation of the best alternative. Cases in advertising, sales, marketing research, and strategic marketing management provide practice in marketing analysis and decision-making.

BA 622. Production Management. 3 Hours.
Emphasis is placed on the use of quantitative techniques for solving manufacturing problems. The student is given an opportunity to practice mathematical model-building and manipulation. Other topics considered include queuing system design, plant layout, statistical quality control, inventory modeling, Program Evaluation and Review Technique (PERT), linear and nonlinear programming, and control theory.

BA 625. Global Strategic Management. 3 Hours.
This course focuses on the strategic challenges and opportunities confronting firms that undertake to create value and to compete in the global economy. Successful companies develop strategies for doing business in emerging markets that are different from those they use at home and often find novel ways of implementing them too. The class will make extensive use of case analysis and discussion to evaluate and understand the strategic issues that confront firms operating internationally, as well as to appreciate the importance of values and ethics in organization decisions and actions. In this course we will probe the workings of business strategies in transition and emerging economies, gain an understanding of the strategies of local firms, and analyze the international success and failure of companies. Prerequisite(s): BA 600 and 15 Credits From Range [BA 600 To BA 799].

BA 626. Accounting in Planning, Budgeting and Control. 3 Hours.
This course examines the role of accounting in the planning, budgeting, and control process of a business in a dynamic environment. The integration of measuring and analyzing (planning), short-term decisions and managing organizations (control), and preparing various budgets (budgeting) are emphasized. This course is designed as a continuation of BA602 Managerial Accounting. Numerical problems, as well as case studies, are utilized as methods of study. Prerequisite(s): BA 602 or AC 211.

BA 627. Investment Analysis. 3 Hours.
This course provides a detailed description of securities market organization and approaches to investment opportunities. Students will examine theories used in the valuation of financial securities and employ projects and applications to develop a real world understanding of portfolio management. Prerequisite(s): BA 602.

BA 628. New Venture Planning and Management. 3 Hours.
This course deals with the foundation of new ventures and related aspects of managing the small growing enterprise. Techniques taught in this course are equally applicable to small businesses, nonprofit organizations, and new ventures of larger organizations. Topics include: use of scarce resources, such as money, talent and technological expertise; identification of environmental threats and opportunities; and operational considerations such as organizational structure, legal requirements, financing, and accounting procedures.

BA 641. Human Resource Management. 3 Hours.
This course explores human resource management as an integrated process of planning and control designed to achieve high employee productivity and job satisfaction. The course focuses on the essential functions of human resource management as they apply both to the general supervisory responsibilities of every manager and to the specific operations of the personnel department.

BA 642. Leadership in Business and Professions. 3 Hours.
This course is designed to provide graduate management students with a comprehensive review of the essentials for effective leadership. It focuses on the identification of basic leadership styles, explores the theoretical and practical findings of research in leadership development, and seeks to synthesize the student’s leadership style with the most effective working models of leadership.
BA 643. Strategic Change Management. 3 Hours.
Strategic Change Management focuses on the skills required to deal effectively with organizational change. The course addresses first the pressures in the business environment that make change a fundamental reality for managers. Particular attention is paid to change arising from public policy initiatives that impinge on business. The course then examines the manager as change agent responsible for initiating innovation and explores both the personal skills required in the role of change agent and the tools and techniques available to support the manager in that role. The course also examines the problems and opportunities of those who are the recipients of change in an organization and the skills required to cope effectively with that situation.

BA 644. The Legal Environment of Business. 3 Hours.
This course will provide an overview of the important aspects of business law for executives, managers, accountants, and other professionals. The areas of law covered include but are not limited to administrative, contract, corporate and other business organizations, employment relations, real estate, taxes, and UCC sales.

BA 646. Current Issues in Business. 3 Hours.
This course, conducted in seminar fashion, draws on current literature to analyze contemporary and emerging issues facing management in the late twentieth century. Content will vary.

BA 700. Health Care Management. 3 Hours.
This course examines management problems and policy-making in the health care industry. Several areas are considered including: (1) the functions of the health care manager, (2) the types of health care delivery systems, (3) the administration of hospitals, (4) the financing of medical care, and (5) the role of government. Through readings, lectures, discussions, and projects, students clarify their own role in the delivery of health services. The course regularly draws on experts in health planning and health care administration.

BA 701. Legal Environment of Health Care Management. 3 Hours.
The course provides a foundation in the legal and regulatory framework in which health care institutions operate. Students will also examine the legal issues confronting health care managers including director and administrative liability, malpractice, negligence, patient rights and confidentiality, licensure requirements, and the like.

BA 702. Health Care Economics. 3 Hours.
In this course, the principles and tools of economic decision-making are applied to management in the health care sector. The course explores the application to health care management functions of such concepts and processes as supply and demand, resource allocation and utilization, costing and pricing, resource productivity, forecasting and economic aspects of planning, and utilization review. While the principal emphasis in the course is on micro-economic analysis, some consideration is also given to an economic analysis of public policy alternatives for the delivery of health care service. Prerequisite(s): BA 601.

BA 703. Financial Management in Healthcare Organizations. 3 Hours.
This course applies the perspectives and tools of financial analysis to the management of health care organizations and evaluation of organizational performance. Topics covered include capital budgeting, sources of operating revenue, management of cash and inventories, risk analysis and forecasting. Particular attention is paid to cost containment regulatory strategies and their implications for financial planning and management. Prerequisite(s): BA 602.

BA 704. Managing Quality in Healthcare. 3 Hours.
This course examines methods and tools for managing quality in health facilities, physician practices, managed care, and public health. Topics include developments in quality assurance and improvement, utilization review, risk management, and patient satisfaction.

BA 705. Global Perspectives in Healthcare. 3 Hours.
This course examines the social, political, and economic aspects of global healthcare issues. Through a comparative analysis of the health systems of multiple nations, students will compare theories of health policy and priorities, healthcare system facilities, workforce, technology, cost, quality, and access. The emphasis of the course will be on health management strategies used in different countries and healthcare systems to mobilize, allocate, and maintain resources to improve the healthcare status and delivery systems.

BA 710. Law & Ethics for Non-Profit Organizations. 3 Hours.
Non-profit managers and supervisors are held to a higher standard of ethical behavior due to the nature of their funding sources and their mission. This course is designed to develop in the student a basic understanding of the laws governing non-profit organizations, the practical applications of these laws and the ethics that are demanded of non-profit managers.

BA 711. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics covered include: leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 712. Strategic Marketing for Nonprofit Organizations. 3 Hours.
This course applies the concepts of marketing and strategy to the management of non-profit organizations. Through class lectures, discussion, case studies, and applied projects, students will build an understanding of the marketing process in the non-profit environment in order to be able to design, implement, and evaluate an organization's approach to marketing and strategic positioning.

BA 713. Fundraising. 3 Hours.
This course takes a systems approach to the process of fund-raising. Topics covered include: donor cultivation, use of the annual fund, major gifts, corporate giving, and grant writing.

BA 720. Advanced Sales and Marketing in Hospitality. 3 Hours.
This course focuses on difficult problems and issues facing sales and marketing personnel in the hospitality industry. Students will make use of case studies in order to develop their decision-making process including the use of marketing research and analysis.

BA 721. Convention Planning and Events Planning. 3 Hours.
This course focuses on the rapidly growing convention sales and events planning industries. The student will learn how to design, plan, market and manage meetings and events.

BA 722. Advanced Front Office Operations. 3 Hours.
This course begins with detailed introduction about numerous aspects of front office operations and management. The next section of the course examines the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.
BA 723. Legal Issues in Hospitality Management. 3 Hours.
This course will provide the student an overview of the important aspects of hospitality law for managers, and other professionals. Some of the areas of study include and are not limited to torts, products liability, constitutional and criminal law and many other subjects.

BA 724. Managing Service. 3 Hours.
This course begins with an introduction to the framework for providing quality service to customers and guests. Next we will discuss the needs of the customer/guest and proceed to develop our menu and/or product accordingly. Finally, we will learn how management and staff create loyal customers and guests by delivering service that exceeds their expectations.

BA 729. Hospitality Graduate Directed Practicum. 3 Hours.
Each student will find, will choose or will be provided with an internship site. The site chosen will be based on; and interview conducted by the management of the internship site and the student's preference of location based on those available. The Coordinator of Hospitality Management will have the final decision on all internship site placements. The Coordinator's decision will be based on his or her interaction with the student during previous course work, his or her understanding of the student and the internship properties requirements. Every consideration will be given to the student's personal preferences with regard to location and types of property. However, the student's preferences will not be the only consideration for placement. Prerequisite(s): BA 720 and BA 722 and BA 724.

BA 731. Business and Information Technology. 3 Hours.
This graduate course approaches Information Technology from the perspective of information consumers as opposed to technology implementers. During this course, students will examine various technologies and their application within modern organizations. The course has two primary goals. (1) The course will explain information technologies in non-technical terms so that students can evaluate a technology's effectiveness relative to any existing alternatives and the overall organizational needs. (2) This course should increase student awareness regarding how they interact with technology in a personal or business setting. Business leaders are constantly bombarded with technology. This course addresses the need to sift through that information in an intelligent manner and make smart business decisions.

BA 741. Staffing & Selection. 3 Hours.
A source of competitive advantage for any organization is its talent. The effectiveness of an organization depends on the performance of each individual in that organization. Hence, one of the most important human resource functions is that of staffing the organization. This course is essential for HR professionals who are responsible for recruiting, screening, hiring, promoting, and placing employees. It is also very crucial for any line managers, supervisors, team leaders, and hiring managers who are involved in recruiting, making promotions, succession, or any other workforce decisions. An examination of the scientific, legal, and administrative issues associated with the recruitment, selection, employment, and retention of individuals by organizations augments the study. Specific attention will be given to the current challenges of an increasingly dynamic workplace and diverse workforce.

BA 742. Training & Development. 3 Hours.
The effective training and development of human resources creates tremendous and unique value for an organization. This course examines how organizations can develop and manage the talents and skill set of human capital. The course explores topics such as training needs analysis, formulating training objectives, and the design, implementation, and evaluation of training and development programs.

BA 745. Innovative Global Strategy. 3 Hours.
This course will build students' awareness of the challenges that must be addressed and the opportunities that may be present when competing in the global marketplace. The course focuses on how firms apply innovative strategies to create a sustainable competitive advantage in the global arena. Course content will be drawn from readings, case analysis, online content and discussions. The course requires students to analyze and understand real world examples of both successful and unsuccessful global strategy implementation.

BA 750. Fundamentals of Risk Management. 3 Hours.
This course explores the fundamentals of risk management. After discussion of the importance of risk and the rationale for its management in organizations, the remainder of the course will analyze the process of and methods for managing risk.

BA 751. Employee Benefits. 3 Hours.
This course explores the nature and operation of employer-sponsored benefit plans. Emphasis is placed on plan design, administration, funding, and regulation. The course also addresses organizational characteristics, benefit structure, and pricing of risk transfer schemes for groups.

BA 752. Crisis Management. 3 Hours.
Crisis Management can be defined as a communications response to an event that has a negative impact on an audience - the public, customers/clients, employees, shareholders, etc. Examples of such events could include tainted food, a corporate leak, a political scandal, an entertainment or athletic scandal, damaged products that cause or could potentially cause life-threatening situations, natural disasters, terrorism, and financial disasters. In this course, students will analyze and critique high-profile cases and learn how to effectively respond to crises.

BA 753. Corporate Risk Management. 3 Hours.
Corporate risk is analyzed through the lens of enterprise risk management. This course explores the operational and financial risks faced by firms and the study of various methods of handling these risks.

BA 754. Strategic Selling. 3 Hours.
The focus of this course is on key, strategic customer selling approaches. The process of sales planning and strategy development for these types of customers will be emphasized. The objective of this course is to understand and execute sales strategies for managing major and large customers.

BA 760. Technology & Innovation. 3 Hours.
BA 760 Technology & Innovation offers a research approach to identifying, analyzing, and creating technological advantage in nascent and mature industries. Students will apply the methodologies of innovation and discovery to business settings and markets, seeking to create competitive advantage and achieve market transformation through strategic initiatives that redefine consumer expectations and industry practices and reframe organizations to embrace innovative practices and processes.

BA 761. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.
### BA 762. Groupthink. 3 Hours.
This course explores the origin of groupthink. Groupthink is a term first used by social psychologist Irving L. Janis (1972) that refers to a psychological phenomenon in which people strive for consensus within a group. This course explores groupthink as a phenomenon where people set aside their own personal beliefs or adopt the opinion of the rest of the group.

### BA 763. Biotechnology & Innovation: Intellectual Property. 3 Hours.
This course focuses on the protection of proprietary and intellectual rights in inventions, writings, creative works, software, industry trade secrets, industry trade designations, and other intellectual assets at the international, Federal, and State Levels. The course will give special consideration to the emergence of new areas of patent law in Biotechnology and Pharmaceutical fields, examining not only the patentability of intellectual assets, but also the discovery process, particularly in collaborative environments involving multiple organizations and institutions, and the qualifying distinctions between collaborative and competitive research.

### BA 790. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.*

### BA 791. Professional Project. 3-6 Hours.
This course is used to award graduate credit for prior learning and educational experience obtained outside of the traditional classroom. Through the preparation of a professional project, students provide formal documentation of the specific graduate-level learning competencies which they have acquired through prior experience. A maximum of six (6) credit hours may be earned.

### BA 792. Graduate Internship I. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

### BA 793. Graduate Internship II. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization’s supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 792.

### BA 794. Graduate Internship III. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.

### BA 796. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

### BA 798. Thesis. 6 Hours.
The thesis may be library-oriented research with extensive reliance on documents and a relatively limited amount of primary field research, or it may be action-oriented field research with relevant documentation from the literature. The title of the thesis topic must be filed with the graduate committee. A student, with the approval of his/her advisory committee, may register for the thesis after completion of twenty-four (24) semester hours.

### BA 799. Topic/. 3 Hours.
Students work together in a seminar setting under the direction of a member of the graduate faculty. The content of the seminar will vary according to the interests of students and faculty involved.

## B.S. Business Administration Concentration in Marketing

Students in the Marketing concentration study the components of marketing structure and the modern concepts of marketing. Marketing involves understanding the development of new products or enhancement of existing products, the price of products, communication and distribution of the products. Additionally, the legal environment, segmentation, the international market, consumer behavior, research, retailing and advertising are studied.

In addition to the program objectives of the B.S. Business Administration degree, this concentration requires students to:

- Demonstrate knowledge of basic principles of marketing
- Demonstrate knowledge of the importance of global markets
- Apply statistical, problem solving and critical thinking skills

### Total Hours 27
Courses

BA 101. Introduction to Business. 3 Hours.
This course introduces students to the general nature of functional areas in business such as marketing, management, accounting, finance, research and development, and risk management. The relationship between business, the government, the economy, and the environment is examined.

BA 111. Economic Geography. 3 Hours.
This course is an introduction to the principles of economic geography, ranging from physical and biological geography to cultural and political factors. The decision making processes, both local and global, for different types of service oriented, manufacturing, transportation, and resource based businesses will be examined. The relationship of natural resources, population, and culture, and how such factors affect economic activity will be emphasized.

BA 201. Business Law I. 3 Hours.
This course provides students with a basic knowledge of the law of contracts, personal property and real property.

BA 202. Business Law II. 3 Hours.
This course is intended to augment BA 201 with in depth analysis of the law in Contracts, UCC, Corporations, Principal Agency Law, Advanced Tort Law, Environmental Law, Real Property Law, Securities Law and Employment Law.

BA 204. Franchise Formation and Management. 3 Hours.
This class will discuss franchise formation and management with particular emphasis on the discovery and evaluation of the franchisor and the feasibility of entrepreneurs converting an existing business into a franchise chain or creating and selling new franchises, domestic and international. Franchise accounting and finance (borrowing or leveraging) will be covered, as well as, taking the franchise to the stock market or going public (IPO) and raising investment capital. Prerequisite(s): BA 401.

BA 205. Real Estate Law. 3 Hours.
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

BA 210. Economics Overview for Non-Business Majors. 3 Hours.
This is an overview of microeconomic and macroeconomic concepts for non-business majors. It will include an introduction to American capitalism including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of competitive firms. It will also be an introduction to national income accounts, unemployment, inflation, government fiscal policy and monetary policy.

BA 211. Microeconomics. 3 Hours.
This is an introduction to American capitalism and microeconomic concepts including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of purely and impurely competitive firms.

BA 212. Macroeconomics. 3 Hours.
This is an introduction to macroeconomics in the American economy: national income accounts, unemployment, inflation, government fiscal policy, monetary policy and economic growth.

BA 220. Real Estate Principles and Practices. 3 Hours.
This course will provide students with methods of analyzing acquisition and retention of Real Estate. Also, there will be a focus on the skills and techniques required to operate a real estate business, including trust accounts, risk management, and property management.

BA 243. The Business of Innovation. 3 Hours.
This is a cross-disciplinary class that will introduce students to the Lean Startup Scientific Method for developing and commercializing ideas for new ventures or else innovating and developing new products or business models within existing companies. Topics include marketplace innovations, technology and science based innovations, marketplace hypothesis development and testing, frugal and agile engineering, business models, intellectual property, prototyping, exit strategies, and fundraising. Lab component is integrated within module deliverables.

BA 271. Risk Management. 3 Hours.
A study is made of the risks encountered by individuals and business firms. A presentation is made of the basic principles and institutions, which have been developed in risk management. This material is treated primarily from the consumer point of view.

BA 299. Topic/. 1 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 300. Business Presentations. 3 Hours.
Communication is a vital function of any business. Managers at all levels must be able to communicate effectively to advance their career and ensure the success of their organization. This course will give students a working knowledge of how to create, brief, and present information across the organizational communications spectrum. Students will learn how to think critically and apply problem solving skills across a variety of historical and contemporary business topics. Students will learn how to collect, analyze, synthesize, and present information in a professional manner to assorted audiences in different venues. The foundational skill set developed in this course is the ability for students to articulate their ideas in a professional manner within a variety of business settings. Prerequisite(s): EH 124.

BA 302. Business Ethics. 3 Hours.
This course is designed to raise a moral consciousness and sensitivity within the various disciplines of the business curriculum. The disciplines focused on here are business, accounting, marketing, multinational corporations, and those areas of human resource management inclusive of diversity in the workplace within the context of environmental and social responsibility.

BA 306. Franchise Law. 3 Hours.
This is a law class that analyzes all the issues of Franchise Law with a particular emphasis on Contracts, Principal/Agent Franchise Relations, Corporate Formation of Franchises, and Securities Law. Prerequisite(s): BA 201 and BA 202.

BA 310. Organization and Management. 3 Hours.
This course focuses on how to design organization systems and effectively manage them. Students completing the course should understand the universal process of management and key terminology in the language of management. Students are encouraged conceptually to blend contributions from the various schools of management thought into an integrated perspective of what managers do and why.
BA 311. Human Resource Management. 3 Hours.
This course addresses traditional personnel administration issues. Emphasis in the course is on how to manage the major human resource administration functions of job design, reward system design, staffing, training and performance control, to achieve maximum employee performance and satisfaction. Prerequisite(s): BA 310 or ( Major=BS Criminal Justice or Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Paralegal or Major=BS English - Prelaw).

BA 312. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics include leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 321. Marketing Principles. 3 Hours.
The course covers the language and issues of marketing with an emphasis on developing responsive marketing strategies that meet customer needs. The course focuses on marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing. Other topics will be incorporated into the course including the external environment (focus on integrative topics within marketing, such as economics, politics, government, and nature), marketing research, international/global marketing with relevance to cultural diversity, ethics, the impact of technology on marketing, and careers in marketing.

BA 334. International Economics. 3 Hours.
This applied economics course will emphasize the use of cases to study topics such as comparative advantage, treaties, tariffs, non-tariff trade barriers, and trade blocks among developed and developing nations. Prerequisite(s): BA 211 and BA 212.

BA 344. Personal Financial Planning. 3 Hours.
This course provides comprehensive coverage of personal financial planning in the areas of money management, axes, consumer credit, housing and other consumer decisions, legal protection, insurance, retirement planning, and estate planning. Prerequisite(s): MS 141 or MS 111 or MS 242 or MS 180 or MS 181.

BA 351. Internship. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 352. Internship II. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 353. Internship III. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 354. Internship IV. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 355. Internship V. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 362. Financial Management I. 3 Hours.
The foundation finance course covers basic personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management. Students are expected to become proficient in financial analysis of a corporation and in various aspects of corporate financial management. Prerequisite(s): AC 121 and (AC 122 or AC 211) and BA 211 and (MS 141 or MS 111 or MS 242 or MS 180 or MS 181).

BA 364. Financial Management II. 3 Hours.
The course is a continuation of Financial Management I and will cover such topics as real options, sensitivity, scenario and break-even analysis, basic issues regarding stocks and bonds, risk/return and cost of capital, capital structure and limits to the use of debt. Prerequisite(s): BA 362.

BA 375. Supply Chain Management. 3 Hours.
This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategies to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.

BA 401. Managerial Economics. 3 Hours.
This course is designed to close the gap between economic theory and business application. It reviews traditional analysis and shows its application to the understanding and solution of economic problems of the firm and industry. Prerequisite(s): BA 211 and BA 212.
BA 411. Organizational Behavior. 3 Hours.
This course is highly experiential in its approach to helping students understand and appreciate why people behave the way they do in an organizational context. Students learn how to manage employee behavior by analysis of real world phenomena and by application of principles in the areas of human perception and communication, leadership and motivation, small group dynamics, organizational culture, and organizational change. Prerequisite(s): BA 310.

BA 413. Operations Management. 3 Hours.
Quantitative model building and manipulation are a means of analyzing and synthesizing the elements of productions management. Both deterministic and stochastic modeling are emphasized in the areas of work systems design, queuing, PERT, SQC, inventory control, forecasting, and linear and nonlinear programming. Prerequisite(s): BA 310 and MS 132.

BA 414. Business Strategy. 3 Hours.
This Business Administration senior seminar focuses on decision making at the executive management level, the formulation of strategy, and its implementation in the organization. The course will employ case studies, laboratory simulation techniques, and computer spreadsheet analysis. Prerequisite(s): College Level=Senior.

BA 421. Integrated Marketing Communication and Advertising. 3 Hours.
An introduction into the world of advertising: Students will plan and design Ad campaigns, write copy and design layouts for the different types/forms of advertising. The students will work with local companies and assist them in redesign of their ad campaigns. Prerequisite(s): BA 321.

BA 422. Sales and Sales Management. 3 Hours.
This course provides students with the fundamentals of good salesmanship and sales management. Prior to studying management principles students practice sales techniques in simulations. Cases are used to illustrate and evaluate principles of sales management. Prerequisite(s): BA 321.

BA 423. Retail Management. 3 Hours.
The purpose of this course is to provide students with an understanding of the fundamentals of successful retail operations. Topics included are the market concept in retailing, factors of area and market analysis, and aspects of organizational structure, layout, and personnel planning. Also covered are methods of pricing, merchandising planning, inventory, expense control and sales promotion techniques. Prerequisite(s): BA 321.

BA 424. Marketing Research. 3 Hours.
The basic research concepts and practices as applied to the analysis of marketing problems are examined. Topics include sources of data, collecting data, sampling, questionnaire construction, tabulating data, and report preparation; computerized statistical software is used. Prerequisite(s): BA 321 and MS 132.

BA 425. Marketing Management. 3 Hours.
This is the capstone course for marketing majors. Students apply concepts learned in other courses to marketing problems of business and nonprofit organizations. Cases and business simulations are used to teach decision-making in the complex environment of business. A complete marketing plan for a simulated company of the student’s choice summarizes the student’s knowledge of the field. Prerequisite(s): BA 321.

BA 426. Real Estate Market, Research and Analysis. 3 Hours.
This course will discuss market research, real estate sales, property valuations and analysis. Students will examine market research reports to gain insight into product and market trends, opportunities, projections, and growth in the Maine, the US and global real estate markets. Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 427. Franchise Market Research and Analysis. 3 Hours.
This class will focus on analysis of market demographics, feasibility studies, product pricing, promotion and distribution, franchise broker contacts, extrapolation of sales and expenses, and the projection of costs and net profits, emerging markets and capital expansion. Prerequisite(s): BA 401 and MS 132 and MS 232 and BA 362.

BA 428. Strategic Selling. 3 Hours.
This course builds on the fundamentals of selling. The student will understand how to advance sales in light of complex business environments consisting of layers of buyers, decision makers and those who influence purchasing decisions. A strategic account planning process will be analyzed and applied to real companies by way of case studies. The art and skill of negotiating will be studied and learned through role play. Prerequisite(s): BA 422.

BA 434. International Finance. 3 Hours.
The factors affecting exchange rates are discussed, as well as different types of exchange rate systems and how governments attempt to influence exchange rates. The relationships among interest rate parity, purchasing power parity, the Fisher effect and International Fisher effect and exchange rates are analyzed. Students learn how currency futures, currency options and money market hedges are used to hedge exchange rate risk. Prerequisite(s): BA 362.

BA 437. International Marketing. 3 Hours.
The basics of international marketing will be taught including the foundations of culture, cultural understanding, business customs and practices in global marketing, assessing global markets, and developing international marketing strategy. Prerequisite(s): BA 321.

BA 438. Export-Import Procedures. 3 Hours.
The basics of export-import procedures will be taught including justification for exporting/importing, market planning methods, selection of appropriate marketing mix variables, and regulation. Prerequisite(s): BA 321.

BA 439. International Franchising Management. 3 Hours.
This course will focus on international expansion of franchises, learning the culture, monetary exchanges, imports and exports, local international market analysis and much more. Prerequisite(s): BA 204 and BA 306 and BA 427.

BA 440. Small Business Management I. 3 Hours.
This course supplies prospective and current small business managers with the essential concepts of starting and operating small businesses. Topics covered include: environment and management of small business enterprise, problems in starting small businesses, financial and administrative control, and management of business operations. Particular emphasis is placed on the interrelated nature of the components, particularly as they affect the financial picture of the firm. Through a lecture and discussion format, students are expected to share their own experiences in small businesses with their fellow students. Prerequisite(s): College Level=Senior or College Level=Junior.
BA 441. Entrepreneurship I- New Venture Development. 3 Hours.
Students will be introduced to the practical application of classic and contemporary business theory as it applies to the early stages of entrepreneurship and intrapreneurship, opportunity recognition, innovation, and new venture development. Course topics include types of entrepreneurs, opportunity recognition, marketing, cash and other resource requirements, financial statements, planning, franchising, intellectual property, success/failure/resilience, and growth. Class will use text, cases, articles, internet sources, and guest lecturers. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 442. Applied Small Business Management. 3 Hours.
This is an advanced course which focuses on real problems in Small Business Management, using the case approach. Cases are drawn from the text, from actual local small businesses, and from the practical experience of students in the class. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 443. Entrepreneurship II: Business Plans. 3 Hours.
This class builds on BA 441, New Venture Development. The focus of this class is on the early stages of formalizing and growing a venture. Topics include business plan writing, fund raising and cash flow, measuring and conveying financial position, core strategy development and competitive advantage, sustainability, international entrepreneurship, supply chain, growth, and exit. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 460. Investments. 3 Hours.
Beginning with an introduction to financial markets and investment instruments, topics include stock and bond quotations and trading procedures, rate of return, margin trading, stock indexes, stock and bond valuation, risk and return, portfolio theory, active and passive portfolio management, and investment performance evaluation. Prerequisite(s): BA 362.

BA 464. Bank & Financial Services Management. 3 Hours.
This course will introduce students to the specific issues in the financial management of a banking firm and, to a smaller degree, of other financial intermediaries. Emphasis will be on products, roles, regulatory framework, and risk management. Prerequisite(s): BA 362.

BA 465. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 471. Life and Health Insurance. 3 Hours.
This course is intended to provide background knowledge for personal application and for those responsible for administering benefit plans for employees; it provides the necessary information required to pass the State of Maine license examination. Prerequisite(s): BA 271.

BA 472. Casualty and Property Insurance. 3 Hours.
The first part of the course introduces the basics of the entire insurance business, including a summary of legal aspects, types of insurers and principles of reinsurance; next, each type of insurance is studied in detail. Topics covered are fire, consequential loss, inland marine, ocean marine, theft and surety, liability and miscellaneous property insurance. Prerequisite(s): BA 271.

BA 473. Real Estate Appraisal. 3 Hours.
This course familiarizes the student with the foundation and principles of the appraisal process. The student will become familiar with the three approaches to value. Site valuation, construction costs, depreciation; comparables selection and adjustments; rental multipliers; and reconciliation will be discussed. The student will focus on the elements making up the standards for professional appraisal practice. These elements, i.e., Definitions, Rules, Standards and Standard Rules, Statements and advisory opinions are discussed in detail along with the philosophy and history of USPAP. Prerequisite(s): BA 401 and MS 132 and BA 362.

BA 475. E-Business and E-Commerce for Managers. 3 Hours.
This course teaches the basic e-business and e-commerce theory. The students will apply the theory through the development of a website for the prime purpose of marketing a product or service or idea online.

BA 490. International Business. 3 Hours.
This course covers the international dimensions of managerial decision-making including: world economies, international trade theories, tariffs, quotas and other trade issues, global strategic planning, cross-cultural management, international market entry, international human resource management, international organization strategy, international logistics, import/export operations, currency exchange, international financial management. Current developments in global economic and business are emphasized; students participate in a computerized simulation throughout the semester. Prerequisite(s): BA 310 and BA 321.

BA 495. Senior Management Project. 3 Hours.
An experiential course that gives seniors the opportunity to apply what they have learned in class to a real business situation. Prerequisite(s): College Level=Senior.

BA 496. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 497. Business and Culture Travel Study Course. 3 Hours.
Business and Culture Travel Study course is designed to expose students to economies across the world. During the course students will travel to important commercial, cultural and governmental cities. Through a combination of readings students will be exposed to 20th and 21st century history, economics, culture political and business philosophy. The course will also involve visits to major multinational corporations, cultural activities and lectures from University business faculty when available. The course will also have two pre-trip class sessions with readings and one post course session to wrap up the experience and discuss the student travel logs.

BA 498. Business Seminar. 3 Hours.
This honors course requires the study of various business problems under the supervision of members of the Department of Business Administration. A paper is required. An oral examination is scheduled as the final examination in the course. Prerequisite(s): College Level=Senior.

BA 499. Topic/. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.
BA 600. Research Methods in Business and Education. 3 Hours.
This course is designed for beginning graduate students who have little or no formal preparation in those areas of research and problem-solving essential for a comprehensive study of business and education at the graduate level. Emphasis is placed on the identification of common problem types and the selection and use of appropriate methods of analysis (primarily statistical in nature).

BA 601. Managerial Economics. 3 Hours.
This course begins with a comprehensive overview of micro- and macroeconomic concepts with the aim of developing within students a picture of how business and nonprofit organizations relate to the economy as a whole. The course then focuses on practical applications of economic analysis to problems of concern to managers. Case studies and projects are used to demonstrate the methods used to determine economic feasibility and cost-effectiveness of products, services, and programs.

BA 602. Managerial Accounting. 3 Hours.
This is an accelerated accounting course for those with little or no formal accounting background. The emphasis is on concepts which managers need to know in order to be effective. Topics include the preparation and interpretation of financial statements, cost planning and control, cost-volume-profit analysis, decision-making models, master budgeting and variances, and evaluation of capital projects.

BA 605. Management Communications. 3 Hours.
This is an advanced communications course that builds upon a student’s experience and prior undergraduate coursework in writing and oral communications. Topics include: advanced business writing, use of visual materials, selection of secondary sources of information, report preparation, and presentations to small and large groups.

BA 611. Organizational Behavior. 3 Hours.
This course surveys the major field of management, examining structures and processes on both group and organizational levels. Both traditional and contemporary theories are analyzed and applied to business operations.

BA 620. Financial Management. 3 Hours.
Topics considered include financial planning, operating and capital budgets, cash flow, purchasing and accounting procedures, the sources and uses of corporate and institutional funds, and financial analysis for evaluation and control. Students develop projects specifically related to their needs in educational administration, small business, or corporate management. Prerequisite(s): BA 602 or AC 301.

BA 621. Marketing Management. 3 Hours.
This course focuses on complex problems facing decision-makers in the marketing of goods and services. Emphasis is placed on the decision-making process, including assessment of the social, economic, and political environment in which the organization operates; problem definition; development and evaluation of alternatives, and the implementation of the best alternative. Cases in advertising, sales, marketing research, and strategic marketing management provide practice in marketing analysis and decision-making.

BA 622. Production Management. 3 Hours.
Emphasis is placed on the use of quantitative techniques for solving manufacturing problems. The student is given an opportunity to practice mathematical model-building and manipulation. Other topics considered include queuing system design, plant layout, statistical quality control, inventory modeling, Program Evaluation and Review Technique (PERT), linear and nonlinear programming, and control theory.

BA 625. Global Strategic Management. 3 Hours.
This course focuses on the strategic challenges and opportunities confronting firms that undertake to create value and to compete in the global economy. Successful companies develop strategies for doing business in emerging markets that are different from those they use at home and often find novel ways of implementing them too. The class will make extensive use of case analysis and discussion to evaluate and understand the strategic issues that confront firms operating internationally, as well as to appreciate the importance of values and ethics in organization decisions and actions. In this course we will probe the workings of business strategies in transition and emerging economies, gain an understanding of the strategies of local firms, and analyze the international success and failure of companies. Prerequisite(s): BA 600 and 15 Credits From Range [BA 600 To BA 799].

BA 626. Accounting in Planning, Budgeting and Control. 3 Hours.
This course examines the role of accounting in the planning, budgeting, and control process of a business in a dynamic environment. The integration of measuring and analyzing (planning), short-term decisions and managing organizations (control), and preparing various budgets (budgeting) are emphasized. This course is designed as a continuation of BA602 Managerial Accounting. Numerical problems, as well as case studies, are utilized as methods of study. Prerequisite(s): BA 602 or AC 211.

BA 627. Investment Analysis. 3 Hours.
This course provides a detailed description of securities market organization and approaches to investment opportunities. Students will examine theories used in the valuation of financial securities and employ projects and applications to develop a real world understanding of portfolio management. Prerequisite(s): BA 602.

BA 628. New Venture Planning and Management. 3 Hours.
This course deals with the foundation of new ventures and related aspects of managing the small growing enterprise. Techniques taught in this course are equally applicable to small businesses, nonprofit organizations, and new ventures of larger organizations. Topics include: use of scarce resources, such as money, talent and technological expertise; identification of environmental threats and opportunities; and operational considerations such as organizational structure, legal requirements, financing, and accounting procedures.

BA 641. Human Resource Management. 3 Hours.
This course explores human resource management as an integrated process of planning and control designed to achieve high employee productivity and job satisfaction. The course focuses on the essential functions of human resource management as they apply both to the general supervisory responsibilities of every manager and to the specific operations of the personnel department.

BA 642. Leadership in Business and Professions. 3 Hours.
This course is designed to provide graduate management students with a comprehensive review of the essentials for effective leadership. It focuses on the identification of basic leadership styles, explores the theoretical and practical findings of research in leadership development, and seeks to synthesize the student’s leadership style with the most effective working models of leadership.
BA 643. Strategic Change Management. 3 Hours.
Strategic Change Management focuses on the skills required to deal effectively with organizational change. The course addresses first the pressures in the business environment that make change a fundamental reality for managers. Particular attention is paid to change arising from public policy initiatives that impinge on business. The course then examines the manager as change agent responsible for initiating innovation and explores both the personal skills required in the role of change agent and the tools and techniques available to support the manager in that role. The course also examines the problems and opportunities of those who are the recipients of change in an organization and the skills required to cope effectively with that situation.

BA 644. The Legal Environment of Business. 3 Hours.
This course will provide an overview of the important aspects of business law for executives, managers, accountants, and other professionals. The areas of law covered include but are not limited to administrative, contract, corporate and other business organizations, employment relations, real estate, taxes, and UCC sales.

BA 646. Current Issues in Business. 3 Hours.
This course, conducted in seminar fashion, draws on current literature to analyze contemporary and emerging issues facing management in the late twentieth century. Content will vary.

BA 700. Health Care Management. 3 Hours.
This course examines management problems and policy-making in the health care industry. Several areas are considered including: (1) the functions of the health care manager, (2) the types of health care delivery systems, (3) the administration of hospitals, (4) the financing of medical care, and (5) the role of government. Through readings, lectures, discussions, and projects, students clarify their own role in the delivery of health services. The course regularly draws on experts in health planning and health care administration.

BA 701. Legal Environment of Health Care Management. 3 Hours.
The course provides a foundation in the legal and regulatory framework in which health care institutions operate. Students will also examine the legal issues confronting health care managers including director and administrative liability, malpractice, negligence, patient rights and confidentiality, licensure requirements, and the like.

BA 702. Health Care Economics. 3 Hours.
In this course, the principles and tools of economic decision-making are applied to management in the health care sector. The course explores the application to health care management functions of such concepts and processes as supply and demand, resource allocation and utilization, costing and pricing, resource productivity, forecasting and economic aspects of planning, and utilization review. While the principal emphasis in the course is on micro-economic analysis, some consideration is also given to an economic analysis of public policy alternatives for the delivery of health care service. Prerequisite(s): BA 601.

BA 703. Financial Management in Healthcare Organizations. 3 Hours.
This course applies the perspectives and tools of financial analysis to the management of health care organizations and evaluation of organizational performance. Topics covered include capital budgeting, sources of operating revenue, management of cash and inventories, risk analysis and forecasting. Particular attention is paid to cost containment regulatory strategies and their implications for financial planning and management. Prerequisite(s): BA 602.

BA 704. Managing Quality in Healthcare. 3 Hours.
This course examines methods and tools for managing quality in health facilities, physician practices, managed care, and public health. Topics include developments in quality assurance and improvement, utilization review, risk management, and patient satisfaction.

BA 705. Global Perspectives in Healthcare. 3 Hours.
This course examines the social, political, and economic aspects of global healthcare issues. Through a comparative analysis of the health systems of multiple nations, students will compare theories of health policy and priorities, healthcare system facilities, workforce, technology, cost, quality, and access. The emphasis of the course will be on health management strategies used in different countries and healthcare systems to mobilize, allocate, and maintain resources to improve the healthcare status and delivery systems.

BA 710. Law & Ethics for Non-Profit Organizations. 3 Hours.
Non-profit managers and supervisors are held to a higher standard of ethical behavior due to the nature of their funding sources and their mission. This course is designed to develop in the student a basic understanding of the laws governing non-profit organizations, the practical applications of these laws and the ethics that are demanded of non-profit managers.

BA 711. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics covered include: leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 712. Strategic Marketing for Nonprofit Organizations. 3 Hours.
This course applies the concepts of marketing and strategy to the management of non-profit organizations. Through class lectures, discussion, case studies, and applied projects, students will build an understanding of the marketing process in the non-profit environment in order to be able to design, implement, and evaluate an organization’s approach to marketing and strategic positioning.

BA 713. Fundraising. 3 Hours.
This course takes a systems approach to the process of fund-raising. Topics covered include: donor cultivation, use of the annual fund, major gifts, corporate giving, and grant writing.

BA 720. Advanced Sales and Marketing in Hospitality. 3 Hours.
This course focuses on difficult problems and issues facing sales and marketing personnel in the hospitality industry. Students will make use of case studies in order to develop their decision-making process including the use of marketing research and analysis.

BA 721. Convention Planning and Events Planning. 3 Hours.
This course focuses on the rapidly growing convention sales and events planning industries. The student will learn how to design, plan, market and manage meetings and events.

BA 722. Advanced Front Office Operations. 3 Hours.
This course begins with detailed introduction about numerous aspects of front office operations and management. The next section of the course examines the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.
BA 723. Legal Issues in Hospitality Management. 3 Hours.
This course will provide the student an overview of the important aspects of Hospitality Law for Managers, and other professionals. Some of the areas of study include and are not limited to Torts, Products Liability, Constitutional Law and Criminal Law and many other subjects.

BA 724. Managing Service. 3 Hours.
This course begins with an introduction to the framework for providing quality service to customers and guests. Next we will discuss the needs of the customer/guest and proceed to develop our menu and/or product accordingly. Finally, we will learn how management and staff create loyal customers and guests by delivering service that exceeds their expectations.

BA 729. Hospitality Graduate Directed Practicum. 3 Hours.
Each student will find, will choose or will be provided with an internship site. The site chosen will be based on; and interview conducted by the management of the internship site and the student’s preference of location based on those available. The Coordinator of Hospitality Management will have the final decision on all internship site placements. The Coordinator’s decision will be based on his or her interaction with the student during previous course work, his or her understanding of the student and the internship properties requirements. Every consideration will be given to the student’s personal preferences with regard to location and types of property. However, the student’s preferences will not be the only consideration for placement. Prerequisite(s): BA 720 and BA 722 and BA 724.

BA 731. Business and Information Technology. 3 Hours.
This graduate course approaches Information Technology from the perspective of information consumers as opposed to technology implementers. During this course, students will examine various technologies and their application within modern organizations. The course has two primary goals. (1) The course will explain information technologies in non-technical terms so that students can evaluate a technology’s effectiveness relative to any existing alternatives and the overall organizational needs. (2) This course should increase student awareness regarding how they interact with technology in a personal or business setting. Business leaders are constantly bombarded with technology. This course addresses the need to sift through that information in an intelligent manner and make smart business decisions.

BA 741. Staffing & Selection. 3 Hours.
A source of competitive advantage for any organization is its talent. The effectiveness of an organization depends on the performance of each individual in that organization. Hence, one of the most important human resource functions is that of staffing the organization. This course is essential for HR professionals who are responsible for recruiting, screening, hiring, promoting, and outplacing employees. It is also very crucial for any line managers, supervisors, team leaders, and hiring managers who are involved in recruiting, making promotions, succession, or any other workforce decisions. An examination of the scientific, legal, and administrative issues associated with the recruitment, selection, employment and retention of individuals by organizations augments the study. Specific attention will be given to the current challenges of an increasingly dynamic workplace and diverse workforce.

BA 742. Training & Development. 3 Hours.
The effective training and development of human resources creates tremendous and unique value for an organization. This course examines how organizations can develop and manage the talents and skillset of human capital. The course explores topics such as training needs analysis, formulating training objectives, and the design, implementation, and evaluation of training and development programs.

BA 745. Innovative Global Strategy. 3 Hours.
This course will build students’ awareness of the challenges that must be addressed and the opportunities that may be present when competing in the global marketplace. The course focuses on how firms apply innovative strategies to create a sustainable competitive advantage in the global arena. Course content will be drawn from readings, case analysis, online content and discussions. The course requires students to analyze and understand real world examples of both successful and unsuccessful global strategy implementation.

BA 750. Fundamentals of Risk Management. 3 Hours.
This course explores the fundamentals of risk management. After discussion of the importance of risk and the rationale for its management in organizations, the remainder of the course will analyze the process of and methods for managing risk.

BA 751. Employee Benefits. 3 Hours.
This course explores the nature and operation of employer-sponsored benefit plans. Emphasis is placed on plan design, administration, funding, and regulation. The course also addresses organizational characteristics, benefit structure, and pricing of risk transfer schemes for groups.

BA 752. Crisis Management. 3 Hours.
Crisis Management can be defined as a communications response to an event that has a negative impact on an audience - the public, customers/clients, employees, shareholders, etc. Examples of such events could include tainted food, a corporate leak, a political scandal, an entertainment or athletic scandal, damaged products that cause or could potentially cause life-threatening situations, natural disasters, terrorism, and financial disasters. In this course, students will analyze and critique high-profile cases and learn how to effectively respond to crises.

BA 753. Corporate Risk Management. 3 Hours.
Corporate risk is analyzed through the lens of enterprise risk management. This course explores the operational and financial risks faced by firms and the study of various methods of handling these risks.

BA 754. Strategic Selling. 3 Hours.
The focus of this course is on key, strategic customer selling approaches. The process of sales planning and strategy development for these types of customers will be emphasized. The objective of this course is to understand and execute sales strategies for managing major and large customers.

BA 760. Technology & Innovation. 3 Hours.
BA 760 Technology & Innovation offers a research approach to identifying, analyzing, and creating technological advantage in nascent and mature industries. Students will apply the methodologies of innovation and discovery to business settings and markets, seeking to create competitive advantage and achieve market transformation through strategic initiatives that redefine consumer expectations and industry practices and reframe organizations to embrace innovative practices and processes.

BA 761. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.
BA 762. Groupthink. 3 Hours.
This course explores the origin of groupthink. Groupthink is a term first used by social psychologist Irving L. Janis (1972) that refers to a psychological phenomenon in which people strive for consensus within a group. This course explores groupthink as a phenomenon where people set aside their own personal beliefs or adopt the opinion of the rest of the group.

BA 763. Biotechnology & Innovation: Intellectual Property. 3 Hours.
This course focuses on the protection of proprietary and intellectual rights in inventions, writings, creative works, software, industry trade secrets, industry trade designations, and other intellectual assets at the international, Federal, and State Levels. The course will give special consideration to the emergence of new areas of patent law in Biotechnology and Pharmaceutical fields, examining not only the patentability of intellectual assets, but also the discovery process, particularly in collaborative environments involving multiple organizations and institutions, and the qualifying distinctions between collaborative and competitive research.

BA 790. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.*

BA 791. Professional Project. 3-6 Hours.
This course is used to award graduate credit for prior learning and educational experience obtained outside of the traditional classroom. Through the preparation of a professional project, students provide formal documentation of the specific graduate-level learning competencies which they have acquired through prior experience. A maximum of six (6) credit hours may be earned.

BA 792. Graduate Internship I. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 793. Graduate Internship II. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 792.

BA 794. Graduate Internship III. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.

BA 796. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 798. Thesis. 6 Hours.
The thesis may be library-oriented research with extensive reliance on documents and a relatively limited amount of primary field research, or it may be action-oriented field research with relevant documentation from the literature. The title of the thesis topic must be filed with the graduate committee. A student, with the approval of his/her advisory committee, may register for the thesis after completion of twenty-four (24) semester hours.

BA 799. Topic/. 3 Hours.
Students work together in a seminar setting under the direction of a member of the graduate faculty. The content of the seminar will vary according to the interests of students and faculty involved.

B.S. Business Administration/M.B.A.

The dual B.S. in Business Administration / M.B.A. degree program affords students the opportunity to earn both degrees in five years as opposed to the six years it would take to pursue the degrees separately.

Students have the opportunity to choose from specific areas of interest for an added concentration in their B.S. degree such as entrepreneurship/ small business management, financial management, healthcare management, international business, management or marketing. Similarly, students can add a concentration to their MBA degree such as healthcare management, hospitality and tourism management, organizational management, biotechnology and innovation or risk management.

Requirements for Major

Students are expected to achieve and maintain a GPA of 3.0 in their undergraduate program in order to take graduate classes. Further, Students must maintain a 3.0 in graduate classes to remain in the MBA portion of the program.

Please select from the particular programs for more detailed information.

### Total Hours: 152

*** Credit may not be required for degree completion.***

#### Courses

**BA 101. Introduction to Business. 3 Hours.**

This course introduces students to the general nature of functional areas in business such as marketing, management, accounting, finance, research and development, and risk management. The relationship between business, the government, the economy, and the environment is examined.
BA 111. Economic Geography. 3 Hours.
This course is an introduction to the principles of economic geography, ranging from physical and biological geography to cultural and political factors. The decision making processes, both local and global, for different types of service oriented, manufacturing, transportation, and resource based businesses will be examined. The relationship of natural resources, population, and culture, and how such factors affect economic activity will be emphasized.

BA 201. Business Law I. 3 Hours.
This course provides students with a basic knowledge of the law of contracts, personal property and real property.

BA 202. Business Law II. 3 Hours.
This course is intended to augment BA 201 with in depth analysis of the law in Contracts, UCC, Corporations, Principal Agency Law, Advanced Tort Law, Environmental Law, Real Property Law, Securities Law and Employment Law.

BA 204. Franchise Formation and Management. 3 Hours.
This class will discuss franchise formation and management with particular emphasis on the discovery and evaluation of the franchisor and the feasibility of entrepreneurs converting an existing business into a franchise chain or creating and selling new franchises, domestic and international. Franchise accounting and finance (borrowing or leveraging) will be covered, as well as, taking the franchise to the stock market or going public (IPO) and raising investment capital. Prerequisite(s): BA 401.

BA 205. Real Estate Law. 3 Hours.
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

BA 210. Economics Overview for Non-Business Majors. 3 Hours.
This is an overview of microeconomic and macroeconomic concepts for non-business majors. It will include an introduction to American capitalism including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of competitive firms. It will also be an introduction to national income accounts, unemployment, inflation, government fiscal policy and monetary policy.

BA 211. Microeconomics. 3 Hours.
This is an introduction to American capitalism and microeconomic concepts including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of purely and impurely competitive firms.

BA 212. Macroeconomics. 3 Hours.
This is an introduction to macroeconomics in the American economy: national income accounts, unemployment, inflation, government fiscal policy, monetary policy and economic growth.

BA 220. Real Estate Principles and Practices. 3 Hours.
This course will provide students with methods of analyzing acquisition and retention of Real Estate. Also, there will be a focus on the skills and techniques required to operate a real estate business, including trust accounts, risk management, and property management.

BA 243. The Business of Innovation. 3 Hours.
This is a cross-disciplinary class that will introduce students to the Lean Startup Scientific Method for developing and commercializing ideas for new ventures or else innovating and developing new products or business models within existing companies. Topics include marketplace innovations, technology and science based innovations, marketplace hypothesis development and testing, frugal and agile engineering, business models, intellectual property, prototyping, exit strategies, and fundraising. Lab component is integrated within module deliverables.

BA 271. Risk Management. 3 Hours.
A study is made of the risks encountered by individuals and business firms. A presentation is made of the basic principles and institutions, which have been developed in risk management. This material is treated primarily from the consumer point of view.

BA 299. Topic/. 1 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 300. Business Presentations. 3 Hours.
Communication is a vital function of any business. Managers at all levels must be able to communicate effectively to advance their career and ensure the success of their organization. This course will give students a working knowledge of how to create, brief, and present information across the organizational communications spectrum. Students will learn how to think critically and apply problem solving skills across a variety of historical and contemporary business topics. Students will learn how to collect, analyze, synthesize, and present information in a professional manner to assorted audiences in different venues. The foundational skill set developed in this course is the ability for students to articulate their ideas in a professional manner within a variety of business settings. Prerequisite(s): EH 124.

BA 302. Business Ethics. 3 Hours.
This course is designed to raise a moral consciousness and sensitivity within the various disciplines of the business curriculum. The disciplines focused on here are business, accounting, marketing, multinational corporations, and those areas of human resource management inclusive of diversity in the workplace within the context of environmental and social responsibility.

BA 306. Franchise Law. 3 Hours.
This is a law class that analyzes all the issues of Franchise Law with a particular emphasis on Contracts, Principal/Agent Franchise Relations, Corporate Formation of Franchises, and Securities Law. Prerequisite(s): BA 201 and BA 202.

BA 310. Organization and Management. 3 Hours.
This course focuses on how to design organization systems and effectively manage them. Students completing the course should understand the universal process of management and key terminology in the language of management. Students are encouraged conceptually to blend contributions from the various schools of management thought into an integrated perspective of what managers do and why.

BA 311. Human Resource Management. 3 Hours.
This course addresses traditional personnel administration issues. Emphasis in the course is on how to manage the major human resource administration functions of job design, reward system design, staffing, training and performance control, to achieve maximum employee performance and satisfaction. Prerequisite(s): BA 310 or ( Major=BS Criminal Justice or Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Paralegal or Major=BS English - Prelaw).
BA 312. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics include leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 321. Marketing Principles. 3 Hours.
The course covers the language and issues of marketing with an emphasis on developing responsive marketing strategies that meet customer needs. The course focuses on marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing. Other topics will be incorporated into the course including the external environment (focus on integrative topics within marketing, such as economics, politics, government, and nature), marketing research, international/global marketing with relevance to cultural diversity, ethics, the impact of technology on marketing, and careers in marketing.

BA 334. International Economics. 3 Hours.
This applied economics course will emphasize the use of cases to study topics such as comparative advantage, treaties, tariffs, non-tariff trade barriers, and trade blocks among developed and developing nations. Prerequisite(s): BA 211 and BA 212.

BA 344. Personal Financial Planning. 3 Hours.
This course provides comprehensive coverage of personal financial planning in the areas of money management, axes, consumer credit, housing and other consumer decisions, legal protection, insurance, retirement planning, and estate planning. Prerequisite(s): MS 141 or MS 111 or MS 242 or MS 180 or MS 181.

BA 351. Internship. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 352. Internship II. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 353. Internship III. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 354. Internship IV. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 355. Internship V. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 356. Internship VI. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 357. Internship VII. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 358. Internship VIII. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 359. Internship IX. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 360. Internship X. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 361. Internship XI. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 362. Financial Management I. 3 Hours.
The foundation finance course covers basic personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management. Students are expected to become proficient in financial analysis of a corporation and in various aspects of corporate financial management. Prerequisite(s): AC 121 and (AC 122 or AC 211) and BA 211 and (MS 141 or MS 111 or MS 242 or MS 180 or MS 181).

BA 364. Financial Management II. 3 Hours.
The course is a continuation of Financial Management I and will cover such topics as real options, sensitivity, scenario and break-even analysis, basic issues regarding stocks and bonds, risk/return and cost of capital, capital structure and limits to the use of debt. Prerequisite(s): BA 362.

BA 375. Supply Chain Management. 3 Hours.
This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategies to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.

BA 401. Managerial Economics. 3 Hours.
This course is designed to close the gap between economic theory and business application. It reviews traditional analysis and shows its application to the understanding and solution of economic problems of the firm and industry. Prerequisite(s): BA 211 and BA 212.

BA 411. Organizational Behavior. 3 Hours.
This course is highly experiential in its approach to helping students understand and appreciate why people behave the way they do in an organizational context. Students learn how to manage employee behavior by analysis of real world phenomena and by application of principles in the areas of human perception and communication, leadership and motivation, small group dynamics, organizational culture, and organizational change. Prerequisite(s): BA 310.

BA 413. Operations Management. 3 Hours.
Quantitative model building and manipulation are a means of analyzing and synthesizing the elements of productions management. Both deterministic and stochastic modeling are emphasized in the areas of work systems design, queuing, PERT, SQC, inventory control, forecasting, and linear and nonlinear programming. Prerequisite(s): BA 310 and MS 132.
BA 414. Business Strategy. 3 Hours.
This Business Administration senior seminar focuses on decision making at the executive management level, the formulation of strategy, and its implementation in the organization. The course will employ case studies, laboratory simulation techniques, and computer spreadsheet analysis. Prerequisite(s): College Level=Senior.

BA 421. Integrated Marketing Communication and Advertising. 3 Hours.
An introduction into the world of advertising: Students will plan and design Ad campaigns, write copy and design layouts for the different types/forms of advertising. The students will work with local companies and assist them in redesign of their ad campaigns. Prerequisite(s): BA 321.

BA 422. Sales and Sales Management. 3 Hours.
This course provides students with the fundamentals of good salesmanship and sales management. Prior to studying management principles students practice sales techniques in simulations. Cases are used to illustrate and evaluate principles of sales management. Prerequisite(s): BA 321.

BA 423. Retail Management. 3 Hours.
The purpose of this course is to provide students with an understanding of the fundamentals of successful retail operations. Topics included are the market concept in retailing, factors of area and market analysis, and aspects of organizational structure, layout, and personnel planning. Also covered are methods of pricing, merchandising planning, inventory, expense control and sales promotion techniques. Prerequisite(s): BA 321.

BA 424. Marketing Research. 3 Hours.
The basic research concepts and practices as applied to the analysis of marketing problems are examined. Topics include sources of data, collecting data, sampling, questionnaire construction, tabulating data, and report preparation; computerized statistical software is used. Prerequisite(s): BA 321 and MS 132.

BA 425. Marketing Management. 3 Hours.
This is the capstone course for marketing majors. Students apply concepts learned in other courses to marketing problems of business and nonprofit organizations. Cases and business simulations are used to teach decision-making in the complex environment of business. A complete marketing plan for a simulated company of the student’s choice summarizes the student’s knowledge of the field. Prerequisite(s): BA 321.

BA 426. Real Estate Market, Research and Analysis. 3 Hours.
This course will discuss market research, real estate sales, property valuations and analysis. Students will examine market research reports to gain insight into product and market trends, opportunities, projections, and growth in the maine, the US and global real estate markets. Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 427. Franchise Market Research and Analysis. 3 Hours.
This class will focus on analysis of market demographics, feasibility studies, product pricing, promotion and distribution, franchise broker contacts, extrapolation of sales and expenses, and the projection of costs and net profits, emerging markets and capital expansion. Prerequisite(s): BA 401 and MS 132 and MS 232 and BA 362.

BA 428. Strategic Selling. 3 Hours.
This course builds on the fundamentals of selling. The student will understand how to advance sales in light of complex business environments consisting of layers of buyers, decision makers and those who influence purchasing decisions. A strategic account planning process will be analyzed and applied to real companies by way of case studies. The art and skill of negotiating will be studied and learned through role play. Prerequisite(s): BA 422.

BA 434. International Finance. 3 Hours.
The factors affecting exchange rates are discussed, as well as different types of exchange rate systems and how governments attempt to influence exchange rates. The relationships among interest rate parity, purchasing power parity, the Fisher effect and International Fisher effect and exchange rates are analyzed. Students learn how currency futures, currency options and money market hedges are used to hedge exchange rate risk. Prerequisite(s): BA 362.

BA 437. International Marketing. 3 Hours.
The basics of international marketing will be taught including the foundations of culture, cultural understanding, business customs and practices in global marketing, assessing global markets, and developing international marketing strategy. Prerequisite(s): BA 321.

BA 438. Export-Import Procedures. 3 Hours.
The basics of export-import procedures will be taught including justification for exporting/importing, market planning methods, selection of appropriate marketing mix variables, and regulation. Prerequisite(s): BA 321.

BA 439. International Franchising Management. 3 Hours.
This course will focus on international expansion of franchises, learning the culture, monetary exchanges, imports and exports, local international market analysis and much more. Prerequisite(s): BA 204 and BA 306 and BA 427.

BA 440. Small Business Management I. 3 Hours.
This course supplies prospective and current small business managers with the essential concepts of starting and operating small businesses. Topics covered include: environment and management of small business enterprise, problems in starting small businesses, financial and administrative control, and management of business operations. Particular emphasis is placed on the interrelated nature of the components, particularly as they affect the financial picture of the firm. Through a lecture and discussion format, students are expected to share their own experiences in small businesses with their fellow students. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 441. Entrepreneurship I- New Venture Development. 3 Hours.
Students will be introduced to the practical application of classic and contemporary business theory as it applies to the early stages of entrepreneurship and intrapreneurship, opportunity recognition, innovation, and new venture development. Course topics include types of entrepreneurs, opportunity recognition, marketing, cash and other resource requirements, financial statements, planning, franchising, intellectual property, success/failure/resilience, and growth. Class will use text, cases, articles, internet sources, and guest lecturers. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 442. Applied Small Business Management. 3 Hours.
This is an advanced course which focuses on real problems in Small Business Management, using the case approach. Cases are drawn from the text, from actual local small businesses, and from the practical experience of students in the class. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 443. Entrepreneurship II: Business Plans. 3 Hours.
This class builds on BA 441, New Venture Development. The focus of this class is on the early stages of formalizing and growing a venture. Topics include business plan writing, fund raising and cash flow, measuring and conveying financial position, core strategy development and competitive advantage, sustainability, international entrepreneurship, supply chain, growth, and exit. Prerequisite(s): College Level=Junior or College Level=Senior.
BA 460. Investments. 3 Hours.
Beginning with an introduction to financial markets and investment instruments, topics include stock and bond quotations and trading procedures, rate of return, margin trading, stock indexes, stock and bond valuation, risk and return, portfolio theory, active and passive portfolio management, and investment performance evaluation. Prerequisite(s): BA 362.

BA 464. Bank & Financial Services Management. 3 Hours.
This course will introduce students to the specific issues in the financial management of a banking firm and, to a smaller degree, of other financial intermediaries. Emphasis will be on products, roles, regulatory framework, and risk management. Prerequisite(s): BA 362.

BA 465. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 471. Life and Health Insurance. 3 Hours.
This course is intended to provide background knowledge for personal application and for those responsible for administering benefit plans for employees; it provides the necessary information required to pass the State of Maine license examination. Prerequisite(s): BA 271.

BA 472. Casualty and Property Insurance. 3 Hours.
The first part of the course introduces the basics of the entire insurance business, including a summary of legal aspects, types of insurers and principles of reinsurance; next, each type of insurance is studied in detail. Topics covered are fire, consequential loss, inland marine, ocean marine, theft and surety, liability and miscellaneous property insurance. Prerequisite(s): BA 271.

BA 473. Real Estate Appraisal. 3 Hours.
This course familiarizes the student with the foundation and principles of the appraisal process. The student will become familiar with the three approaches to value. Site valuation, construction costs, depreciation; comparables selection and adjustments; rental multipliers; and reconciliation will be discussed. The student will focus on the elements making up the standards for professional appraisal practice. These elements, i.e., Definitions, Rules, Standards and Standard Rules, Statements and advisory opinions are discussed in detail along with the philosophy and history of USPAP. Prerequisite(s): BA 401 and MS 132 and BA 362.

BA 475. E-Business and E-Commerce for Managers. 3 Hours.
This course teaches the basic e-business and e-commerce theory. The students will apply the theory through the development of a website for the prime purpose of marketing a product or service or idea online.

BA 490. International Business. 3 Hours.
This course covers the international dimensions of managerial decision-making including: world economies, international trade theories, tariffs, quotas and other trade issues, global strategic planning, cross-cultural management, international market entry, international human resource management, international organization strategy, international logistics, import/export operations, currency exchange, international financial management. Current developments in global economic and business are emphasized; students participate in a computerized simulation throughout the semester. Prerequisite(s): BA 310 and BA 321.

BA 495. Senior Management Project. 3 Hours.
An experiential course that gives seniors the opportunity to apply what they have learned in class to a real business situation. Prerequisite(s): College Level=Senior.

BA 496. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 497. Business and Culture Travel Study Course. 3 Hours.
Business and Culture Travel Study course is designed to expose students to economies across the world. During the course students will travel to important commercial, cultural and governmental cities. Through a combination of readings students will be exposed to 20th and 21st century history, economics, culture political and business philosophy. The course will also involve visits to major multinational corporations, cultural activities and lectures from University business faculty when available. The course will also have two pre-trip class sessions with readings and one post course session to wrap up the experience and discuss the student travel logs.

BA 498. Business Seminar. 3 Hours.
This honors course requires the study of various business problems under the supervision of members of the Department of Business Administration. A paper is required. An oral examination is scheduled as the final examination in the course. Prerequisite(s): College Level=Senior.

BA 499. Topic/. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 600. Research Methods in Business and Education. 3 Hours.
This course is designed for beginning graduate students who have little or no formal preparation in those areas of research and problem-solving essential for a comprehensive study of business and education at the graduate level. Emphasis is placed on the identification of common problem types and the selection and use of appropriate methods of analysis (primarily statistical in nature).

BA 601. Managerial Economics. 3 Hours.
This course begins with a comprehensive overview of micro- and macroeconomic concepts with the aim of developing within students a picture of how business and nonprofit organizations relate to the economy as a whole. The course then focuses on practical applications of economic analysis to problems of concern to managers. Case studies and projects are used to demonstrate the methods used to determine economic feasibility and cost-effectiveness of products, services, and programs.

BA 602. Managerial Accounting. 3 Hours.
This is an accelerated accounting course for those with little or no formal accounting background. The emphasis is on concepts which managers need to know in order to be effective. Topics include the preparation and interpretation of financial statements, cost planning and control, cost-volume-profit analysis, decision-making models, master budgeting and variances, and evaluation of capital projects.
BA 605. Management Communications. 3 Hours.
This is an advanced communications course that builds upon a student's experience and prior undergraduate coursework in writing and oral communications. Topics include: advanced business writing, use of visual materials, selection of secondary sources of information, report preparation, and presentations to small and large groups.

BA 611. Organizational Behavior. 3 Hours.
This course surveys the major field of management, examining structures and processes on both group and organizational levels. Both traditional and contemporary theories are analyzed and applied to business operations.

BA 620. Financial Management. 3 Hours.
Topics considered include financial planning, operating and capital budgets, cash flow, purchasing and accounting procedures, the sources and uses of corporate and institutional funds, and financial analysis for evaluation and control. Students develop projects specifically related to their needs in educational administration, small business, or corporate management. Prerequisite(s): BA 602 or AC 301.

BA 621. Marketing Management. 3 Hours.
This course focuses on complex problems facing decision-makers in the marketing of goods and services. Emphasis is placed on the decision-making process, including assessment of the social, economic, and political environment in which the organization operates; problem definition; development and evaluation of alternatives, and the implementation of the best alternative. Cases in advertising, sales, marketing research, and strategic marketing management provide practice in marketing analysis and decision-making.

BA 622. Production Management. 3 Hours.
Emphasis is placed on the use of quantitative techniques for solving manufacturing problems. The student is given an opportunity to practice mathematical model-building and manipulation. Other topics considered include queuing system design, plant layout, statistical quality control, inventory modeling, Program Evaluation and Review Technique (PERT), linear and nonlinear programming, and control theory.

BA 625. Global Strategic Management. 3 Hours.
This course focuses on the strategic challenges and opportunities confronting firms that undertake to create value and to compete in the global economy. Successful companies develop strategies for doing business in emerging markets that are different from those they use at home and often find novel ways of implementing them too. The class will make extensive use of case analysis and discussion to evaluate and understand the strategic issues that confront firms operating internationally, as well as to appreciate the importance of values and ethics in organization decisions and actions. In this course we will probe the workings of business strategies in transition and emerging economies, gain an understanding of the strategies of local firms, and analyze the international success and failure of companies. Prerequisite(s): BA 600 and 15 Credits From Range [BA 600 To BA 799].

BA 626. Accounting in Planning, Budgeting and Control. 3 Hours.
This course examines the role of accounting in the planning, budgeting, and control process of a business in a dynamic environment. The integration of measuring and analyzing (planning), short-term decisions and managing organizations (control), and preparing various budgets (budgeting) are emphasized. This course is designed as a continuation of BA602 Managerial Accounting. Numerical problems, as well as case studies, are utilized as methods of study. Prerequisite(s): BA 602 or AC 211.

BA 627. Investment Analysis. 3 Hours.
This course provides a detailed description of securities market organization and approaches to investment opportunities. Students will examine theories used in the valuation of financial securities and employ projects and applications to develop a real world understanding of portfolio management. Prerequisite(s): BA 602.

BA 628. New Venture Planning and Management. 3 Hours.
This course deals with the foundation of new ventures and related aspects of managing the small growing enterprise. Techniques taught in this course are equally applicable to small businesses, nonprofit organizations, and new ventures of larger organizations. Topics include: use of scarce resources, such as money, talent and technological expertise; identification of environmental threats and opportunities; and operational considerations such as organizational structure, legal requirements, financing, and accounting procedures.

BA 641. Human Resource Management. 3 Hours.
This course explores human resource management as an integrated process of planning and control designed to achieve high employee productivity and job satisfaction. The course focuses on the essential functions of human resource management as they apply both to the general supervisory responsibilities of every manager and to the specific operations of the personnel department.

BA 642. Leadership in Business and Professions. 3 Hours.
This course is designed to provide graduate management students with a comprehensive review of the essentials for effective leadership. It focuses on the identification of basic leadership styles, explores the theoretical and practical findings of research in leadership development, and seeks to synthesize the student’s leadership style with the most effective working models of leadership.

BA 643. Strategic Change Management. 3 Hours.
Strategic Change Management focuses on the skills required to deal effectively with organizational change. The course addresses first the pressures in the business environment that make change a fundamental reality for managers. Particular attention is paid to change arising from public policy initiatives that impinge on business. The course then examines the manager as change agent responsible for initiating innovation and explores both the personal skills required in the role of change agent and the tools and techniques available to support the manager in that role. The course also examines the problems and opportunities of those who are the recipients of change in an organization and the skills required to cope effectively with that situation.

BA 644. The Legal Environment of Business. 3 Hours.
This course will provide an overview of the important aspects of business law for executives, managers, accountants, and other professionals. The areas of law covered include but are not limited to administrative, contract, corporate and other business organizations, employment relations, real estate, taxes, and UCC sales.

BA 646. Current Issues in Business. 3 Hours.
This course, conducted in seminar fashion, draws on current literature to analyze contemporary and emerging issues facing management in the late twentieth century. Content will vary.
BA 700. Health Care Management. 3 Hours.
This course examines management problems and policy-making in the health care industry. Several areas are considered including: (1) the functions of the health care manager, (2) the types of health care delivery systems, (3) the administration of hospitals, (4) the financing of medical care, and (5) the role of government. Through readings, lectures, discussions, and projects, students clarify their own role in the delivery of health services. The course regularly draws on experts in health planning and health care administration.

BA 701. Legal Environment of Health Care Management. 3 Hours.
The course provides a foundation in the legal and regulatory framework in which health care institutions operate. Students will also examine the legal issues confronting health care managers including director and administrative liability, malpractice, negligence, patient rights and confidentiality, licensure requirements, and the like.

BA 702. Health Care Economics. 3 Hours.
In this course, the principles and tools of economic decision-making are applied to management in the health care sector. The course explores the application to health care management functions of such concepts and processes as supply and demand, resource allocation and utilization, costing and pricing, resource productivity, forecasting and economic aspects of planning, and utilization review. While the principal emphasis in the course is on micro-economic analysis, some consideration is also given to an economic analysis of public policy alternatives for the delivery of health care service. Prerequisite(s): BA 601.

BA 703. Financial Management in Healthcare Organizations. 3 Hours.
This course applies the perspectives and tools of financial analysis to the management of health care organizations and evaluation of organizational performance. Topics covered include capital budgeting, sources of operating revenue, management of cash and inventories, risk analysis and forecasting. Particular attention is paid to cost containment regulatory strategies and their implications for financial planning and management. Prerequisite(s): BA 602.

BA 704. Managing Quality in Healthcare. 3 Hours.
This course examines methods and tools for managing quality in health facilities, physician practices, managed care, and public health. Topics include developments in quality assurance and improvement, utilization review, risk management, and patient satisfaction.

BA 705. Global Perspectives in Healthcare. 3 Hours.
This course examines the social, political, and economic aspects of global healthcare issues. Through a comparative analysis of the health systems of multiple nations, students will compare theories of health policy and priorities, healthcare system facilities, workforce, technology, cost, quality, and access. The emphasis of the course will be on health management strategies used in different countries and healthcare systems to mobilize, allocate, and maintain resources to improve the healthcare status and delivery systems.

BA 710. Law & Ethics for Non-Profit Organizations. 3 Hours.
Non-profit managers and supervisors are held to a higher standard of ethical behavior due to the nature of their funding sources and their mission. This course is designed to develop in the student a basic understanding of the laws governing non-profit organizations, the practical applications of these laws and the ethics that are demanded of non-profit managers.

BA 711. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics covered include: leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 712. Strategic Marketing for Nonprofit Organizations. 3 Hours.
This course applies the concepts of marketing and strategy to the management of non-profit organizations. Through class lectures, discussion, case studies, and applied projects, students will build an understanding of the marketing process in the non-profit environment in order to be able to design, implement, and evaluate an organization’s approach to marketing and strategic positioning.

BA 713. Fundraising. 3 Hours.
This course takes a systems approach to the process of fund-raising. Topics covered include: donor cultivation, use of the annual fund, major gifts, corporate giving, and grant writing.

BA 720. Advanced Sales and Marketing in Hospitality. 3 Hours.
This course focuses on difficult problems and issues facing sales and marketing personnel in the hospitality industry. Students will make use of case studies in order to develop their decision-making process including the use of marketing research and analysis.

BA 721. Convention Planning and Events Planning. 3 Hours.
This course focuses on the rapidly growing convention sales and events planning industries. The student will learn how to design, plan, market and manage meetings and events.

BA 722. Advanced Front Office Operations. 3 Hours.
This course begins with detailed introduction about numerous aspects of front office operations and management. The next section of the course examines the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.

BA 723. Legal Issues in Hospitality Management. 3 Hours.
This course will provide the student an overview of the important aspects of Hospitality Law for Managers, and other professionals. Some of the areas of study include and are not limited to Torts, Products Liability, Constitutional Law and Criminal Law and many other subjects.

BA 724. Managing Service. 3 Hours.
This course begins with an introduction to the framework for providing quality service to customers and guests. Next we will discuss the needs of the customer/guest and proceed to develop our menu and/or product accordingly. Finally, we will learn how management and staff create loyal customers and guests by delivering service that exceeds their expectations.

BA 729. Hospitality Graduate Directed Practicum. 3 Hours.
Each student will find, who can be or will be provided with an internship site. The site chosen will be based on; and interview conducted by the management of the internship site and the student’s preference of location based on those available. The Coordinator of Hospitality Management will have the final decision on all internship site placements. The Coordinator’s decision will be based on his or her interaction with the student during previous course work, his or her understanding of the student and the internship properties requirements. Every consideration will be given to the student’s personal preferences with regard to location and types of property. However, the student’s preferences will not be the only consideration for placement. Prerequisite(s): BA 720 and BA 722 and BA 724.
BA 731. Business and Information Technology. 3 Hours.
This graduate course approaches Information Technology from the perspective of information consumers as opposed to technology implementers. During this course, students will examine various technologies and their application within modern organizations. The course has two primary goals. (1) The course will explain information technologies in non-technical terms so that students can evaluate a technology’s effectiveness relative to any existing alternatives and the overall organizational needs. (2) This course should increase student awareness regarding how they interact with technology in a personal or business setting. Business leaders are constantly bombarded with technology. This course addresses the need to sift through that information in an intelligent manner and make smart business decisions.

BA 741. Staffing & Selection. 3 Hours.
A source of competitive advantage for any organization is its talent. The effectiveness of an organization depends on the performance of each individual in that organization. Hence, one of the most important human resource functions is that of staffing the organization. This course is essential for HR professionals who are responsible for recruiting, screening, hiring, promoting, and outplacing employees. It is also very crucial for any line managers, supervisors, team leaders, and hiring managers who are involved in recruiting, making promotions, succession, or any other workforce decisions. An examination of the scientific, legal, and administrative issues associated with the recruitment, selection, employment and retention of individuals by organizations augments the study. Specific attention will be given to the current challenges of an increasingly dynamic workplace and diverse workforce.

BA 742. Training & Development. 3 Hours.
The effective training and development of human resources creates tremendous and unique value for an organization. This course examines how organizations can develop and manage the talents and skillset of human capital. The course explores topics such as training needs analysis, formulating training objectives, and the design, implementation, and evaluation of training and development programs.

BA 745. Innovative Global Strategy. 3 Hours.
This course will build students’ awareness of the challenges that must be addressed and the opportunities that may be present when competing in the global marketplace. The course focuses on how firms apply innovative strategies to create a sustainable competitive advantage in the global arena. Course content will be drawn from readings, case analysis, online content and discussions. The course requires students to analyze and understand real world examples of both successful and unsuccessful global strategy implementation.

BA 750. Fundamentals of Risk Management. 3 Hours.
This course explores the fundamentals of risk management. After discussion of the importance of risk and the rationale for its management in organizations, the remainder of the course will analyze the process of and methods for managing risk.

BA 751. Employee Benefits. 3 Hours.
This course explores the nature and operation of employer-sponsored benefit plans. Emphasis is placed on plan design, administration, funding, and regulation. The course also addresses organizational characteristics, benefit structure, and pricing of risk transfer schemes for groups.

BA 752. Crisis Management. 3 Hours.
Crisis Management can be defined as a communications response to an event that has a negative impact on an audience - the public, customers/clients, employees, shareholders, etc. Examples of such events could include tainted food, a corporate leak, a political scandal, an entertainment or athletic scandal, damaged products that cause or could potentially cause life-threatening situations, natural disasters, terrorism, and financial disasters. In this course, students will analyze and critique high-profile cases and learn how to effectively respond to crises.

BA 753. Corporate Risk Management. 3 Hours.
Corporate risk is analyzed through the lens of enterprise risk management. This course explores the operational and financial risks faced by firms and the study of various methods of handling these risks.

BA 754. Strategic Selling. 3 Hours.
The focus of this course is on key, strategic customer selling approaches. The process of sales planning and strategy development for these types of customers will be emphasized. The objective of this course is to understand and execute sales strategies for managing major and large customers.

BA 760. Technology & Innovation. 3 Hours.
BA 760 Technology & Innovation offers a research approach to identifying, analyzing, and creating technological advantage in nascent and mature industries. Students will apply the methodologies of innovation and discovery to business settings and markets, seeking to create competitive advantage and achieve market transformation through strategic initiatives that redefine consumer expectations and industry practices and reframe organizations to embrace innovative practices and processes.

BA 761. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 762. Groupthink. 3 Hours.
This course explores the origin of groupthink. Groupthink is a term first used by social psychologist Irving L. Janis (1972) that refers to a psychological phenomenon in which people strive for consensus within a group. This course explores groupthink as a phenomenon where people set aside their own personal beliefs or adopt the opinion of the rest of the group.

BA 763. Biotechnology & Innovation: Intellectual Property. 3 Hours.
This course focuses on the protection of proprietary and intellectual rights in inventions, writings, creative works, software, industry trade secrets, industry trade designations, and other intellectual assets at the international, Federal, and State Levels. The course will give special consideration to the emergence of new areas of patent law in Biotechnology and Pharmaceutical fields, examining not only the patentability of intellectual assets, but also the discovery process, particularly in collaborative environments involving multiple organizations and institutions, and the qualifying distinctions between collaborative and competitive research.
BA 790. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.*

BA 791. Professional Project. 3-6 Hours.
This course is used to award graduate credit for prior learning and educational experience obtained outside of the traditional classroom. Through the preparation of a professional project, students provide formal documentation of the specific graduate-level learning competencies which they have acquired through prior experience. A maximum of six (6) credit hours may be earned.

BA 792. Graduate Internship I. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 793. Graduate Internship II. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization’s supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 792.

BA 794. Graduate Internship III. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization’s supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.

BA 796. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 798. Thesis. 6 Hours.
The thesis may be library-oriented research with extensive reliance on documents and a relatively limited amount of primary field research, or it may be action-oriented field research with relevant documentation from the literature. The title of the thesis topic must be filed with the graduate committee. A student, with the approval of his/her advisory committee, may register for the thesis after completion of twenty-four (24) semester hours.

BA 799. Topic/. 3 Hours.
Students work together in a seminar setting under the direction of a member of the graduate faculty. The content of the seminar will vary according to the interests of students and faculty involved.

B.S. Business Administration - Entrepreneurship & Small Business Management/M.B.A.

Students in the Entrepreneurship and Small Business Management concentration study the essential concepts of starting and operating small businesses through a series of eight classes. Topics covered include: environment and management of small business enterprise, problems in starting small businesses, financial and administrative control, and management of business operations.

Students will also learn the practical application of classic and contemporary business theory as it applies to the early stages of entrepreneurship and intrapreneurship, opportunity recognition, innovation, and new venture development. Topics include: types of entrepreneurs, opportunity recognition, marketing, cash and other resource requirements, financial statements, planning, franchising, intellectual property, success/failure/resilience, and growth.

In addition to the program objectives of the B.S. Business Administration degree, this concentration requires students to demonstrate subject matter knowledge and competence as applied to a smaller company or family business.

Students must also achieve the program objectives of the MBA degree.

Graduate Business Elective 12

Total Hours 54
Courses

BA 101. Introduction to Business. 3 Hours.
This course introduces students to the general nature of functional areas in business such as marketing, management, accounting, finance, research and development, and risk management. The relationship between business, the government, the economy, and the environment is examined.

BA 111. Economic Geography. 3 Hours.
This course is an introduction to the principles of economic geography, ranging from physical and biological geography to cultural and political factors. The decision making processes, both local and global, for different types of service oriented, manufacturing, transportation, and resource based businesses will be examined. The relationship of natural resources, population, and culture, and how such factors affect economic activity will be emphasized.

BA 201. Business Law I. 3 Hours.
This course provides students with a basic knowledge of the law of contracts, personal property and real property.

BA 202. Business Law II. 3 Hours.
This course is intended to augment BA 201 with in depth analysis of the law in Contracts, UCC, Corporations, Principal Agency Law, Advanced Tort Law, Environmental Law, Real Property Law, Securities Law and Employment Law.

BA 204. Franchise Formation and Management. 3 Hours.
This class will discuss franchise formation and management with particular emphasis on the discovery and evaluation of the franchisor and the feasibility of entrepreneurs converting an existing business into a franchise chain or creating and selling new franchises, domestic and international. Franchise accounting and finance (borrowing or leveraging) will be covered, as well as, taking the franchise to the stock market or going public (IPO) and raising investment capital. Prerequisite(s): BA 401.

BA 205. Real Estate Law. 3 Hours.
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

BA 210. Economics Overview for Non-Business Majors. 3 Hours.
This is an overview of microeconomic and macroeconomic concepts for non-business majors. It will include an introduction to American capitalism including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of competitive firms. It will also be an introduction to national income accounts, unemployment, inflation, government fiscal policy and monetary policy.

BA 211. Microeconomics. 3 Hours.
This is an introduction to American capitalism and microeconomic concepts including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of purely and impurely competitive firms.

BA 212. Macroeconomics. 3 Hours.
This is an introduction to macroeconomics in the American economy; national income accounts, unemployment, inflation, government fiscal policy, monetary policy and economic growth.

BA 220. Real Estate Principles and Practices. 3 Hours.
This course will provide students with methods of analyzing acquisition and retention of Real Estate. Also, there will be a focus on the skills and techniques required to operate a real estate business, including trust accounts, risk management, and property management.

BA 243. The Business of Innovation. 3 Hours.
This is a cross-disciplinary class that will introduce students to the Lean Startup Scientific Method for developing and commercializing ideas for new ventures or else innovating and developing new products or business models within existing companies. Topics include marketplace innovations, technology and science based innovations, marketplace hypothesis development and testing, frugal and agile engineering, business models, intellectual property, prototyping, exit strategies, and fundraising. Lab component is integrated within module deliverables.

BA 271. Risk Management. 3 Hours.
A study is made of the risks encountered by individuals and business firms. A presentation is made of the basic principles and institutions, which have been developed in risk management. This material is treated primarily from the consumer point of view.

BA 299. Topic/. 1 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 300. Business Presentations. 3 Hours.
Communication is a vital function of any business. Managers at all levels must be able to communicate effectively to advance their career and ensure the success of their organization. This course will give students a working knowledge of how to create, brief, and present information across the organizational communications spectrum. Students will learn how to think critically and apply problem solving skills across a variety of historical and contemporary business topics. Students will learn how to collect, analyze, synthesize, and present information in a professional manner to assorted audiences in different venues. The foundational skill set developed in this course is the ability for students to articulate their ideas in a professional manner within a variety of business settings. Prerequisite(s): EH 124.

BA 302. Business Ethics. 3 Hours.
This course is designed to raise a moral consciousness and sensitivity within the various disciplines of the business curriculum. The disciplines focused on here are business, accounting, marketing, multinational corporations, and those areas of human resource management inclusive of diversity in the workplace within the context of environmental and social responsibility.

BA 306. Franchise Law. 3 Hours.
This is a law class that analyzes all the issues of Franchise Law with a particular emphasis on Contracts, Principal/Agent Franchise Relations, Corporate Formation of Franchises, and Securities Law. Prerequisite(s): BA 201 and BA 202.

BA 310. Organization and Management. 3 Hours.
This course focuses on how to design organization systems and effectively manage them. Students completing the course should understand the universal process of management and key terminology in the language of management. Students are encouraged conceptually to blend contributions from the various schools of management thought into an integrated perspective of what managers do and why.
BA 311. Human Resource Management. 3 Hours.

This course addresses traditional personnel administration issues. Emphasis in the course is on how to manage the major human resource administration functions of job design, reward system design, staffing, training and performance control, to achieve maximum employee performance and satisfaction. Prerequisite(s): BA 310 or (Major=BS Criminal Justice or Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Paralegal or Major=BS English - Prelaw).

BA 312. Non-Profit Management and Leadership. 3 Hours.

This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics include leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 321. Marketing Principles. 3 Hours.

The course covers the language and issues of marketing with an emphasis on developing responsive marketing strategies that meet customer needs. The course focuses on marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing. Other topics will be incorporated into the course including the external environment (focus on integrative topics within marketing, such as economics, politics, government, and nature), marketing research, international/global marketing with relevance to cultural diversity, ethics, the impact of technology on marketing, and careers in marketing.

BA 334. International Economics. 3 Hours.

This applied economics course will emphasize the use of cases to study topics such as comparative advantage, treaties, tariffs, non-tariff trade barriers, and trade blocks among developed and developing nations. Prerequisite(s): BA 211 and BA 212.

BA 344. Personal Financial Planning. 3 Hours.

This course provides comprehensive coverage of personal financial planning in the areas of money management, axes, consumer credit, housing and other consumer decisions, legal protection, insurance, retirement planning, and estate planning. Prerequisite(s): MS 141 or MS 111 or MS 242 or MS 180 or MS 181.

BA 351. Internship. 3 Hours.

In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 352. Internship II. 3 Hours.

In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 353. Internship III. 3 Hours.

In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 354. Internship IV. 3 Hours.

In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 355. Internship V. 3 Hours.

In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 362. Financial Management I. 3 Hours.

The foundation finance course covers basic personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management. Students are expected to become proficient in financial analysis of a corporation and in various aspects of corporate financial management. Prerequisite(s): AC 121 and (AC 122 or AC 211) and BA 211 and (MS 141 or MS 111 or MS 242 or MS 180 or MS 181).

BA 364. Financial Management II. 3 Hours.

The course is a continuation of Financial Management I and will cover such topics as real options, sensitivity, scenario and break-even analysis, basic issues regarding stocks and bonds, risk/return and cost of capital, capital structure and limits to the use of debt. Prerequisite(s): BA 362.

BA 375. Supply Chain Management. 3 Hours.

This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategies to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.

BA 401. Managerial Economics. 3 Hours.

This course is designed to close the gap between economic theory and business application. It reviews traditional analysis and shows its application to the understanding and solution of economic problems of the firm and industry. Prerequisite(s): BA 211 and BA 212.
BA 411. Organizational Behavior. 3 Hours.
This course is highly experiential in its approach to helping students understand and appreciate why people behave the way they do in an organizational context. Students learn how to manage employee behavior by analysis of real world phenomena and by application of principles in the areas of human perception and communication, leadership and motivation, small group dynamics, organizational culture, and organizational change. Prerequisite(s): BA 310.

BA 413. Operations Management. 3 Hours.
Quantitative model building and manipulation are a means of analyzing and synthesizing the elements of productions management. Both deterministic and stochastic modeling are emphasized in the areas of work systems design, queuing, PERT, SQC, inventory control, forecasting, and linear and nonlinear programming. Prerequisite(s): BA 310 and MS 132.

BA 414. Business Strategy. 3 Hours.
This Business Administration senior seminar focuses on decision making at the executive management level, the formulation of strategy, and its implementation in the organization. The course will employ case studies, laboratory simulation techniques, and computer spreadsheet analysis. Prerequisite(s): College Level=Senior.

BA 421. Integrated Marketing Communication and Advertising. 3 Hours.
An introduction into the world of advertising: Students will plan and design Ad campaigns, write copy and design layouts for the different types/forms of advertising. The students will work with local companies and assist them in redesign of their ad campaigns. Prerequisite(s): BA 321.

BA 422. Sales and Sales Management. 3 Hours.
This course provides students with the fundamentals of good salesmanship and sales management. Prior to studying management principles students practice sales techniques in simulations. Cases are used to illustrate and evaluate principles of sales management. Prerequisite(s): BA 321.

BA 423. Retail Management. 3 Hours.
The purpose of this course is to provide students with an understanding of the fundamentals of successful retail operations. Topics included are the market concept in retailing, factors of area and market analysis, and aspects of organizational structure, layout, and personnel planning. Also covered are methods of pricing, merchandising planning, inventory, expense control and sales promotion techniques. Prerequisite(s): BA 321.

BA 424. Marketing Research. 3 Hours.
The basic research concepts and practices as applied to the analysis of marketing problems are examined. Topics include sources of data, collecting data, sampling, questionnaire construction, tabulating data, and report preparation; computerized statistical software is used. Prerequisite(s): BA 321 and MS 132.

BA 425. Marketing Management. 3 Hours.
This is the capstone course for marketing majors. Students apply concepts learned in other courses to marketing problems of business and nonprofit organizations. Cases and business simulations are used to teach decision-making in the complex environment of business. A complete marketing plan for a simulated company of the student’s choice summarizes the student’s knowledge of the field. Prerequisite(s): BA 321.

BA 426. Real Estate Market, Research and Analysis. 3 Hours.
This course will discuss market research, real estate sales, property valuations and analysis. Students will examine market research reports to gain insight into product and market trends, opportunities, projections, and growth in the Maine, the US and global real estate markets. Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 427. Franchise Market Research and Analysis. 3 Hours.
This class will focus on analysis of market demographics, feasibility studies, product pricing, promotion and distribution, franchise broker contacts, extrapolation of sales and expenses, and the projection of costs and net profits, emerging markets and capital expansion. Prerequisite(s): BA 401 and MS 132 and MS 232 and BA 362.

BA 428. Strategic Selling. 3 Hours.
This course builds on the fundamentals of selling. The student will understand how to advance sales in light of complex business environments consisting of layers of buyers, decision makers and those who influence purchasing decisions. A strategic account planning process will be analyzed and applied to real companies by way of case studies. The art and skill of negotiating will be studied and learned through role play. Prerequisite(s): BA 422.

BA 434. International Finance. 3 Hours.
The factors affecting exchange rates are discussed, as well as different types of exchange rate systems and how governments attempt to influence exchange rates. The relationships among interest rate parity, purchasing power parity, the Fisher effect and International Fisher effect and exchange rates are analyzed. Students learn how currency futures, currency options and money market hedges are used to hedge exchange rate risk. Prerequisite(s): BA 321.

BA 437. International Marketing. 3 Hours.
The basics of international marketing will be taught including the foundations of culture, cultural understanding, business customs and practices in global marketing, assessing global markets, and developing international marketing strategy. Prerequisite(s): BA 321.

BA 438. Export-Import Procedures. 3 Hours.
The basics of export-import procedures will be taught including justification for exporting/importing, market planning methods, selection of appropriate marketing mix variables, and regulation. Prerequisite(s): BA 321.

BA 439. International Franchising Management. 3 Hours.
This course will focus on international expansion of franchises, learning the culture, monetary exchanges, imports and exports, local international market analysis and much more. Prerequisite(s): BA 204 and BA 306 and BA 427.

BA 440. Small Business Management I. 3 Hours.
This course supplies prospective and current small business managers with the essential concepts of starting and operating small businesses. Topics covered include: environment and management of small business enterprise, problems in starting small businesses, financial and administrative control, and management of business operations. Particular emphasis is placed on the interrelated nature of the components, particularly as they affect the financial picture of the firm. Through a lecture and discussion format, students are expected to share their own experiences in small businesses with their fellow students. Prerequisite(s): College Level=Senior or College Level=Junior.
BA 441. Entrepreneurship I- New Venture Development. 3 Hours.  
Students will be introduced to the practical application of classic and contemporary business theory as it applies to the early stages of entrepreneurship and intrapreneurship, opportunity recognition, innovation, and new venture development. Course topics include types of entrepreneurs, opportunity recognition, marketing, cash and other resource requirements, financial statements, planning, franchising, intellectual property, success/failure/resilience, and growth. Class will use text, cases, articles, internet sources, and guest lecturers. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 442. Applied Small Business Management. 3 Hours.  
This is an advanced course which focuses on real problems in Small Business Management, using the case approach. Cases are drawn from the text, from actual local small businesses, and from the practical experience of students in the class. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 444. Entrepreneurship II: Business Plans. 3 Hours.  
This class builds on BA 441, New Venture Development. The focus of this class is on the early stages of formalizing and growing a venture. Topics include business plan writing, fund raising and cash flow, measuring and conveying financial position, core strategy development and competitive advantage, sustainability, international entrepreneurship, supply chain, growth, and exit. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 460. Investments. 3 Hours.  
Beginning with an introduction to financial markets and investment instruments, topics include stock and bond quotations and trading procedures, rate of return, margin trading, stock indexes, stock and bond valuation, risk and return, portfolio theory, active and passive portfolio management, and investment performance evaluation. Prerequisite(s): BA 362.

BA 464. Bank & Financial Services Management. 3 Hours.  
This course will introduce students to the specific issues in the financial management of a banking firm and, to a smaller degree, of other financial intermediaries. Emphasis will be on products, roles, regulatory framework, and risk management. Prerequisite(s): BA 362.

BA 465. Biotechnology: The Business of Genetics. 3 Hours.  
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 471. Life and Health Insurance. 3 Hours.  
This course is intended to provide background knowledge for personal application and for those responsible for administering benefit plans for employees; it provides the necessary information required to pass the State of Maine license examination. Prerequisite(s): BA 271.

BA 472. Casualty and Property Insurance. 3 Hours.  
The first part of the course introduces the basics of the entire insurance business, including a summary of legal aspects, types of insurers and principles of reinsurance; next, each type of insurance is studied in detail. Topics covered are fire, consequential loss, inland marine, ocean marine, theft and surety, liability and miscellaneous property insurance. Prerequisite(s): BA 271.

BA 473. Real Estate Appraisal. 3 Hours.  
This course familiarizes the student with the foundation and principles of the appraisal process. The student will become familiar with the three approaches to value. Site valuation, construction costs, depreciation; comparables selection and adjustments; rental multipliers; and reconciliation will be discussed. The student will focus on the elements making up the standards for professional appraisal practice. These elements, i.e., Definitions, Rules, Standards and Standard Rules, Statements and advisory opinions are discussed in detail along with the philosophy and history of USPAP. Prerequisite(s): BA 401 and MS 132 and BA 362.

BA 475. E-Business and E-Commerce for Managers. 3 Hours.  
This course teaches the basic e-business and e-commerce theory. The students will apply the theory through the development of a website for the prime purpose of marketing a product or service or idea online.

BA 490. International Business. 3 Hours.  
This course covers the international dimensions of managerial decision-making including: world economies, international trade theories, tariffs, quotas and other trade issues, global strategic planning, cross-cultural management, international market entry, international human resource management, international organization strategy, international logistics, import/export operations, currency exchange, international financial management. Current developments in global economic and business are emphasized; students participate in a computerized simulation throughout the semester. Prerequisite(s): BA 310 and BA 321.

BA 495. Senior Management Project. 3 Hours.  
An experiential course that gives seniors the opportunity to apply what they have learned in class to a real business situation. Prerequisite(s): College Level=Senior.

BA 496. Leadership Maine. 3 Hours.  
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 497. Business and Culture Travel Study Course. 3 Hours.  
Business and Culture Travel Study course is designed to expose students to economies across the world. During the course students will travel to important commercial, cultural and governmental cities. Through a combination of readings students will be exposed to 20th and 21st century history, economics, culture political and business philosophy. The course will also involve visits to major multinational corporations, cultural activities and lectures from University business faculty when available. The course will also have two pre-trip class sessions with readings and one post course session to wrap up the experience and discuss the student travel logs.

BA 498. Business Seminar. 3 Hours.  
This honors course requires the study of various business problems under the supervision of members of the Department of Business Administration. A paper is required. An oral examination is scheduled as the final examination in the course. Prerequisite(s): College Level=Senior.

BA 499. Topic/. 1-3 Hour.  
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.
BA 600. Research Methods in Business and Education. 3 Hours.
This course is designed for beginning graduate students who have little or no formal preparation in those areas of research and problem-solving essential for a comprehensive study of business and education at the graduate level. Emphasis is placed on the identification of common problem types and the selection and use of appropriate methods of analysis (primarily statistical in nature).

BA 601. Managerial Economics. 3 Hours.
This course begins with a comprehensive overview of micro- and macroeconomic concepts with the aim of developing within students a picture of how business and nonprofit organizations relate to the economy as a whole. The course then focuses on practical applications of economic analysis to problems of concern to managers. Case studies and projects are used to demonstrate the methods used to determine economic feasibility and cost-effectiveness of products, services, and programs.

BA 602. Managerial Accounting. 3 Hours.
This is an accelerated accounting course for those with little or no formal accounting background. The emphasis is on concepts which managers need to know in order to be effective. Topics include the preparation and interpretation of financial statements, cost planning and control, cost-volume-profit analysis, decision-making models, master budgeting and variances, and evaluation of capital projects.

BA 605. Management Communications. 3 Hours.
This is an advanced communications course that builds upon a student’s experience and prior undergraduate coursework in writing and oral communications. Topics include: advanced business writing, use of visual materials, selection of secondary sources of information, report preparation, and presentations to small and large groups.

BA 611. Organizational Behavior. 3 Hours.
This course surveys the major field of management, examining structures and processes on both group and organizational levels. Both traditional and contemporary theories are analyzed and applied to business operations.

BA 620. Financial Management. 3 Hours.
Topics considered include financial planning, operating and capital budgets, cash flow, purchasing and accounting procedures, the sources and uses of corporate and institutional funds, and financial analysis for evaluation and control. Students develop projects specifically related to their needs in educational administration, small business, or corporate management. Prerequisite(s): BA 602 or AC 301.

BA 621. Marketing Management. 3 Hours.
This course focuses on complex problems facing decision-makers in the marketing of goods and services. Emphasis is placed on the decision-making process, including assessment of the social, economic, and political environment in which the organization operates; problem definition; development and evaluation of alternatives, and the implementation of the best alternative. Cases in advertising, sales, marketing research, and strategic marketing management provide practice in marketing analysis and decision-making.

BA 622. Production Management. 3 Hours.
Emphasis is placed on the use of quantitative techniques for solving manufacturing problems. The student is given an opportunity to practice mathematical model-building and manipulation. Other topics considered include queuing system design, plant layout, statistical quality control, inventory modeling, Program Evaluation and Review Technique (PERT), linear and nonlinear programming, and control theory.

BA 625. Global Strategic Management. 3 Hours.
This course focuses on the strategic challenges and opportunities confronting firms that undertake to create value and to compete in the global economy. Successful companies develop strategies for doing business in emerging markets that are different from those they use at home and often find novel ways of implementing them too. The class will make extensive use of case analysis and discussion to evaluate and understand the strategic issues that confront firms operating internationally, as well as to appreciate the importance of values and ethics in organization decisions and actions. In this course we will probe the workings of business strategies in transition and emerging economies, gain an understanding of the strategies of local firms, and analyze the international success and failure of companies. Prerequisite(s): BA 600 and 15 Credits From Range [BA 600 To BA 799].

BA 626. Accounting in Planning, Budgeting and Control. 3 Hours.
This course examines the role of accounting in the planning, budgeting, and control process of a business in a dynamic environment. The integration of measuring and analyzing (planning), short-term decisions and managing organizations (control), and preparing various budgets (budgeting) are emphasized. This course is designed as a continuation of BA602 Managerial Accounting. Numerical problems, as well as case studies, are utilized as methods of study. Prerequisite(s): BA 602 or AC 211.

BA 627. Investment Analysis. 3 Hours.
This course provides a detailed description of securities market organization and approaches to investment opportunities. Students will examine theories used in the valuation of financial securities and employ projects and applications to develop a real world understanding of portfolio management. Prerequisite(s): BA 602.

BA 628. New Venture Planning and Management. 3 Hours.
This course deals with the foundation of new ventures and related aspects of managing the small growing enterprise. Techniques taught in this course are equally applicable to small businesses, nonprofit organizations, and new ventures of larger organizations. Topics include: use of scarce resources, such as money, talent and technological expertise; identification of environmental threats and opportunities; and operational considerations such as organizational structure, legal requirements, financing, and accounting procedures.

BA 641. Human Resource Management. 3 Hours.
This course explores human resource management as an integrated process of planning and control designed to achieve high employee productivity and job satisfaction. The course focuses on the essential functions of human resource management as they apply both to the general supervisory responsibilities of every manager and to the specific operations of the personnel department.

BA 642. Leadership in Business and Professions. 3 Hours.
This course is designed to provide graduate management students with a comprehensive review of the essentials for effective leadership. It focuses on the identification of basic leadership styles, explores the theoretical and practical findings of research in leadership development, and seeks to synthesize the student’s leadership style with the most effective working models of leadership.
BA 643. Strategic Change Management. 3 Hours.
Strategic Change Management focuses on the skills required to deal effectively with organizational change. The course addresses first the pressures in the business environment that make change a fundamental reality for managers. Particular attention is paid to change arising from public policy initiatives that impinge on business. The course then examines the manager as change agent responsible for initiating innovation and explores both the personal skills required in the role of change agent and the tools and techniques available to support the manager in that role. The course also examines the problems and opportunities of those who are the recipients of change in an organization and the skills required to cope effectively with that situation.

BA 644. The Legal Environment of Business. 3 Hours.
This course will provide an overview of the important aspects of business law for executives, managers, accountants, and other professionals. The areas of law covered include but are not limited to administrative, contract, corporate and other business organizations, employment relations, real estate, taxes, and UCC sales.

BA 646. Current Issues in Business. 3 Hours.
This course, conducted in seminar fashion, draws on current literature to analyze contemporary and emerging issues facing management in the late twentieth century. Content will vary.

BA 700. Health Care Management. 3 Hours.
This course examines management problems and policy-making in the health care industry. Several areas are considered including: (1) the functions of the health care manager, (2) the types of health care delivery systems, (3) the administration of hospitals, (4) the financing of medical care, and (5) the role of government. Through readings, lectures, discussions, and projects, students clarify their own role in the delivery of health services. The course regularly draws on experts in health planning and health care administration.

BA 701. Legal Environment of Health Care Management. 3 Hours.
The course provides a foundation in the legal and regulatory framework in which health care institutions operate. Students will also examine the legal issues confronting health care managers including director and administrative liability, malpractice, negligence, patient rights and confidentiality, licensure requirements, and the like.

BA 702. Health Care Economics. 3 Hours.
In this course, the principles and tools of economic decision-making are applied to management in the health care sector. The course explores the application to health care management functions of such concepts and processes as supply and demand, resource allocation and utilization, costing and pricing, resource productivity, forecasting and economic aspects of planning, and utilization review. While the principal emphasis in the course is on micro-economic analysis, some consideration is also given to an economic analysis of public policy alternatives for the delivery of health care service. Prerequisite(s): BA 601.

BA 703. Financial Management in Healthcare Organizations. 3 Hours.
This course applies the perspectives and tools of financial analysis to the management of health care organizations and evaluation of organizational performance. Topics covered include capital budgeting, sources of operating revenue, management of cash and inventories, risk analysis and forecasting. Particular attention is paid to cost containment regulatory strategies and their implications for financial planning and management. Prerequisite(s): BA 602.

BA 704. Managing Quality in Healthcare. 3 Hours.
This course examines methods and tools for managing quality in health facilities, physician practices, managed care, and public health. Topics include developments in quality assurance and improvement, utilization review, risk management, and patient satisfaction.

BA 705. Global Perspectives in Healthcare. 3 Hours.
This course examines the social, political, and economic aspects of global healthcare issues. Through a comparative analysis of the health systems of multiple nations, students will compare theories of health policy and priorities, healthcare system facilities, workforce, technology, cost, quality, and access. The emphasis of the course will be on health management strategies used in different countries and healthcare systems to mobilize, allocate, and maintain resources to improve the healthcare status and delivery systems.

BA 710. Law & Ethics for Non-Profit Organizations. 3 Hours.
Non-profit managers and supervisors are held to a higher standard of ethical behavior due to the nature of their funding sources and their mission. This course is designed to develop in the student a basic understanding of the laws governing non-profit organizations, the practical applications of these laws and the ethics that are demanded of non-profit managers.

BA 711. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics covered include: leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 712. Strategic Marketing for Nonprofit Organizations. 3 Hours.
This course applies the concepts of marketing and strategy to the management of non-profit organizations. Through class lectures, discussion, case studies, and applied projects, students will build an understanding of the marketing process in the non-profit environment in order to be able to design, implement, and evaluate an organization’s approach to marketing and strategic positioning.

BA 713. Fundraising. 3 Hours.
This course takes a systems approach to the process of fund-raising. Topics covered include: donor cultivation, use of the annual fund, major gifts, corporate giving, and grant writing.

BA 720. Advanced Sales and Marketing in Hospitality. 3 Hours.
This course focuses on difficult problems and issues facing sales and marketing personnel in the hospitality industry. Students will make use of case studies in order to develop their decision-making process including the use of marketing research and analysis.

BA 721. Convention Planning and Events Planning. 3 Hours.
This course focuses on the rapidly growing convention sales and events planning industries. The student will learn how to design, plan, market and manage meetings and events.

BA 722. Advanced Front Office Operations. 3 Hours.
This course begins with a detailed introduction about numerous aspects of front office operations and management. The next section of the course examines the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.
BA 723. Legal Issues in Hospitality Management. 3 Hours.
This course will provide the student an overview of the important aspects of Hospitality Law for Managers, and other professionals. Some of the areas of study include and are not limited to Torts, Products Liability, Constitutional Law and Criminal Law and many other subjects.

BA 724. Managing Service. 3 Hours.
This course begins with an introduction to the framework for providing quality service to customers and guests. Next we will discuss the needs of the customer/guest and proceed to develop our menu and/or product accordingly. Finally, we will learn how management and staff create loyal customers and guests by delivering service that exceeds their expectations.

BA 729. Hospitality Graduate Directed Practicum. 3 Hours.
Each student will find, will choose or will be provided with an internship site. The site chosen will be based on; and interview conducted by the management of the internship site and the student's preference of location based on those available. The Coordinator of Hospitality Management will have the final decision on all internship site placements. The Coordinator's decision will be based on his or her interaction with the student during previous course work, his or her understanding of the student and the internship properties requirements. Every consideration will be given to the student's personal preferences with regard to location and types of property. However, the student's preferences will not be the only consideration for placement. Prerequisite(s): BA 720 and BA 722 and BA 724.

BA 731. Business and Information Technology. 3 Hours.
This graduate course approaches Information Technology from the perspective of information consumers as opposed to technology implementers. During this course, students will examine various technologies and their application within modern organizations. The course has two primary goals. (1) The course will explain information technologies in non-technical terms so that students can evaluate a technology’s effectiveness relative to any existing alternatives and the overall organizational needs. (2) This course should increase student awareness regarding how they interact with technology in a personal or business setting. Business leaders are constantly bombarded with technology. This course addresses the need to sift through that information in an intelligent manner and make smart business decisions.

BA 741. Staffing & Selection. 3 Hours.
A source of competitive advantage for any organization is its talent. The effectiveness of an organization depends on the performance of each individual in that organization. Hence, one of the most important human resource functions is that of staffing the organization. This course is essential for HR professionals who are responsible for recruiting, screening, hiring, promoting, and outplacing employees. It is also very crucial for any line managers, supervisors, team leaders, and hiring managers who are involved in recruiting, making promotions, succession, or any other workforce decisions. An examination of the scientific, legal, and administrative issues associated with the recruitment, selection, employment and retention of individuals by organizations augments the study. Specific attention will be given to the current challenges of an increasingly dynamic workplace and diverse workforce.

BA 742. Training & Development. 3 Hours.
The effective training and development of human resources creates tremendous and unique value for an organization. This course examines how organizations can develop and manage the talents and skillset of human capital. The course explores topics such as training needs analysis, formulating training objectives, and the design, implementation, and evaluation of training and development programs.

BA 745. Innovative Global Strategy. 3 Hours.
This course will build students' awareness of the challenges that must be addressed and the opportunities that may be present when competing in the global marketplace. The course focuses on how firms apply innovative strategies to create a sustainable competitive advantage in the global arena. Course content will be drawn from readings, case analysis, online content and discussions. The course requires students to analyze and understand real world examples of both successful and unsuccessful global strategy implementation.

BA 750. Fundamentals of Risk Management. 3 Hours.
This course explores the fundamentals of risk management. After discussion of the importance of risk and the rationale for its management in organizations, the remainder of the course will analyze the process of and methods for managing risk.

BA 751. Employee Benefits. 3 Hours.
This course explores the nature and operation of employer-sponsored benefit plans. Emphasis is placed on plan design, administration, funding, and regulation. The course also addresses organizational characteristics, benefit structure, and pricing of risk transfer schemes for groups.

BA 752. Crisis Management. 3 Hours.
Crisis Management can be defined as a communications response to an event that has a negative impact on an audience - the public, customers/clients, employees, shareholders, etc. Examples of such events could include tainted food, a corporate leak, a political scandal, an entertainment or athletic scandal, damaged products that cause or could potentially cause life-threatening situations, natural disasters, terrorism, and financial disasters. In this course, students will analyze and critique high-profile cases and learn how to effectively respond to crises.

BA 753. Corporate Risk Management. 3 Hours.
Corporate risk is analyzed through the lens of enterprise risk management. This course explores the operational and financial risks faced by firms and the study of various methods of handling these risks.

BA 754. Strategic Selling. 3 Hours.
The focus of this course is on key, strategic customer selling approaches. The process of sales planning and strategy development for these types of customers will be emphasized. The objective of this course is to understand and execute sales strategies for managing major and large customers.

BA 760. Technology & Innovation. 3 Hours.
BA 760 Technology & Innovation offers a research approach to identifying, analyzing, and creating technological advantage in nascent and mature industries. Students will apply the methodologies of innovation and discovery to business settings and markets, seeking to create competitive advantage and achieve market transformation through strategic initiatives that redefine consumer expectations and industry practices and reframe organizations to embrace innovative practices and processes.

BA 761. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.
BA 762. Groupthink. 3 Hours.
This course explores the origin of groupthink. Groupthink is a term first used by social psychologist Irving L. Janis (1972) that refers to a psychological phenomenon in which people strive for consensus within a group. This course explores groupthink as a phenomenon where people set aside their own personal beliefs or adopt the opinion of the rest of the group.

BA 763. Biotechnology & Innovation: Intellectual Property. 3 Hours.
This course focuses on the protection of proprietary and intellectual rights in inventions, writings, creative works, software, industry trade secrets, industry trade designations, and other intellectual assets at the international, Federal, and State Levels. The course will give special consideration to the emergence of new areas of patent law in Biotechnology and Pharmaceutical fields, examining not only the patentability of intellectual assets, but also the discovery process, particularly in collaborative environments involving multiple organizations and institutions, and the qualifying distinctions between collaborative and competitive research.

BA 790. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.*

BA 791. Professional Project. 3-6 Hours.
This course is used to award graduate credit for prior learning and educational experience obtained outside of the traditional classroom. Through the preparation of a professional project, students provide formal documentation of the specific graduate-level learning competencies which they have acquired through prior experience. A maximum of six (6) credit hours may be earned.

BA 792. Graduate Internship I. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 793. Graduate Internship II. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization’s supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 792.

BA 794. Graduate Internship III. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.

BA 796. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 798. Thesis. 6 Hours.
The thesis may be library-oriented research with extensive reliance on documents and a relatively limited amount of primary field research, or it may be action-oriented field research with relevant documentation from the literature. The title of the thesis topic must be filed with the graduate committee. A student, with the approval of his/her advisory committee, may register for the thesis after completion of twenty-four (24) semester hours.

BA 799. Topic/. 3 Hours.
Students work together in a seminar setting under the direction of a member of the graduate faculty. The content of the seminar will vary according to the interests of students and faculty involved.

B.S. Business Administration - Financial Management/M.B.A.
Students in the Financial Management concentration study personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management in the first part of the program followed by real options, sensitivity, scenario and break-even analysis, basic issues regarding stocks and bonds, risk/return and cost of capital, capital structure and limits to the use of debt. Students take 7 required courses focusing on national and international perspectives of financial management, investments, risk management and personal financial planning.

In addition to the program objectives of the B.S. Business Administration degree, this concentration requires students to:

- Demonstrate knowledge of present value principles and capital budgeting decisions
- Utilize information and skill to make financing and capital structure decisions relating to long-term investments
- Apply international finance decision making and calculate hedge exchange rate risks

Students must also achieve the program objectives of the MBA degree.

Courses

BA 101. Introduction to Business. 3 Hours.
This course introduces students to the general nature of functional areas in business such as marketing, management, accounting, finance, research and development, and risk management. The relationship between business, the government, the economy, and the environment is examined.

BA 111. Economic Geography. 3 Hours.
This course is an introduction to the principles of economic geography, ranging from physical and biological geography to cultural and political factors. The decision making processes, both local and global, for different types of service oriented, manufacturing, transportation, and resource based businesses will be examined. The relationship of natural resources, population, and culture, and how such factors affect economic activity will be emphasized.

BA 201. Business Law I. 3 Hours.
This course provides students with a basic knowledge of the law of contracts, personal property and real property.

BA 202. Business Law II. 3 Hours.
This course is intended to augment BA 201 with in depth analysis of the law in Contracts, UCC, Corporations, Principal Agency Law, Advanced Tort Law, Environmental Law, Real Property Law, Securities Law and Employment Law.

BA 204. Franchise Formation and Management. 3 Hours.
This class will discuss franchise formation and management with particular emphasis on the discovery and evaluation of the franchisor and the feasibility of entrepreneurs converting an existing business into a franchise chain or creating and selling new franchises, domestic and international. Franchise accounting and finance (borrowing or leveraging) will be covered, as well as, taking the franchise to the stock market or going public (IPO) and raising investment capital. Prerequisite(s): BA 401.

BA 205. Real Estate Law. 3 Hours.
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

BA 210. Economics Overview for Non-Business Majors. 3 Hours.
This is an overview of microeconomic and macroeconomic concepts for non-business majors. It will include an introduction to American capitalism including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of competitive firms. It will also be an introduction to national income accounts, unemployment, inflation, government fiscal policy and monetary policy.

BA 211. Microeconomics. 3 Hours.
This is an introduction to American capitalism and microeconomic concepts including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of purely and impurely competitive firms.

BA 212. Macroeconomics. 3 Hours.
This is an introduction to macroeconomics in the American economy: national income accounts, unemployment, inflation, government fiscal policy, monetary policy and economic growth.

BA 220. Real Estate Principles and Practices. 3 Hours.
This course will provide students with methods of analyzing acquisition and retention of Real Estate. Also, there will be a focus on the skills and techniques required to operate a real estate business, including trust accounts, risk management, and property management.

BA 243. The Business of Innovation. 3 Hours.
This is a cross-disciplinary class that will introduce students to the Lean Startup Scientific Method for developing and commercializing ideas for new ventures or else innovating and developing new products or business models within existing companies. Topics include marketplace innovations, technology and science based innovations, marketplace hypothesis development and testing, frugal and agile engineering, business models, intellectual property, prototyping, exit strategies, and fundraising. Lab component is integrated within module deliverables.

BA 299. Topic/. 1 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 300. Business Presentations. 3 Hours.
Communication is a vital function of any business. Managers at all levels must be able to communicate effectively to advance their career and ensure the success of their organization. This course will give students a working knowledge of how to create, brief, and present information across the organizational communications spectrum. Students will learn how to think critically and apply problem solving skills across a variety of historical and contemporary business topics. Students will learn how to collect, analyze, synthesize, and present information in a professional manner to assorted audiences in different venues. The foundational skill set developed in this course is the ability for students to articulate their ideas in a professional manner within a variety of business settings. Prerequisite(s): EH 124.
BA 302. Business Ethics. 3 Hours.
This course is designed to raise a moral consciousness and sensitivity within the various disciplines of the business curriculum. The disciplines focused on here are business, accounting, marketing, multinational corporations, and those areas of human resource management inclusive of diversity in the workplace within the context of environmental and social responsibility.

BA 306. Franchise Law. 3 Hours.
This is a law class that analyzes all the issues of Franchise Law with a particular emphasis on Contracts, Principal/Agent Franchise Relations, Corporate Formation of Franchises, and Securities Law. Prerequisite(s): BA 201 and BA 202.

BA 310. Organization and Management. 3 Hours.
This course focuses on how to design organization systems and effectively manage them. Students completing the course should understand the universal process of management and key terminology in the language of management. Students are encouraged conceptually to blend contributions from the various schools of management thought into an integrated perspective of what managers do and why.

BA 311. Human Resource Management. 3 Hours.
This course addresses traditional personnel administration issues. Emphasis in the course is on how to manage the major human resource administration functions of job design, reward system design, staffing, training and performance control, to achieve maximum employee performance and satisfaction. Prerequisite(s): BA 310 or (Major=BS Criminal Justice or Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Paralegal or Major=BS English - Prelaw).

BA 312. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics include leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 321. Marketing Principles. 3 Hours.
The course covers the language and issues of marketing with an emphasis on developing responsive marketing strategies that meet customer needs. The course focuses on marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing. Other topics will be incorporated into the course including the external environment (focus on integrative topics within marketing, such as economics, politics, government, and nature), marketing research, international/global marketing with relevance to cultural diversity, ethics, the impact of technology on marketing, and careers in marketing.

BA 334. International Economics. 3 Hours.
This applied economics course will emphasize the use of cases to study topics such as comparative advantage, treaties, tariffs, non-tariff trade barriers, and trade blocks among developed and developing nations. Prerequisite(s): BA 211 and BA 212.

BA 344. Personal Financial Planning. 3 Hours.
This course provides comprehensive coverage of personal financial planning in the areas of money management, axes, consumer credit, housing and other consumer decisions, legal protection, insurance, retirement planning, and estate planning. Prerequisite(s): MS 141 or MS 111 or MS 242 or MS 180 or MS 181.

BA 351. Internship. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 352. Internship II. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 353. Internship III. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 354. Internship IV. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 355. Internship V. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 351 and BA 352 and BA 353 and BA 354.

BA 362. Financial Management I. 3 Hours.
The foundation finance course covers basic personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management. Students are expected to become proficient in financial analysis of a corporation and in various aspects of corporate financial management. Prerequisite(s): AC 121 and (AC 122 or AC 211) and BA 211 and (MS 141 or MS 111 or MS 242 or MS 180 or MS 181).

BA 364. Financial Management II. 3 Hours.
The course is a continuation of Financial Management I and will cover such topics as real options, sensitivity, scenario and break-even analysis, basic issues regarding stocks and bonds, risk/return and cost of capital, capital structure and limits to the use of debt. Prerequisite(s): BA 362.
BA 375. Supply Chain Management. 3 Hours.
This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategy to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.

BA 401. Managerial Economics. 3 Hours.
This course is designed to close the gap between economic theory and business application. It reviews traditional analysis and shows its application to the understanding and solution of economic problems of the firm and industry. Prerequisite(s): BA 211 and BA 212.

BA 411. Organizational Behavior. 3 Hours.
This course is highly experiential in its approach to helping students understand and appreciate why people behave the way they do in an organizational context. Students learn how to manage employee behavior by analysis of real world phenomena and by application of principles in the areas of human perception and communication, leadership and motivation, small group dynamics, organizational culture, and organizational change. Prerequisite(s): BA 310.

BA 413. Operations Management. 3 Hours.
Quantitative model building and manipulation are a means of analyzing and synthesizing the elements of productions management. Both deterministic and stochastic modeling are emphasized in the areas of work systems design, queuing, PERT, SQC, inventory control, forecasting, and linear and nonlinear programming. Prerequisite(s): BA 310 and MS 132.

BA 414. Business Strategy. 3 Hours.
This Business Administration senior seminar focuses on decision making at the executive management level, the formulation of strategy, and its implementation in the organization. The course will employ case studies, laboratory simulation techniques, and computer spreadsheet analysis. Prerequisite(s): College Level=Senior.

BA 421. Integrated Marketing Communication and Advertising. 3 Hours.
An introduction into the world of advertising: Students will plan and design Ad campaigns, write copy and design layouts for the different types/forms of advertising. The students will work with local companies and assist them in redesign of their ad campaigns. Prerequisite(s): BA 321.

BA 422. Sales and Sales Management. 3 Hours.
This course provides students with the fundamentals of good salesmanship and sales management. Prior to studying management principles students practice sales techniques in simulations. Cases are used to illustrate and evaluate principles of sales management. Prerequisite(s): BA 321.

BA 423. Retail Management. 3 Hours.
The purpose of this course is to provide students with an understanding of the fundamentals of successful retail operations. Topics included are the market concept in retailing, factors of area and market analysis, and aspects of organizational structure, layout, and personnel planning. Also covered are methods of pricing, merchandising planning, inventory, expense control and sales promotion techniques. Prerequisite(s): BA 321.

BA 424. Marketing Research. 3 Hours.
The basic research concepts and practices as applied to the analysis of marketing problems are examined. Topics include sources of data, collecting data, sampling, questionnaire construction, tabulating data, and report preparation; computerized statistical software is used. Prerequisite(s): BA 321 and MS 132.

BA 425. Marketing Management. 3 Hours.
This is the capstone course for marketing majors. Students apply concepts learned in other courses to marketing problems of business and nonprofit organizations. Cases and business simulations are used to teach decision-making in the complex environment of business. A complete marketing plan for a simulated company of the student’s choice summarizes the student's knowledge of the field. Prerequisite(s): BA 321.

BA 426. Real Estate Market, Research and Analysis. 3 Hours.
This course will discuss market research, real estate sales, property valuations and analysis. Students will examine market research reports to gain insight into product and market trends, opportunities, projections, and growth in the Maine, the US and global real estate markets. Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 427. Franchise Market Research and Analysis. 3 Hours.
This class will focus on analysis of market demographics, feasibility studies, product pricing, promotion and distribution, franchise broker contacts, extrapolation of sales and expenses, and the projection of costs and net profits, emerging markets and capital expansion. Prerequisite(s): BA 401 and MS 132 and MS 232 and BA 362.

BA 428. Strategic Selling. 3 Hours.
This course builds on the fundamentals of selling. The student will understand how to advance sales in light of complex business environments consisting of layers of buyers, decision makers and those who influence purchasing decisions. A strategic account planning process will be analyzed and applied to real companies by way of case studies. The art and skill of negotiating will be studied and learned through role play. Prerequisite(s): BA 422.

BA 434. International Finance. 3 Hours.
The factors affecting exchange rates are discussed, as well as different types of exchange rate systems and how governments attempt to influence exchange rates. The relationships among interest rate parity, purchasing power parity, the Fisher effect and International Fisher effect and exchange rates are analyzed. Students learn how currency futures, currency options and money market hedges are used to hedge exchange rate risk. Prerequisite(s): BA 362.

BA 437. International Marketing. 3 Hours.
The basics of international marketing will be taught including the foundations of culture, cultural understanding, business customs and practices in global marketing, assessing global markets, and developing international marketing strategy. Prerequisite(s): BA 321.

BA 438. Export-Import Procedures. 3 Hours.
The basics of export-import procedures will be taught including justification for exporting/importing, market planning methods, selection of appropriate marketing mix variables, and regulation. Prerequisite(s): BA 321.

BA 439. International Franchising Management. 3 Hours.
This course will focus on international expansion of franchises, learning the culture, monetary exchanges, imports and exports, local international market analysis and much more. Prerequisite(s): BA 204 and BA 306 and BA 427.
BA 440. Small Business Management I. 3 Hours.
This course supplies prospective and current small business managers with the essential concepts of starting and operating small businesses. Topics covered include: environment and management of small business enterprise, problems in starting small businesses, financial and administrative control, and management of business operations. Particular emphasis is placed on the interrelated nature of the components, particularly as they affect the financial picture of the firm. Through a lecture and discussion format, students are expected to share their own experiences in small businesses with their fellow students. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 441. Entrepreneurship I- New Venture Development. 3 Hours.
Students will be introduced to the practical application of classic and contemporary business theory as it applies to the early stages of entrepreneurship and intrapreneurship, opportunity recognition, innovation, and new venture development. Course topics include types of entrepreneurs, opportunity recognition, marketing, cash and other resource requirements, financial statements, planning, franchising, intellectual property, success/failure/resilience, and growth. Class will use text, cases, articles, internet sources, and guest lecturers. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 442. Applied Small Business Management. 3 Hours.
This is an advanced course which focuses on real problems in Small Business Management, using the case approach. Cases are drawn from the text, from actual local small businesses, and from the practical experience of students in the class. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 443. Entrepreneurship II: Business Plans. 3 Hours.
This class builds on BA 441, New Venture Development. The focus of this class is on the early stages of formalizing and growing a venture. Topics include business plan writing, fund raising and cash flow, measuring and conveying financial position, core strategy development and competitive advantage, sustainability, international entrepreneurship, supply chain, growth, and exit. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 460. Investments. 3 Hours.
Beginning with an introduction to financial markets and investment instruments, topics include stock and bond quotations and trading procedures, rate of return, margin trading, stock indexes, stock and bond valuation, risk and return, portfolio theory, active and passive portfolio management, and investment performance evaluation. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 464. Bank & Financial Services Management. 3 Hours.
This course will introduce students to the specific issues in the financial management of a banking firm, and, to a lesser degree, of other financial intermediaries. Emphasis will be on products, roles, regulatory framework, and risk management. Prerequisite(s): BA 362.

BA 465. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 471. Life and Health Insurance. 3 Hours.
This course is intended to provide background knowledge for personal application and for those responsible for administering benefit plans for employees; it provides the necessary information required to pass the State of Maine license examination. Prerequisite(s): BA 271.

BA 472. Casualty and Property Insurance. 3 Hours.
The first part of the course introduces the basics of the entire insurance business, including a summary of legal aspects, types of insurers and principles of reinsurance; next, each type of insurance is studied in detail. Topics covered are fire, consequential loss, inland marine, ocean marine, theft and surety, liability and miscellaneous property insurance. Prerequisite(s): BA 271.

BA 473. Real Estate Appraisal. 3 Hours.
This course familiarizes the student with the foundation and principles of the appraisal process. The student will become familiar with the three approaches to value. Site valuation, construction costs, depreciation; comparables selection and adjustments; rental multipliers; and reconciliation will be discussed. The student will focus on the elements making up the standards for professional appraisal practice. These elements, i.e., Definitions, Rules, Standards and Standard Rules, Statements and advisory opinions are discussed in detail along with the philosophy and history of USPAP. Prerequisite(s): BA 401 and MS 132 and BA 362.

BA 475. E-Business and E-Commerce for Managers. 3 Hours.
This course teaches the basic e-business and e-commerce theory. The students will apply the theory through the development of a website for the prime purpose of marketing a product or service or idea online.

BA 490. International Business. 3 Hours.
This course covers the international dimensions of managerial decision-making including: world economies, international trade theories, tariffs, quotas and other trade issues, global strategic planning, cross-cultural management, international market entry, international human resource management, international organization strategy, international logistics, import/export operations, currency exchange, international financial management. Current developments in global economic and business are emphasized; students participate in a computerized simulation throughout the semester. Prerequisite(s): BA 310 and BA 321.

BA 495. Senior Management Project. 3 Hours.
An experiential course that gives seniors the opportunity to apply what they have learned in class to a real business situation. Prerequisite(s): College Level=Senior.

BA 496. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.
BA 497. Business and Culture Travel Study Course. 3 Hours.
Business and Culture Travel Study course is designed to expose students to economies across the world. During the course students will travel to important commercial, cultural and governmental cities. Through a combination of readings students will be exposed to 20th and 21st century history, economics, culture political and business philosophy. The course will also involve visits to major multinational corporations, cultural activities and lectures from University business faculty when available. The course will also have two pre-trip class sessions with readings and one post course session to wrap up the experience and discuss the student travel logs.

BA 498. Business Seminar. 3 Hours.
This honors course requires the study of various business problems under the supervision of members of the Department of Business Administration. A paper is required. An oral examination is scheduled as the final examination in the course. Prerequisite(s): College Level=Senior.

BA 499. Topic/. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 600. Research Methods in Business and Education. 3 Hours.
This course is designed for beginning graduate students who have little or no formal preparation in those areas of research and problem-solving essential for a comprehensive study of business and education at the graduate level. Emphasis is placed on the identification of common problem types and the selection and use of appropriate methods of analysis (primarily statistical in nature).

BA 601. Managerial Economics. 3 Hours.
This course begins with a comprehensive overview of micro- and macroeconomic concepts with the aim of developing within students a picture of how business and nonprofit organizations relate to the economy as a whole. The course then focuses on practical applications of economic analysis to problems of concern to managers. Case studies and projects are used to demonstrate the methods used to determine economic feasibility and cost-effectiveness of products, services, and programs.

BA 602. Managerial Accounting. 3 Hours.
This is an accelerated accounting course for those with little or no formal accounting background. The emphasis is on concepts which managers need to know in order to be effective. Topics include the preparation and interpretation of financial statements, cost planning and control, cost-volume-profit analysis, decision-making models, master budgeting and variances, and evaluation of capital projects.

BA 605. Management Communications. 3 Hours.
This is an advanced communications course that builds upon a student’s experience and prior undergraduate coursework in writing and oral communications. Topics include: advanced business writing, use of visual materials, selection of secondary sources of information, report preparation, and presentations to small and large groups.

BA 611. Organizational Behavior. 3 Hours.
This course surveys the major field of management, examining structures and processes on both group and organizational levels. Both traditional and contemporary theories are analyzed and applied to business operations.

BA 620. Financial Management. 3 Hours.
Topics considered include financial planning, operating and capital budgets, cash flow, purchasing and accounting procedures, the sources and uses of corporate and institutional funds, and financial analysis for evaluation and control. Students develop projects specifically related to their needs in educational administration, small business, or corporate management. Prerequisite(s): BA 602 or AC 301.

BA 621. Marketing Management. 3 Hours.
This course focuses on complex problems facing decision-makers in the marketing of goods and services. Emphasis is placed on the decision-making process, including assessment of the social, economic, and political environment in which the organization operates; problem definition; development and evaluation of alternatives, and the implementation of the best alternative. Cases in advertising, sales, marketing research, and strategic marketing management provide practice in marketing analysis and decision-making.

BA 622. Production Management. 3 Hours.
Emphasis is placed on the use of quantitative techniques for solving manufacturing problems. The student is given an opportunity to practice mathematical model-building and manipulation. Other topics considered include queuing system design, plant layout, statistical quality control, inventory modeling, Program Evaluation and Review Technique (PERT), linear and nonlinear programming, and control theory.

BA 625. Global Strategic Management. 3 Hours.
This course focuses on the strategic challenges and opportunities confronting firms that undertake to create value and to compete in the global economy. Successful companies develop strategies for doing business in emerging markets that are different from those they use at home and often find novel ways of implementing them too. The class will make extensive use of case analysis and discussion to evaluate and understand the strategic issues that confront firms operating internationally, as well as to appreciate the importance of values and ethics in organization decisions and actions. In this course we will probe the workings of business strategies in transition and emerging economies, gain an understanding of the strategies of local firms, and analyze the international success and failure of companies. Prerequisite(s): BA 600 and 15 Credits From Range [BA 600 To BA 799].

BA 626. Accounting in Planning, Budgeting and Control. 3 Hours.
This course examines the role of accounting in the planning, budgeting, and control process of a business in a dynamic environment. The integration of measuring and analyzing (planning), short-term decisions and managing organizations (control), and preparing various budgets (budgeting) are emphasized. This course is designed as a continuation of BA602 Managerial Accounting. Numerical problems, as well as case studies, are utilized as methods of study. Prerequisite(s): BA 602 or AC 211.

BA 627. Investment Analysis. 3 Hours.
This course provides a detailed description of securities market organization and approaches to investment opportunities. Students will examine theories used in the valuation of financial securities and employ projects and applications to develop a real world understanding of portfolio management. Prerequisite(s): BA 602.
BA 628. New Venture Planning and Management. 3 Hours.
This course deals with the foundation of new ventures and related aspects of managing the small growing enterprise. Techniques taught in this course are equally applicable to small businesses, nonprofit organizations, and new ventures of larger organizations. Topics include: use of scarce resources, such as money, talent and technological expertise; identification of environmental threats and opportunities; and operational considerations such as organizational structure, legal requirements, financing, and accounting procedures.

BA 641. Human Resource Management. 3 Hours.
This course explores human resource management as an integrated process of planning and control designed to achieve high employee productivity and job satisfaction. The course focuses on the essential functions of human resource management as they apply both to the general supervisory responsibilities of every manager and to the specific operations of the personnel department.

BA 642. Leadership in Business and Professions. 3 Hours.
This course is designed to provide graduate management students with a comprehensive review of the essentials for effective leadership. It focuses on the identification of basic leadership styles, explores the theoretical and practical findings of research in leadership development, and seeks to synthesize the student’s leadership style with the most effective working models of leadership.

BA 643. Strategic Change Management. 3 Hours.
Strategic Change Management focuses on the skills required to deal effectively with organizational change. The course addresses first the pressures in the business environment that make change a fundamental reality for managers. Particular attention is paid to change arising from public policy initiatives that impinge on business. The course then examines the manager as change agent responsible for initiating innovation and explores both the personal skills required in the role of change agent and the tools and techniques available to support the manager in that role. The course also examines the problems and opportunities of those who are the recipients of change in an organization and the skills required to cope effectively with that situation.

BA 644. The Legal Environment of Business. 3 Hours.
This course will provide an overview of the important aspects of business law for executives, managers, accountants, and other professionals. The areas of law covered include but are not limited to administrative, contract, corporate and other business organizations, employment relations, real estate, taxes, and UCC sales.

BA 646. Current Issues in Business. 3 Hours.
This course, conducted in seminar fashion, draws on current literature to analyze contemporary and emerging issues facing management in the late twentieth century. Content will vary.

BA 700. Health Care Management. 3 Hours.
This course examines management problems and policy-making in the health care industry. Several areas are considered including: (1) the functions of the health care manager, (2) the types of health care delivery systems, (3) the administration of hospitals, (4) the financing of medical care, and (5) the role of government. Through readings, lectures, discussions, and projects, students clarify their own role in the delivery of health services. The course regularly draws on experts in health planning and health care administration.

BA 701. Legal Environment of Health Care Management. 3 Hours.
The course provides a foundation in the legal and regulatory framework in which health care institutions operate. Students will also examine the legal issues confronting health care managers including director and administrative liability, malpractice, negligence, patient rights and confidentiality, licensure requirements, and the like.

BA 702. Health Care Economics. 3 Hours.
In this course, the principles and tools of economic decision-making are applied to management in the health care sector. The course explores the application to health care management functions of such concepts and processes as supply and demand, resource allocation and utilization, costing and pricing, resource productivity, forecasting and economic aspects of planning, and utilization review. While the principal emphasis in the course is on micro-economic analysis, some consideration is also given to an economic analysis of public policy alternatives for the delivery of health care service. Prerequisite(s): BA 601.

BA 703. Financial Management in Healthcare Organizations. 3 Hours.
This course applies the perspectives and tools of financial analysis to the management of health care organizations and evaluation of organizational performance. Topics covered include capital budgeting, sources of operating revenue, management of cash and inventories, risk analysis and forecasting. Particular attention is paid to cost containment regulatory strategies and their implications for financial planning and management. Prerequisite(s): BA 602.

BA 704. Managing Quality in Healthcare. 3 Hours.
This course examines methods and tools for managing quality in health facilities, physician practices, managed care, and public health. Topics include developments in quality assurance and improvement, utilization review, risk management, and patient satisfaction.

BA 705. Global Perspectives in Healthcare. 3 Hours.
This course examines the social, political, and economic aspects of global healthcare issues. Through a comparative analysis of the health systems of multiple nations, students will compare theories of health policy and priorities, healthcare system facilities, workforce, technology, cost, quality, and access. The emphasis of the course will be on health management strategies used in different countries and healthcare systems to mobilize, allocate, and maintain resources to improve the healthcare status and delivery systems.

BA 710. Law & Ethics for Non-Profit Organizations. 3 Hours.
Non-profit managers and supervisors are held to a higher standard of ethical behavior due to the nature of their funding sources and their mission. This course is designed to develop in the student a basic understanding of the laws governing non-profit organizations, the practical applications of these laws and the ethics that are demanded of non-profit managers.

BA 711. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics covered include: leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 712. Strategic Marketing for Nonprofit Organizations. 3 Hours.
This course applies the concepts of marketing and strategy to the management of non-profit organizations. Through class lectures, discussion, case studies, and applied projects, students will build an understanding of the marketing process in the non-profit environment in order to be able to design, implement, and evaluate an organization’s approach to marketing and strategic positioning.
BA 713. Fundraising. 3 Hours.
This course takes a systems approach to the process of fund-raising. Topics covered include: donor cultivation, use of the annual fund, major gifts, corporate giving, and grant writing.

BA 720. Advanced Sales and Marketing in Hospitality. 3 Hours.
This course focuses on difficult problems and issues facing sales and marketing personnel in the hospitality industry. Students will make use of case studies in order to develop their decision-making process including the use of marketing research and analysis.

BA 721. Convention Planning and Events Planning. 3 Hours.
This course focuses on the rapidly growing convention sales and events planning industries. The student will learn how to design, plan, market and manage meetings and events.

BA 722. Advanced Front Office Operations. 3 Hours.
This course begins with detailed introduction about numerous aspects of front office operations and management. The next section of the course examines the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.

BA 723. Legal Issues in Hospitality Management. 3 Hours.
This course will provide the student an overview of the important aspects of Hospitality Law for Managers, and other professionals. Some of the areas of study include and are not limited to Torts, Products Liability, Constitutional Law and Criminal Law and many other subjects.

BA 724. Managing Service. 3 Hours.
This course begins with an introduction to the framework for providing quality service to customers and guests. Next we will discuss the needs of the customer/guest and proceed to develop our menu and/or product accordingly. Finally, we will learn how management and staff create loyal customers and guests by delivering service that exceeds their expectations.

BA 729. Hospitality Graduate Directed Practicum. 3 Hours.
Each student will find, will choose or will be provided with an internship site. The site chosen will be based on; and interview conducted by the management of the internship site and the student’s preference of location based on those available. The Coordinator of Hospitality Management will have the final decision on all internship site placements. The Coordinator’s decision will be based on his or her interaction with the student during previous course work, his or her understanding of the student and the internship properties requirements. Every consideration will be given to the student’s personal preferences with regard to location and types of property. However, the student’s preferences will not be the only consideration for placement. Prerequisite(s): BA 720 and BA 722 and BA 724.

BA 731. Business and Information Technology. 3 Hours.
This graduate course approaches Information Technology from the perspective of information consumers as opposed to technology implementers. During this course, students will examine various technologies and their application within modern organizations. The course has two primary goals. (1) The course will explain information technologies in non-technical terms so that students can evaluate a technology’s effectiveness relative to any existing alternatives and the overall organizational needs. (2) This course should increase student awareness regarding how they interact with technology in a personal or business setting. Business leaders are constantly bombarded with technology. This course addresses the need to sift through that information in an intelligent manner and make smart business decisions.

BA 741. Staffing & Selection. 3 Hours.
A source of competitive advantage for any organization is its talent. The effectiveness of an organization depends on the performance of each individual in that organization. Hence, one of the most important human resource functions is that of staffing the organization. This course is essential for HR professionals who are responsible for recruiting, screening, hiring, promoting, and outplacing employees. It is also very crucial for any line managers, supervisors, team leaders, and hiring managers who are involved in recruiting, making promotions, succession, or any other workforce decisions. An examination of the scientific, legal, and administrative issues associated with the recruitment, selection, employment and retention of individuals by organizations augments the study. Specific attention will be given to the current challenges of an increasingly dynamic workplace and diverse workforce.

BA 742. Training & Development. 3 Hours.
The effective training and development of human resources creates tremendous and unique value for an organization. This course examines how organizations can develop and manage the talents and skillset of human capital. The course explores topics such as training needs analysis, formulating training objectives, and the design, implementation, and evaluation of training and development programs.

BA 745. Innovative Global Strategy. 3 Hours.
This course will build students’ awareness of the challenges that must be addressed and the opportunities that may be present when competing in the global marketplace. The course focuses on how firms apply innovative strategies to create a sustainable competitive advantage in the global arena. Course content will be drawn from readings, case analysis, online content and discussions. The course requires students to analyze and understand real world examples of both successful and unsuccessful global strategy implementation.

BA 750. Fundamentals of Risk Management. 3 Hours.
This course explores the fundamentals of risk management. After discussion of the importance of risk and the rationale for its management in organizations, the remainder of the course will analyze the process of and methods for managing risk.

BA 751. Employee Benefits. 3 Hours.
This course explores the nature and operation of employer-sponsored benefit plans. Emphasis is placed on plan design, administration, funding, and regulation. The course also addresses organizational characteristics, benefit structure, and pricing of risk transfer schemes for groups.

BA 752. Crisis Management. 3 Hours.
Crisis Management can be defined as a communications response to an event that has a negative impact on an audience - the public, customers/clients, employees, shareholders, etc. Examples of such events could include tainted food, a corporate leak, a political scandal, an entertainment or athletic scandal, damaged products that cause or could potentially cause life-threatening situations, natural disasters, terrorism, and financial disasters. In this course, students will analyze and critique high-profile cases and learn how to effectively respond to crises.

BA 753. Corporate Risk Management. 3 Hours.
Corporate risk is analyzed through the lens of enterprise risk management. This course explores the operational and financial risks faced by firms and the study of various methods of handling these risks.

BA 754. Strategic Selling. 3 Hours.
The focus of this course is on key, strategic customer selling approaches. The process of sales planning and strategy development for these types of customers will be emphasized. The objective of this course is to understand and execute sales strategies for managing major and large customers.
BA 760. Technology & Innovation. 3 Hours.
BA 760 Technology & Innovation offers a research approach to identifying, analyzing, and creating technological advantage in nascent and mature industries. Students will apply the methodologies of innovation and discovery to business settings and markets, seeking to create competitive advantage and achieve market transformation through strategic initiatives that redefine consumer expectations and industry practices and reframe organizations to embrace innovative practices and processes.

BA 761. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 762. Groupthink. 3 Hours.
This course explores the origin of groupthink. Groupthink is a term first used by social psychologist Irving L. Janis (1972) that refers to a psychological phenomenon in which people strive for consensus within a group. This course explores groupthink as a phenomenon where people set aside their own personal beliefs or adopt the opinion of the rest of the group.

BA 763. Biotechnology & Innovation: Intellectual Property. 3 Hours.
This course focuses on the protection of proprietary and intellectual rights in inventions, writings, creative works, software, industry trade secrets, industry trade designations, and other intellectual assets at the international, Federal, and State Levels. The course will give special consideration to the emergence of new areas of patent law in Biotechnology and Pharmaceutical fields, examining not only the patentability of intellectual assets, but also the discovery process, particularly in collaborative environments involving multiple organizations and institutions, and the qualifying distinctions between collaborative and competitive research.

BA 790. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.*

BA 791. Professional Project. 3-6 Hours.
This course is used to award graduate credit for prior learning and educational experience obtained outside of the traditional classroom. Through the preparation of a professional project, students provide formal documentation of the specific graduate-level learning competencies which they have acquired through prior experience. A maximum of six (6) credit hours may be earned.

BA 792. Graduate Internship I. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization’s supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 793. Graduate Internship II. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization’s supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 792.

BA 794. Graduate Internship III. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.

BA 796. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 798. Thesis. 6 Hours.
The thesis may be library-oriented research with extensive reliance on documents and a relatively limited amount of primary field research, or it may be action-oriented field research with relevant documentation from the literature. The title of the thesis topic must be filed with the graduate committee. A student, with the approval of his/her advisory committee, may register for the thesis after completion of twenty-four (24) semester hours.

BA 799. Topic/. 3 Hours.
Students work together in a seminar setting under the direction of a member of the graduate faculty. The content of the seminar will vary according to the interests of students and faculty involved.

B.S. Business Administration - Healthcare Management/M.B.A.

Healthcare Agencies nationwide have increased their demand for astute, well-rounded individuals to effectively manage day-to-day needs. The B.S.Business Administration - Healthcare Management concentration degree can challenge students to explore the organizational structure of healthcare institutions and develop an understanding of the interrelatedness of psychological, social, cultural and political factors in healthcare delivery, organizational culture and healthcare management. Further, organizations need employees with an understanding of financial reimbursement, human resources, and law. Many of the healthcare related classes are listed below and additional specialized topics classes will be offered that can be approved by a student’s Advisor to fulfill the Healthcare Electives.

In addition to the program objectives of the B.S. Business Administration degree, this concentration requires students to demonstrate an understanding of current healthcare financing, important healthcare management concepts, and national healthcare policy issues.
Further, students must achieve the program objectives for the MBA degree.

### BA Courses

#### BA 101. Introduction to Business. 3 Hours.
This course introduces students to the general nature of functional areas in business such as marketing, management, accounting, finance, research and development, and risk management. The relationship between business, the government, the economy, and the environment is examined.

#### BA 111. Economic Geography. 3 Hours.
This course is an introduction to the principles of economic geography, ranging from physical and biological geography to cultural and political factors. The decision making processes, both local and global, for different types of service oriented, manufacturing, transportation, and resource based businesses will be examined. The relationship of natural resources, population, and culture, and how such factors affect economic activity will be emphasized.

#### BA 201. Business Law I. 3 Hours.
This course provides students with a basic knowledge of the law of contracts, personal property and real property.

#### BA 202. Business Law II. 3 Hours.
This course is intended to augment BA 201 with in depth analysis of the law in Contracts, UCC, Corporations, Principal Agency Law, Advanced Tort Law, Environmental Law, Real Property Law, Securities Law and Employment Law.

#### BA 204. Franchise Formation and Management. 3 Hours.
This class will discuss franchise formation and management with particular emphasis on the discovery and evaluation of the franchisor and the feasibility of entrepreneurs converting an existing business into a franchise chain or creating and selling new franchises, domestic and international. Franchise accounting and finance (borrowing or leveraging) will be covered, as well as, taking the franchise to the stock market or going public (IPO) and raising investment capital. Prerequisite(s): BA 401.

#### BA 205. Real Estate Law. 3 Hours.
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

#### BA 210. Economics Overview for Non-Business Majors. 3 Hours.
This is an overview of microeconomic and macroeconomic concepts for non-business majors. It will include an introduction to American capitalism including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of competitive firms. It will also be an introduction to national income accounts, unemployment, inflation, government fiscal policy and monetary policy.

#### BA 211. Microeconomics. 3 Hours.
This is an introduction to American capitalism and microeconomic concepts including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of purely and impurely competitive firms.

#### BA 212. Macroeconomics. 3 Hours.
This is an introduction to macroeconomics in the American economy: national income accounts, unemployment, inflation, government fiscal policy, monetary policy and economic growth.

#### BA 220. Real Estate Principles and Practices. 3 Hours.
This course will provide students with methods of analyzing acquisition and retention of Real Estate. Also, there will be a focus on the skills and techniques required to operate a real estate business, including trust accounts, risk management, and property management.

#### BA 243. The Business of Innovation. 3 Hours.
This is a cross-disciplinary class that will introduce students to the Lean Startup Scientific Method for developing and commercializing ideas for new ventures or else innovating and developing new products or business models within existing companies. Topics include marketplace innovations, technology and science based innovations, marketplace hypothesis development and testing, frugal and agile engineering, business models, intellectual property, prototyping, exit strategies, and fundraising. Lab component is integrated within module deliverables.

#### BA 271. Risk Management. 3 Hours.
A study is made of the risks encountered by individuals and business firms. A presentation is made of the basic principles and institutions, which have been developed in risk management. This material is treated primarily from the consumer point of view.

#### BA 299. Topic/. 1 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.
BA 300. Business Presentations. 3 Hours.
Communication is a vital function of any business. Managers at all levels must be able to communicate effectively to advance their career and ensure the success of their organization. This course will give students a working knowledge of how to create, brief, and present information across the organizational communications spectrum. Students will learn how to think critically and apply problem solving skills across a variety of historical and contemporary business topics. Students will learn how to collect, analyze, synthesize, and present information in a professional manner to assorted audiences in different venues. The foundational skill set developed in this course is the ability for students to articulate their ideas in a professional manner within a variety of business settings. Prerequisite(s): EH 124.

BA 302. Business Ethics. 3 Hours.
This course is designed to raise a moral consciousness and sensitivity within the various disciplines of the business curriculum. The disciplines focused on here are business, accounting, marketing, multinational corporations, and those areas of human resource management inclusive of diversity in the workplace within the context of environmental and social responsibility.

BA 306. Franchise Law. 3 Hours.
This is a law class that analyzes all the issues of Franchise Law with a particular emphasis on Contracts, Principal-Agent Franchise Relations, Corporate Formation of Franchises, and Securities Law. Prerequisite(s): BA 201 and BA 202.

BA 310. Organization and Management. 3 Hours.
This course focuses on how to design organization systems and effectively manage them. Students completing the course should understand the universal process of management and key terminology in the language of management. Students are encouraged conceptually to blend contributions from the various schools of management thought into an integrated perspective of what managers do and why.

BA 311. Human Resource Management. 3 Hours.
Emphasis in the course is on how to manage the major human resource administration functions of job design, reward system design, staffing, training and performance control, to achieve maximum employee performance and satisfaction. Prerequisite(s): BA 310 or (Major=BS Criminal Justice or Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Paralegal or Major=BS English - Prelaw).

BA 312. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics include leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 321. Marketing Principles. 3 Hours.
The course covers the language and issues of marketing with an emphasis on developing responsive marketing strategies that meet customer needs. The course focuses on marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing. Other topics will be incorporated into the course including the external environment (focus on integrative topics within marketing, such as economics, politics, government, and nature), marketing research, international/global marketing with relevance to cultural diversity, ethics, the impact of technology on marketing, and careers in marketing.

BA 334. International Economics. 3 Hours.
This applied economics course will emphasize the use of cases to study topics such as comparative advantage, treaties, tariffs, non-tariff trade barriers, and trade blocks among developed and developing nations. Prerequisite(s): BA 211 and BA 212.

BA 344. Personal Financial Planning. 3 Hours.
This course provides comprehensive coverage of personal financial planning in the areas of money management, axes, consumer credit, housing and other consumer decisions, legal protection, insurance, retirement planning, and estate planning. Prerequisite(s): MS 141 or MS 111 or MS 242 or MS 180 or MS 181.

BA 351. Internship. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 352. Internship II. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 353. Internship III. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 354. Internship IV. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 355. Internship V. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 351 and BA 352 and BA 353 and BA 354.
BA 362. Financial Management I. 3 Hours.
The foundation finance course covers basic personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management. Students are expected to become proficient in financial analysis of a corporation and in various aspects of corporate financial management. Prerequisite(s): AC 121 and (AC 122 or AC 211) and BA 211 and (MS 141 or MS 111 or MS 242 or MS 180 or MS 181).

BA 364. Financial Management II. 3 Hours.
The course is a continuation of Financial Management I and will cover such topics as real options, sensitivity, scenario and break-even analysis, basic issues regarding stocks and bonds, risk/return and cost of capital, capital structure and limits to the use of debt. Prerequisite(s): BA 362.

BA 375. Supply Chain Management. 3 Hours.
This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategies to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.

BA 401. Managerial Economics. 3 Hours.
This course is designed to close the gap between economic theory and business application. It reviews traditional analysis and shows its application to the understanding and solution of economic problems of the firm and industry. Prerequisite(s): BA 211 and BA 212.

BA 411. Organizational Behavior. 3 Hours.
This course is highly experiential in its approach to helping students understand and appreciate why people behave the way they do in an organizational context. Students learn how to manage employee behavior through analysis of real world phenomena and by application of principles in the areas of human perception and communication, leadership and motivation, small group dynamics, organizational culture, and organizational change. Prerequisite(s): BA 310.

BA 413. Operations Management. 3 Hours.
Quantitative model building and manipulation are a means of analyzing and synthesizing the elements of productions management. Both deterministic and stochastic modeling are emphasized in the areas of work systems design, queuing, PERT, SQC, inventory control, forecasting, and linear and nonlinear programming. Prerequisite(s): BA 310 and MS 132.

BA 414. Business Strategy. 3 Hours.
This Business Administration senior seminar focuses on decision making at the executive management level, the formulation of strategy, and its implementation in the organization. The course will employ case studies, laboratory simulation techniques, and computer spreadsheet analysis. Prerequisite(s): College Level=Senior.

BA 421. Integrated Marketing Communication and Advertising. 3 Hours.
An introduction into the world of advertising: Students will plan and design Ad campaigns, write copy and design layouts for the different types/forms of advertising. The students will work with local companies and assist them in redesign of their ad campaigns. Prerequisite(s): BA 321.

BA 422. Sales and Sales Management. 3 Hours.
This course provides students with the fundamentals of good salesman and sales management. Prior to studying management principles students practice sales techniques in simulations. Cases are used to illustrate and evaluate principles of sales management. Prerequisite(s): BA 321.

BA 423. Retail Management. 3 Hours.
The purpose of this course is to provide students with an understanding of the fundamentals of successful retail operations. Topics included are the market concept in retailing, factors of area and market analysis, and aspects of organizational structure, layout, and personnel planning. Also covered are methods of pricing, merchandising planning, inventory, expense control and sales promotion techniques. Prerequisite(s): BA 321.

BA 424. Marketing Research. 3 Hours.
The basic research concepts and practices as applied to the analysis of marketing problems are examined. Topics include sources of data, collecting data, sampling, questionnaire construction, tabulating data, and report preparation; computerized statistical software is used. Prerequisite(s): BA 321 and MS 132.

BA 425. Marketing Management. 3 Hours.
This is the capstone course for marketing majors. Students apply concepts learned in other courses to marketing problems of business and nonprofit organizations. Cases and business simulations are used to teach decision-making in the complex environment of business. A complete marketing plan for a simulated company of the student's choice summarizes the student's knowledge of the field. Prerequisite(s): BA 321.

BA 426. Real Estate Market, Research and Analysis. 3 Hours.
This course will discuss market research, real estate sales, property valuations and analysis. Students will examine market research reports to gain insight into product and market trends, opportunities, projections, and growth in the Maine, the US and global real estate markets. Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 427. Franchise Market Research and Analysis. 3 Hours.
This class will focus on analysis of market demographics, feasibility studies, product pricing, promotion and distribution, franchise broker contacts, extrapolation of sales and expenses, and the projection of costs and net profits, emerging markets and capital expansion. Prerequisite(s): BA 401 and MS 132 and MS 232 and BA 362.

BA 428. Strategic Selling. 3 Hours.
This course builds on the fundamentals of selling. The student will understand how to advance sales in light of complex business environments consisting of layers of buyers, decision makers and those who influence purchasing decisions. A strategic account planning process will be analyzed and applied to real companies by way of case studies. The art and skill of negotiating will be studied and learned through role play. Prerequisite(s): BA 422.

BA 434. International Finance. 3 Hours.
The factors affecting exchange rates are discussed, as well as different types of exchange rate systems and how governments attempt to influence exchange rates. The relationships among interest rate parity, purchasing power parity, the Fisher effect and International Fisher effect and exchange rates are analyzed. Students learn how currency futures, currency options and money market hedges are used to hedge exchange rate risk. Prerequisite(s): BA 362.
BA 437. International Marketing. 3 Hours.
The basics of international marketing will be taught including the
foundations of culture, cultural understanding, business customs and
practices in global marketing, assessing global markets, and developing
international marketing strategy. Prerequisite(s): BA 321.

BA 438. Export-Import Procedures. 3 Hours.
The basics of export-import procedures will be taught including
justification for exporting/importing, market planning methods, selection
of appropriate marketing mix variables, and regulation. Prerequisite(s): BA 321.

BA 439. International Franchising Management. 3 Hours.
This course will focus on international expansion of franchises, learning
the culture, monetary exchanges, imports and exports, local international
market analysis and much more. Prerequisite(s): BA 204 and BA 306 and BA 427.

BA 440. Small Business Management I. 3 Hours.
This course supplies prospective and current small business managers
with the essential concepts of starting and operating small businesses.
Topics covered include: environment and management of small
business enterprise, problems in starting small businesses, financial
and administrative control, and management of business operations.
Particular emphasis is placed on the interrelated nature of the
components, particularly as they affect the financial picture of the firm.
Through a lecture and discussion format, students are expected to share
their own experiences in small businesses with their fellow students.
Prerequisite(s): College Level=Senior or College Level=Junior.

BA 441. Entrepreneurship I - New Venture Development. 3 Hours.
Students will be introduced to the practical application of classic
and contemporary business theory as it applies to the early stages
of entrepreneurship and intrapreneurship, opportunity recognition,
innovation, and new venture development. Course topics include types
of entrepreneurs, opportunity recognition, marketing, cash and other
resource requirements, financial statements, planning, franchising,
intellectual property, success/failure/resilience, and growth. Class
will use text, cases, articles, internet sources, and guest lecturers.
Prerequisite(s): College Level=Senior or College Level=Junior.

BA 442. Applied Small Business Management. 3 Hours.
This is an advanced course which focuses on real problems in Small
Business Management, using the case approach. Cases are drawn from
the text, from actual local small businesses, and from the practical
experience of students in the class. Prerequisite(s): College Level=Junior or
College Level=Senior.

BA 443. Entrepreneurship II: Business Plans. 3 Hours.
This class builds on BA 441, New Venture Development. The focus of this
class is on the early stages of formalizing and growing a venture. Topics
include business plan writing, fund raising and cash flow, measuring
and conveying financial position, core strategy development and
competitive advantage, sustainability, international entrepreneurship,
supply chain, growth, and exit. Prerequisite(s): College Level=Junior or
College Level=Senior.

BA 460. Investments. 3 Hours.
Beginning with an introduction to financial markets and investment
instruments, topics include stock and bond quotations and trading
procedures, rate of return, margin trading, stock indexes, stock and bond
valuation, risk and return, portfolio theory, active and passive portfolio
management, and investment performance evaluation. Prerequisite(s):
BA 362.

BA 464. Bank & Financial Services Management. 3 Hours.
This course will introduce students to the specific issues in the financial
management of a banking firm and, to a smaller degree, of other financial
intermediaries. Emphasis will be on products, roles, regulatory framework,
and risk management. Prerequisite(s): BA 362.

BA 465. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to
come familiar with the scope and nature of organizations that work
with genetics within biotechnology industries. Through extensive case
studies, students focus on the dynamics of these enterprises; their
organizational structures, the regulatory considerations of these entities,
and how organizational cultures are created to enhance opportunities for
innovation and discovery.

BA 471. Life and Health Insurance. 3 Hours.
This course is intended to provide background knowledge for personal
application and for those responsible for administering benefit plans for
employees; it provides the necessary information required to pass the
State of Maine license examination. Prerequisite(s): BA 271.

BA 472. Casualty and Property Insurance. 3 Hours.
The first part of the course introduces the basics of the entire insurance
business, including a summary of legal aspects, types of insurers and
principles of reinsurance; next, each type of insurance is studied in
detail. Topics covered are fire, consequential loss, inland marine, ocean
marine, theft and surety, liability and miscellaneous property insurance.
Prerequisite(s): BA 271.

BA 473. Real Estate Appraisal. 3 Hours.
This course familiarizes the student with the foundation and principles
of the appraisal process. The student will become familiar with
the three approaches to value. Site valuation, construction costs,
depreciation; comparables selection and adjustments; rental multipliers;
and reconciliation will be discussed. The student will focus on the
elements making up the standards for professional appraisal practice.
These elements, i.e., Definitions, Rules, Standards and Standard Rules,
Statements and advisory opinions are discussed in detail along with the
philosophy and history of USPAP. Prerequisite(s): BA 401 and MS 132
and BA 362.

BA 475. E-Business and E-Commerce for Managers. 3 Hours.
This course teaches the basic e-business and e-commerce theory. The
students will apply the theory through the development of a website for
the prime purpose of marketing a product or service or idea online.

BA 490. International Business. 3 Hours.
This course covers the international dimensions of managerial decision-
making including: world economies, international trade theories, tariffs,
quotas and other trade issues, global strategic planning, cross-cultural
management, international market entry, international human resource
management, international organization strategy, international logistics,
import/export operations, currency exchange, international financial
management. Current developments in global economic and business
are emphasized; students participate in a computerized simulation
throughout the semester. Prerequisite(s): BA 310 and BA 321.

BA 495. Senior Management Project. 3 Hours.
An experiential course that gives seniors the opportunity to apply what
they have learned in class to a real business situation. Prerequisite(s):
College Level=Senior.
BA 496. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 497. Business and Culture Travel Study Course. 3 Hours.
Business and Culture Travel Study course is designed to expose students to economies across the world. During the course students will travel to important commercial, cultural and governmental cities. Through a combination of readings students will be exposed to 20th and 21st century history, economics, culture political and business philosophy. The course will also involve visits to major multinational and problem-solving, cultural activities and lectures from University business faculty when available. The course will also have two pre-trip class sessions with readings and one post course session to wrap up the experience and discuss the student travel logs.

BA 498. Business Seminar. 3 Hours.
This honors course requires the study of various business problems under the supervision of members of the Department of Business Administration. A paper is required. An oral examination is scheduled as the final examination in the course. Prerequisite(s): College Level=Senior.

BA 499. Topic/. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 600. Research Methods in Business and Education. 3 Hours.
This course is designed for beginning graduate students who have little or no formal preparation in those areas of research and problem-solving essential for a comprehensive study of business and education at the graduate level. Emphasis is placed on the identification of common problem types and the selection and use of appropriate methods of analysis (primarily statistical in nature).

BA 601. Managerial Economics. 3 Hours.
This course begins with a comprehensive overview of micro- and macroeconomic concepts with the aim of developing within students a picture of how business and nonprofit organizations relate to the economy as a whole. The course then focuses on practical applications of economic analysis to problems of concern to managers. Case studies and projects are used to demonstrate the methods used to determine economic feasibility and cost-effectiveness of products, services, and programs.

BA 602. Managerial Accounting. 3 Hours.
This is an accelerated accounting course for those with little or no formal accounting background. The emphasis is on concepts which managers need to know in order to be effective. Topics include the preparation and interpretation of financial statements, cost planning and control, cost-volume-profit analysis, decision-making models, master budgeting and variances, and evaluation of capital projects.

BA 605. Management Communications. 3 Hours.
This is an advanced communications course that builds upon a student's experience and prior undergraduate coursework in writing and oral communications. Topics include: advanced business writing, use of visual materials, selection of secondary sources of information, report preparation, and presentations to small and large groups.

BA 611. Organizational Behavior. 3 Hours.
This course surveys the major field of management, examining structures and processes on both group and organizational levels. Both traditional and contemporary theories are analyzed and applied to business operations.

BA 620. Financial Management. 3 Hours.
Topics considered include financial planning, operating capital budgets, cash flow, purchasing and accounting procedures, the sources and uses of corporate and institutional funds, and financial analysis for evaluation and control. Students develop projects specifically related to their needs in educational administration, small business, or corporate management. Prerequisite(s): BA 602 or AC 301.

BA 621. Marketing Management. 3 Hours.
This course focuses on complex problems facing decision-makers in the marketing of goods and services. Emphasis is placed on the decision-making process, including assessment of the social, economic, and political environment in which the organization operates; problem definition; development and evaluation of alternatives, and the implementation of the best alternative. Cases in advertising, sales, marketing research, and strategic marketing management provide practice in marketing analysis and decision-making.

BA 622. Production Management. 3 Hours.
Emphasis is placed on the use of quantitative techniques for solving manufacturing problems. The student is given an opportunity to practice mathematical model-building and manipulation. Other topics considered include queuing system design, plant layout, statistical quality control, inventory modeling, Program Evaluation and Review Technique (PERT), linear and nonlinear programming, and control theory.

BA 625. Global Strategic Management. 3 Hours.
This course focuses on the strategic challenges and opportunities confronting firms that undertake to create value and to compete in the global economy. Successful companies develop strategies for doing business in emerging markets that are different from those they use at home and often find novel ways of implementing them too. The class will make extensive use of case analysis and discussion to evaluate and understand the strategic issues that confront firms operating internationally, as well as to appreciate the importance of values and ethics in organization decisions and actions. In this course we will probe the workings of business strategies in transition and emerging economies, gain an understanding of the strategies of local firms, and analyze the international success and failure of companies. Prerequisite(s): BA 600 and 15 Credits From Range [BA 600 To BA 799].

BA 626. Accounting in Planning, Budgeting and Control. 3 Hours.
This course examines the role of accounting in the planning, budgeting, and control process of a business in a dynamic environment. The integration of measuring and analyzing (planning), short-term decisions and managing organizations (control), and preparing various budgets (budgeting) are emphasized. This course is designed as a continuation of BA602 Managerial Accounting. Numerical problems, as well as case studies, are utilized as methods of study. Prerequisite(s): BA 602 or AC 211.

BA 627. Investment Analysis. 3 Hours.
This course provides a detailed description of securities market organization and approaches to investment opportunities. Students will examine theories used in the valuation of financial securities and employ projects and applications to develop a real world understanding of portfolio management. Prerequisite(s): BA 602.
BA 628. New Venture Planning and Management. 3 Hours.
This course deals with the foundation of new ventures and related aspects of managing the small growing enterprise. Techniques taught in this course are equally applicable to small businesses, nonprofit organizations, and new ventures of larger organizations. Topics include: use of scarce resources, such as money, talent and technological expertise; identification of environmental threats and opportunities; and operational considerations such as organizational structure, legal requirements, financing, and accounting procedures.

BA 641. Human Resource Management. 3 Hours.
This course explores human resource management as an integrated process of planning and control designed to achieve high employee productivity and job satisfaction. The course focuses on the essential functions of human resource management as they apply both to the general supervisory responsibilities of every manager and to the specific operations of the personnel department.

BA 642. Leadership in Business and Professions. 3 Hours.
This course is designed to provide graduate management students with a comprehensive review of the essentials for effective leadership. It focuses on the identification of basic leadership styles, explores the theoretical and practical findings of research in leadership development, and seeks to synthesize the student’s leadership style with the most effective working models of leadership.

BA 643. Strategic Change Management. 3 Hours.
Strategic Change Management focuses on the skills required to deal effectively with organizational change. The course addresses the pressures in the business environment that make change a fundamental reality for managers. Particular attention is paid to change arising from public policy initiatives that impinge on business. The course then examines the manager as change agent responsible for initiating innovation and explores both the personal skills required in the role of change agent and the tools and techniques available to support the manager in that role. The course also examines the problems and opportunities of those who are the recipients of change in an organization and the skills required to cope effectively with that situation.

BA 644. The Legal Environment of Business. 3 Hours.
This course will provide an overview of the important aspects of business law for executives, managers, accountants, and other professionals. The areas of law covered include but are not limited to administrative, contract, corporate and other business organizations, employment relations, real estate, taxes, and UCC sales.

BA 646. Current Issues in Business. 3 Hours.
This course, conducted in seminar fashion, draws on current literature to analyze contemporary and emerging issues facing management in the late twentieth century. Content will vary.

BA 700. Health Care Management. 3 Hours.
This course examines management problems and policy-making in the health care industry. Several areas are considered including: (1) the functions of the health care manager, (2) the types of health care delivery systems, (3) the administration of hospitals, (4) the financing of medical care, and (5) the role of government. Through readings, lectures, discussions, and projects, students clarify their own role in the delivery of health services. The course regularly draws on experts in health planning and health care administration.

BA 701. Legal Environment of Health Care Management. 3 Hours.
The course provides a foundation in the legal and regulatory framework in which health care institutions operate. Students will also examine the legal issues confronting health care managers including director and administrative liability, malpractice, negligence, patient rights and confidentiality, licensure requirements, and the like.

BA 702. Health Care Economics. 3 Hours.
In this course, the principles and tools of economic decision-making are applied to management in the health care sector. The course explores the application to health care management functions of such concepts and processes as supply and demand, resource allocation and utilization, costing and pricing, resource productivity, forecasting and economic aspects of planning, and utilization review. While the principal emphasis in the course is on micro-economic analysis, some consideration is also given to an economic analysis of public policy alternatives for the delivery of health care service. Prerequisite(s): BA 601.

BA 703. Financial Management in Healthcare Organizations. 3 Hours.
This course applies the perspectives and tools of financial analysis to the management of health care organizations and evaluation of organizational performance. Topics covered include capital budgeting, sources of operating revenue, management of cash and inventories, risk analysis and forecasting. Particular attention is paid to cost containment regulatory strategies and their implications for financial planning and management. Prerequisite(s): BA 602.

BA 704. Managing Quality in Healthcare. 3 Hours.
This course examines methods and tools for managing quality in health facilities, physician practices, managed care, and public health. Topics include developments in quality assurance and improvement, utilization review, risk management, and patient satisfaction.

BA 705. Global Perspectives in Healthcare. 3 Hours.
This course examines the social, political, and economic aspects of global healthcare issues. Through a comparative analysis of the health systems of multiple nations, students will compare theories of health policy and priorities, healthcare system facilities, workforce, technology, cost, quality, and access. The emphasis of the course will be on health management strategies used in different countries and healthcare systems to mobilize, allocate, and maintain resources to improve the healthcare status and delivery systems.

BA 710. Law & Ethics for Non-Profit Organizations. 3 Hours.
Non-profit managers and supervisors are held to a higher standard of ethical behavior due to the nature of their funding sources and their mission. This course is designed to develop in the student a basic understanding of the laws governing non-profit organizations, the practical applications of these laws and the ethics that are demanded of non-profit managers.

BA 711. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics covered include: leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 712. Strategic Marketing for Nonprofit Organizations. 3 Hours.
This course applies the concepts of marketing and strategy to the management of non-profit organizations. Through class lectures, discussion, case studies, and applied projects, students will build an understanding of the marketing process in the non-profit environment in order to be able to design, implement, and evaluate an organization’s approach to marketing and strategic positioning.
BA 713. Fundraising. 3 Hours.
This course takes a systems approach to the process of fund-raising. Topics covered include: donor cultivation, use of the annual fund, major gifts, corporate giving, and grant writing.

BA 720. Advanced Sales and Marketing in Hospitality. 3 Hours.
This course focuses on difficult problems and issues facing sales and marketing personnel in the hospitality industry. Students will make use of case studies in order to develop their decision-making process including the use of marketing research and analysis.

BA 721. Convention Planning and Events Planning. 3 Hours.
This course focuses on the rapidly growing convention sales and events planning industries. The student will learn how to design, plan, market and manage meetings and events.

BA 722. Advanced Front Office Operations. 3 Hours.
This course begins with detailed introduction about numerous aspects of front office operations and management. The next section of the course examines the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.

BA 723. Legal Issues in Hospitality Management. 3 Hours.
This course will provide the student an overview of the important aspects of Hospitality Law for Managers, and other professionals. Some of the areas of study include and are not limited to Torts, Products Liability, Constitutional Law and Criminal Law and many other subjects.

BA 724. Managing Service. 3 Hours.
This course begins with an introduction to the framework for providing quality service to customers and guests. Next we will discuss the needs of the customer/guest and proceed to develop our menu and/or product accordingly. Finally, we will learn how management and staff create loyal customers and guests by delivering service that exceeds their expectations.

BA 729. Hospitality Graduate Directed Practicum. 3 Hours.
Each student will find, will choose or will be provided with an internship site. The site chosen will be based on; and interview conducted by the management of the internship site and the student’s preference of location based on those available. The Coordinator of Hospitality Management will have the final decision on all internship site placements. The Coordinator’s decision will be based on his or her interaction with the student during previous course work, his or her understanding of the student and the internship properties requirements. Every consideration will be given to the student’s personal preferences with regard to location and types of property. However, the student’s preferences will not be the only consideration for placement. Prerequisite(s): BA 720 and BA 722 and BA 724.

BA 731. Business and Information Technology. 3 Hours.
This graduate course approaches Information Technology from the perspective of information consumers as opposed to technology implementers. During this course, students will examine various technologies and their application within modern organizations. The course has two primary goals. (1) The course will explain information technologies in non-technical terms so that students can evaluate a technology’s effectiveness relative to any existing alternatives and the overall organizational needs. (2) This course should increase student awareness regarding how they interact with technology in a personal or business setting. Business leaders are constantly bombarded with technology. This course addresses the need to sift through that information in an intelligent manner and make smart business decisions.

BA 741. Staffing & Selection. 3 Hours.
A source of competitive advantage for any organization is its talent. The effectiveness of an organization depends on the performance of each individual in that organization. Hence, one of the most important human resource functions is that of staffing the organization. This course is essential for HR professionals who are responsible for recruiting, screening, hiring, promoting, and outplacing employees. It is also very crucial for any line managers, supervisors, team leaders, and hiring managers who are involved in recruiting, making promotions, succession, or any other workforce decisions. An examination of the scientific, legal, and administrative issues associated with the recruitment, selection, employment and retention of individuals by organizations augments the study. Specific attention will be given to the current challenges of an increasingly dynamic workplace and diverse workforce.

BA 742. Training & Development. 3 Hours.
The effective training and development of human resources creates tremendous and unique value for an organization. This course examines how organizations can develop and manage the talents and skillset of human capital. The course explores topics such as training needs analysis, formulating training objectives, and the design, implementation, and evaluation of training and development programs.

BA 745. Innovative Global Strategy. 3 Hours.
This course will build students’ awareness of the challenges that must be addressed and the opportunities that may be present when competing in the global marketplace. The course focuses on how firms apply innovative strategies to create a sustainable competitive advantage in the global arena. Course content will be drawn from readings, case analysis, online content and discussions. The course requires students to analyze and understand real world examples of both successful and unsuccessful global strategy implementation.

BA 750. Fundamentals of Risk Management. 3 Hours.
This course explores the fundamentals of risk management. After discussion of the importance of risk and the rationale for its management in organizations, the remainder of the course will analyze the process of and methods for managing risk.

BA 751. Employee Benefits. 3 Hours.
This course explores the nature and operation of employer-sponsored benefit plans. Emphasis is placed on plan design, administration, funding, and regulation. The course also addresses organizational characteristics, benefit structure, and pricing of risk transfer schemes for groups.

BA 752. Crisis Management. 3 Hours.
Crisis Management can be defined as a communications response to an event that has a negative impact on an audience - the public, customers/clients, employees, shareholders, etc. Examples of such events could include tainted food, a corporate leak, a political scandal, an entertainment or athletic scandal, damaged products that cause or could potentially cause life-threatening situations, natural disasters, terrorism, and financial disasters. In this course, students will analyze and critique high-profile cases and learn how to effectively respond to crises.

BA 753. Corporate Risk Management. 3 Hours.
Corporate risk is analyzed through the lens of enterprise risk management. This course explores the operational and financial risks faced by firms and the study of various methods of handling these risks.

BA 754. Strategic Selling. 3 Hours.
The focus of this course is on key, strategic customer selling approaches. The process of sales planning and strategy development for these types of customers will be emphasized. The objective of this course is to understand and execute sales strategies for managing major and large customers.
BA 760. Technology & Innovation. 3 Hours.
BA 760 Technology & Innovation offers a research approach to identifying, analyzing, and creating technological advantage in nascent and mature industries. Students will apply the methodologies of innovation and discovery to business settings and markets, seeking to create competitive advantage and achieve market transformation through strategic initiatives that redefine consumer expectations and industry practices and reframe organizations to embrace innovative practices and processes.

BA 761. Biotechnology: The Business of Genomics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 762. Groupthink. 3 Hours.
This course explores the origin of groupthink. Groupthink is a term first used by social psychologist Irving L. Janis (1972) that refers to a psychological phenomenon in which people strive for consensus within a group. This course explores groupthink as a phenomenon where people set aside their own personal beliefs or adopt the opinion of the rest of the group.

BA 763. Biotechnology & Innovation: Intellectual Property. 3 Hours.
This course focuses on the protection of proprietary and intellectual rights in inventions, writings, creative works, software, industry trade secrets, industry trade designations, and other intellectual assets at the international, Federal, and State Levels. The course will give special consideration to the emergence of new areas of patent law in Biotechnology and Pharmaceutical fields, examining not only the patentability of intellectual assets, but also the discovery process, particularly in collaborative environments involving multiple organizations and institutions, and the qualifying distinctions between collaborative and competitive research.

BA 790. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.*

BA 791. Professional Project. 3-6 Hours.
This course is used to award graduate credit for prior learning and educational experience obtained outside of the traditional classroom. Through the preparation of a professional project, students provide formal documentation of the specific graduate-level learning competencies which they have acquired through prior experience. A maximum of six (6) credit hours may be earned.

BA 792. Graduate Internship I. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 793. Graduate Internship II. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization’s supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 792.

BA 794. Graduate Internship III. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.

BA 796. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 798. Thesis. 6 Hours.
The thesis may be library-oriented research with extensive reliance on documents and a relatively limited amount of primary field research, or it may be action-oriented field research with relevant documentation from the literature. The title of the thesis topic must be filed with the graduate committee. A student, with the approval of his/her advisory committee, may register for the thesis after completion of twenty-four (24) semester hours.

BA 799. Topic/. 3 Hours.
Students work together in a seminar setting under the direction of a member of the graduate faculty. The content of the seminar will vary according to the interests of students and faculty involved.

HS Courses

HS 100. Overview of Careers in Health Care. 1 Hour.
This course introduces the students to the different employment possibilities for a Health Care Studies graduate. Seminars will feature invited speakers to discuss how their company works and what positions they might have for a graduate in Health Care Studies. In addition, students can visit different facilities to see first-hand how their studies in Health Care can be applied to different job settings through virtual tours.

HS 101. Introduction to Health Care Studies. 3 Hours.
This course will introduce the students to the health care industry, and will consist of lectures, readings, discussions, and visiting professionals. While the principal goal will be to inform students of the necessary skills needed to succeed in the health care field, a secondary goal will have the student be able to articulate the background to almost any article relating to the challenges of national health care.
HS 121. Medical Terminology. 3 Hours.
This course introduces students to the language used in describing and coding of clinical visits, medical procedures and on medical forms. The ability to understand complex medical terms will be gained by the analysis of prefixes, word roots and suffixes. Coding of diseases (ICD-9) and medical insurance language will also be emphasized.

HS 299. Topic./. 1-3 Hour.
This course is intended to provide the opportunity to offer courses in health care studies that would not normally be a part of the Husson curriculum. As such the topics will depend upon the interests of students and faculty.

HS 301. Introduction to Public Health. 3 Hours.
This course is an introductory overview of the U.S. Public Health System with an emphasis on the core areas of public health, challenges and strategies for working with communities, and specific health issues that impact the health of the population. We will look at environmental and behavior factors associated with health promotion and disease prevention and view different national programs and programs going on in Maine.

HS 311. Healthcare Management and Organization. 3 Hours.
This course will introduce junior year students to the complexity of healthcare organizations and how they are managed. An overview of the historical development of the modern healthcare organization, as well as the contemporary management roles and functions within them, will be reviewed. Measuring performance and quality improvement will also be taught. The importance of the roles of physicians, nurses, as well as other professionals and support staff will be highlighted. Theories of healthcare leadership will also be explored. Prerequisite(s): (HS 101) or (Major=MS Occupational Therapy and (College Level=Grad Freshman or College Level=Grad Sophomore or College Level=Grad Junior or College Level=Grad Senior)).

HS 321. Healthcare Law and Ethics. 3 Hours.
This course is a summation and integration of Ethics and Law within the context of healthcare delivery. The class will be introduced to the ethical and moral considerations of the healthcare professions by exploring their historical development. Students will also discover how the law influences the healthcare profession and be introduced to our complex legal structure through exposure to case law and regulations. Prerequisite(s): HS 101 and HS 121 and PH 110.

HS 401. Medical Databases. 3 Hours.
This course is designed as a continuation of HS 121 (medical terminology) and MI 214. Students will learn about and contrast different types of electronic medical record systems. They will learn how to transfer and share data with people from same clinics to people outside of the system and learn about the ethical and legal issues of sharing data. Prerequisite(s): HS 121 and (MI 111 or MI 214).

HS 411. Health Economics and Policy. 3 Hours.
This course will introduce senior Health Care Studies students to beginning healthcare economics and its influence on health policy. The course will emphasize the economic issues of scarcity, choice, supply and demand, marginal analysis, substitutes, and externalities as they relate to health care policies. National health insurance, as a rapidly evolving idea for the future, will also be analyzed and evaluated. Prerequisite(s): HS 101 and HS 311.

HS 421. Health Care Studies Senior Experience. 3 Hours.
This course combines students past course work into one research project. Each student will be required to plan and carry out an investigation into some health area of interest and write-up and report their experiences and results to the whole class. In addition they will put together a portfolio, resume and cover letter for a job of their choice. Prerequisite(s): Major=BS Health Care Studies.

HS 491. Health Care Studies Internship. 3-6 Hours.
This course offers the students experiences in a work and/or research environment dedicated to health care or public health. Each student chooses and contacts a hospital, clinic, health center, public health department or health care business and spends a total of 100 hours in that setting. Activities will include training/orientation, work on projects relevant to the mission of the agency, observation of agency work processes, and other assigned work from the site liaison. Students keep daily journals and meet three times during the semester for training and to share their experiences. Prerequisite(s): Major=BS Health Care Studies and (College Level=Junior or College Level=Senior).

HS 499. Topic/. 1-6 Hour.
This course is intended to provide the opportunity to offer advanced courses in health care studies that would not normally be a part of the Husson curriculum. As such the topics will depend upon the interests of students and faculty.

B.S. Business Administration - Interdisciplinary Program of Study (IPS)/M.B.A.

The Program
Students must complete an approved program of study that demonstrates a broad base in business administration, and also demonstrates a significant concentration of study in two or more distinct business concentrations.

It is expected that the approved program of study be filed with the Dean of Business as soon as possible but preferably prior to beginning course work as a third year student (> 60 credit hours). In the event that program approval is sought after beginning the third year’s work, an academic program totaling more than 153 credit hours may be required in order to satisfy all requirements.

Basic Guidelines
All approved IPS programs leading to the degree of Bachelor’s of Business Administration will incorporate the following features, including:

1. All required General Education requirements;
2. All general business courses;
3. Business electives as necessary to support the development of at least two (2) areas of concentration totaling 30 credit hours (including at least 15 hours completed at Husson with a 2.0 grade point average or better among these courses), resulting in a comprehensive program of study totaling not less than 124 credit hours;
4. 30 credit hours of graduate business courses.

In addition to the program objectives of the B.S. Business Administration degree, this concentration requires students to demonstrate the learning outcomes for the two relative concentrations chosen from the College
of Business. Thus, students should refer to the corresponding learning outcomes for those concentrations.

Students must also achieve the program objectives of the MBA degree.

The following curriculum should be followed by the Advisor and student to ensure that all degree requirements are met.

**Courses**

**BA 101. Introduction to Business. 3 Hours.**
This course introduces students to the general nature of functional areas in business such as marketing, management, accounting, finance, research and development, and risk management. The relationship between business, the government, the economy, and the environment is examined.

**BA 111. Economic Geography. 3 Hours.**
This course is an introduction to the principles of economic geography, ranging from physical and biological geography to cultural and political factors. The decision making processes, both local and global, for different types of service oriented, manufacturing, transportation, and resource based businesses will be examined. The relationship of natural resources, population, and culture, and how such factors affect economic activity will be emphasized.

**BA 201. Business Law I. 3 Hours.**
This course provides students with a basic knowledge of the law of contracts, personal property and real property.

**BA 202. Business Law II. 3 Hours.**
This course is intended to augment BA 201 with in depth analysis of the law in Contracts, UCC, Corporations, Principal Agency Law, Advanced Tort Law, Environmental Law, Real Property Law, Securities Law and Employment Law.

**BA 204. Franchise Formation and Management. 3 Hours.**
This class will discuss franchise formation and management with particular emphasis on the discovery and evaluation of the franchisor and the feasibility of entrepreneurs converting an existing business into a franchise chain or creating and selling new franchises, domestic and international. Franchise accounting and finance (borrowing or leveraging) will be covered, as well as, taking the franchise to the stock market or going public (IPO) and raising investment capital. Prerequisite(s): BA 401.

**BA 205. Real Estate Law. 3 Hours.**
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

**BA 210. Economics Overview for Non-Business Majors. 3 Hours.**
This is an overview of microeconomic and macroeconomic concepts for non-business majors. It will include an introduction to American capitalism including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of competitive firms. It will also be an introduction to national income accounts, unemployment, inflation, government fiscal policy and monetary policy.

**BA 211. Microeconomics. 3 Hours.**
This is an introduction to American capitalism and microeconomic concepts including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of purely and impurely competitive firms.

**BA 212. Macroeconomics. 3 Hours.**
This is an introduction to macroeconomics in the American economy: national income accounts, unemployment, inflation, government fiscal policy, monetary policy and economic growth.
BA 220. Real Estate Principles and Practices. 3 Hours.
This course will provide students with methods of analyzing acquisition and retention of Real Estate. Also, there will be a focus on the skills and techniques required to operate a real estate business, including trust accounts, risk management, and property management.

BA 243. The Business of Innovation. 3 Hours.
This is a cross-disciplinary class that will introduce students to the Lean Startup Scientific Method for developing and commercializing ideas for new ventures or else innovating and developing new products or business models within existing companies. Topics include marketplace innovations, technology and science based innovations, marketplace hypothesis development and testing, frugal and agile engineering, business models, intellectual property, prototyping, exit strategies, and fundraising. Lab component is integrated within module deliverables.

BA 271. Risk Management. 3 Hours.
A study is made of the risks encountered by individuals and business firms. A presentation is made of the basic principles and institutions, which have been developed in risk management. This material is treated primarily from the consumer point of view.

BA 299. Topic/. 1 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 300. Business Presentations. 3 Hours.
Communication is a vital function of any business. Managers at all levels must be able to communicate effectively to advance their career and ensure the success of their organization. This course will give students a working knowledge of how to create, brief, and present information across the organizational communications spectrum. Students will learn how to think critically and apply problem solving skills across a variety of historical and contemporary business topics. Students will learn how to collect, analyze, synthesize, and present information in a professional manner to assorted audiences in different venues. The foundational skill set developed in this course is the ability for students to articulate their ideas in a professional manner within a variety of business settings. Prerequisite(s): EH 124.

BA 302. Business Ethics. 3 Hours.
This course is designed to raise a moral consciousness and sensitivity within the various disciplines of the business curriculum. The disciplines focused on here are business, accounting, marketing, multinational corporations, and those areas of human resource management inclusive of diversity in the workplace within the context of environmental and social responsibility.

BA 306. Franchise Law. 3 Hours.
This is a law class that analyzes all the issues of Franchise Law with a particular emphasis on Contracts, Principal/Agent Franchise Relations, Corporate Formation of Franchises, and Securities Law. Prerequisite(s): BA 201 and BA 202.

BA 310. Organization and Management. 3 Hours.
This course focuses on how to design organization systems and effectively manage them. Students completing the course should understand the universal process of management and key terminology in the language of management. Students are encouraged conceptually to blend contributions from the various schools of management thought into an integrated perspective of what managers do and why.

BA 311. Human Resource Management. 3 Hours.
This course addresses traditional personnel administration issues. Emphasis in the course is on how to manage the major human resource administration functions of job design, reward system design, staffing, training and performance control, to achieve maximum employee performance and satisfaction. Prerequisite(s): BA 310 or (Major=BS Criminal Justice or Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Paralegal or Major=BS English - Prelaw).

BA 312. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics include leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 321. Marketing Principles. 3 Hours.
The course covers the language and issues of marketing with an emphasis on developing responsive marketing strategies that meet customer needs. The course focuses on marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing. Other topics will be incorporated into the course including the external environment (focus on integrative topics within marketing, such as economics, politics, government, and nature), marketing research, international/global marketing with relevance to cultural diversity, ethics, the impact of technology on marketing, and careers in marketing.

BA 334. International Economics. 3 Hours.
This applied economics course will emphasize the use of cases to study topics such as comparative advantage, treaties, tariffs, non-tariff trade barriers, and trade blocks among developed and developing nations. Prerequisite(s): BA 211 and BA 212.

BA 344. Personal Financial Planning. 3 Hours.
This course provides comprehensive coverage of personal financial planning in the areas of money management, axes, consumer credit, housing and other consumer decisions, legal protection, insurance, retirement planning, and estate planning. Prerequisite(s): MS 141 or MS 111 or MS 242 or MS 180 or MS 181.

BA 351. Internship. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 352. Internship II. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.
BA 353. Internship III. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 354. Internship IV. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 355. Internship V. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 362. Financial Management I. 3 Hours.
The foundation finance course covers basic personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management. Students are expected to become proficient in financial analysis of a corporation and in various aspects of corporate financial management. Prerequisite(s): BA 351 and BA 352 and BA 353 and BA 354.

BA 364. Financial Management II. 3 Hours.
The course is a continuation of Financial Management I and will cover such topics as real options, sensitivity, scenario and break-even analysis, basic issues regarding stocks and bonds, risk/return and cost of capital, capital structure and limits to the use of debt. Prerequisite(s): BA 362.

BA 375. Supply Chain Management. 3 Hours.
This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategies to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.

BA 401. Managerial Economics. 3 Hours.
This course is designed to close the gap between economic theory and business application. It reviews traditional analysis and shows its application to the understanding and solution of economic problems of the firm and industry. Prerequisite(s): BA 211 and BA 212.

BA 411. Organizational Behavior. 3 Hours.
This course is highly experiential in its approach to helping students understand and appreciate why people behave the way they do in an organizational context. Students learn how to manage employee behavior by analysis of real world phenomena and by application of principles in the areas of human perception and communication, leadership and motivation, small group dynamics, organizational culture, and organizational change. Prerequisite(s): BA 310.

BA 413. Operations Management. 3 Hours.
Quantitative model building and manipulation are a means of analyzing and synthesizing the elements of productions management. Both deterministic and stochastic modeling are emphasized in the areas of work systems design, queuing, PERT, SQC, inventory control, forecasting, and linear and nonlinear programming. Prerequisite(s): BA 310 and MS 132.

BA 414. Business Strategy. 3 Hours.
This Business Administration senior seminar focuses on decision making at the executive management level, the formulation of strategy, and its implementation in the organization. The course will employ case studies, laboratory simulation techniques, and computer spreadsheet analysis. Prerequisite(s): College Level+Senior.

BA 421. Integrated Marketing Communication and Advertising. 3 Hours.
An introduction into the world of advertising. Students will plan and design ad campaigns, write copy and design layouts for the different types/forms of advertising. The students will work with local companies and assist them in redesign of their ad campaigns. Prerequisite(s): BA 321.

BA 422. Sales and Sales Management. 3 Hours.
This course provides students with the fundamentals of good salesmanship and sales management. Prior to studying management principles students practice sales techniques in simulations. Cases are used to illustrate and evaluate principles of sales management. Prerequisite(s): BA 321.

BA 423. Retail Management. 3 Hours.
The purpose of this course is to provide students with an understanding of the fundamentals of successful retail operations. Topics included are the market concept in retailing, factors of area and market analysis, and aspects of organizational structure, layout, and personnel planning. Also covered are methods of pricing, merchandising planning, inventory, expense control and sales promotion techniques. Prerequisite(s): BA 321.

BA 424. Marketing Research. 3 Hours.
The basic research concepts and practices as applied to the analysis of marketing problems are examined. Topics include sources of data, collecting data, sampling, questionnaire construction, tabulating data, and report preparation; computerized statistical software is used. Prerequisite(s): BA 321 and MS 132.

BA 425. Marketing Management. 3 Hours.
This is the capstone course for marketing majors. Students apply concepts learned in other courses to marketing problems of business and nonprofit organizations. Cases and business simulations are used to teach decision-making in the complex environment of business. A complete marketing plan for a simulated company of the student’s choice summarizes the student’s knowledge of the field. Prerequisite(s): BA 321.
BA 426. Real Estate Market, Research and Analysis. 3 Hours.
This course will discuss market research, real estate sales, property valuations and analysis. Students will examine market research reports to gain insight into product and market trends, opportunities, projections, and growth in the Maine, the US and global real estate markets. Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 427. Franchise Market Research and Analysis. 3 Hours.
This class will focus on analysis of market demographics, feasibility studies, product pricing, promotion and distribution, franchise broker contacts, extrapolation of sales and expenses, and the projection of costs and net profits, emerging markets and capital expansion. Prerequisite(s): BA 401 and MS 132 and MS 232 and BA 362.

BA 428. Strategic Selling. 3 Hours.
This course builds on the fundamentals of selling. The student will understand how to advance sales in light of complex business environments consisting of layers of buyers, decision makers and those who influence purchasing decisions. A strategic account planning process will be analyzed and applied to real companies by way of case studies. The art and skill of negotiating will be studied and learned through role play. Prerequisite(s): BA 422.

BA 434. International Finance. 3 Hours.
The factors affecting exchange rates are discussed, as well as different types of exchange rate systems and how governments attempt to influence exchange rates. The relationships among interest rate parity, purchasing power parity, the Fisher effect and International Fisher effect and exchange rates are analyzed. Students learn how currency futures, currency options and money market hedges are used to hedge exchange rate risk. Prerequisite(s): BA 362.

BA 437. International Marketing. 3 Hours.
The basics of international marketing will be taught including the foundations of culture, cultural understanding, business customs and practices in global marketing, assessing global markets, and developing international marketing strategy. Prerequisite(s): BA 321.

BA 438. Export-Import Procedures. 3 Hours.
The basics of export-import procedures will be taught including justification for exporting/importing, market planning methods, selection of appropriate marketing mix variables, and regulation. Prerequisite(s): BA 321.

BA 439. International Franchising Management. 3 Hours.
This course will focus on international expansion of franchises, learning the culture, monetary exchanges, imports and exports, local international market analysis and much more. Prerequisite(s): BA 204 and BA 306 and BA 427.

BA 440. Small Business Management I. 3 Hours.
This course supplies prospective and current small business managers with the essential concepts of starting and operating small businesses. Topics covered include: environment and management of small business enterprise, problems in starting small businesses, financial and administrative control, and management of business operations. Particular emphasis is placed on the interrelated nature of the components, particularly as they affect the financial picture of the firm. Through a lecture and discussion format, students are expected to share their own experiences in small businesses with their fellow students. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 441. Entrepreneurship I- New Venture Development. 3 Hours.
Students will be introduced to the practical application of classic and contemporary business theory as it applies to the early stages of entrepreneurship and intrapreneurship, opportunity recognition, innovation, and new venture development. Course topics include types of entrepreneurs, opportunity recognition, marketing, cash and other resource requirements, financial statements, planning, franchising, intellectual property, success/failure/resilience, and growth. Class will use text, cases, articles, internet sources, and guest lecturers. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 442. Applied Small Business Management. 3 Hours.
This is an advanced course which focuses on real problems in Small Business Management, using the case approach. Cases are drawn from the text, from actual local small businesses, and from the practical experience of students in the class. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 443. Entrepreneurship II: Business Plans. 3 Hours.
This class builds on BA 441, New Venture Development. The focus of this class is on the early stages of formalizing and growing a venture. Topics include business plan writing, fund raising and cash flow, measuring and conveying financial position, core strategy development and competitive advantage, sustainability, international entrepreneurship, supply chain, growth, and exit. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 460. Investments. 3 Hours.
Beginning with an introduction to financial markets and investment instruments, topics include stock and bond quotations and trading procedures, rate of return, margin trading, stock indexes, stock and bond valuation, risk and return, portfolio theory, active and passive portfolio management, and investment performance evaluation. Prerequisite(s): BA 362.

BA 464. Bank & Financial Services Management. 3 Hours.
This course will introduce students to the specific issues in the financial management of a banking firm and, to a smaller degree, of other financial intermediaries. Emphasis will be on products, roles, regulatory framework, and risk management. Prerequisite(s): BA 362.

BA 465. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 471. Life and Health Insurance. 3 Hours.
This course is intended to provide background knowledge for personal application and for those responsible for administering benefit plans for employees; it provides the necessary information required to pass the State of Maine license examination. Prerequisite(s): BA 271.

BA 472. Casualty and Property Insurance. 3 Hours.
The first part of the course introduces the basics of the entire insurance business, including a summary of legal aspects, types of insurers and principles of reinsurance; next, each type of insurance is studied in detail. Topics covered are fire, consequential loss, inland marine, ocean marine, theft and surety, liability and miscellaneous property insurance. Prerequisite(s): BA 271.
BA 473. Real Estate Appraisal. 3 Hours.
This course familiarizes the student with the foundation and principles of the appraisal process. The student will become familiar with the three approaches to value. Site valuation, construction costs, depreciation; comparables selection and adjustments; rental multipliers; and reconciliation will be discussed. The student will focus on the elements making up the standards for professional appraisal practice. These elements, i.e., Definitions, Rules, Standards and Standard Rules, Statements and advisory opinions are discussed in detail along with the philosophy and history of USPAP. Prerequisite(s): BA 401 and MS 132 and BA 362.

BA 475. E-Business and E-Commerce for Managers. 3 Hours.
This course teaches the basic e-business and e-commerce theory. The students will apply the theory through the development of a website for the prime purpose of marketing a product or service or idea online.

BA 490. International Business. 3 Hours.
This course covers the international dimensions of managerial decision-making including: world economies, international trade theories, tariffs, quotas and other trade issues, global strategic planning, cross-cultural management, international market entry, international human resource management, international organization strategy, international logistics, import/export operations, currency exchange, international financial management. Current developments in global economic and business are emphasized; students participate in a computerized simulation throughout the semester. Prerequisite(s): BA 310 and BA 321.

BA 495. Senior Management Project. 3 Hours.
An experiential course that gives seniors the opportunity to apply what they have learned in class to a real business situation. Prerequisite(s): College Level=Senior.

BA 496. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 497. Business and Culture Travel Study Course. 3 Hours.
Business and Culture Travel Study course is designed to expose students to economies across the world. During the course students will travel to important commercial, cultural and governmental cities. Through a combination of readings students will be exposed to 20th and 21st century history, economics, culture political and business philosophy. The course will also involve visits to major multinational corporations, cultural activities and lectures from University business faculty when available. The course will also have two pre-trip class sessions with readings and one post course session to wrap up the experience and discuss the student travel logs.

BA 498. Business Seminar. 3 Hours.
This honors course requires the study of various business problems under the supervision of members of the Department of Business Administration. A paper is required. An oral examination is scheduled as the final examination in the course. Prerequisite(s): College Level=Senior.

BA 499. Topic/. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 600. Research Methods in Business and Education. 3 Hours.
This course is designed for beginning graduate students who have little or no formal preparation in those areas of research and problem-solving essential for a comprehensive study of business and education at the graduate level. Emphasis is placed on the identification of common problem types and the selection and use of appropriate methods of analysis (primarily statistical in nature).

BA 601. Managerial Economics. 3 Hours.
This course begins with a comprehensive overview of micro- and macroeconomic concepts with the aim of developing within students a picture of how business and nonprofit organizations relate to the economy as a whole. The course then focuses on practical applications of economic analysis to problems of concern to managers. Case studies and projects are used to demonstrate the methods used to determine economic feasibility and cost-effectiveness of products, services, and programs.

BA 602. Managerial Accounting. 3 Hours.
This is an accelerated accounting course for those with little or no formal accounting background. The emphasis is on concepts which managers need to know in order to be effective. Topics include the preparation and interpretation of financial statements, cost planning and control, cost-volume-profit analysis, decision-making models, master budgeting and variances, and evaluation of capital projects.

BA 605. Management Communications. 3 Hours.
This is an advanced communications course that builds upon a student’s experience and prior undergraduate coursework in writing and oral communications. Topics include: advanced business writing, use of visual materials, selection of secondary sources of information, report preparation, and presentations to small and large groups.

BA 611. Organizational Behavior. 3 Hours.
This course surveys the major field of management, examining structures and processes on both group and organizational levels. Both traditional and contemporary theories are analyzed and applied to business operations.

BA 620. Financial Management. 3 Hours.
Topics considered include financial planning, operating and capital budgets, cash flow, purchasing and accounting procedures, the sources and uses of corporate and institutional funds, and financial analysis for evaluation and control. Students develop projects specifically related to their needs in educational administration, small business, or corporate management. Prerequisite(s): BA 602 or AC 301.

BA 621. Marketing Management. 3 Hours.
This course focuses on complex problems facing decision-makers in the marketing of goods and services. Emphasis is placed on the decision-making process, including assessment of the social, economic, and political environment in which the organization operates; problem definition; development and evaluation of alternatives, and the implementation of the best alternative. Cases in advertising, sales, marketing research, and strategic marketing management provide practice in marketing analysis and decision-making.

BA 622. Production Management. 3 Hours.
Emphasis is placed on the use of quantitative techniques for solving manufacturing problems. The student is given an opportunity to practice mathematical model-building and manipulation. Other topics considered include queuing system design, plant layout, statistical quality control, inventory modeling, Program Evaluation and Review Technique (PERT), linear and nonlinear programming, and control theory.
BA 625. Global Strategic Management. 3 Hours.
This course focuses on the strategic challenges and opportunities confronting firms that undertake to create value and to compete in the global economy. Successful companies develop strategies for doing business in emerging markets that are different from those they use at home and often find novel ways of implementing them too. The class will make extensive use of case analysis and discussion to evaluate and understand the strategic issues that confront firms operating internationally, as well as to appreciate the importance of values and ethics in organization decisions and actions. In this course we will probe the workings of business strategies in transition and emerging economies, gain an understanding of the strategies of local firms, and analyze the international success and failure of companies. Prerequisite(s): BA 600 and 15 Credits From Range [BA 600 To BA 799].

BA 626. Accounting in Planning, Budgeting and Control. 3 Hours.
This course examines the role of accounting in the planning, budgeting, and control process of a business in a dynamic environment. The integration of measuring and analyzing (planning), short-term decisions and managing organizations (control), and preparing various budgets (budgeting) are emphasized. This course is designed as a continuation of BA602 Managerial Accounting. Numerical problems, as well as case studies, are utilized as methods of study. Prerequisite(s): BA 602 or AC 211.

BA 627. Investment Analysis. 3 Hours.
This course provides a detailed description of securities market organization and approaches to investment opportunities. Students will examine theories used in the valuation of financial securities and employ projects and applications to develop a real world understanding of portfolio management. Prerequisite(s): BA 602.

BA 628. New Venture Planning and Management. 3 Hours.
This course deals with the foundation of new ventures and related aspects of managing the small growing enterprise. Techniques taught in this course are equally applicable to small businesses, nonprofit organizations, and new ventures of larger organizations. Topics include: use of scarce resources, such as money, talent and technological expertise; identification of environmental threats and opportunities; and operational considerations such as organizational structure, legal requirements, financing, and accounting procedures.

BA 641. Human Resource Management. 3 Hours.
This course explores human resource management as an integrated process of planning and control designed to achieve high employee productivity and job satisfaction. The course focuses on the essential functions of human resource management as they apply both to the general supervisory responsibilities of every manager and to the specific operations of the personnel department.

BA 642. Leadership in Business and Professions. 3 Hours.
This course is designed to provide graduate management students with a comprehensive review of the essentials for effective leadership. It focuses on the identification of basic leadership styles, explores the theoretical and practical findings of research in leadership development, and seeks to synthesize the student's leadership style with the most effective working models of leadership.

BA 643. Strategic Change Management. 3 Hours.
Strategic Change Management focuses on the skills required to deal effectively with organizational change. The course addresses first the pressures in the business environment that make change a fundamental reality for managers. Particular attention is paid to change arising from public policy initiatives that impinge on business. The course then examines the manager as change agent responsible for initiating innovation and explores both the personal skills required in the role of change agent and the tools and techniques available to support the manager in that role. The course also examines the problems and opportunities of those who are the recipients of change in an organization and the skills required to cope effectively with that situation.

BA 644. The Legal Environment of Business. 3 Hours.
This course will provide an overview of the important aspects of business law for executives, managers, accountants, and other professionals. The areas of law covered include but are not limited to administrative, contract, corporate and other business organizations, employment relations, real estate, taxes, and UCC sales.

BA 646. Current Issues in Business. 3 Hours.
This course, conducted in seminar fashion, draws on current literature to analyze contemporary and emerging issues facing management in the late twentieth century. Content will vary.

BA 700. Health Care Management. 3 Hours.
This course examines management problems and policy-making in the health care industry. Several areas are considered including: (1) the functions of the health care manager, (2) the types of health care delivery systems, (3) the administration of hospitals, (4) the financing of medical care, and (5) the role of government. Through readings, lectures, discussions, and projects, students clarify their own role in the delivery of health services. The course regularly draws on experts in health planning and health care administration.

BA 701. Legal Environment of Health Care Management. 3 Hours.
The course provides a foundation in the legal and regulatory framework in which health care institutions operate. Students will also examine the legal issues confronting health care managers including director and administrative liability, malpractice, negligence, patient rights and confidentiality, licensure requirements, and the like.

BA 702. Health Care Economics. 3 Hours.
In this course, the principles and tools of economic decision-making are applied to management in the health care sector. The course explores the application to health care management functions of such concepts and processes as supply and demand, resource allocation and utilization, costing and pricing, resource productivity, forecasting and economic aspects of planning, and utilization review. While the principal emphasis in the course is on micro-economic analysis, some consideration is also given to an economic analysis of public policy alternatives for the delivery of health care service. Prerequisite(s): BA 601.

BA 703. Financial Management in Healthcare Organizations. 3 Hours.
This course applies the perspectives and tools of financial analysis to the management of health care organizations and evaluation of organizational performance. Topics covered include capital budgeting, sources of operating revenue, management of cash and inventories, risk analysis and forecasting. Particular attention is paid to cost containment regulatory strategies and their implications for financial planning and management. Prerequisite(s): BA 602.
BA 704. Managing Quality in Healthcare. 3 Hours.
This course examines methods and tools for managing quality in health facilities, physician practices, managed care, and public health. Topics include developments in quality assurance and improvement, utilization review, risk management, and patient satisfaction.

BA 705. Global Perspectives in Healthcare. 3 Hours.
This course examines the social, political, and economic aspects of global healthcare issues. Through a comparative analysis of the health systems of multiple nations, students will compare theories of health policy and priorities, healthcare system facilities, workforce, technology, cost, quality, and access. The emphasis of the course will be on health management strategies used in different countries and healthcare systems to mobilize, allocate, and maintain resources to improve the healthcare status and delivery systems.

BA 710. Law & Ethics for Non-Profit Organizations. 3 Hours.
Non-profit managers and supervisors are held to a higher standard of ethical behavior due to the nature of their funding sources and their mission. This course is designed to develop in the student a basic understanding of the laws governing non-profit organizations, the practical applications of these laws and the ethics that are demanded of non-profit managers.

BA 711. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues specific to managing and leading non-profit organizations. Topics covered include: leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 712. Strategic Marketing for Nonprofit Organizations. 3 Hours.
This course applies the concepts of marketing and strategy to the management of non-profit organizations. Through class lectures, discussion, case studies, and applied projects, students will build an understanding of the marketing process in the non-profit environment in order to be able to design, implement, and evaluate an organization's approach to marketing and strategic positioning.

BA 713. Fundraising. 3 Hours.
This course takes a systems approach to the process of fund-raising. Topics covered include: donor cultivation, use of the annual fund, major gifts, corporate giving, and grant writing.

BA 720. Advanced Sales and Marketing in Hospitality. 3 Hours.
This course focuses on difficult problems and issues facing sales and marketing personnel in the hospitality industry. Students will make use of case studies in order to develop their decision-making process including the use of marketing research and analysis.

BA 721. Convention Planning and Events Planning. 3 Hours.
This course focuses on the rapidly growing convention sales and events planning industries. The student will learn how to design, plan, market and manage meetings and events.

BA 722. Advanced Front Office Operations. 3 Hours.
This course begins with detailed introduction about numerous aspects of front office operations and management. The next section of the course examines the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.

BA 723. Legal Issues in Hospitality Management. 3 Hours.
This course will provide the student an overview of the important aspects of Hospitality Law for Managers, and other professionals. Some of the areas of study include and are not limited to Torts, Products Liability, Constitutional Law and Criminal Law and many other subjects.

BA 724. Managing Service. 3 Hours.
This course begins with an introduction to the framework for providing quality service to customers and guests. Next we will discuss the needs of the customer/guest and proceed to develop our menu and/or product accordingly. Finally, we will learn how management and staff create loyal customers and guests by delivering service that exceeds their expectations.

BA 729. Hospitality Graduate Directed Practicum. 3 Hours.
Each student will find, will choose or will be provided with an internship site. The site chosen will be based on; and interview conducted by the management of the internship site and the student’s preference of location based on those available. The Coordinator of Hospitality Management will have the final decision on all internship site placements. The Coordinator's decision will be based on his or her interaction with the student during previous course work, his or her understanding of the student and the internship properties requirements. Every consideration will be given to the student’s personal preferences with regard to location and types of property. However, the student’s preferences will not be the only consideration for placement. Prerequisite(s): BA 720 and BA 722 and BA 724.

BA 731. Business and Information Technology. 3 Hours.
This graduate course approaches Information Technology from the perspective of information consumers as opposed to technology implementers. During this course, students will examine various technologies and their application within modern organizations. The course has two primary goals. (1) The course will explain information technologies in non-technical terms so that students can evaluate a technology’s effectiveness relative to any existing alternatives and the overall organizational needs. (2) This course should increase student awareness regarding how they interact with technology in a personal or business setting. Business leaders are constantly bombarded with technology. This course addresses the need to sift through that information in an intelligent manner and make smart business decisions.

BA 741. Staffing & Selection. 3 Hours.
A source of competitive advantage for any organization is its talent. The effectiveness of an organization depends on the performance of each individual in that organization. Hence, one of the most important human resource functions is that of staffing the organization. This course is essential for HR professionals who are responsible for recruiting, screening, hiring, promoting, and outplacing employees. It is also very crucial for any line managers, supervisors, team leaders, and hiring managers who are involved in recruiting, making promotions, succession, or any other workforce decisions. An examination of the scientific, legal, and administrative issues associated with the recruitment, selection, employment and retention of individuals by organizations augments the study. Specific attention will be given to the current challenges of an increasingly dynamic workplace and diverse workforce.

BA 742. Training & Development. 3 Hours.
The effective training and development of human resources creates tremendous and unique value for an organization. This course examines how organizations can develop and manage the talents and skillset of human capital. The course explores topics such as training needs analysis, formulating training objectives, and the design, implementation, and evaluation of training and development programs.
BA 745. Innovative Global Strategy. 3 Hours.
This course will build students’ awareness of the challenges that must be addressed and the opportunities that may be present when competing in the global marketplace. The course focuses on how firms apply innovative strategies to create a sustainable competitive advantage in the global arena. Course content will be drawn from readings, case analysis, online content and discussions. The course requires students to analyze and understand real world examples of both successful and unsuccessful global strategy implementation.

BA 750. Fundamentals of Risk Management. 3 Hours.
This course explores the fundamentals of risk management. After discussion of the importance of risk and the rationale for its management in organizations, the remainder of the course will analyze the process of and methods for managing risk.

BA 751. Employee Benefits. 3 Hours.
This course explores the nature and operation of employer-sponsored benefit plans. Emphasis is placed on plan design, administration, funding, and regulation. The course also addresses organizational characteristics, benefit structure, and pricing of risk transfer schemes for groups.

BA 752. Crisis Management. 3 Hours.
Crisis Management can be defined as a communications response to an event that has a negative impact on an audience - the public, customers/clients, employees, shareholders, etc. Examples of such events could include tainted food, a corporate leak, a political scandal, an entertainment or athletic scandal, damaged products that cause or could potentially cause life-threatening situations, natural disasters, terrorism, and financial disasters. In this course, students will analyze and critique high-profile cases and learn how to effectively respond to crises.

BA 753. Corporate Risk Management. 3 Hours.
Corporate risk is analyzed through the lens of enterprise risk management. This course explores the operational and financial risks faced by firms and the study of various methods of handling these risks.

BA 754. Strategic Selling. 3 Hours.
The focus of this course is on key, strategic customer selling approaches. The process of sales planning and strategy development for these types of customers will be emphasized. The objective of this course is to understand and execute sales strategies for managing major and large customers.

BA 760. Technology & Innovation. 3 Hours.
BA 760 Technology & Innovation offers a research approach to identifying, analyzing, and creating technological advantage in nascent and mature industries. Students will apply the methodologies of innovation and discovery to business settings and markets, seeking to create competitive advantage and achieve market transformation through strategic initiatives that redefine consumer expectations and industry practices and reframe organizations to embrace innovative practices and processes.

BA 761. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 762. Groupthink. 3 Hours.
This course explores the origin of groupthink. Groupthink is a term first used by social psychologist Irving L. Janis (1972) that refers to a psychological phenomenon in which people strive for consensus within a group. This course explores groupthink as a phenomenon where people set aside their own personal beliefs or adopt the opinion of the rest of the group.

BA 763. Biotechnology & Innovation: Intellectual Property. 3 Hours.
This course focuses on the protection of proprietary and intellectual rights in inventions, writings, creative works, software, industry trade secrets, industry trade designations, and other intellectual assets at the International, Federal, and State Levels. The course will give special consideration to the emergence of new areas of patent law in Biotechnology and Pharmaceutical fields, examining not only the patentability of intellectual assets, but also the discovery process, particularly in collaborative environments involving multiple organizations and institutions, and the qualifying distinctions between collaborative and competitive research.

BA 790. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.*

BA 791. Professional Project. 3-6 Hours.
This course is used to award graduate credit for prior learning and educational experience obtained outside of the traditional classroom. Through the preparation of a professional project, students provide formal documentation of the specific graduate-level learning competencies which they have acquired through prior experience. A maximum of six (6) credit hours may be earned.

BA 792. Graduate Internship I. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 793. Graduate Internship II. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization’s supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 792.

BA 794. Graduate Internship III. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.
Students must also achieve the program objectives of the MBA degree.

BA 796. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 798. Thesis. 6 Hours.
The thesis may be library-oriented research with extensive reliance on documents and a relatively limited amount of primary field research, or it may be action-oriented field research with relevant documentation from the literature. The title of the thesis topic must be filed with the graduate committee. A student, with the approval of his/her advisory committee, may register for the thesis after completion of twenty-four (24) semester hours.

BA 799. Topic/. 3 Hours.
Students work together in a seminar setting under the direction of a member of the graduate faculty. The content of the seminar will vary according to the interests of students and faculty involved.

B.S. Business Administration - International Business/M.B.A.
Students in the International Business concentration study the international dimensions of managerial decision-making including: world economies, international trade theories, tariffs, quotas and other trade issues, global strategic planning, cross-cultural management, international market entry, international human resource management, international organization strategy, international logistics, import/export operations, currency exchange, international financial management. Current developments in global economics, finance, marketing and exporting-importing are emphasized.

As part of a capstone experience, students participate in a computerized simulation which provides experiential learning incorporating all areas of international business and business administration studies. Further, experience with hands-on micro-lending prepares students beyond the traditional classroom education.

In addition to the program objectives of the B.S. Business Administration degree, this concentration requires students to utilize cross cultural literacy in the analysis of foreign political, economic, and legal systems.

Students must also achieve the program objectives of the MBA degree.

Courses

BA 101. Introduction to Business. 3 Hours.
This course introduces students to the general nature of functional areas in business such as marketing, management, accounting, finance, research and development, and risk management. The relationship between business, the government, the economy, and the environment is examined.

BA 111. Economic Geography. 3 Hours.
This course is an introduction to the principles of economic geography, ranging from physical and biological geography to cultural and political factors. The decision making processes, both local and global, for different types of service oriented, manufacturing, transportation, and resource based businesses will be examined. The relationship of natural resources, population, and culture, and how such factors affect economic activity will be emphasized.

BA 201. Business Law I. 3 Hours.
This course provides students with a basic knowledge of the law of contracts, personal property and real property.

BA 202. Business Law II. 3 Hours.
This course is intended to augment BA 201 with in depth analysis of the law in Contracts, UCC, Corporations, Principal Agency Law, Advanced Tort Law, Environmental Law, Real Property Law, Securities Law and Employment Law.

BA 204. Franchise Formation and Management. 3 Hours.
This class will discuss franchise formation and management with particular emphasis on the discovery and evaluation of the franchisor and the feasibility of entrepreneurs converting an existing business into a franchise chain or creating and selling new franchises, domestic and international. Franchise accounting and finance (borrowing or leveraging) will be covered, as well as, taking the franchise to the stock market or going public (IPO) and raising investment capital. Prerequisite(s): BA 401.

BA 205. Real Estate Law. 3 Hours.
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

BA 210. Economics Overview for Non-Business Majors. 3 Hours.
This is an overview of microeconomic and macroeconomic concepts for non-business majors. It will include an introduction to American capitalism including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of competitive firms. It will also be an introduction to national income accounts, unemployment, inflation, government fiscal policy and monetary policy.
BA 211. Microeconomics. 3 Hours.
This is an introduction to American capitalism and microeconomic concepts including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of purely and imperfectly competitive firms.

BA 212. Macroeconomics. 3 Hours.
This is an introduction to macroeconomics in the American economy: national income accounts, unemployment, inflation, government fiscal policy, monetary policy and economic growth.

BA 220. Real Estate Principles and Practices. 3 Hours.
This course will provide students with methods of analyzing acquisition and retention of Real Estate. Also, there will be a focus on the skills and techniques required to operate a real estate business, including trust accounts, risk management, and property management.

BA 243. The Business of Innovation. 3 Hours.
This is a cross-disciplinary class that will introduce students to the Lean Startup Scientific Method for developing and commercializing ideas for new ventures or else innovating and developing new products or business models within existing companies. Topics include marketplace innovations, technology and science based innovations, marketplace hypothesis development and testing, frugal and agile engineering, business models, intellectual property, prototyping, exit strategies, and fundraising. Lab component is integrated within module deliverables.

BA 271. Risk Management. 3 Hours.
A study is made of the risks encountered by individuals and business firms. A presentation is made of the basic principles and institutions, which have been developed in risk management. This material is treated primarily from the consumer point of view.

BA 299. Topic(s). 1 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 300. Business Presentations. 3 Hours.
Communication is a vital function of any business. Managers at all levels must be able to communicate effectively to advance their career and ensure the success of their organization. This course will give students a working knowledge of how to create, brief, and present information across the organizational communications spectrum. Students will learn how to think critically and apply problem solving skills across a variety of historical and contemporary business topics. Students will learn how to collect, analyze, synthesize, and present information in a professional manner to assorted audiences in different venues. The foundational skill set developed in this course is the ability for students to articulate their ideas in a professional manner within a variety of business settings. Prerequisite(s): EH 124.

BA 302. Business Ethics. 3 Hours.
This course is designed to raise a moral consciousness and sensitivity within the various disciplines of the business curriculum. The disciplines focused on here are business, accounting, marketing, multinational corporations, and those areas of human resource management inclusive of diversity in the workplace within the context of environmental and social responsibility.

BA 306. Franchise Law. 3 Hours.
This is a law class that analyzes all the issues of Franchise Law with a particular emphasis on Contracts, Principal/Agent Franchise Relations, Corporate Formation of Franchises, and Securities Law. Prerequisite(s): BA 201 and BA 202.

BA 310. Organization and Management. 3 Hours.
This course focuses on how to design organization systems and effectively manage them. Students completing the course should understand the universal process of management and key terminology in the language of management. Students are encouraged conceptually to blend contributions from the various schools of management thought into an integrated perspective of what managers do and why.

BA 311. Human Resource Management. 3 Hours.
This course addresses traditional personnel administration issues. Emphasis in the course is on how to manage the major human resource administration functions of job design, reward system design, staffing, training and performance control, to achieve maximum employee performance and satisfaction. Prerequisite(s): BA 310 or (Major=BS Criminal Justice or Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Paralegal or Major=BS English - Prelaw).

BA 312. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics include leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 321. Marketing Principles. 3 Hours.
The course covers the language and issues of marketing with an emphasis on developing responsive marketing strategies that meet customer needs. The course focuses on marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing. Other topics will be incorporated into the course including the external environment (focus on integrative topics within marketing, such as economics, politics, government, and nature), marketing research, international/global marketing with relevance to cultural diversity, ethics, the impact of technology on marketing, and careers in marketing.

BA 334. International Economics. 3 Hours.
This applied economics course will emphasize the use of cases to study topics such as comparative advantage, treaties, tariffs, non-tariff trade barriers, and trade blocks among developed and developing nations. Prerequisite(s): BA 211 and BA 212.

BA 344. Personal Financial Planning. 3 Hours.
This course provides comprehensive coverage of personal financial planning in the areas of money management, axes, consumer credit, housing and other consumer decisions, legal protection, insurance, retirement planning, and estate planning. Prerequisite(s): MS 141 or MS 111 or MS 242 or MS 180 or MS 181.

BA 351. Internship. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.
BA 352. Internship II. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 353. Internship III. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 354. Internship IV. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 355. Internship V. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 356. Financial Management I. 3 Hours.
The foundation finance course covers basic personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management. Students are expected to become proficient in financial analysis of a corporation and in various aspects of corporate financial management. Prerequisite(s): AC 121 and (AC 122 or AC 211) and BA 211 and (MS 141 or MS 111 or MS 242 or MS 180 or MS 181).

BA 354. Financial Management II. 3 Hours.
The course is a continuation of Financial Management I and will cover such topics as real options, sensitivity, scenario and break-even analysis, basic issues regarding stocks and bonds, risk/return and cost of capital, capital structure and limits to the use of debt. Prerequisite(s): BA 352.

BA 357. Supply Chain Management. 3 Hours.
This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategies to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.

BA 401. Managerial Economics. 3 Hours.
This course is designed to close the gap between economic theory and business application. It reviews traditional analysis and shows its application to the understanding and solution of economic problems of the firm and industry. Prerequisite(s): BA 211 and BA 212.

BA 411. Organizational Behavior. 3 Hours.
This course is highly experiential in its approach to helping students understand and appreciate why people behave the way they do in an organizational context. Students learn how to manage employee behavior by analysis of real world phenomena and by application of principles in the areas of human perception and communication, leadership and motivation, small group dynamics, organizational culture, and organizational change. Prerequisite(s): BA 310.

BA 413. Operations Management. 3 Hours.
Quantitative model building and manipulation are a means of analyzing and synthesizing the elements of productions management. Both deterministic and stochastic modeling are emphasized in the areas of work systems design, queuing, PERT, SQC, inventory control, forecasting, and linear and nonlinear programming. Prerequisite(s): BA 310 and MS 132.

BA 414. Business Strategy. 3 Hours.
This Business Administration senior seminar focuses on decision making at the executive management level, the formulation of strategy, and its implementation in the organization. The course will employ case studies, laboratory simulation techniques, and computer spreadsheet analysis. Prerequisite(s): College Level-Senior.

BA 421. Integrated Marketing Communication and Advertising. 3 Hours.
An introduction into the world of advertising: Students will plan and design Ad campaigns, write copy and design layouts for the different types/forms of advertising. The students will work with local companies and assist them in redesign of their ad campaigns. Prerequisite(s): BA 321.

BA 422. Sales and Sales Management. 3 Hours.
This course provides students with the fundamentals of good salesmanship and sales management. Prior to studying management principles students practice sales techniques in simulations. Cases are used to illustrate and evaluate principles of sales management. Prerequisite(s): BA 321.

BA 423. Retail Management. 3 Hours.
The purpose of this course is to provide students with an understanding of the fundamentals of successful retail operations. Topics included are the market concept in retailing, factors of area and market analysis, and aspects of organizational structure, layout, and personnel planning. Also covered are methods of pricing, merchandising planning, inventory, expense control and sales promotion techniques. Prerequisite(s): BA 321.

BA 424. Marketing Research. 3 Hours.
The basic research concepts and practices as applied to the analysis of marketing problems are examined. Topics include sources of data, collecting data, sampling, questionnaire construction, tabulating data, and report preparation; computerized statistical software is used. Prerequisite(s): BA 321 and MS 132.

BA 425. Marketing Management. 3 Hours.
This is the capstone course for marketing majors. Students apply concepts learned in other courses to marketing problems of business and nonprofit organizations. Cases and business simulations are used to teach decision-making in the complex environment of business. A complete marketing plan for a simulated company of the student’s choice summarizes the student’s knowledge of the field. Prerequisite(s): BA 321.
Prerequisite(s): College Level=Senior or College Level=Junior.

BA 426. Real Estate Market, Research and Analysis. 3 Hours.
This course will discuss market research, real estate sales, property valuations and analysis. Students will examine market research reports to gain insight into product and market trends, opportunities, projections, and growth in the Maine, the US and global real estate markets.
Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 427. Franchise Market Research and Analysis. 3 Hours.
This class will focus on analysis of market demographics, feasibility studies, product pricing, promotion and distribution, franchise broker contacts, extrapolation of sales and expenses, and the projection of costs and net profits, emerging markets and capital expansion. Prerequisite(s): BA 401 and MS 132 and MS 232 and BA 362.

BA 428. Strategic Selling. 3 Hours.
This course builds on the fundamentals of selling. The student will understand how to advance sales in light of complex business environments consisting of layers of buyers, decision makers and those who influence purchasing decisions. A strategic account planning process will be analyzed and applied to real companies by way of case studies. The art and skill of negotiating will be studied and learned through role play. Prerequisite(s): BA 422.

BA 434. International Finance. 3 Hours.
The factors affecting exchange rates are discussed, as well as different types of exchange rate systems and how governments attempt to influence exchange rates. The relationships among interest rate parity, purchasing power parity, the Fisher effect and International Fisher effect and exchange rates are analyzed. Students learn how currency futures, currency options and money market hedges are used to hedge exchange rate risk. Prerequisite(s): BA 362.

BA 437. International Marketing. 3 Hours.
The basics of international marketing will be taught including the foundations of culture, cultural understanding, business customs and practices in global marketing, assessing global markets, and developing international marketing strategy. Prerequisite(s): BA 321.

BA 438. Export-Import Procedures. 3 Hours.
The basics of export-import procedures will be taught including justification for exporting/importing, market planning methods, selection of appropriate marketing mix variables, and regulation. Prerequisite(s): BA 321.

BA 439. International Franchising Management. 3 Hours.
This course will focus on international expansion of franchises, learning the culture, monetary exchanges, imports and exports, local international market analysis and much more. Prerequisite(s): BA 204 and BA 306 and BA 427.

BA 440. Small Business Management I. 3 Hours.
This course supplies prospective and current small business managers with the essential concepts of starting and operating small businesses. Topics covered include: environment and management of small business enterprise, problems in starting small businesses, financial and administrative control, and management of business operations. Particular emphasis is placed on the interrelated nature of the components, particularly as they affect the financial picture of the firm. Through a lecture and discussion format, students are expected to share their own experiences in small businesses with their fellow students.
Prerequisite(s): College Level=Senior or College Level=Junior.

BA 441. Entrepreneurship I- New Venture Development. 3 Hours.
Students will be introduced to the practical application of classic and contemporary business theory as it applies to the early stages of entrepreneurship and intrapreneurship, opportunity recognition, innovation, and new venture development. Course topics include types of entrepreneurs, opportunity recognition, marketing, cash and other resource requirements, financial statements, planning, franchising, intellectual property, success/failure/resilience, and growth. Class will use text, cases, articles, internet sources, and guest lecturers.
Prerequisite(s): College Level=Senior or College Level=Junior.

BA 442. Applied Small Business Management. 3 Hours.
This is an advanced course which focuses on real problems in Small Business Management, using the case approach. Cases are drawn from the text, from actual local small businesses, and from the practical experience of students in the class. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 443. Entrepreneurship II: Business Plans. 3 Hours.
This class builds on BA 441, New Venture Development. The focus of this class is on the early stages of formalizing and growing a venture. Topics include business plan writing, fund raising and cash flow, measuring and conveying financial position, core strategy development and competitive advantage, sustainability, international entrepreneurship, supply chain, growth, and exit. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 460. Investments. 3 Hours.
Beginning with an introduction to financial markets and investment instruments, topics include stock and bond quotations and trading procedures, rate of return, margin trading, stock indexes, stock and bond valuation, risk and return, portfolio theory, active and passive portfolio management, and investment performance evaluation. Prerequisite(s): BA 362.

BA 464. Bank & Financial Services Management. 3 Hours.
This course will introduce students to the specific issues in the financial management of a banking firm and, to a smaller degree, of other financial intermediaries. Emphasis will be on products, roles, regulatory framework, and risk management. Prerequisite(s): BA 362.

BA 465. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 471. Life and Health Insurance. 3 Hours.
This course is intended to provide background knowledge for personal application and for those responsible for administering benefit plans for employees; it provides the necessary information required to pass the State of Maine license examination. Prerequisite(s): BA 271.

BA 472. Casualty and Property Insurance. 3 Hours.
The first part of the course introduces the basics of the entire insurance business, including a summary of legal aspects, types of insurers and principles of reinsurance; next, each type of insurance is studied in detail. Topics covered are fire, consequential loss, inland marine, ocean marine, theft and surety, liability and miscellaneous property insurance.
Prerequisite(s): BA 271.
BA 473. Real Estate Appraisal. 3 Hours.
This course familiarizes the student with the foundation and principles of the appraisal process. The student will become familiar with the three approaches to value. Site valuation, construction costs, depreciation; comparables selection and adjustments; rental multipliers; and reconciliation will be discussed. The student will focus on the elements making up the standards for professional appraisal practice. These elements, i.e., Definitions, Rules, Standards and Standard Rules, Statements and advisory opinions are discussed in detail along with the philosophy and history of USPAP. Prerequisite(s): BA 401 and MS 132 and BA 362.

BA 475. E-Business and E-Commerce for Managers. 3 Hours.
This course teaches the basic e-business and e-commerce theory. The students will apply the theory through the development of a website for the prime purpose of marketing a product or service or idea online.

BA 490. International Business. 3 Hours.
This course covers the international dimensions of managerial decision-making including: world economies, international trade theories, tariffs, quotas and other trade issues, global strategic planning, cross-cultural management, international market entry, international human resource management, international organization strategy, international logistics, import/export operations, currency exchange, international financial management. Current developments in global economic and business are emphasized; students participate in a computerized simulation throughout the semester. Prerequisite(s): BA 310 and BA 321.

BA 495. Senior Management Project. 3 Hours.
An experiential course that gives seniors the opportunity to apply what they have learned in class to a real business situation. Prerequisite(s): College Level=Senior.

BA 496. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 497. Business and Culture Travel Study Course. 3 Hours.
Business and Culture Travel Study course is designed to expose students to economies across the world. During the course students will travel to important commercial, cultural and governmental cities. Through a combination of readings students will be exposed to 20th and 21st century history, economics, culture political and business philosophy. The course will also involve visits to major multinational corporations, cultural activities and lectures from University business faculty when available. The course will also have two pre-trip class sessions with readings and one post course session to wrap up the experience and discuss the student travel logs.

BA 498. Business Seminar. 3 Hours.
This honors course requires the study of various business problems under the supervision of members of the Department of Business Administration. A paper is required. An oral examination is scheduled as the final examination in the course. Prerequisite(s): College Level=Senior.

BA 499. Topic/. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 600. Research Methods in Business and Education. 3 Hours.
This course is designed for beginning graduate students who have little or no formal preparation in those areas of research and problem-solving essential for a comprehensive study of business and education at the graduate level. Emphasis is placed on the identification of common problem types and the selection and use of appropriate methods of analysis (primarily statistical in nature).

BA 601. Managerial Economics. 3 Hours.
This course begins with a comprehensive overview of micro- and macroeconomic concepts with the aim of developing within students a picture of how business and nonprofit organizations relate to the economy as a whole. The course then focuses on practical applications of economic analysis to problems of concern to managers. Case studies and projects are used to demonstrate the methods used to determine economic feasibility and cost-effectiveness of products, services, and programs.

BA 602. Managerial Accounting. 3 Hours.
This is an accelerated accounting course for those with little or no formal accounting background. The emphasis is on concepts which managers need to know in order to be effective. Topics include the preparation and interpretation of financial statements, cost planning and control, cost-volume-profit analysis, decision-making models, master budgeting and variances, and evaluation of capital projects.

BA 605. Management Communications. 3 Hours.
This is an advanced communications course that builds upon a student’s experience and prior undergraduate coursework in writing and oral communications. Topics include: advanced business writing, use of visual materials, selection of secondary sources of information, report preparation, and presentations to small and large groups.

BA 611. Organizational Behavior. 3 Hours.
This course surveys the major field of management, examining structures and processes on both group and organizational levels. Both traditional and contemporary theories are analyzed and applied to business operations.

BA 620. Financial Management. 3 Hours.
Topics considered include financial planning, operating and capital budgets, cash flow, purchasing and accounting procedures, the sources and uses of corporate and institutional funds, and financial analysis for evaluation and control. Students develop projects specifically related to their needs in educational administration, small business, or corporate management. Prerequisite(s): BA 602 or AC 301.

BA 621. Marketing Management. 3 Hours.
This course focuses on complex problems facing decision-makers in the marketing of goods and services. Emphasis is placed on the decision-making process, including assessment of the social, economic, and political environment in which the organization operates; problem definition; development and evaluation of alternatives, and the implementation of the best alternative. Cases in advertising, sales, marketing research, and strategic marketing management provide practice in marketing analysis and decision-making.

BA 622. Production Management. 3 Hours.
Emphasis is placed on the use of quantitative techniques for solving manufacturing problems. The student is given an opportunity to practice mathematical model-building and manipulation. Other topics considered include queuing system design, plant layout, statistical quality control, inventory modeling, Program Evaluation and Review Technique (PERT), linear and nonlinear programming, and control theory.
BA 625. Global Strategic Management. 3 Hours.
This course focuses on the strategic challenges and opportunities confronting firms that undertake to create value and to compete in the global economy. Successful companies develop strategies for doing business in emerging markets that are different from those they use at home and often find novel ways of implementing them too. The class will make extensive use of case analysis and discussion to evaluate and understand the strategic issues that confront firms operating internationally, as well as to appreciate the importance of values and ethics in organization decisions and actions. In this course we will probe the workings of business strategies in transition and emerging economies, gain an understanding of the strategies of local firms, and analyze the international success and failure of companies. Prerequisite(s): BA 600 and 15 Credits From Range [BA 600 To BA 799].

BA 626. Accounting in Planning, Budgeting and Control. 3 Hours.
This course examines the role of accounting in the planning, budgeting, and control process of a business in a dynamic environment. The integration of measuring and analyzing (planning), short-term decisions and managing organizations (control), and preparing various budgets (budgeting) are emphasized. This course is designed as a continuation of BA602 Managerial Accounting. Numerical problems, as well as case studies, are utilized as methods of study. Prerequisite(s): BA 602 or AC 211.

BA 627. Investment Analysis. 3 Hours.
This course provides a detailed description of securities market organization and approaches to investment opportunities. Students will examine theories used in the valuation of financial securities and employ projects and applications to develop a real world understanding of portfolio management. Prerequisite(s): BA 602.

BA 628. New Venture Planning and Management. 3 Hours.
This course deals with the foundation of new ventures and related aspects of managing the small growing enterprise. Techniques taught in this course are equally applicable to small businesses, nonprofit organizations, and new ventures of larger organizations. Topics include: use of scarce resources, such as money, talent and technological expertise; identification of environmental threats and opportunities; and operational considerations such as organizational structure, legal requirements, financing, and accounting procedures.

BA 641. Human Resource Management. 3 Hours.
This course explores human resource management as an integrated process of planning and control designed to achieve high employee productivity and job satisfaction. The course focuses on the essential functions of human resource management as they apply both to the general supervisory responsibilities of every manager and to the specific operations of the personnel department.

BA 642. Leadership in Business and Professions. 3 Hours.
This course is designed to provide graduate management students with a comprehensive review of the essentials for effective leadership. It focuses on the identification of basic leadership styles, explores the theoretical and practical findings of research in leadership development, and seeks to synthesize the student’s leadership style with the most effective working models of leadership.

BA 643. Strategic Change Management. 3 Hours.
Strategic Change Management focuses on the skills required to deal effectively with organizational change. The course addresses first the pressures in the business environment that make change a fundamental reality for managers. Particular attention is paid to change arising from public policy initiatives that impinge on business. The course then examines the manager as change agent responsible for initiating innovation and explores both the personal skills required in the role of change agent and the tools and techniques available to support the manager in that role. The course also examines the problems and opportunities of those who are the recipients of change in an organization and the skills required to cope effectively with that situation.

BA 644. The Legal Environment of Business. 3 Hours.
This course will provide an overview of the important aspects of business law for executives, managers, accountants, and other professionals. The areas of law covered include but are not limited to administrative, contract, corporate and other business organizations, employment relations, real estate, taxes, and UCC sales.

BA 646. Current Issues in Business. 3 Hours.
This course, conducted in seminar fashion, draws on current literature to analyze contemporary and emerging issues facing management in the late twentieth century. Content will vary.

BA 700. Health Care Management. 3 Hours.
This course examines management problems and policy-making in the health care industry. Several areas are considered including: (1) the functions of the health care manager, (2) the types of health care delivery systems, (3) the administration of hospitals, (4) the financing of medical care, and (5) the role of government. Through readings, lectures, discussions, and projects, students clarify their own role in the delivery of health services. The course regularly draws on experts in health planning and health care administration.

BA 701. Legal Environment of Health Care Management. 3 Hours.
The course provides a foundation in the legal and regulatory framework in which health care institutions operate. Students will also examine the legal issues confronting health care managers including director and administrative liability, malpractice, negligence, patient rights and confidentiality, licensure requirements, and the like.

BA 702. Health Care Economics. 3 Hours.
In this course, the principles and tools of economic decision-making are applied to management in the health care sector. The course explores the application to health care management functions of such concepts and processes as supply and demand, resource allocation and utilization, costing and pricing, resource productivity, forecasting and economic aspects of planning, and utilization review. While the principal emphasis in the course is on micro-economic analysis, some consideration is also given to an economic analysis of public policy alternatives for the delivery of health care service. Prerequisite(s): BA 601.

BA 703. Financial Management in Healthcare Organizations. 3 Hours.
This course applies the perspectives and tools of financial analysis to the management of health care organizations and evaluation of organizational performance. Topics covered include capital budgeting, sources of operating revenue, management of cash and inventories, risk analysis and forecasting. Particular attention is paid to cost containment regulatory strategies and their implications for financial planning and management. Prerequisite(s): BA 602.
BA 704. Managing Quality in Healthcare. 3 Hours.
This course examines methods and tools for managing quality in health facilities, physician practices, managed care, and public health. Topics include developments in quality assurance and improvement, utilization review, risk management, and patient satisfaction.

BA 705. Global Perspectives in Healthcare. 3 Hours.
This course examines the social, political, and economic aspects of global healthcare issues. Through a comparative analysis of the health systems of multiple nations, students will compare theories of health policy and priorities, healthcare system facilities, workforce, technology, cost, quality, and access. The emphasis of the course will be on health management strategies used in different countries and healthcare systems to mobilize, allocate, and maintain resources to improve the healthcare status and delivery systems.

BA 710. Law & Ethics for Non-Profit Organizations. 3 Hours.
Non-profit managers and supervisors are held to a higher standard of ethical behavior due to the nature of their funding sources and their mission. This course is designed to develop in the student a basic understanding of the laws governing non-profit organizations, the practical applications of these laws and the ethics that are demanded of non-profit managers.

BA 711. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues specific to managing and leading non-profit organizations. Topics covered include: leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 712. Strategic Marketing for Nonprofit Organizations. 3 Hours.
This course applies the concepts of marketing and strategy to the management of non-profit organizations. Through class lectures, discussion, case studies, and applied projects, students will build an understanding of the marketing process in the non-profit environment in order to be able to design, implement, and evaluate an organization’s approach to marketing and strategic positioning.

BA 713. Fundraising. 3 Hours.
This course takes a systems approach to the process of fund-raising. Topics covered include: donor cultivation, use of the annual fund, major gifts, corporate giving, and grant writing.

BA 720. Advanced Sales and Marketing in Hospitality. 3 Hours.
This course focuses on difficult problems and issues facing sales and marketing personnel in the hospitality industry. Students will make use of case studies in order to develop their decision-making process including the use of marketing research and analysis.

BA 721. Convention Planning and Events Planning. 3 Hours.
This course focuses on the rapidly growing convention sales and events planning industries. The student will learn how to design, plan, market and manage meetings and events.

BA 722. Advanced Front Office Operations. 3 Hours.
This course begins with detailed introduction about numerous aspects of front office operations and management. The next section of the course examines the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.

BA 723. Legal Issues in Hospitality Management. 3 Hours.
This course will provide the student an overview of the important aspects of Hospitality Law for Managers, and other professionals. Some of the areas of study include and are not limited to Torts, Products Liability, Constitutional Law and Criminal Law and many other subjects.

BA 724. Managing Service. 3 Hours.
This course begins with an introduction to the framework for providing quality service to customers and guests. Next we will discuss the needs of the customer/guest and proceed to develop our menu and/or product accordingly. Finally, we will learn how management and staff create loyal customers and guests by delivering service that exceeds their expectations.

BA 729. Hospitality Graduate Directed Practicum. 3 Hours.
Each student will find, will choose or will be provided with an internship site. The site chosen will be based on; and interview conducted by the management of the internship site and the student’s preference of location based on those available. The Coordinator of Hospitality Management will have the final decision on all internship site placements. The Coordinator’s decision will be based on his or her interaction with the student during previous course work, his or her understanding of the student and the internship properties requirements. Every consideration will be given to the student’s personal preferences with regard to location and types of property. However, the student’s preferences will not be the only consideration for placement. Prerequisite(s): BA 720 and BA 722 and BA 724.

BA 731. Business and Information Technology. 3 Hours.
This graduate course approaches Information Technology from the perspective of information consumers as opposed to technology implementers. During this course, students will examine various technologies and their application within modern organizations. The course has two primary goals. (1) The course will explain information technologies in non-technical terms so that students can evaluate a technology's effectiveness relative to any existing alternatives and the overall organizational needs. (2) This course should increase student awareness regarding how they interact with technology in a personal or business setting. Business leaders are constantly bombarded with technology. This course addresses the need to sift through that information in an intelligent manner and make smart business decisions.

BA 741. Staffing & Selection. 3 Hours.
A source of competitive advantage for any organization is its talent. The effectiveness of an organization depends on the performance of each individual in that organization. Hence, one of the most important human resource functions is that of staffing the organization. This course is essential for HR professionals who are responsible for recruiting, screening, hiring, promoting, and outplacing employees. It is also very crucial for any line managers, supervisors, team leaders, and hiring managers who are involved in recruiting, making promotions, succession, or any other workforce decisions. An examination of the scientific, legal, and administrative issues associated with the recruitment, selection, employment and retention of individuals by organizations augments the study. Specific attention will be given to the current challenges of an increasingly dynamic workplace and diverse workforce.

BA 742. Training & Development. 3 Hours.
The effective training and development of human resources creates tremendous and unique value for an organization. This course examines how organizations can develop and manage the talents and skillset of human capital. The course explores topics such as training needs analysis, formulating training objectives, and the design, implementation, and evaluation of training and development programs.
BA 745. Innovative Global Strategy. 3 Hours.
This course will build students' awareness of the challenges that must be addressed and the opportunities that may be present when competing in the global marketplace. The course focuses on how firms apply innovative strategies to create a sustainable competitive advantage in the global arena. Course content will be drawn from readings, case analysis, online content and discussions. The course requires students to analyze and understand real world examples of both successful and unsuccessful global strategy implementation.

BA 750. Fundamentals of Risk Management. 3 Hours.
This course explores the fundamentals of risk management. After discussion of the importance of risk and the rationale for its management in organizations, the remainder of the course will analyze the process of and methods for managing risk.

BA 751. Employee Benefits. 3 Hours.
This course explores the nature and operation of employer-sponsored benefit plans. Emphasis is placed on plan design, administration, funding, and regulation. The course also addresses organizational characteristics, benefit structure, and pricing of risk transfer schemes for groups.

BA 752. Crisis Management. 3 Hours.
Crisis Management can be defined as a communications response to an event that has a negative impact on an audience - the public, customers/clients, employees, shareholders, etc. Examples of such events could include tainted food, a corporate leak, a political scandal, an entertainment or athletic scandal, damaged products that cause or could potentially cause life-threatening situations, natural disasters, terrorism, and financial disasters. In this course, students will analyze and critique high-profile cases and learn how to effectively respond to crises.

BA 753. Corporate Risk Management. 3 Hours.
Corporate risk is analyzed through the lens of enterprise risk management. This course explores the operational and financial risks faced by firms and the study of various methods of handling these risks.

BA 754. Strategic Selling. 3 Hours.
The focus of this course is on key, strategic customer selling approaches. The process of sales planning and strategy development for these types of customers will be emphasized. The objective of this course is to understand and execute sales strategies for managing major and large customers.

BA 760. Technology & Innovation. 3 Hours.
BA 760 Technology & Innovation offers a research approach to identifying, analyzing, and creating technological advantage in nascent and mature industries. Students will apply the methodologies of innovation and discovery to business settings and markets, seeking to create competitive advantage and achieve market transformation through strategic initiatives that redefine consumer expectations and industry practices and reframe organizations to embrace innovative practices and processes.

BA 761. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 762. Groupthink. 3 Hours.
This course explores the origin of groupthink. Groupthink is a term first used by social psychologist Irving L. Janis (1972) that refers to a psychological phenomenon in which people strive for consensus within a group. This course explores groupthink as a phenomenon where people set aside their own personal beliefs or adopt the opinion of the rest of the group.

BA 763. Biotechnology & Innovation: Intellectual Property. 3 Hours.
This course focuses on the protection of proprietary and intellectual rights in inventions, writings, creative works, software, industry trade secrets, industry trade designations, and other intellectual assets at the international, Federal, and State Levels. The course will give special consideration to the emergence of new areas of patent law in Biotechnology and Pharmaceutical fields, examining not only the patentability of intellectual assets, but also the discovery process, particularly in collaborative environments involving multiple organizations and institutions, and the qualifying distinctions between collaborative and competitive research.

BA 790. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.*

BA 791. Professional Project. 3-6 Hours.
This course is used to award graduate credit for prior learning and educational experience obtained outside of the traditional classroom. Through the preparation of a professional project, students provide formal documentation of the specific graduate-level learning competencies which they have acquired through prior experience. A maximum of six (6) credit hours may be earned.

BA 792. Graduate Internship I. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 793. Graduate Internship II. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization's supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 792.

BA 794. Graduate Internship III. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.
BA 796. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 798. Thesis. 6 Hours.
The thesis may be library-oriented research with extensive reliance on documents and a relatively limited amount of primary field research, or it may be action-oriented field research with relevant documentation from the literature. The title of the thesis topic must be filed with the graduate committee. A student, with the approval of his/her advisory committee, may register for the thesis after completion of twenty-four (24) semester hours.

BA 799. Topic/. 3 Hours.
Students work together in a seminar setting under the direction of a member of the graduate faculty. The content of the seminar will vary according to the interests of students and faculty involved.

B.S. Business Administration - Management/MBA

Students in the Management concentration study organization systems and methods of management for staff, supervisors and administrators. These management theories apply to corporations, small businesses, and non-profit organizations. Students take courses that cover strategic decision making, policy, organizational theory and behavior, marketing, human resource management, sales and operations.

In addition to the program objectives of the B.S. Business Administration degree, this concentration requires students to integrate and apply administrative and organizational principles and theory to human resource management, decision making, operations management and other systems.

Students must also achieve the program objectives of the MBA degree.

Concentration in Management

Total Hours 54

Courses

BA 101. Introduction to Business. 3 Hours.
This course introduces students to the general nature of functional areas in business such as marketing, management, accounting, finance, research and development, and risk management. The relationship between business, the government, the economy, and the environment is examined.

BA 111. Economic Geography. 3 Hours.
This course is an introduction to the principles of economic geography, ranging from physical and biological geography to cultural and political factors. The decision making processes, both local and global, for different types of service oriented, manufacturing, transportation, and resource based businesses will be examined. The relationship of natural resources, population, and culture, and how such factors affect economic activity will be emphasized.

BA 201. Business Law I. 3 Hours.
This course provides students with a basic knowledge of the law of contracts, personal property and real property.

BA 202. Business Law II. 3 Hours.
This course is intended to augment BA 201 with in depth analysis of the law in Contracts, UCC, Corporations, Principal Agency Law, Advanced Tort Law, Environmental Law, Real Property Law, Securities Law and Employment Law.

BA 204. Franchise Formation and Management. 3 Hours.
This class will discuss franchise formation and management with particular emphasis on the discovery and evaluation of the franchisor and the feasibility of entrepreneurs converting an existing business into a franchise chain or creating and selling new franchises, domestic and international. Franchise accounting and finance (borrowing or leveraging) will be covered, as well as, taking the franchise to the stock market or going public (IPO) and raising investment capital. Prerequisite(s): BA 401.

BA 205. Real Estate Law. 3 Hours.
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

BA 210. Economics Overview for Non-Business Majors. 3 Hours.
This is an overview of microeconomic and macroeconomic concepts for non-business majors. It will include an introduction to American capitalism including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of competitive firms. It will also be an introduction to national income accounts, unemployment, inflation, government fiscal policy and monetary policy.

BA 211. Microeconomics. 3 Hours.
This is an introduction to American capitalism and microeconomic concepts including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of purely and impurely competitive firms.
BA 212. Macroeconomics. 3 Hours.
This is an introduction to macroeconomics in the American economy: national income accounts, unemployment, inflation, government fiscal policy, monetary policy and economic growth.

BA 220. Real Estate Principles and Practices. 3 Hours.
This course will provide students with methods of analyzing acquisition and retention of Real Estate. Also, there will be a focus on the skills and techniques required to operate a real estate business, including trust accounts, risk management, and property management.

BA 243. The Business of Innovation. 3 Hours.
This is a cross-disciplinary class that will introduce students to the Lean Startup Scientific Method for developing and commercializing ideas for new ventures or else innovating and developing new products or business models within existing companies. Topics include marketplace innovations, technology and science based innovations, marketplace hypothesis development and testing, frugal and agile engineering, business models, intellectual property, prototyping, exit strategies, and fundraising. Lab component is integrated within module deliverables.

BA 271. Risk Management. 3 Hours.
A study is made of the risks encountered by individuals and business firms. A presentation is made of the basic principles and institutions, which have been developed in risk management. This material is treated primarily from the consumer point of view.

BA 299. Topic/ 1 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 300. Business Presentations. 3 Hours.
Communication is a vital function of any business. Managers at all levels must be able to communicate effectively to advance their career and ensure the success of their organization. This course will give students a working knowledge of how to create, brief, and present information across the organizational communications spectrum. Students will learn how to think critically and apply problem solving skills across a variety of historical and contemporary business topics. Students will learn how to collect, analyze, synthesize, and present information in a professional manner to assorted audiences in different venues. The foundational skill set developed in this course is the ability for students to articulate their ideas in a professional manner within a variety of business settings. Prerequisite(s): EH 124.

BA 302. Business Ethics. 3 Hours.
This course is designed to raise a moral consciousness and sensitivity within the various disciplines of the business curriculum. The disciplines focused on here are business, accounting, marketing, multinational corporations, and those areas of human resource management inclusive of diversity in the workplace within the context of environmental and social responsibility.

BA 306. Franchise Law. 3 Hours.
This is a law class that analyzes all the issues of Franchise Law with a particular emphasis on Contracts, Principal/Agent Franchise Relations, Corporate Formation of Franchises, and Securities Law. Prerequisite(s): BA 201 and BA 202.

BA 310. Organization and Management. 3 Hours.
This course focuses on how to design organization systems and effectively manage them. Students completing the course should understand the universal process of management and key terminology in the language of management. Students are encouraged conceptually to blend contributions from the various schools of management thought into an integrated perspective of what managers do and why.

BA 311. Human Resource Management. 3 Hours.
This course addresses traditional personnel administration issues. Emphasis in the course is on how to manage the major human resource administration functions of job design, reward system design, staffing, training and performance control, to achieve maximum employee performance and satisfaction. Prerequisite(s): BA 310 or ( Major=BS Criminal Justice or Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Paralegal or Major=BS English - Prelaw).

BA 312. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics include leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 321. Marketing Principles. 3 Hours.
The course covers the language and issues of marketing with an emphasis on developing responsive marketing strategies that meet customer needs. The course focuses on marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing. Other topics will be incorporated into the course including the external environment (focus on integrative topics within marketing, such as economics, politics, government, and nature), marketing research, international/global marketing with relevance to cultural diversity, ethics, the impact of technology on marketing, and careers in marketing.

BA 334. International Economics. 3 Hours.
This applied economics course will emphasize the use of cases to study topics such as comparative advantage, treaties, tariffs, non-tariff trade barriers, and trade blocks among developed and developing nations. Prerequisite(s): BA 211 and BA 212.

BA 344. Personal Financial Planning. 3 Hours.
This course provides comprehensive coverage of personal financial planning in the areas of money management, axes, consumer credit, housing and other consumer decisions, legal protection, insurance, retirement planning, and estate planning. Prerequisite(s): MS 141 or MS 111 or MS 242 or MS 180 or MS 181.

BA 351. Internship. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.
BA 352. Internship II. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 353. Internship III. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 354. Internship IV. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 355. Internship V. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 351 and BA 352 and BA 353 and BA 354.

BA 362. Financial Management I. 3 Hours.
The foundation finance course covers basic personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management. Students are expected to become proficient in financial analysis of a corporation and in various aspects of corporate financial management. Prerequisite(s): AC 121 and (AC 122 or AC 211) and BA 211 and (MS 141 or MS 111 or MS 242 or MS 180 or MS 181).

BA 364. Financial Management II. 3 Hours.
The course is a continuation of Financial Management I and will cover such topics as real options, sensitivity, scenario and break-even analysis, basic issues regarding stocks and bonds, risk/return and cost of capital, capital structure and limits to the use of debt. Prerequisite(s): BA 362.

BA 375. Supply Chain Management. 3 Hours.
This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategies to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.

BA 401. Managerial Economics. 3 Hours.
This course is designed to close the gap between economic theory and business application. It reviews traditional analysis and shows its application to the understanding and solution of economic problems of the firm and industry. Prerequisite(s): BA 211 and BA 212.

BA 411. Organizational Behavior. 3 Hours.
This course is highly experiential in its approach to helping students understand and appreciate why people behave the way they do in an organizational context. Students learn how to manage employee behavior by analysis of real world phenomena and by application of principles in the areas of human perception and communication, leadership and motivation, small group dynamics, organizational culture, and organizational change. Prerequisite(s): BA 310.

BA 413. Operations Management. 3 Hours.
Quantitative model building and manipulation are a means of analyzing and synthesizing the elements of productions management. Both deterministic and stochastic modeling are emphasized in the areas of work systems design, queuing, PERT, SQC, inventory control, forecasting, and linear and nonlinear programming. Prerequisite(s): BA 310 and MS 132.

BA 414. Business Strategy. 3 Hours.
This Business Administration senior seminar focuses on decision making at the executive management level, the formulation of strategy, and its implementation in the organization. The course will employ case studies, laboratory simulation techniques, and computer spreadsheet analysis. Prerequisite(s): College Level=Senior.

BA 421. Integrated Marketing Communication and Advertising. 3 Hours.
An introduction into the world of advertising: Students will plan and design Ad campaigns, write copy and design layouts for the different types/forms of advertising. The students will work with local companies and assist them in redesign of their ad campaigns. Prerequisite(s): BA 321.

BA 422. Sales and Sales Management. 3 Hours.
This course provides students with the fundamentals of good salesmanship and sales management. Prior to studying management principles students practice sales techniques in simulations. Cases are used to illustrate and evaluate principles of sales management. Prerequisite(s): BA 321.

BA 423. Retail Management. 3 Hours.
The purpose of this course is to provide students with an understanding of the fundamentals of successful retail operations. Topics included are the market concept in retailing, factors of area and market analysis, and aspects of organizational structure, layout, and personnel planning. Also covered are methods of pricing, merchandise planning, inventory, expense control and sales promotion techniques. Prerequisite(s): BA 321.

BA 424. Marketing Research. 3 Hours.
The basic research concepts and practices as applied to the analysis of marketing problems are examined. Topics include sources of data, collecting data, sampling, questionnaire construction, tabulating data, and report preparation; computerized statistical software is used. Prerequisite(s): BA 321 and MS 132.

BA 425. Marketing Management. 3 Hours.
This is the capstone course for marketing majors. Students apply concepts learned in other courses to marketing problems of business and nonprofit organizations. Cases and business simulations are used to teach decision-making in the complex environment of business. A complete marketing plan for a simulated company of the student’s choice summarizes the student’s knowledge of the field. Prerequisite(s): BA 321.
BA 426. Real Estate Market, Research and Analysis. 3 Hours.
This course will discuss market research, real estate sales, property valuations and analysis. Students will examine market research reports to gain insight into product and market trends, opportunities, projections, and growth in the Maine, the US and global real estate markets. Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 427. Franchise Market Research and Analysis. 3 Hours.
This class will focus on analysis of market demographics, feasibility studies, product pricing, promotion and distribution, franchise broker contacts, extrapolation of sales and expenses, and the projection of costs and net profits, emerging markets and capital expansion. Prerequisite(s): BA 401 and MS 132 and MS 232 and BA 362.

BA 428. Strategic Selling. 3 Hours.
This course builds on the fundamentals of selling. The student will understand how to advance sales in light of complex business environments consisting of layers of buyers, decision makers and those who influence purchasing decisions. A strategic account planning process will be analyzed and applied to real companies by way of case studies. The art and skill of negotiating will be studied and learned through role play. Prerequisite(s): BA 422.

BA 434. International Finance. 3 Hours.
The factors affecting exchange rates are discussed, as well as different types of exchange rate systems and how governments attempt to influence exchange rates. The relationships among interest rate parity, purchasing power parity, the Fisher effect and International Fisher effect and exchange rates are analyzed. Students learn how currency futures, currency options and money market hedges are used to hedge exchange rate risk. Prerequisite(s): BA 362.

BA 437. International Marketing. 3 Hours.
The basics of international marketing will be taught including the foundations of culture, cultural understanding, business customs and practices in global marketing, assessing global markets, and developing international marketing strategy. Prerequisite(s): BA 321.

BA 438. Export-Import Procedures. 3 Hours.
The basics of export-import procedures will be taught including justification for exporting/importing, market planning methods, selection of appropriate marketing mix variables, and regulation. Prerequisite(s): BA 321.

BA 439. International Franchising Management. 3 Hours.
This course will focus on international expansion of franchises, learning the culture, monetary exchanges, imports and exports, local international market analysis and much more. Prerequisite(s): BA 204 and BA 306 and BA 427.

BA 440. Small Business Management I. 3 Hours.
This course supplies prospective and current small business managers with the essential concepts of starting and operating small businesses. Topics covered include: environment and management of small business enterprise, problems in starting small businesses, financial and administrative control, and management of business operations. Particular emphasis is placed on the interrelated nature of the components, particularly as they affect the financial picture of the firm. Through a lecture and discussion format, students are expected to share their own experiences in small businesses with their fellow students. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 441. Entrepreneurship I- New Venture Development. 3 Hours.
Students will be introduced to the practical application of classic and contemporary business theory as it applies to the early stages of entrepreneurship and intrapreneurship, opportunity recognition, innovation, and new venture development. Course topics include types of entrepreneurs, opportunity recognition, marketing, cash and other resource requirements, financial statements, planning, franchising, intellectual property, success/failure/resilience, and growth. Class will use text, cases, articles, internet sources, and guest lecturers. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 442. Applied Small Business Management. 3 Hours.
This is an advanced course which focuses on real problems in Small Business Management, using the case approach. Cases are drawn from the text, from actual local small businesses, and from the practical experience of students in the class. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 443. Entrepreneurship II: Business Plans. 3 Hours.
This class builds on BA 441, New Venture Development. The focus of this class is on the early stages of formalizing and growing a venture. Topics include business plan writing, fund raising and cash flow, measuring and conveying financial position, core strategy development and competitive advantage, sustainability, international entrepreneurship, supply chain, growth, and exit. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 460. Investments. 3 Hours.
Beginning with an introduction to financial markets and investment instruments, topics include stock and bond quotations and trading procedures, rate of return, margin trading, stock indexes, stock and bond valuation, risk and return, portfolio theory, active and passive portfolio management, and investment performance evaluation. Prerequisite(s): BA 362.

BA 464. Bank & Financial Services Management. 3 Hours.
This course will introduce students to the specific issues in the financial management of a banking firm and, to a smaller degree, of other financial intermediaries. Emphasis will be on products, roles, regulatory framework, and risk management. Prerequisite(s): BA 362.

BA 465. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 471. Life and Health Insurance. 3 Hours.
This course is intended to provide background knowledge for personal application and for those responsible for administering benefit plans for employees; it provides the necessary information required to pass the State of Maine license examination. Prerequisite(s): BA 271.

BA 472. Casualty and Property Insurance. 3 Hours.
The first part of the course introduces the basics of the entire insurance business, including a summary of legal aspects, types of insurers and principles of reinsurance; next, each type of insurance is studied in detail. Topics covered are fire, consequential loss, inland marine, ocean marine, theft and surety, liability and miscellaneous property insurance. Prerequisite(s): BA 271.
BA 473. Real Estate Appraisal. 3 Hours.
This course familiarizes the student with the foundation and principles of the appraisal process. The student will become familiar with the three approaches to value. Site valuation, construction costs, depreciation; comparables selection and adjustments; rental multipliers; and reconciliation will be discussed. The student will focus on the elements making up the standards for professional appraisal practice. These elements, i.e., Definitions, Rules, Standards and Standard Rules, Statements and advisory opinions are discussed in detail along with the philosophy and history of USPAP. Prerequisite(s): BA 401 and MS 132 and BA 362.

BA 475. E-Business and E-Commerce for Managers. 3 Hours.
This course teaches the basic e-business and e-commerce theory. The students will apply the theory through the development of a website for the prime purpose of marketing a product or service or idea online.

BA 490. International Business. 3 Hours.
This course covers the international dimensions of managerial decision-making including: world economies, international trade theories, tariffs, quotas and other trade issues, global strategic planning, cross-cultural management, international market entry, international human resource management, international organization strategy, international logistics, import/export operations, currency exchange, international financial management. Current developments in global economic and business are emphasized; students participate in a computerized simulation throughout the semester. Prerequisite(s): BA 310 and BA 321.

BA 495. Senior Management Project. 3 Hours.
An experiential course that gives seniors the opportunity to apply what they have learned in class to a real business situation. Prerequisite(s): College Level=Senior.

BA 496. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 497. Business and Culture Travel Study Course. 3 Hours.
Business and Culture Travel Study course is designed to expose students to economies across the world. During the course students will travel to important commercial, cultural and governmental cities. Through a combination of readings students will be exposed to 20th and 21st century history, economics, culture political and business philosophy. The course will also involve visits to major multinational corporations, cultural activities and lectures from University business faculty when available. The course will also have two pre-trip class sessions with readings and one post course session to wrap up the experience and discuss the student travel logs.

BA 498. Business Seminar. 3 Hours.
This honors course requires the study of various business problems under the supervision of members of the Department of Business Administration. A paper is required. An oral examination is scheduled as the final examination in the course. Prerequisite(s): College Level=Senior.

BA 499. Topic/. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 600. Research Methods in Business and Education. 3 Hours.
This course is designed for beginning graduate students who have little or no formal preparation in those areas of research and problem-solving essential for a comprehensive study of business and education at the graduate level. Emphasis is placed on the identification of common problem types and the selection and use of appropriate methods of analysis (primarily statistical in nature).

BA 601. Managerial Economics. 3 Hours.
This course begins with a comprehensive overview of micro- and macroeconomic concepts with the aim of developing within students a picture of how business and nonprofit organizations relate to the economy as a whole. The course then focuses on practical applications of economic analysis to problems of concern to managers. Case studies and projects are used to demonstrate the methods used to determine economic feasibility and cost-effectiveness of products, services, and programs.

BA 602. Managerial Accounting. 3 Hours.
This is an accelerated accounting course for those with little or no formal accounting background. The emphasis is on concepts which managers need to know in order to be effective. Topics include the preparation and interpretation of financial statements, cost planning and control, cost-volume-profit analysis, decision-making models, master budgeting and variances, and evaluation of capital projects.

BA 605. Management Communications. 3 Hours.
This is an advanced communications course that builds upon a student’s experience and prior undergraduate coursework in writing and oral communications. Topics include: advanced business writing, use of visual materials, selection of secondary sources of information, report preparation, and presentations to small and large groups.

BA 611. Organizational Behavior. 3 Hours.
This course surveys the major field of management, examining structures and processes on both group and organizational levels. Both traditional and contemporary theories are analyzed and applied to business operations.

BA 620. Financial Management. 3 Hours.
Topics considered include financial planning, operating and capital budgets, cash flow, purchasing and accounting procedures, the sources and uses of corporate and institutional funds, and financial analysis for evaluation and control. Students develop projects specifically related to their needs in educational administration, small business, or corporate management. Prerequisite(s): BA 602 or AC 301.

BA 621. Marketing Management. 3 Hours.
This course focuses on complex problems facing decision-makers in the marketing of goods and services. Emphasis is placed on the decision-making process, including assessment of the social, economic, and political environment in which the organization operates; problem definition; development and evaluation of alternatives, and the implementation of the best alternative. Cases in advertising, sales, marketing research, and strategic marketing management provide practice in marketing analysis and decision-making.

BA 622. Production Management. 3 Hours.
Emphasis is placed on the use of quantitative techniques for solving manufacturing problems. The student is given an opportunity to practice mathematical model-building and manipulation. Other topics considered include queuing system design, plant layout, statistical quality control, inventory modeling, Program Evaluation and Review Technique (PERT), linear and nonlinear programming, and control theory.
BA 625. Global Strategic Management. 3 Hours.
This course focuses on the strategic challenges and opportunities confronting firms that undertake to create value and to compete in the global economy. Successful companies develop strategies for doing business in emerging markets that are different from those they use at home and often find novel ways of implementing them too. The class will make extensive use of case analysis and discussion to evaluate and understand the strategic issues that confront firms operating internationally, as well as to appreciate the importance of values and ethics in organization decisions and actions. In this course we will probe the workings of business strategies in transition and emerging economies, gain an understanding of the strategies of local firms, and analyze the international success and failure of companies. Prerequisite(s): BA 600 and 15 Credits From Range [BA 600 To BA 799].

BA 626. Accounting in Planning, Budgeting and Control. 3 Hours.
This course examines the role of accounting in the planning, budgeting, and control process of a business in a dynamic environment. The integration of measuring and analyzing (planning), short-term decisions and managing organizations (control), and preparing various budgets (budgeting) are emphasized. This course is designed as a continuation of BA602 Managerial Accounting. Numerical problems, as well as case studies, are utilized as methods of study. Prerequisite(s): BA 602 or AC 211.

BA 627. Investment Analysis. 3 Hours.
This course provides a detailed description of securities market organization and approaches to investment opportunities. Students will examine theories used in the valuation of financial securities and employ projects and applications to develop a real world understanding of portfolio management. Prerequisite(s): BA 602.

BA 628. New Venture Planning and Management. 3 Hours.
This course deals with the foundation of new ventures and related aspects of managing the small growing enterprise. Techniques taught in this course are equally applicable to small businesses, nonprofit organizations, and new ventures of larger organizations. Topics include: use of scarce resources, such as money, talent and technological expertise; identification of environmental threats and opportunities; and operational considerations such as organizational structure, legal requirements, financing, and accounting procedures.

BA 641. Human Resource Management. 3 Hours.
This course explores human resource management as an integrated process of planning and control designed to achieve high employee productivity and job satisfaction. The course focuses on the essential functions of human resource management as they apply both to the general supervisory responsibilities of every manager and to the specific operations of the personnel department.

BA 642. Leadership in Business and Professions. 3 Hours.
This course is designed to provide graduate management students with a comprehensive review of the essentials for effective leadership. It focuses on the identification of basic leadership styles, explores the theoretical and practical findings of research in leadership development, and seeks to synthesize the student’s leadership style with the most effective working models of leadership.

BA 643. Strategic Change Management. 3 Hours.
Strategic Change Management focuses on the skills required to deal effectively with organizational change. The course addresses first the pressures in the business environment that make change a fundamental reality for managers. Particular attention is paid to change arising from public policy initiatives that impinge on business. The course then examines the manager as change agent responsible for initiating innovation and explores both the personal skills required in the role of change agent and the tools and techniques available to support the manager in that role. The course also examines the problems and opportunities of those who are the recipients of change in an organization and the skills required to cope effectively with that situation.

BA 644. The Legal Environment of Business. 3 Hours.
This course will provide an overview of the important aspects of business law for executives, managers, accountants, and other professionals. The areas of law covered include but are not limited to administrative, contract, corporate and other business organizations, employment relations, real estate, taxes, and UCC sales.

BA 646. Current Issues in Business. 3 Hours.
This course, conducted in seminar fashion, draws on current literature to analyze contemporary and emerging issues facing management in the late twentieth century. Content will vary.

BA 700. Health Care Management. 3 Hours.
This course examines management problems and policy-making in the health care industry. Several areas are considered including: (1) the functions of the health care manager, (2) the types of health care delivery systems, (3) the administration of hospitals, (4) the financing of medical care, and (5) the role of government. Through readings, lectures, discussions, and projects, students clarify their own role in the delivery of health services. The course regularly draws on experts in health planning and health care administration.

BA 701. Legal Environment of Health Care Management. 3 Hours.
The course provides a foundation in the legal and regulatory framework in which health care institutions operate. Students will also examine the legal issues confronting health care managers including director and administrative liability, malpractice, negligence, patient rights and confidentiality, licensure requirements, and the like.

BA 702. Health Care Economics. 3 Hours.
In this course, the principles and tools of economic decision-making are applied to management in the health care sector. The course explores the application to health care management functions of such concepts and processes as supply and demand, resource allocation and utilization, costing and pricing, resource productivity, forecasting and economic aspects of planning, and utilization review. While the principal emphasis in the course is on micro-economic analysis, some consideration is also given to an economic analysis of public policy alternatives for the delivery of health care service. Prerequisite(s): BA 601.

BA 703. Financial Management in Healthcare Organizations. 3 Hours.
This course applies the perspectives and tools of financial analysis to the management of health care organizations and evaluation of organizational performance. Topics covered include capital budgeting, sources of operating revenue, management of cash and inventories, risk analysis and forecasting. Particular attention is paid to cost containment regulatory strategies and their implications for financial planning and management. Prerequisite(s): BA 602.
BA 704. Managing Quality in Healthcare. 3 Hours.
This course examines methods and tools for managing quality in health facilities, physician practices, managed care, and public health. Topics include developments in quality assurance and improvement, utilization review, risk management, and patient satisfaction.

BA 705. Global Perspectives in Healthcare. 3 Hours.
This course examines the social, political, and economic aspects of global healthcare issues. Through a comparative analysis of the health systems of multiple nations, students will compare theories of health policy and priorities, healthcare system facilities, workforce, technology, cost, quality, and access. The emphasis of the course will be on health management strategies used in different countries and healthcare systems to mobilize, allocate, and maintain resources to improve the healthcare status and delivery systems.

BA 710. Law & Ethics for Non-Profit Organizations. 3 Hours.
Non-profit managers and supervisors are held to a higher standard of ethical behavior due to the nature of their funding sources and their mission. This course is designed to develop in the student a basic understanding of the laws governing non-profit organizations, the practical applications of these laws and the ethics that are demanded of non-profit managers.

BA 711. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics covered include: leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 712. Strategic Marketing for Nonprofit Organizations. 3 Hours.
This course applies the concepts of marketing and strategy to the management of non-profit organizations. Through class lectures, discussion, case studies, and applied projects, students will build an understanding of the marketing process in the non-profit environment in order to be able to design, implement, and evaluate an organization's approach to marketing and strategic positioning.

BA 713. Fundraising. 3 Hours.
This course takes a systems approach to the process of fund-raising. Topics covered include: donor cultivation, use of the annual fund, major gifts, corporate giving, and grant writing.

BA 720. Advanced Sales and Marketing in Hospitality. 3 Hours.
This course focuses on difficult problems and issues facing sales and marketing personnel in the hospitality industry. Students will make use of case studies in order to develop their decision-making process including the use of marketing research and analysis.

BA 721. Convention Planning and Events Planning. 3 Hours.
This course focuses on the rapidly growing convention sales and events planning industries. The student will learn how to design, plan, market and manage meetings and events.

BA 722. Advanced Front Office Operations. 3 Hours.
This course begins with detailed introduction about numerous aspects of front office operations and management. The next section of the course examines the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.

BA 723. Legal Issues in Hospitality Management. 3 Hours.
This course will provide the student an overview of the important aspects of Hospitality Law for Managers, and other professionals. Some of the areas of study include and are not limited to Torts, Products Liability, Constitutional Law and Criminal Law and many other subjects.

BA 724. Managing Service. 3 Hours.
This course begins with an introduction to the framework for providing quality service to customers and guests. Next we will discuss the needs of the customer/guest and proceed to develop our menu and/or product accordingly. Finally, we will learn how management and staff create loyal customers and guests by delivering service that exceeds their expectations.

BA 729. Hospitality Graduate Directed Practicum. 3 Hours.
Each student will find, will choose or will be provided with an internship site. The site chosen will be based on; and interview conducted by the management of the internship site and the student's preference of location based on those available. The Coordinator of Hospitality Management will have the final decision on all internship site placements. The Coordinator's decision will be based on his or her interaction with the student during previous course work, his or her understanding of the student and the internship properties requirements. Every consideration will be given to the student's personal preferences with regard to location and types of property. However, the student's preferences will not be the only consideration for placement. Prerequisite(s): BA 720 and BA 722 and BA 724.

BA 731. Business and Information Technology. 3 Hours.
This graduate course approaches Information Technology from the perspective of information consumers as opposed to technology implementers. During this course, students will examine various technologies and their application within modern organizations. The course has two primary goals. (1) The course will explain information technologies in non-technical terms so that students can evaluate a technology's effectiveness relative to any existing alternatives and the overall organizational needs. (2) This course should increase student awareness regarding how they interact with technology in a personal or business setting. Business leaders are constantly bombarded with technology. This course addresses the need to sift through that information in an intelligent manner and make smart business decisions.

BA 741. Staffing & Selection. 3 Hours.
A source of competitive advantage for any organization is its talent. The effectiveness of an organization depends on the performance of each individual in that organization. Hence, one of the most important human resource functions is that of staffing the organization. This course is essential for HR professionals who are responsible for recruiting, screening, hiring, promoting, and outplacing employees. It is also very crucial for any line managers, supervisors, team leaders, and hiring managers who are involved in recruiting, making promotions, succession, or any other workforce decisions. An examination of the scientific, legal, and administrative issues associated with the recruitment, selection, employment and retention of individuals by organizations augments the study. Specific attention will be given to the current challenges of an increasingly dynamic workplace and diverse workforce.

BA 742. Training & Development. 3 Hours.
The effective training and development of human resources creates tremendous and unique value for an organization. This course examines how organizations can develop and manage the talents and skillset of human capital. The course explores topics such as training needs analysis, formulating training objectives, and the design, implementation, and evaluation of training and development programs.
BA 745. Innovative Global Strategy. 3 Hours.
This course will build students' awareness of the challenges that must be addressed and the opportunities that may be present when competing in the global marketplace. The course focuses on how firms apply innovative strategies to create a sustainable competitive advantage in the global arena. Course content will be drawn from readings, case analysis, online content and discussions. The course requires students to analyze and understand real world examples of both successful and unsuccessful global strategy implementation.

BA 750. Fundamentals of Risk Management. 3 Hours.
This course explores the fundamentals of risk management. After discussion of the importance of risk and the rationale for its management in organizations, the remainder of the course will analyze the process of and methods for managing risk.

BA 751. Employee Benefits. 3 Hours.
This course explores the nature and operation of employer-sponsored benefit plans. Emphasis is placed on plan design, administration, funding, and regulation. The course also addresses organizational characteristics, benefit structure, and pricing of risk transfer schemes for groups.

BA 752. Crisis Management. 3 Hours.
Crisis Management can be defined as a communications response to an event that has a negative impact on an audience - the public, customers/clients, employees, shareholders, etc. Examples of such events could include tainted food, a corporate leak, a political scandal, an entertainment or athletic scandal, damaged products that cause or could potentially cause life-threatening situations, natural disasters, terrorism, and financial disasters. In this course, students will analyze and critique high-profile cases and learn how to effectively respond to crises.

BA 753. Corporate Risk Management. 3 Hours.
Corporate risk is analyzed through the lens of enterprise risk management. This course explores the operational and financial risks faced by firms and the study of various methods of handling these risks.

BA 754. Strategic Selling. 3 Hours.
The focus of this course is on key, strategic customer selling approaches. The process of sales planning and strategy development for these types of customers will be emphasized. The objective of this course is to understand and execute sales strategies for managing major and large customers.

BA 760. Technology & Innovation. 3 Hours.
BA 760 Technology & Innovation offers a research approach to identifying, analyzing, and creating technological advantage in nascent and mature industries. Students will apply the methodologies of innovation and discovery to business settings and markets, seeking to create competitive advantage and achieve market transformation through strategic initiatives that redefine consumer expectations and industry practices and reframe organizations to embrace innovative practices and processes.

BA 761. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 762. Groupthink. 3 Hours.
This course explores the origin of groupthink. Groupthink is a term first used by social psychologist Irving L. Janis (1972) that refers to a psychological phenomenon in which people strive for consensus within a group. This course explores groupthink as a phenomenon where people set aside their own personal beliefs or adopt the opinion of the rest of the group.

BA 763. Biotechnology & Innovation: Intellectual Property. 3 Hours.
This course focuses on the protection of proprietary and intellectual rights in inventions, writings, creative works, software, industry trade secrets, industry trade designations, and other intellectual assets at the international, Federal, and State Levels. The course will give special consideration to the emergence of new areas of patent law in Biotechnology and Pharmaceutical fields, examining not only the patentability of intellectual assets, but also the discovery process, particularly in collaborative environments involving multiple organizations and institutions, and the qualifying distinctions between collaborative and competitive research.

BA 769. Professional Project. 3-6 Hours.
This course is used to award graduate credit for prior learning and educational experience obtained outside of the traditional classroom. Through the preparation of a professional project, students provide formal documentation of the specific graduate-level learning competencies which they have acquired through prior experience. A maximum of six (6) credit hours may be earned.

BA 771. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.

BA 790. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.

BA 792. Graduate Internship I. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 793. Graduate Internship II. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization's supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 792.

BA 794. Graduate Internship III. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.
BA 796. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 798. Thesis. 6 Hours.
The thesis may be library-oriented research with extensive reliance on documents and a relatively limited amount of primary field research, or it may be action-oriented field research with relevant documentation from the literature. The title of the thesis topic must be filed with the graduate committee. A student, with the approval of his/her advisory committee, may register for the thesis after completion of twenty-four (24) semester hours.

BA 799. Topic/. 3 Hours.
Students work together in a seminar setting under the direction of a member of the graduate faculty. The content of the seminar will vary according to the interests of students and faculty involved.

B.S. Business Administration - Marketing/MBA

Students in the Marketing concentration study the components of marketing structure and the modern concepts of marketing. Marketing involves understanding the development of new products or enhancement of existing products, the price of products, communication and distribution of the products. Additionally, the legal environment, segmentation, the international market, consumer behavior, marketing structure and the modern concepts of marketing.

In addition to the program objectives of the B.S. Business Administration degree, this concentration requires students to:
- Demonstrate knowledge of basic principles of marketing
- Demonstrate knowledge of the importance of global markets
- Apply statistical, problem solving and critical thinking skills

Students must also achieve the program objectives of the MBA degree.

*** Credit may not be required for degree completion.

Courses

BA 101. Introduction to Business. 3 Hours.
This course introduces students to the general nature of functional areas in business such as marketing, management, accounting, finance, research and development, and risk management. The relationship between business, the government, the economy, and the environment is examined.

BA 111. Economic Geography. 3 Hours.
This course is an introduction to the principles of economic geography, ranging from physical and biological geography to cultural and political factors. The decision making processes, both local and global, for different types of service oriented, manufacturing, transportation, and resource based businesses will be examined. The relationship of natural resources, population, and culture, and how such factors affect economic activity will be emphasized.

BA 201. Business Law I. 3 Hours.
This course provides students with a basic knowledge of the law of contracts, personal property and real property.

BA 202. Business Law II. 3 Hours.
This course is intended to augment BA 201 with in depth analysis of the law in Contracts, UCC, Corporations, Principal Agency Law, Advanced Tort Law, Environmental Law, Real Property Law, Securities Law and Employment Law.

BA 204. Franchise Formation and Management. 3 Hours.
This class will discuss franchise formation and management with particular emphasis on the discovery and evaluation of the franchisor and the feasibility of entrepreneurs converting an existing business into a franchise chain or creating and selling new franchises, domestic and international. Franchise accounting and finance (borrowing or leveraging) will be covered, as well as, taking the franchise to the stock market or going public (IPO) and raising investment capital. Prerequisite(s): BA 401.

BA 205. Real Estate Law. 3 Hours.
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.
BA 210. Economics Overview for Non-Business Majors. 3 Hours.
This is an overview of microeconomic and macroeconomic concepts for non-business majors. It will include an introduction to American capitalism including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of competitive firms. It will also be an introduction to national income accounts, unemployment, inflation, government fiscal policy and monetary policy.

BA 211. Microeconomics. 3 Hours.
This is an introduction to American capitalism and microeconomic concepts including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of purely and impurely competitive firms.

BA 212. Macroeconomics. 3 Hours.
This is an introduction to macroeconomics in the American economy: national income accounts, unemployment, inflation, government fiscal policy, monetary policy and economic growth.

BA 220. Real Estate Principles and Practices. 3 Hours.
This course will provide students with methods of analyzing acquisition and retention of Real Estate. Also, there will be a focus on the skills and techniques required to operate a real estate business, including trust accounts, risk management, and property management.

BA 243. The Business of Innovation. 3 Hours.
This is a cross-disciplinary class that will introduce students to the Lean Startup Scientific Method for developing and commercializing ideas for new ventures or else innovating and developing new products or business models within existing companies. Topics include marketplace innovations, technology and science based innovations, marketplace hypothesis development and testing, frugal and agile engineering, business models, intellectual property, prototyping, exit strategies, and fundraising. Lab component is integrated within module deliverables.

BA 271. Risk Management. 3 Hours.
A study is made of the risks encountered by individuals and business firms. A presentation is made of the basic principles and institutions, which have been developed in risk management. This material is treated primarily from the consumer point of view.

BA 299. Topic/. 1 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 300. Business Presentations. 3 Hours.
Communication is a vital function of any business. Managers at all levels must be able to communicate effectively to advance their career and ensure the success of their organization. This course will give students a working knowledge of how to create, brief, and present information to an organizational communications spectrum. Students will learn how to think critically and apply problem solving skills across a variety of historical and contemporary business topics. Students will learn how to collect, analyze, synthesize, and present information in a professional manner to assorted audiences in different venues. The foundational skill set developed in this course is the ability for students to articulate their ideas in a professional manner within a variety of business settings. Prerequisite(s): EH 124.

BA 302. Business Ethics. 3 Hours.
This course is designed to raise a moral consciousness and sensitivity within the various disciplines of the business curriculum. The disciplines focused on here are business, accounting, marketing, multinational corporations, and those areas of human resource management inclusive of diversity in the workplace within the context of environmental and social responsibility.

BA 306. Franchise Law. 3 Hours.
This is a law class that analyzes all the issues of Franchise Law with a particular emphasis on Contracts, Principal-Agent Franchise Relations, Corporate Formation of Franchises, and Securities Law. Prerequisite(s): BA 201 and BA 202.

BA 310. Organization and Management. 3 Hours.
This course focuses on how to design organization systems and effectively manage them. Students completing the course should understand the universal process of management and key terminology in the language of management. Students are encouraged conceptually to blend contributions from the various schools of management thought into an integrated perspective of what managers do and why.

BA 311. Human Resource Management. 3 Hours.
This course addresses traditional personnel administration issues. Emphasis in the course is on how to manage the major human resource administration functions of job design, reward system design, staffing, training and performance control, to achieve maximum employee performance and satisfaction. Prerequisite(s): BA 310 or ( Major=BS Criminal Justice or Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Paralegal or Major=BS English - Prelaw).

BA 312. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics include leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 321. Marketing Principles. 3 Hours.
The course covers the language and issues of marketing with an emphasis on developing responsive marketing strategies that meet customer needs. The course focuses on marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing. Other topics will be incorporated into the course including the external environment (focus on integrative topics within marketing, such as economics, politics, government, and nature), marketing research, international/global marketing with relevance to cultural diversity, ethics, the impact of technology on marketing, and careers in marketing.

BA 334. International Economics. 3 Hours.
This applied economics course will emphasize the use of cases to study topics such as comparative advantage, treaties, tariffs, non-tariff trade barriers, and trade blocks among developed and developing nations. Prerequisite(s): BA 211 and BA 212.

BA 344. Personal Financial Planning. 3 Hours.
This course provides comprehensive coverage of personal financial planning in the areas of money management, axes, consumer credit, housing and other consumer decisions, legal protection, insurance, retirement planning, and estate planning. Prerequisite(s): MS 141 or MS 111 or MS 242 or MS 180 or MS 181.
BA 351. Internship. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 352. Internship II. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 353. Internship III. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 354. Internship IV. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 355. Internship V. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 351 and BA 352 and BA 353 and BA 354.

BA 362. Financial Management I. 3 Hours.
The foundation finance course covers basic personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management. Students are expected to become proficient in financial analysis of a corporation and in various aspects of corporate financial management. Prerequisite(s): AC 121 and (AC 122 or AC 211) and BA 211 and (MS 141 or MS 111 or MS 242 or MS 180 or MS 181).

BA 364. Financial Management II. 3 Hours.
The course is a continuation of Financial Management I and will cover such topics as real options, sensitivity, scenario and break-even analysis, basic issues regarding stocks and bonds, risk/return and cost of capital, capital structure and limits to the use of debt. Prerequisite(s): BA 362.

BA 375. Supply Chain Management. 3 Hours.
This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategies to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.

BA 401. Managerial Economics. 3 Hours.
This course is designed to close the gap between economic theory and business application. It reviews traditional analysis and shows its application to the understanding and solution of economic problems of the firm and industry. Prerequisite(s): BA 211 and BA 212.

BA 411. Organizational Behavior. 3 Hours.
This course is highly experiential in its approach to helping students understand and appreciate why people behave the way they do in an organizational context. Students learn how to manage employee behavior by analysis of real world phenomena and by application of principles in the areas of human perception and communication, leadership and motivation, small group dynamics, organizational culture, and organizational change. Prerequisite(s): BA 310.

BA 413. Operations Management. 3 Hours.
Quantitative model building and manipulation are a means of analyzing and synthesizing the elements of productions management. Both deterministic and stochastic modeling are emphasized in the areas of work systems design, queuing, PERT, SQC, inventory control, forecasting, and linear and nonlinear programming. Prerequisite(s): BA 310 and MS 132.

BA 414. Business Strategy. 3 Hours.
This Business Administration senior seminar focuses on decision making at the executive management level, the formulation of strategy, and its implementation in the organization. The course will employ case studies, laboratory simulation techniques, and computer spreadsheet analysis. Prerequisite(s): College Level=Senior.

BA 421. Integrated Marketing Communication and Advertising. 3 Hours.
An introduction into the world of advertising. Students will plan and design Ad campaigns, write copy and design layouts for the different types/forms of advertising. The students will work with local companies and assist them in redesign of their ad campaigns. Prerequisite(s): BA 321.

BA 422. Sales and Sales Management. 3 Hours.
This course provides students with the fundamentals of good salesmanship and sales management. Prior to studying management principles students practice sales techniques in simulations. Cases are used to illustrate and evaluate principles of sales management. Prerequisite(s): BA 321.

BA 423. Retail Management. 3 Hours.
The purpose of this course is to provide students with an understanding of the fundamentals of successful retail operations. Topics included are the market concept in retailing, factors of area and market analysis, and aspects of organizational structure, layout, and personnel planning. Also covered are methods of pricing, merchandising planning, inventory, expense control and sales promotion techniques. Prerequisite(s): BA 321.

BA 424. Marketing Research. 3 Hours.
The basic research concepts and practices as applied to the analysis of marketing problems are examined. Topics include sources of data, collecting data, sampling, questionnaire construction, tabulating data, and report preparation; computerized statistical software is used. Prerequisite(s): BA 321 and MS 132.
BA 425. Marketing Management. 3 Hours.
This is the capstone course for marketing majors. Students apply concepts learned in other courses to marketing problems of business and nonprofit organizations. Cases and business simulations are used to teach decision-making in the complex environment of business. A complete marketing plan for a simulated company of the student’s choice summarizes the student’s knowledge of the field. Prerequisite(s): BA 321.

BA 426. Real Estate Market, Research and Analysis. 3 Hours.
This course will discuss market research, real estate sales, property valuations and analysis. Students will examine market research reports to gain insight into product and market trends, opportunities, projections, and growth in the Maine, the US and global real estate markets. Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 427. Franchise Market Research and Analysis. 3 Hours.
This course will focus on international expansion of franchises, learning of appropriate marketing mix variables, and regulation. Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 428. Strategic Selling. 3 Hours.
This course builds on the fundamentals of selling. The student will understand how to advance sales in light of complex business environments consisting of layers of buyers, decision makers and those who influence purchasing decisions. A strategic account planning process will be analyzed and applied to real companies by way of case studies. The art and skill of negotiating will be studied and learned through role play. Prerequisite(s): BA 422.

BA 434. International Finance. 3 Hours.
The factors affecting exchange rates are discussed, as well as different types of exchange rate systems and how governments attempt to influence exchange rates. The relationships among interest rate parity, purchasing power parity, the Fisher effect and International Fisher effect and exchange rates are analyzed. Students learn how currency futures, currency options and money market hedges are used to hedge exchange rate risk. Prerequisite(s): BA 362.

BA 437. International Marketing. 3 Hours.
The basics of international marketing will be taught including the foundations of culture, cultural understanding, business customs and practices in global marketing, assessing global markets, and developing international marketing strategy. Prerequisite(s): BA 321.

BA 438. Export-Import Procedures. 3 Hours.
The basics of export-import procedures will be taught including justification for exporting/importing, market planning methods, selection of appropriate marketing mix variables, and regulation. Prerequisite(s): BA 321.

BA 439. International Franchising Management. 3 Hours.
This course will focus on international expansion of franchises, learning the culture, monetary exchanges, imports and exports, local international market analysis and much more. Prerequisite(s): BA 204 and BA 306 and BA 427.

BA 440. Small Business Management I. 3 Hours.
This course supplies prospective and current small business managers with the essential concepts of starting and operating small businesses. Topics covered include: environment and management of small business enterprise, problems in starting small businesses, financial and administrative control, and management of business operations. Particular emphasis is placed on the interrelated nature of the components, particularly as they affect the financial picture of the firm. Through a lecture and discussion format, students are expected to share their own experiences in small businesses with their fellow students. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 441. Entrepreneurship I- New Venture Development. 3 Hours.
Students will be introduced to the practical application of classic and contemporary business theory as it applies to the early stages of entrepreneurship and intrapreneurship, opportunity recognition, innovation, and new venture development. Course topics include types of entrepreneurs, opportunity recognition, marketing, cash and other resource requirements, financial statements, planning, franchising, intellectual property, success/failure/resilience, and growth. Class will use text, cases, articles, internet sources, and guest lecturers. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 442. Applied Small Business Management. 3 Hours.
This is an advanced course which focuses on real problems in Small Business Management, using the case approach. Cases are drawn from the text, from actual local small businesses, and from the practical experience of students in the class. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 443. Entrepreneurship II: Business Plans. 3 Hours.
This course builds on BA 441, New Venture Development. The focus of this class is on the early stages of formalizing and growing a venture. Topics include business plan writing, fund raising and cash flow, measuring and conveying financial position, core strategy development and competitive advantage, sustainability, international entrepreneurship, supply chain, growth, and exit. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 460. Investments. 3 Hours.
Beginning with an introduction to financial markets and investment instruments, topics include stock and bond quotations and trading procedures, rate of return, margin trading, stock indexes, stock and bond valuation, risk and return, portfolio theory, active and passive portfolio management, and investment performance evaluation. Prerequisite(s): BA 321.

BA 464. Bank & Financial Services Management. 3 Hours.
This course will introduce students to the specific issues in the financial management of a banking firm and, to a smaller degree, of other financial intermediaries. Emphasis will be on products, roles, regulatory framework, and risk management. Prerequisite(s): BA 362.

BA 465. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises; their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.
BA 471. Life and Health Insurance. 3 Hours.
This course is intended to provide background knowledge for personal application and for those responsible for administering benefit plans for employees; it provides the necessary information required to pass the State of Maine license examination. Prerequisite(s): BA 271.

BA 472. Casualty and Property Insurance. 3 Hours.
The first part of the course introduces the basics of the entire insurance business, including a summary of legal aspects, types of insurers and principles of reinsurance; next, each type of insurance is studied in detail. Topics covered are fire, consequential loss, inland marine, ocean marine, theft and surety, liability and miscellaneous property insurance. Prerequisite(s): BA 271.

BA 473. Real Estate Appraisal. 3 Hours.
This course familiarizes the student with the foundation and principles of the appraisal process. The student will become familiar with the three approaches to value. Site valuation, construction costs, depreciation; comparables selection and adjustments; rental multipliers; and reconciliation will be discussed. The student will focus on the elements making up the standards for professional appraisal practice. These elements, i.e., Definitions, Rules, Standards and Standard Rules, Statements and advisory opinions are discussed in detail along with the philosophy and history of USPAP. Prerequisite(s): BA 401 and MS 132 and BA 362.

BA 475. E-Business and E-Commerce for Managers. 3 Hours.
This course teaches the basic e-business and e-commerce theory. The students will apply the theory through the development of a website for the prime purpose of marketing a product or service or idea online.

BA 490. International Business. 3 Hours.
This course covers the international dimensions of managerial decision-making including: world economies, international trade theories, tariffs, quotas and other trade issues, global strategic planning, cross-cultural management, international market entry, international human resource management, international organization strategy, international logistics, import/export operations, currency exchange, international financial management. Current developments in global economic and business are emphasized; students participate in a computerized simulation throughout the semester. Prerequisite(s): BA 310 and BA 321.

BA 495. Senior Management Project. 3 Hours.
An experiential course that gives seniors the opportunity to apply what they have learned in class to a real business situation. Prerequisite(s): College Level=Senior.

BA 496. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 497. Business and Culture Travel Study Course. 3 Hours.
Business and Culture Travel Study course is designed to expose students to economies across the world. During the course students will travel to important commercial, cultural and governmental cities. Through a combination of readings students will be exposed to 20th and 21st century history, economics, culture political and business philosophy. The course will also involve visits to major multinational corporations, cultural activities and lectures from University business faculty when available. The course will also have two pre-trip class sessions with readings and one post course session to wrap up the experience and discuss the student travel logs.

BA 498. Business Seminar. 3 Hours.
This honors course requires the study of various business problems under the supervision of members of the Department of Business Administration. A paper is required. An oral examination is scheduled as the final examination in the course. Prerequisite(s): College Level=Senior.

BA 499. Topic/. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 600. Research Methods in Business and Education. 3 Hours.
This course is designed for beginning graduate students who have little or no formal preparation in those areas of research and problem-solving essential for a comprehensive study of business and education at the graduate level. Emphasis is placed on the identification of common problem types and the selection and use of appropriate methods of analysis (primarily statistical in nature).

BA 601. Managerial Economics. 3 Hours.
This course begins with a comprehensive overview of micro- and macroeconomic concepts with the aim of developing within students a picture of how business and nonprofit organizations relate to the economy as a whole. The course then focuses on practical applications of economic analysis to problems of concern to managers. Case studies and projects are used to demonstrate the methods used to determine economic feasibility and cost-effectiveness of products, services, and programs.

BA 602. Managerial Accounting. 3 Hours.
This is an accelerated accounting course for those with little or no formal accounting background. The emphasis is on concepts which managers need to know in order to be effective. Topics include the preparation and interpretation of financial statements, cost planning and control, cost-volume-profit analysis, decision-making models, master budgeting and variances, and evaluation of capital projects.

BA 605. Management Communications. 3 Hours.
This is an advanced communications course that builds upon a student’s experience and prior undergraduate coursework in writing and oral communications. Topics include: advanced business writing, use of visual materials, selection of secondary sources of information, report preparation, and presentations to small and large groups.

BA 611. Organizational Behavior. 3 Hours.
This course surveys the major field of management, examining structures and processes on both group and organizational levels. Both traditional and contemporary theories are analyzed and applied to business operations.
BA 620. Financial Management. 3 Hours.
Topics considered include financial planning, operating and capital budgets, cash flow, purchasing and accounting procedures, the sources and uses of corporate and institutional funds, and financial analysis for evaluation and control. Students develop projects specifically related to their needs in educational administration, small business, or corporate management. Prerequisite(s): BA 602 or AC 301.

BA 621. Marketing Management. 3 Hours.
This course focuses on complex problems facing decision-makers in the marketing of goods and services. Emphasis is placed on the decision-making process, including assessment of the social, economic, and political environment in which the organization operates; problem definition; development and evaluation of alternatives, and the implementation of the best alternative. Cases in advertising, sales, marketing research, and strategic marketing management provide practice in marketing analysis and decision-making.

BA 622. Production Management. 3 Hours.
Emphasis is placed on the use of quantitative techniques for solving manufacturing problems. The student is given an opportunity to practice mathematical model-building and manipulation. Other topics considered include queuing system design, plant layout, statistical quality control, inventory modeling, Program Evaluation and Review Technique (PERT), linear and nonlinear programming, and control theory.

BA 625. Global Strategic Management. 3 Hours.
This course focuses on the strategic challenges and opportunities confronting firms that undertake to create value and to compete in the global economy. Successful companies develop strategies for doing business in emerging markets that are different from those they use at home and often find novel ways of implementing them too. The class will make extensive use of case analysis and discussion to understand the strategic issues that confront firms operating internationally, as well as to appreciate the importance of values and ethics in organization decisions and actions. In this course we will probe the workings of business strategies in transition and emerging economies, gain an understanding of the strategies of local firms, and analyze the international success and failure of companies. Prerequisite(s): BA 600 and 15 Credits From Range [BA 600 To BA 799].

BA 626. Accounting in Planning, Budgeting and Control. 3 Hours.
This course examines the role of accounting in the planning, budgeting, and control process of a business in a dynamic environment. The integration of measuring and analyzing (planning), short-term decisions and managing organizations (control), and preparing various budgets (budgeting) are emphasized. This course is designed as a continuation of BA602 Managerial Accounting. Numerical problems, as well as case studies, are utilized as methods of study. Prerequisite(s): BA 602 or AC 211.

BA 627. Investment Analysis. 3 Hours.
This course provides a detailed description of securities market organization and approaches to investment opportunities. Students will examine theories used in the valuation of financial securities and employ projects and applications to develop a real world understanding of portfolio management. Prerequisite(s): BA 602.

BA 628. New Venture Planning and Management. 3 Hours.
This course deals with the foundation of new ventures and related aspects of managing the small growing enterprise. Techniques taught in this course are equally applicable to small businesses, nonprofit organizations, and new ventures of larger organizations. Topics include: use of scarce resources, such as money, talent and technological expertise; identification of environmental threats and opportunities; and operational considerations such as organizational structure, legal requirements, financing, and accounting procedures.

BA 641. Human Resource Management. 3 Hours.
This course explores human resource management as an integrated process of planning and control designed to achieve high employee productivity and job satisfaction. The course focuses on the essential functions of human resource management as they apply both to the general supervisory responsibilities of every manager and to the specific operations of the personnel department.

BA 642. Leadership in Business and Professions. 3 Hours.
This course is designed to provide graduate management students with a comprehensive review of the essentials for effective leadership. It focuses on the identification of basic leadership styles, explores the theoretical and practical findings of research in leadership development, and seeks to synthesize the student’s leadership style with the most effective working models of leadership.

BA 643. Strategic Change Management. 3 Hours.
Strategic Change Management focuses on the skills required to deal effectively with organizational change. The course addresses first the pressures in the business environment that make change a fundamental reality for managers. Particular attention is paid to change arising from public policy initiatives that impinge on business. The course then examines the manager as change agent responsible for initiating innovation and explores both the personal skills required in the role of change agent and the tools and techniques available to support the manager in that role. The course also examines the problems and opportunities of those who are the recipients of change in an organization and the skills required to cope effectively with that situation.

BA 644. The Legal Environment of Business. 3 Hours.
This course will provide an overview of the important aspects of business law for executives, managers, accountants, and other professionals. The areas of law covered include but are not limited to administrative, contract, corporate and other business organizations, employment relations, real estate, taxes, and UCC sales.

BA 646. Current Issues in Business. 3 Hours.
This course, conducted in seminar fashion, draws on current literature to analyze contemporary and emerging issues facing management in the late twentieth century. Content will vary.
BA 701. Legal Environment of Health Care Management. 3 Hours.
The course provides a foundation in the legal and regulatory framework in which health care institutions operate. Students will also examine the legal issues confronting health care managers including director and administrative liability, malpractice, negligence, patient rights and confidentiality, licensure requirements, and the like.

BA 702. Health Care Economics. 3 Hours.
In this course, the principles and tools of economic decision-making are applied to management in the health care sector. The course explores the application to health care management functions of such concepts and processes as supply and demand, resource allocation and utilization, costing and pricing, resource productivity, forecasting and economic aspects of planning, and utilization review. While the principal emphasis in the course is on micro-economic analysis, some consideration is also given to an economic analysis of public policy alternatives for the delivery of health care service. Prerequisite(s): BA 601.

BA 703. Financial Management in Healthcare Organizations. 3 Hours.
This course applies the perspectives and tools of financial analysis to the management of health care organizations and evaluation of organizational performance. Topics covered include capital budgeting, sources of operating revenue, management of cash and inventories, risk analysis and forecasting. Particular attention is paid to cost containment regulatory strategies and their implications for financial planning and management. Prerequisite(s): BA 602.

BA 704. Managing Quality in Healthcare. 3 Hours.
This course examines methods and tools for managing quality in health facilities, physician practices, managed care, and public health. Topics include developments in quality assurance and improvement, utilization review, risk management, and patient satisfaction.

BA 705. Global Perspectives in Healthcare. 3 Hours.
This course examines the social, political, and economic aspects of global healthcare issues. Through a comparative analysis of the health systems of multiple nations, students will compare theories of health policy and priorities, healthcare system facilities, workforce, technology, cost, quality, and access. The emphasis of the course will be on health management strategies used in different countries and healthcare systems to mobilize, allocate, and maintain resources to improve the healthcare status and delivery systems.

BA 710. Law & Ethics for Non-Profit Organizations. 3 Hours.
Non-profit managers and supervisors are held to a higher standard of ethical behavior due to the nature of their funding sources and their mission. This course is designed to develop in the student a basic understanding of the laws governing non-profit organizations, the practical applications of these laws and the ethics that are demanded of non-profit managers.

BA 711. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics covered include: leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 712. Strategic Marketing for Nonprofit Organizations. 3 Hours.
This course applies the concepts of marketing and strategy to the management of non-profit organizations. Through class lectures, discussion, case studies, and applied projects, students will build an understanding of the marketing process in the non-profit environment in order to be able to design, implement, and evaluate an organization’s approach to marketing and strategic positioning.

BA 713. Fundraising. 3 Hours.
This course takes a systems approach to the process of fund-raising. Topics covered include: donor cultivation, use of the annual fund, major gifts, corporate giving, and grant writing.

BA 720. Advanced Sales and Marketing in Hospitality. 3 Hours.
This course focuses on difficult problems and issues facing sales and marketing personnel in the hospitality industry. Students will make use of case studies in order to develop their decision-making process including the use of marketing research and analysis.

BA 721. Convention Planning and Events Planning. 3 Hours.
This course focuses on the rapidly growing convention sales and events planning industries. The student will learn how to design, plan, market and manage meetings and events.

BA 722. Advanced Front Office Operations. 3 Hours.
This course begins with detailed introduction about numerous aspects of front office operations and management. The next section of the course examines the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.

BA 723. Legal Issues in Hospitality Management. 3 Hours.
This course will provide the student an overview of the important aspects of Hospitality Law for Managers, and other professionals. Some of the areas of study include and are not limited to Torts, Products Liability, Constitutional Law and Criminal Law and many other subjects.

BA 724. Managing Service. 3 Hours.
This course begins with an introduction to the framework for providing quality service to customers and guests. Next we will discuss the needs of the customer/guest and proceed to develop our menu and/or product accordingly. Finally, we will learn how management and staff create loyal customers and guests by delivering service that exceeds their expectations.

BA 729. Hospitality Graduate Directed Practicum. 3 Hours.
Each student will find, will choose or will be provided with an internship site. The site chosen will be based on and interview conducted by the management of the internship site and the student’s preference of location based on those available. The Coordinator of Hospitality Management will have the final decision on all internship site placements. The Coordinator’s decision will be based on his or her interaction with the student during previous course work, his or her understanding of the student and the internship properties requirements. Every consideration will be given to the student’s personal preferences with regard to location and types of property. However, the student’s preferences will not be the only consideration for placement. Prerequisite(s): BA 720 and BA 722 and BA 724.

BA 731. Business and Information Technology. 3 Hours.
This graduate course approaches Information Technology from the perspective of information consumers as opposed to technology implementers. During this course, students will examine various technologies and their application within modern organizations. The course has two primary goals. (1) The course will explain information technologies in non-technical terms so that students can evaluate a technology’s effectiveness relative to any existing alternatives and the overall organizational needs. (2) This course should increase student awareness regarding how they interact with technology in a personal or business setting. Business leaders are constantly bombarded with technology. This course addresses the need to sift through that information in an intelligent manner and make smart business decisions.
BA 741. Staffing & Selection. 3 Hours.
A source of competitive advantage for any organization is its talent. The effectiveness of an organization depends on the performance of each individual in that organization. Hence, one of the most important human resource functions is that of staffing the organization. This course is essential for HR professionals who are responsible for recruiting, screening, hiring, promoting, and placing employees. It is also very crucial for any line managers, supervisors, team leaders, and hiring managers who are involved in recruiting, making promotions, succession, or any other workforce decisions. An examination of the scientific, legal, and administrative issues associated with the recruitment, selection, employment and retention of individuals by organizations augments the study. Specific attention will be given to the current challenges of an increasingly dynamic workplace and diverse workforce.

BA 742. Training & Development. 3 Hours.
The effective training and development of human resources creates tremendous and unique value for an organization. This course examines how organizations can develop and manage the talents and skillset of human capital. The course explores topics such as training needs analysis, formulating training objectives, and the design, implementation, and evaluation of training and development programs.

BA 745. Innovative Global Strategy. 3 Hours.
This course will build students' awareness of the challenges that must be addressed and the opportunities that may be present when competing in the global marketplace. The course focuses on how firms apply innovative strategies to create a sustainable competitive advantage in the global arena. Course content will be drawn from readings, case analysis, online content and discussions. The course requires students to analyze and understand real world examples of both successful and unsuccessful global strategy implementation.

BA 750. Fundamentals of Risk Management. 3 Hours.
This course explores the fundamentals of risk management. After discussion of the importance of risk and the rationale for its management in organizations, the remainder of the course will analyze the process of and methods for managing risk.

BA 751. Employee Benefits. 3 Hours.
This course explores the nature and operation of employer-sponsored benefit plans. Emphasis is placed on plan design, administration, funding, and regulation. The course also addresses organizational characteristics, benefit structure, and pricing of risk transfer schemes for groups.

BA 752. Crisis Management. 3 Hours.
Crisis Management can be defined as a communications response to an event that has a negative impact on an audience - the public, customers/clients, employees, shareholders, etc. Examples of such events could include tainted food, a corporate leak, a political scandal, an entertainment or athletic scandal, damaged products that cause or could potentially cause life-threatening situations, natural disasters, terrorism, and financial disasters. In this course, students will analyze and critique high-profile cases and learn how to effectively respond to crises.

BA 753. Corporate Risk Management. 3 Hours.
Corporate risk is analyzed through the lens of enterprise risk management. This course explores the operational and financial risks faced by firms and the study of various methods of handling these risks.

BA 754. Strategic Selling. 3 Hours.
The focus of this course is on key, strategic customer selling approaches. The process of sales planning and strategy development for these types of customers will be emphasized. The objective of this course is to understand and execute sales strategies for managing major and large customers.

BA 760. Technology & Innovation. 3 Hours.
BA 760 Technology & Innovation offers a research approach to identifying, analyzing, and creating technological advantage in nascent and mature industries. Students will apply the methodologies of innovation and discovery to business settings and markets, seeking to create competitive advantage and achieve market transformation through strategic initiatives that redefine consumer expectations and industry practices and reframe organizations to embrace innovative practices and processes.

BA 761. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 762. Grouthink. 3 Hours.
This course explores the origin of groupthink. Groupthink is a term first used by social psychologist Irving L. Janis (1972) that refers to a psychological phenomenon in which people strive for consensus within a group. This course explores groupthink as a phenomenon where people set aside their own personal beliefs or adopt the opinion of the rest of the group.

BA 763. Biotechnology & Innovation: Intellectual Property. 3 Hours.
This course focuses on the protection of proprietary and intellectual rights in inventions, writings, creative works, software, industry trade secrets, industry trade designations, and other intellectual assets at the international, Federal, and State Levels. The course will give special consideration to the emergence of new areas of patent law in Biotechnology and Pharmaceutical fields, examining not only the patentability of intellectual assets, but also the discovery process, particularly in collaborative environments involving multiple organizations and institutions, and the qualifying distinctions between collaborative and competitive research.

BA 790. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.*

BA 791. Professional Project. 3-6 Hours.
This course is used to award graduate credit for prior learning and educational experience obtained outside of the traditional classroom. Through the preparation of a professional project, students provide formal documentation of the specific graduate-level learning competencies which they have acquired through prior experience. A maximum of six (6) credit hours may be earned.

BA 792. Graduate Internship. 1-3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.
BA 793. Graduate Internship II. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization's supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 792.

BA 794. Graduate Internship III. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.

BA 796. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 798. Thesis. 6 Hours.
The thesis may be library-oriented research with extensive reliance on documents and a relatively limited amount of primary field research, or it may be action-oriented field research with relevant documentation from the literature. The title of the thesis topic must be filed with the graduate committee. A student, with the approval of his/her advisory committee, may register for the thesis after completion of twenty-four (24) semester hours.

BA 799. Topic/. 3 Hours.
Students work together in a seminar setting under the direction of a member of the graduate faculty. The content of the seminar will vary according to the interests of students and faculty involved.

A.S. Business Administration
The A.S. Business Administration is a two-year degree. The classes from this program transfers seamlessly into B.S. in Business Administration at Husson University if you so choose.

The program objectives of the A.S. Business Administration degree are:

- To describe the introductory concepts and practices related to accounting, business law, economics, management, and marketing
- To use current technology in support of professional work
- To produce and present effective oral and written forms of communication
- To apply ethical decision-making skills and integrity in an ever-changing, global environment
- To apply critical problem-solving, decision making, and professional skills

Requirements for Major
The program requires a minimum of 61 credit hours of college-level work that demonstrates a broad base of knowledge in Business Administration and general education courses.

General Education Courses
- BA 211 Microeconomics 3
- BA 212 Macroeconomics 3
- CM 100 Speech 3
- CM 221 Professional Communications 3
- EH 123 Rhetoric and Composition I 3
- EH 124 Rhetoric and Composition II 3
- HE 111 The Husson Experience 1
- MI 111 Introduction to Microcomputing 3
- MS 141 Contemporary College Algebra 4
- MS 132 Probability and Statistics 3
- MS 232 Finite Mathematics 3
- PY 111 General Psychology 3

Business Courses
- AC 121 Principles of Accounting I 3
- AC 211 Managerial Accounting 3
- BA 101 Introduction to Business 3
- BA 201 Business Law I 3
- BA 202 Business Law II 3
- BA 310 Organization and Management 3
- BA 311 Human Resource Management 3
- BA 321 Marketing Principles 3
- BA 351 Internship 3

Open Elective 3

Total Hours 62

Credit may not be required for degree completion.

impurely competitive firms.
consumer demand, and price and output determination of purely and
This is an introduction to American capitalism and microeconomic
This is an overview of microeconomic and macroeconomic concepts ranging from physical and biological geography to cultural and political factors. The decision making processes, both local and global, for different types of service oriented, manufacturing, transportation, and resource based businesses will be examined. The relationship of natural resources, population, and culture, and how such factors affect economic activity will be emphasized.

BA 201. Business Law I. 3 Hours.
This course provides students with a basic knowledge of the law of contracts, personal property and real property.

BA 202. Business Law II. 3 Hours.
This course is intended to augment BA 201 with in depth analysis of the law in Contracts, UCC, Corporations, Principal Agency Law, Advanced Tort Law, Environmental Law, Real Property Law, Securities Law and Employment Law.

BA 204. Franchise Formation and Management. 3 Hours.
This class will discuss franchise formation and management with particular emphasis on the discovery and evaluation of the franchisor and the feasibility of entrepreneurs converting an existing business into a franchise chain or creating and selling new franchises, domestic and international. Franchise accounting and finance (borrowing or leveraging) will be covered, as well as, taking the franchise to the stock market or going public (IPO) and raising investment capital. Prerequisite(s): BA 401.

BA 205. Real Estate Law. 3 Hours.
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

BA 210. Economics Overview for Non-Business Majors. 3 Hours.
This is an overview of microeconomic and macroeconomic concepts for non-business majors. It will include an introduction to American capitalism including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of competitive firms. It will also be an introduction to national income accounts, unemployment, inflation, government fiscal policy and monetary policy.

BA 211. Microeconomics. 3 Hours.
This is an introduction to American capitalism and microeconomic concepts including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of purely and impurely competitive firms.

BA 212. Macroeconomics. 3 Hours.
This is an introduction to macroeconomics in the American economy: national income accounts, unemployment, inflation, government fiscal policy, monetary policy and economic growth.

BA 220. Real Estate Principles and Practices. 3 Hours.
This course will provide students with methods of analyzing acquisition and retention of Real Estate. Also, there will be a focus on the skills and techniques required to operate a real estate business, including trust accounts, risk management, and property management.

BA 243. The Business of Innovation. 3 Hours.
This is a cross-disciplinary class that will introduce students to the Lean Startup Scientific Method for developing and commercializing ideas for new ventures or else innovating and developing new products or business models within existing companies. Topics include marketplace innovations, technology and science based innovations, marketplace hypothesis development and testing, frugal and agile engineering, business models, intellectual property, prototyping, exit strategies, and fundraising. Lab component is integrated within module deliverables.

BA 271. Risk Management. 3 Hours.
A study is made of the risks encountered by individuals and business firms. A presentation is made of the basic principles and institutions, which have been developed in risk management. This material is treated primarily from the consumer point of view.

BA 299. Topic/. 1 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 300. Business Presentations. 3 Hours.
Communication is a vital function of any business. Managers at all levels must be able to communicate effectively to advance their career and ensure the success of their organization. This course will give students a working knowledge of how to create, brief, and present information across the organizational communications spectrum. Students will learn how to think critically and apply problem solving skills across a variety of historical and contemporary business topics. Students will learn how to collect, analyze, synthesize, and present information in a professional manner to assorted audiences in different venues. The foundational skill set developed in this course is the ability for students to articulate their ideas in a professional manner within a variety of business settings. Prerequisite(s): EH 124.

BA 302. Business Ethics. 3 Hours.
This course is designed to raise a moral consciousness and sensitivity within the various disciplines of the business curriculum. The disciplines focused on here are business, accounting, marketing, multinational corporations, and those areas of human resource management inclusive of diversity in the workplace within the context of environmental and social responsibility.

BA 306. Franchise Law. 3 Hours.
This is a law class that analyzes all the issues of Franchise Law with a particular emphasis on Contracts, Principal/Agent Franchise Relations, Corporate Formation of Franchises, and Securities Law. Prerequisite(s): BA 201 and BA 202.
BA 310. Organization and Management. 3 Hours.
This course focuses on how to design organization systems and effectively manage them. Students completing the course should understand the universal process of management and key terminology in the language of management. Students are encouraged conceptually to blend contributions from the various schools of management thought into an integrated perspective of what managers do and why.

BA 311. Human Resource Management. 3 Hours.
This course addresses traditional personnel administration issues. Emphasis in the course is on how to manage the major human resource administration functions of job design, reward system design, staffing, training and performance control, to achieve maximum employee performance and satisfaction. Prerequisite(s): BA 310 or (Major=BS Criminal Justice or Major=MS Paralegal or Major=AS Paralegal or Major=BS English - Prelaw).

BA 312. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics include leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 321. Marketing Principles. 3 Hours.
The course covers the language and issues of marketing with an emphasis on developing responsive marketing strategies that meet customer needs. The course focuses on marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing. Other topics will be incorporated into the course including the external environment (focus on integrative topics within marketing, such as economics, politics, government, and nature), marketing research, international/global marketing with relevance to cultural diversity, ethics, the impact of technology on marketing, and careers in marketing.

BA 334. International Economics. 3 Hours.
This applied economics course will emphasize the use of cases to study topics such as comparative advantage, treaties, tariffs, non-tariff trade barriers, and trade blocks among developed and developing nations. Prerequisite(s): BA 211 and BA 212.

BA 344. Personal Financial Planning. 3 Hours.
This course provides comprehensive coverage of personal financial planning in the areas of money management, axes, consumer credit, housing and other consumer decisions, legal protection, insurance, retirement planning, and estate planning. Prerequisite(s): MS 141 or MS 111 or MS 242 or MS 180 or MS 181.

BA 351. Internship. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 352. Internship II. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 353. Internship III. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 354. Internship IV. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 355. Internship V. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 351 and BA 352 and BA 353 and BA 354.

BA 362. Financial Management I. 3 Hours.
The foundation finance course covers basic personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management. Students are expected to become proficient in financial analysis of a corporation and in various aspects of corporate financial management. Prerequisite(s): AC 121 and (AC 122 or AC 211) and BA 211 and (MS 141 or MS 111 or MS 242 or MS 180 or MS 181).

BA 364. Financial Management II. 3 Hours.
The course is a continuation of Financial Management I and will cover such topics as real options, sensitivity, scenario and break-even analysis, basic issues regarding stocks and bonds, risk/return and cost of capital, capital structure and limits to the use of debt. Prerequisite(s): BA 362.

BA 375. Supply Chain Management. 3 Hours.
This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategy to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.
BA 401. Managerial Economics. 3 Hours.
This course is designed to close the gap between economic theory and business application. It reviews traditional analysis and shows its application to the understanding and solution of economic problems of the firm and industry. Prerequisite(s): BA 211 and BA 212.

BA 411. Organizational Behavior. 3 Hours.
This course is highly experimental in its approach to helping students understand and appreciate why people behave the way they do in an organizational context. Students learn how to manage employee behavior by analysis of real world phenomena and by application of principles in the areas of human perception and communication, leadership and motivation, small group dynamics, organizational culture, and organizational change. Prerequisite(s): BA 310.

BA 413. Operations Management. 3 Hours.
Quantitative model building and manipulation are a means of analyzing and synthesizing the elements of productions management. Both deterministic and stochastic modeling are emphasized in the areas of work systems design, queuing, PERT, SQC, inventory control, forecasting, and linear and nonlinear programming. Prerequisite(s): BA 310 and MS 132.

BA 414. Business Strategy. 3 Hours.
This Business Administration senior seminar focuses on decision making at the executive management level, the formulation of strategy, and its implementation in the organization. The course will employ case studies, laboratory simulation techniques, and computer spreadsheet analysis. Prerequisite(s): College Level=Senior.

BA 421. Integrated Marketing Communication and Advertising. 3 Hours.
An introduction into the world of advertising: Students will plan and design Ad campaigns, write copy and design layouts for the different types/forms of advertising. The students will work with local companies and assist them in redesign of their ad campaigns. Prerequisite(s): BA 321.

BA 422. Sales and Sales Management. 3 Hours.
This course provides students with the fundamentals of good salesmanship and sales management. Prior to studying management principles students practice sales techniques in simulations. Cases are used to illustrate and evaluate principles of sales management. Prerequisite(s): BA 321.

BA 423. Retail Management. 3 Hours.
The purpose of this course is to provide students with an understanding of the fundamentals of successful retail operations. Topics included are the market concept in retailing, factors of area and market analysis, and aspects of organizational structure, layout, and personnel planning. Also covered are methods of pricing, merchandising planning, inventory, expense control and sales promotion techniques. Prerequisite(s): BA 321.

BA 424. Marketing Research. 3 Hours.
The basic research concepts and practices as applied to the analysis of marketing problems are examined. Topics include sources of data, collecting data, sampling, questionnaire construction, tabulating data, and report preparation; computerized statistical software is used. Prerequisite(s): BA 321 and MS 132.

BA 425. Marketing Management. 3 Hours.
This is the capstone course for marketing majors. Students apply concepts learned in other courses to marketing problems of business and nonprofit organizations. Cases and business simulations are used to teach decision-making in the complex environment of business. A complete marketing plan for a simulated company of the student’s choice summarizes the student’s knowledge of the field. Prerequisite(s): BA 321.

BA 426. Real Estate Market, Research and Analysis. 3 Hours.
This course will discuss market research, real estate sales, property valuations and analysis. Students will examine market research reports to gain insight into product and market trends, opportunities, projections, and growth in the Maine, the US and global real estate markets. Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 427. Franchise Market Research and Analysis. 3 Hours.
This class will focus on analysis of market demographics, feasibility studies, product pricing, promotion and distribution, franchise broker contacts, extrapolation of sales and expenses, and the projection of costs and net profits, emerging markets and capital expansion. Prerequisite(s): BA 401 and MS 132 and MS 232 and BA 362.

BA 428. Strategic Selling. 3 Hours.
This course builds on the fundamentals of selling. The student will understand how to advance sales in light of complex business environments consisting of layers of buyers, decision makers and those who influence purchasing decisions. A strategic account planning process will be analyzed and applied to real companies by way of case studies. The art and skill of negotiating will be studied and learned through role play. Prerequisite(s): BA 422.

BA 434. International Finance. 3 Hours.
The factors affecting exchange rates are discussed, as well as different types of exchange rate systems and how governments attempt to influence exchange rates. The relationships among interest rate parity, purchasing power parity, the Fisher effect and International Fisher effect and exchange rates are analyzed. Students learn how currency futures, currency options and money market hedges are used to hedge exchange rate risk. Prerequisite(s): BA 362.

BA 437. International Marketing. 3 Hours.
The basics of international marketing will be taught including the foundations of culture, cultural understanding, business customs and practices in global marketing, assessing global markets, and developing international marketing strategy. Prerequisite(s): BA 321.

BA 438. Export-Import Procedures. 3 Hours.
The basics of export-import procedures will be taught including justification for exporting/importing, market planning methods, selection of appropriate marketing mix variables, and regulation. Prerequisite(s): BA 321.

BA 439. International Franchising Management. 3 Hours.
This course will focus on international expansion of franchises, learning the culture, monetary exchanges, imports and exports, local international market analysis and much more. Prerequisite(s): BA 204 and BA 306 and BA 427.

BA 440. Small Business Management I. 3 Hours.
This course supplies prospective and current small business managers with the essential concepts of starting and operating small businesses. Topics covered include: environment and management of small business enterprise, problems in starting small businesses, financial and administrative control, and management of business operations. Particular emphasis is placed on the interrelated nature of the components, particularly as they affect the financial picture of the firm. Through a lecture and discussion format, students are expected to share their own experiences in small businesses with their fellow students. Prerequisite(s): College Level=Senior or College Level=Junior.
BA 441. Entrepreneurship I- New Venture Development. 3 Hours.
Students will be introduced to the practical application of classic
and contemporary business theory as it applies to the early stages
of entrepreneurship and intrapreneurship, opportunity recognition,
innovation, and new venture development. Course topics include types
of entrepreneurs, opportunity recognition, marketing, cash and other
resource requirements, financial statements, planning, franchising,
intellectual property, success/failure/resilience, and growth. Class
will use text, cases, articles, internet sources, and guest lecturers.
Prerequisite(s): College Level=Senior or College Level=Junior.

BA 442. Applied Small Business Management. 3 Hours.
This is an advanced course which focuses on real problems in Small
Business Management, using the case approach. Cases are drawn from
the text, from actual local small businesses, and from the practical
experience of students in the class. Prerequisite(s): College Level=Junior
or College Level=Senior.

BA 443. Entrepreneurship II: Business Plans. 3 Hours.
This class builds on BA 441, New Venture Development. The focus of this
class is on the early stages of formalizing and growing a venture. Topics
include business plan writing, fund raising and cash flow, measuring
and conveying financial position, core strategy development and
competitive advantage, sustainability, international entrepreneurship,
supply chain, growth, and exit. Prerequisite(s): College Level=Junior
or College Level=Senior.

BA 460. Investments. 3 Hours.
Beginning with an introduction to financial markets and investment
instruments, topics include stock and bond quotations and trading
procedures, rate of return, margin trading, stock indexes, stock and bond
valuation, risk and return, portfolio theory, active and passive portfolio
management, and investment performance evaluation. Prerequisite(s): BA 362.

BA 464. Bank & Financial Services Management. 3 Hours.
This course will introduce students to the specific issues in the financial
management of a banking firm and, to a smaller degree, of other financial
intermediaries. Emphasis will be on products, roles, regulatory framework,
and risk management. Prerequisite(s): BA 362.

BA 465. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to
become familiar with the scope and nature of organizations that work
with genetics within biotechnology industries. Through extensive case
studies, students focus on the dynamics of these enterprises, their
organizational structures, the regulatory considerations of these entities,
and how organizational cultures are created to enhance opportunities for
innovation and discovery.

BA 471. Life and Health Insurance. 3 Hours.
This course is intended to provide background knowledge for personal
application and for those responsible for administering benefit plans for
employees; it provides the necessary information required to pass the
State of Maine license examination. Prerequisite(s): BA 271.

BA 472. Casualty and Property Insurance. 3 Hours.
The first part of the course introduces the basics of the entire insurance
business, including a summary of legal aspects, types of insurers and
principles of reinsurance; next, each type of insurance is studied in
detail. Topics covered are fire, consequential loss, inland marine, ocean
marine, theft and surety, liability and miscellaneous property insurance.
Prerequisite(s): BA 271.

BA 473. Real Estate Appraisal. 3 Hours.
This course familiarizes the student with the foundation and principles
of the appraisal process. The student will become familiar with the
three approaches to value. Site valuation, construction costs, depreciation; comparables selection and adjustments; rental multipliers;
and reconciliation will be discussed. The student will focus on the
elements making up the standards for professional appraisal practice.
These elements, i.e., Definitions, Rules, Standards and Standard Rules,
Statements and advisory opinions are discussed in detail along with the
philosophy and history of USPAP. Prerequisite(s): BA 401 and MS 132
and BA 362.

BA 475. E-Business and E-Commerce for Managers. 3 Hours.
This course teaches the basic e-business and e-commerce theory. The
students will apply the theory through the development of a website for
the prime purpose of marketing a product or service or idea online.

BA 490. International Business. 3 Hours.
This course covers the international dimensions of managerial decision-
making including: world economies, international trade theories, tariffs,
quotas and other trade issues, global strategic planning, cross-cultural
management, international market entry, international human resource
management, international organization strategy, international logistics,
import/export operations, currency exchange, international financial
management. Current developments in global economic and business
are emphasized; students participate in a computerized simulation
throughout the semester. Prerequisite(s): BA 310 and BA 321.

BA 495. Senior Management Project. 3 Hours.
An experiential course that gives seniors the opportunity to apply what
they have learned in class to a real business situation. Prerequisite(s):
College Level=Senior.

BA 496. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor
Region Leadership Institute (BRLI) program or the Leadership Maine
program. Both programs are designed to lead students in an exploration
of leadership and their leadership capabilities. Throughout the programs,
students are introduced to key social and economic issues impacting
the local region and the state of Maine. The programs culminate in an
experiential project undertaken with a non-profit partner.

BA 497. Business and Culture Travel Study Course. 3 Hours.
Business and Culture Travel Study course is designed to expose students
to economies across the world. During the course students will travel
to important commercial, cultural and governmental cities. Through
a combination of readings students will be exposed to 20th and 21st
century history, economics, culture political and business philosophy.
The course will also involve visits to major multinational corporations,
cultural activities and lectures from University business faculty when
available. The course will also have two pre-trip class sessions with
readings and one post course session to wrap up the experience and
discuss the student travel logs.

BA 498. Business Seminar. 3 Hours.
This honors course requires the study of various business problems
under the supervision of members of the Department of Business
Administration. A paper is required. An oral examination is scheduled as
the final examination in the course. Prerequisite(s): College Level=Senior.

BA 499. Topic/. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a
special topic of timely interest in the business area. This course may
consist of seminars, lectures, individualized instruction and/or research
related to a specific area of specialization.
BA 600. Research Methods in Business and Education. 3 Hours.
This course is designed for beginning graduate students who have little or no formal preparation in those areas of research and problem-solving essential for a comprehensive study of business and education at the graduate level. Emphasis is placed on the identification of common problem types and the selection and use of appropriate methods of analysis (primarily statistical in nature).

BA 601. Managerial Economics. 3 Hours.
This course begins with a comprehensive overview of micro- and macroeconomic concepts with the aim of developing within students a picture of how business and nonprofit organizations relate to the economy as a whole. The course then focuses on practical applications of economic analysis to problems of concern to managers. Case studies and projects are used to demonstrate the methods used to determine economic feasibility and cost-effectiveness of products, services, and programs.

BA 602. Managerial Accounting. 3 Hours.
This is an accelerated accounting course for those with little or no formal accounting background. The emphasis is on concepts which managers need to know in order to be effective. Topics include the preparation and interpretation of financial statements, cost planning and control, cost-volume-profit analysis, decision-making models, master budgeting and variances, and evaluation of capital projects.

BA 605. Management Communications. 3 Hours.
This is an advanced communications course that builds upon a student's experience and prior undergraduate coursework in writing and oral communications. Topics include: advanced business writing, use of visual materials, selection of secondary sources of information, report preparation, and presentations to small and large groups.

BA 611. Organizational Behavior. 3 Hours.
This course surveys the major field of management, examining structures and processes on both group and organizational levels. Both traditional and contemporary theories are analyzed and applied to business operations.

BA 620. Financial Management. 3 Hours.
Topics considered include financial planning, operating and capital budgets, cash flow, purchasing and accounting procedures, the sources and uses of corporate and institutional funds, and financial analysis for evaluation and control. Students develop projects specifically related to their needs in educational administration, small business, or corporate management. Prerequisite(s): BA 602 or AC 301.

BA 621. Marketing Management. 3 Hours.
This course focuses on complex problems facing decision-makers in the marketing of goods and services. Emphasis is placed on the decision-making process, including assessment of the social, economic, and political environment in which the organization operates; problem definition; development and evaluation of alternatives, and the implementation of the best alternative. Cases in advertising, sales, marketing research, and strategic marketing management provide practice in marketing analysis and decision-making.

BA 622. Production Management. 3 Hours.
Emphasis is placed on the use of quantitative techniques for solving manufacturing problems. The student is given an opportunity to practice mathematical model-building and manipulation. Other topics considered include queuing system design, plant layout, statistical quality control, inventory modeling, Program Evaluation and Review Technique (PERT), linear and nonlinear programming, and control theory.

BA 625. Global Strategic Management. 3 Hours.
This course focuses on the strategic challenges and opportunities confronting firms that undertake to create value and to compete in the global economy. Successful companies develop strategies for doing business in emerging markets that are different from those they use at home and often find novel ways of implementing them too. The class will make extensive use of case analysis and discussion to evaluate and understand the strategic issues that confront firms operating internationally, as well as to appreciate the importance of values and ethics in organization decisions and actions. In this course we will probe the workings of business strategies in transition and emerging economies, gain an understanding of the strategies of local firms, and analyze the international success and failure of companies. Prerequisite(s): BA 600 and 15 Credits From Range [BA 600 To BA 799].

BA 626. Accounting in Planning, Budgeting and Control. 3 Hours.
This course examines the role of accounting in the planning, budgeting, and control process of a business in a dynamic environment. The integration of measuring and analyzing (planning), short-term decisions and managing organizations (control), and preparing various budgets (budgeting) are emphasized. This course is designed as a continuation of BA602 Managerial Accounting. Numerical problems, as well as case studies, are utilized as methods of study. Prerequisite(s): BA 602 or AC 211.

BA 627. Investment Analysis. 3 Hours.
This course provides a detailed description of securities market organization and approaches to investment opportunities. Students will examine theories used in the valuation of financial securities and employ projects and applications to develop a real world understanding of portfolio management. Prerequisite(s): BA 602.

BA 628. New Venture Planning and Management. 3 Hours.
This course deals with the foundation of new ventures and related aspects of managing the small growing enterprise. Techniques taught in this course are equally applicable to small businesses, nonprofit organizations, and new ventures of larger organizations. Topics include: use of scarce resources, such as money, talent and technological expertise; identification of environmental threats and opportunities; and operational considerations such as organizational structure, legal requirements, financing, and accounting procedures.

BA 641. Human Resource Management. 3 Hours.
This course explores human resource management as an integrated process of planning and control designed to achieve high employee productivity and job satisfaction. The course focuses on the essential functions of human resource management as they apply both to the general supervisory responsibilities of every manager and to the specific operations of the personnel department.

BA 642. Leadership in Business and Professions. 3 Hours.
This course is designed to provide graduate management students with a comprehensive review of the essentials for effective leadership. It focuses on the identification of basic leadership styles, explores the theoretical and practical findings of research in leadership development, and seeks to synthesize the student’s leadership style with the most effective working models of leadership.
BA 643. Strategic Change Management. 3 Hours.
Strategic Change Management focuses on the skills required to deal effectively with organizational change. The course addresses first the pressures in the business environment that make change a fundamental reality for managers. Particular attention is paid to change arising from public policy initiatives that impinge on business. The course then examines the manager as change agent responsible for initiating innovation and explores both the personal skills required in the role of change agent and the tools and techniques available to support the manager in that role. The course also examines the problems and opportunities of those who are the recipients of change in an organization and the skills required to cope effectively with that situation.

BA 644. The Legal Environment of Business. 3 Hours.
This course will provide an overview of the important aspects of business law for executives, managers, accountants, and other professionals. The areas of law covered include but are not limited to administrative, contract, corporate and other business organizations, employment relations, real estate, taxes, and UCC sales.

BA 646. Current Issues in Business. 3 Hours.
This course, conducted in seminar fashion, draws on current literature to analyze contemporary and emerging issues facing management in the late twentieth century. Content will vary.

BA 700. Health Care Management. 3 Hours.
This course examines management problems and policy-making in the health care industry. Several areas are considered including: (1) the functions of the health care manager, (2) the types of health care delivery systems, (3) the administration of hospitals, (4) the financing of medical care, and (5) the role of government. Through readings, lectures, discussions, and projects, students clarify their own role in the delivery of health services. The course regularly draws on experts in health planning and health care administration.

BA 701. Legal Environment of Health Care Management. 3 Hours.
The course provides a foundation in the legal and regulatory framework in which health care institutions operate. Students will also examine the legal issues confronting health care managers including director and administrative liability, malpractice, negligence, patient rights and confidentiality, licensure requirements, and the like.

BA 702. Health Care Economics. 3 Hours.
In this course, the principles and tools of economic decision-making are applied to management in the health care sector. The course explores the application to health care management functions of such concepts and processes as supply and demand, resource allocation and utilization, costing and pricing, resource productivity, forecasting and economic aspects of planning, and utilization review. While the principal emphasis in the course is on micro-economic analysis, some consideration is also given to an economic analysis of public policy alternatives for the delivery of health care service. Prerequisite(s): BA 601.

BA 703. Financial Management in Healthcare Organizations. 3 Hours.
This course applies the perspectives and tools of financial analysis to the management of health care organizations and evaluation of organizational performance. Topics covered include capital budgeting, sources of operating revenue, management of cash and inventories, risk analysis and forecasting. Particular attention is paid to cost containment regulatory strategies and their implications for financial planning and management. Prerequisite(s): BA 602.

BA 704. Managing Quality in Healthcare. 3 Hours.
This course examines methods and tools for managing quality in health facilities, physician practices, managed care, and public health. Topics include developments in quality assurance and improvement, utilization review, risk management, and patient satisfaction.

BA 705. Global Perspectives in Healthcare. 3 Hours.
This course examines the social, political, and economic aspects of global healthcare issues. Through a comparative analysis of the health systems of multiple nations, students will compare theories of health policy and priorities, healthcare system facilities, workforce, technology, cost, quality, and access. The emphasis of the course will be on health management strategies used in different countries and healthcare systems to mobilize, allocate, and maintain resources to improve the healthcare status and delivery systems.

BA 710. Law & Ethics for Non-Profit Organizations. 3 Hours.
Non-profit managers and supervisors are held to a higher standard of ethical behavior due to the nature of their funding sources and their mission. This course is designed to develop in the student a basic understanding of the laws governing non-profit organizations, the practical applications of these laws and the ethics that are demanded of non-profit managers.

BA 711. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics covered include: leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 712. Strategic Marketing for Nonprofit Organizations. 3 Hours.
This course applies the concepts of marketing and strategy to the management of non-profit organizations. Through class lectures, discussion, case studies, and applied projects, students will build an understanding of the marketing process in the non-profit environment in order to be able to design, implement, and evaluate an organization’s approach to marketing and strategic positioning.

BA 713. Fundraising. 3 Hours.
This course takes a systems approach to the process of fund-raising. Topics covered include: donor cultivation, use of the annual fund, major gifts, corporate giving, and grant writing.

BA 720. Advanced Sales and Marketing in Hospitality. 3 Hours.
This course focuses on difficult problems and issues facing sales and marketing personnel in the hospitality industry. Students will make use of case studies in order to develop their decision-making process including the use of marketing research and analysis.

BA 721. Convention Planning and Events Planning. 3 Hours.
This course focuses on the rapidly growing convention sales and events planning industries. The student will learn how to design, plan, market and manage meetings and events.

BA 722. Advanced Front Office Operations. 3 Hours.
This course begins with detailed introduction about numerous aspects of front office operations and management. The next section of the course examines the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.
BA 723. Legal Issues in Hospitality Management. 3 Hours.
This course will provide the student an overview of the important aspects of Hospitality Law for Managers, and other professionals. Some of the areas of study include and are not limited to Torts, Products Liability, Constitutional Law and Criminal Law and many other subjects.

BA 724. Managing Service. 3 Hours.
This course begins with an introduction to the framework for providing quality service to customers and guests. Next we will discuss the needs of the customer/guest and proceed to develop our menu and/or product accordingly. Finally, we will learn how management and staff create loyal customers and guests by delivering service that exceeds their expectations.

BA 729. Hospitality Graduate Directed Practicum. 3 Hours.
Each student will find, will choose or will be provided with an internship site. The site chosen will be based on; and interview conducted by the management of the internship site and the student's preference of location based on those available. The Coordinator of Hospitality Management will have the final decision on all internship site placements. The Coordinator's decision will be based on his or her interaction with the student during previous course work, his or her understanding of the student and the internship properties requirements. Every consideration will be given to the student's personal preferences with regard to location and types of property. However, the student's preferences will not be the only consideration for placement. Prerequisite(s): BA 720 and BA 722 and BA 724.

BA 731. Business and Information Technology. 3 Hours.
This graduate course approaches Information Technology from the perspective of information consumers as opposed to technology implementers. During this course, students will examine various technologies and their application within modern organizations. The course has two primary goals. (1) The course will explain information technologies in non-technical terms so that students can evaluate a technology’s effectiveness relative to any existing alternatives and the overall organizational needs. (2) This course should increase student awareness regarding how they interact with technology in a personal or business setting. Business leaders are constantly bombarded with technology. This course addresses the need to sift through that information in a intelligent manner and make smart business decisions.

BA 741. Staffing & Selection. 3 Hours.
A source of competitive advantage for any organization is its talent. The effectiveness of an organization depends on the performance of each individual in that organization. Hence, one of the most important human resource functions is that of staffing the organization. This course is essential for HR professionals who are responsible for recruiting, screening, hiring, promoting, and outplacing employees. It is also very crucial for any line managers, supervisors, team leaders, and hiring managers who are involved in recruiting, making promotions, succession, or any other workforce decisions. An examination of the scientific, legal, and administrative issues associated with the recruitment, selection, employment and retention of individuals by organizations augments the study. Specific attention will be given to the current challenges of an increasingly dynamic workplace and diverse workforce.

BA 742. Training & Development. 3 Hours.
The effective training and development of human resources creates tremendous and unique value for an organization. This course examines how organizations can develop and manage the talents and skillset of human capital. The course explores topics such as training needs analysis, formulating training objectives, and the design, implementation, and evaluation of training and development programs.

BA 745. Innovative Global Strategy. 3 Hours.
This course will build students’ awareness of the challenges that must be addressed and the opportunities that may be present when competing in the global marketplace. The course focuses on how firms apply innovative strategies to create a sustainable competitive advantage in the global arena. Course content will be drawn from readings, case analysis, online content and discussions. The course requires students to analyze and understand real world examples of both successful and unsuccessful global strategy implementation.

BA 750. Fundamentals of Risk Management. 3 Hours.
This course explores the fundamentals of risk management. After discussion of the importance of risk and the rationale for its management in organizations, the remainder of the course will analyze the process of and methods for managing risk.

BA 751. Employee Benefits. 3 Hours.
This course explores the nature and operation of employer-sponsored benefit plans. Emphasis is placed on plan design, administration, funding, and regulation. The course also addresses organizational characteristics, benefit structure, and pricing of risk transfer schemes for groups.

BA 752. Crisis Management. 3 Hours.
Crisis Management can be defined as a communications response to an event that has a negative impact on an audience - the public, customers/clients, employees, shareholders, etc. Examples of such events could include tainted food, a corporate leak, a political scandal, an entertainment or athletic scandal, damaged products that cause or could potentially cause life-threatening situations, natural disasters, terrorism, and financial disasters. In this course, students will analyze and critique high-profile cases and learn how to effectively respond to crises.

BA 753. Corporate Risk Management. 3 Hours.
Corporate risk is analyzed through the lens of enterprise risk management. This course explores the operational and financial risks faced by firms and the study of various methods of handling these risks.

BA 754. Strategic Selling. 3 Hours.
The focus of this course is on key, strategic customer selling approaches. The process of sales planning and strategy development for these types of customers will be emphasized. The objective of this course is to understand and execute sales strategies for managing major and large customers.

BA 760. Technology & Innovation. 3 Hours.
BA 760 Technology & Innovation offers a research approach to identifying, analyzing, and creating technological advantage in nascent and mature industries. Students will apply the methodologies of innovation and discovery to business settings and markets, seeking to create competitive advantage and achieve market transformation through strategic initiatives that redefine consumer expectations and industry practices and reframe organizations to embrace innovative practices and processes.

BA 761. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.
BA 762. Groupthink. 3 Hours.
This course explores the origin of groupthink. Groupthink is a term first used by social psychologist Irving L. Janis (1972) that refers to a psychological phenomenon in which people strive for consensus within a group. This course explores groupthink as a phenomenon where people set aside their own personal beliefs or adopt the opinion of the rest of the group.

BA 763. Biotechnology & Innovation: Intellectual Property. 3 Hours.
This course focuses on the protection of proprietary and intellectual rights in inventions, writings, creative works, software, industry trade secrets, industry trade designations, and other intellectual assets at the international, Federal, and State Levels. The course will give special consideration to the emergence of new areas of patent law in Biotechnology and Pharmaceutical fields, examining not only the patentability of intellectual assets, but also the discovery process, particularly in collaborative environments involving multiple organizations and institutions, and the qualifying distinctions between collaborative and competitive research.

BA 790. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.*

BA 791. Professional Project. 3-6 Hours.
This course is used to award graduate credit for prior learning and educational experience obtained outside of the traditional classroom. Through the preparation of a professional project, students provide formal documentation of the specific graduate-level learning competencies which they have acquired through prior experience. A maximum of six (6) credit hours may be earned.

BA 792. Graduate Internship I. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 793. Graduate Internship II. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization's supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 792.

BA 794. Graduate Internship III. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.

BA 796. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 798. Thesis. 6 Hours.
The thesis may be library-oriented research with extensive reliance on documents and a relatively limited amount of primary field research, or it may be action-oriented field research with relevant documentation from the literature. The title of the thesis topic must be filed with the graduate committee. A student, with the approval of his/her advisory committee, may register for the thesis after completion of twenty-four (24) semester hours.

BA 799. Topic/. 3 Hours.
Students work together in a seminar setting under the direction of a member of the graduate faculty. The content of the seminar will vary according to the interests of students and faculty involved.

A.S. Business Studies
The A.S. Business Studies degree is a general business program which takes up to 2 years to complete. The program requires a minimum of 60 credit hours of college-level work that demonstrates a broad base understanding of business studies and is complemented with some general education course work.

Requirements for Major
All Business Studies majors must earn an overall 2.0 cumulative grade-point average as well as a 2.0 in their College of Business courses. Transfer students must complete a minimum of 30 credits hours at Husson University, with a minimum of 15 credit hours of coursework in the College of Business at Husson.

Business Administration Certificate

This program offers students an opportunity to take both introductory and upper level business courses regarding business practices, policies and laws. The ability to lead and supervise people, communicate effectively, and understand how businesses are organized are valuable skills regardless of what industry you work in. Also, moving up the ladder in a company or organization typically means moving into a management position. A Business Administration Management Certificate will help prepare you for the future.

These certificate courses can be applied to an A.S. or B.S. degree in Business Administration at Husson University, enhance a degree in another discipline or augment prior learning to provide for a change in career.

Total Hours: 62

**Courses**

**BA 101. Introduction to Business. 3 Hours.**
This course introduces students to the general nature of functional areas in business such as marketing, management, accounting, finance, research and development, and risk management. The relationship between business, the government, the economy, and the environment is examined.

**BA 111. Economic Geography. 3 Hours.**
This course is an introduction to the principles of economic geography, ranging from physical and biological geography to cultural and political factors. The decision making processes, both local and global, for different types of service oriented, manufacturing, transportation, and resource based businesses will be examined. The relationship of natural resources, population, and culture, and how such factors affect economic activity will be emphasized.

**BA 201. Business Law I. 3 Hours.**
This course provides students with a basic knowledge of the law of contracts, personal property and real property.

**BA 202. Business Law II. 3 Hours.**
This course is intended to augment BA 201 with in depth analysis of the law in Contracts, UCC, Corporations, Principal Agency Law, Advanced Tort Law, Environmental Law, Real Property Law, Securities Law and Employment Law.

**BA 204. Franchise Formation and Management. 3 Hours.**
This class will discuss franchise formation and management with particular emphasis on the discovery and evaluation of the franchisor and the feasibility of entrepreneurs converting an existing business into a franchise chain or creating and selling new franchises, domestic and international. Franchise accounting and finance (borrowing or leveraging) will be covered, as well as, taking the franchise to the stock market or going public (IPO) and raising investment capital. Prerequisite(s): BA 401.

**BA 205. Real Estate Law. 3 Hours.**
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

**BA 210. Economics Overview for Non-Business Majors. 3 Hours.**
This is an overview of microeconomic and macroeconomic concepts for non-business majors. It will include an introduction to American capitalism including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of competitive firms. It will also be an introduction to national income accounts, unemployment, inflation, government fiscal policy and monetary policy.

**BA 211. Microeconomics. 3 Hours.**
This is an introduction to American capitalism and microeconomic concepts including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of purely and imperfectly competitive firms.
BA 212. Macroeconomics. 3 Hours.
This is an introduction to macroeconomics in the American economy: national income accounts, unemployment, inflation, government fiscal policy, monetary policy and economic growth.

BA 220. Real Estate Principles and Practices. 3 Hours.
This course will provide students with methods of analyzing acquisition and retention of Real Estate. Also, there will be a focus on the skills and techniques required to operate a real estate business, including trust accounts, risk management, and property management.

BA 243. The Business of Innovation. 3 Hours.
This is a cross-disciplinary class that will introduce students to the Lean Startup Scientific Method for developing and commercializing ideas for new ventures or else innovating and developing new products or business models within existing companies. Topics include marketplace innovations, technology and science based innovations, marketplace hypothesis development and testing, frugal and agile engineering, business models, intellectual property, prototyping, exit strategies, and fundraising. Lab component is integrated within module deliverables.

BA 271. Risk Management. 3 Hours.
A study is made of the risks encountered by individuals and business firms. A presentation is made of the basic principles and institutions, which have been developed in risk management. This material is treated primarily from the consumer point of view.

BA 299. Topic/. 1 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 300. Business Presentations. 3 Hours.
Communication is a vital function of any business. Managers at all levels must be able to communicate effectively to advance their career and ensure the success of their organization. This course will give students a working knowledge of how to create, brief, and present information across the organizational communications spectrum. Students will learn how to think critically and apply problem solving skills across a variety of historical and contemporary business topics. Students will learn how to collect, analyze, synthesize, and present information in a professional manner to assorted audiences in different venues. The foundational skill set developed in this course is the ability for students to articulate their ideas in a professional manner within a variety of business settings. Prerequisite(s): EH 124.

BA 302. Business Ethics. 3 Hours.
This course is designed to raise a moral consciousness and sensitivity within the various disciplines of the business curriculum. The disciplines focused on here are business, accounting, marketing, multinational corporations, and those areas of human resource management inclusive of diversity in the workplace within the context of environmental and social responsibility.

BA 306. Franchise Law. 3 Hours.
This is a law class that analyzes all the issues of Franchise Law with a particular emphasis on Contracts, Principal/Agent Franchise Relations, Corporate Formation of Franchises, and Securities Law. Prerequisite(s): BA 201 and BA 202.

BA 310. Organization and Management. 3 Hours.
This course focuses on how to design organization systems and effectively manage them. Students completing the course should understand the universal process of management and key terminology in the language of management. Students are encouraged conceptually to blend contributions from the various schools of management thought into an integrated perspective of what managers do and why.

BA 311. Human Resource Management. 3 Hours.
This course addresses traditional personnel administration issues. Emphasis in the course is on how to manage the major human resource administration functions of job design, reward system design, staffing, training and performance control, to achieve maximum employee performance and satisfaction. Prerequisite(s): BA 310 or ( Major=BS Criminal Justice or Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Paralegal or Major=BS English - Prelaw).

BA 312. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics include leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 321. Marketing Principles. 3 Hours.
The course covers the language and issues of marketing with an emphasis on developing responsive marketing strategies that meet customer needs. The course focuses on marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing. Other topics will be incorporated into the course including the external environment (focus on integrative topics within marketing, such as economics, politics, government, and nature), marketing research, international/global marketing with relevance to cultural diversity, ethics, the impact of technology on marketing, and careers in marketing.

BA 334. International Economics. 3 Hours.
This applied economics course will emphasize the use of cases to study topics such as comparative advantage, treaties, tariffs, non-tariff trade barriers, and trade blocks among developed and developing nations. Prerequisite(s): BA 211 and BA 212.

BA 344. Personal Financial Planning. 3 Hours.
This course provides comprehensive coverage of personal financial planning in the areas of money management, axes, consumer credit, housing and other consumer decisions, legal protection, insurance, retirement planning, and estate planning. Prerequisite(s): MS 141 or MS 111 or MS 242 or MS 180 or MS 181.

BA 351. Internship. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.
BA 352. Internship II. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 353. Internship III. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 354. Internship IV. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 355. Internship V. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 351 and BA 352 and BA 353 and BA 354.

BA 362. Financial Management I. 3 Hours.
The foundation finance course covers basic personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management. Students are expected to become proficient in financial analysis of a corporation and in various aspects of corporate financial management. Prerequisite(s): AC 121 and (AC 122 or AC 211) and BA 211 and (MS 141 or MS 111 or MS 242 or MS 180 or MS 181).

BA 364. Financial Management II. 3 Hours.
The course is a continuation of Financial Management I and will cover such topics as real options, sensitivity, scenario and break-even analysis, basic issues regarding stocks and bonds, risk/return and cost of capital, capital structure and limits to the use of debt. Prerequisite(s): BA 362.

BA 375. Supply Chain Management. 3 Hours.
This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategy to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.

BA 395. Business and Consumer Finance. 3 Hours.
The course is a continuation of Financial Management II and will cover such topics as real options, sensitivity, scenario and break-even analysis, basic issues regarding stocks and bonds, risk/return and cost of capital, capital structure and limits to the use of debt. Prerequisite(s): BA 362.

BA 401. Managerial Economics. 3 Hours.
This course is designed to close the gap between economic theory and business application. It reviews traditional analysis and shows its application to the understanding and solution of economic problems of the firm and industry. Prerequisite(s): BA 211 and BA 212.

BA 411. Organizational Behavior. 3 Hours.
This course is highly experiential in its approach to helping students understand and appreciate why people behave the way they do in an organizational context. Students learn how to manage employee behavior by analysis of real world phenomena and by application of principles in the areas of human perception and communication, leadership and motivation, small group dynamics, organizational culture, and organizational change. Prerequisite(s): BA 310.

BA 413. Operations Management. 3 Hours.
Quantitative model building and manipulation are a means of analyzing and synthesizing the elements of productions management. Both deterministic and stochastic modeling are emphasized in the areas of work systems design, queuing, PERT, SQC, inventory control, forecasting, and linear and nonlinear programming. Prerequisite(s): BA 310 and MS 132.

BA 414. Business Strategy. 3 Hours.
This Business Administration senior seminar focuses on decision making at the executive management level, the formulation of strategy, and its implementation in the organization. The course will employ case studies, laboratory simulation techniques, and computer spreadsheet analysis. Prerequisite(s): College Level=Senior.

BA 421. Integrated Marketing Communication and Advertising. 3 Hours.
An introduction into the world of advertising: Students will plan and design Ad campaigns, write copy and design layouts for the different types/forms of advertising. The students will work with local companies and assist them in redesign of their ad campaigns. Prerequisite(s): BA 321.

BA 422. Sales and Sales Management. 3 Hours.
This course provides students with the fundamentals of good salesmanhip and sales management. Prior to studying management principles students practice sales techniques in simulations. Cases are used to illustrate and evaluate principles of sales management. Prerequisite(s): BA 321.

BA 423. Retail Management. 3 Hours.
The purpose of this course is to provide students with an understanding of the fundamentals of successful retail operations. Topics included are the market concept in retailing, factors of area and market analysis, and aspects of organizational structure, layout, and personnel planning. Also covered are methods of pricing, merchandising planning, inventory, expense control and sales promotion techniques. Prerequisite(s): BA 321.

BA 424. Marketing Research. 3 Hours.
The basic research concepts and practices as applied to the analysis of marketing problems are examined. Topics include sources of data, collecting data, sampling, questionnaire construction, tabulating data, and report preparation; computerized statistical software is used. Prerequisite(s): BA 321 and MS 132.

BA 425. Marketing Management. 3 Hours.
This is the capstone course for marketing majors. Students apply concepts learned in other courses to marketing problems of business and nonprofit organizations. Cases and business simulations are used to teach decision-making in the complex environment of business. A complete marketing plan for a simulated company of the student’s choice summarizes the student’s knowledge of the field. Prerequisite(s): BA 321.
BA 426. Real Estate Market, Research and Analysis. 3 Hours.
This course will discuss market research, real estate sales, property valuations and analysis. Students will examine market research reports to gain insight into product and market trends, opportunities, projections, and growth in the Maine, the US and global real estate markets. Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 427. Franchise Market Research and Analysis. 3 Hours.
This class will focus on analysis of market demographics, feasibility studies, product pricing, promotion and distribution, franchise broker contacts, extrapolation of sales and expenses, and the projection of costs and net profits, emerging markets and capital expansion. Prerequisite(s): BA 401 and MS 132 and MS 232 and BA 362.

BA 428. Strategic Selling. 3 Hours.
This course builds on the fundamentals of selling. The student will understand how to advance sales in light of complex business environments consisting of layers of buyers, decision makers and those who influence purchasing decisions. A strategic account planning process will be analyzed and applied to real companies by way of case studies. The art and skill of negotiating will be studied and learned through role play. Prerequisite(s): BA 422.

BA 434. International Finance. 3 Hours.
The factors affecting exchange rates are discussed, as well as different types of exchange rate systems and how governments attempt to influence exchange rates. The relationships among interest rate parity, purchasing power parity, the Fisher effect and International Fisher effect and exchange rates are analyzed. Students learn how currency futures, currency options and money market hedges are used to hedge exchange rate risk. Prerequisite(s): BA 362.

BA 437. International Marketing. 3 Hours.
The basics of international marketing will be taught including the foundations of culture, cultural understanding, business customs and practices in global marketing, assessing global markets, and developing international marketing strategy. Prerequisite(s): BA 321.

BA 438. Export-Import Procedures. 3 Hours.
The basics of export-import procedures will be taught including justification for exporting/importing, market planning methods, selection of appropriate marketing mix variables, and regulation. Prerequisite(s): BA 321.

BA 439. International Franchising Management. 3 Hours.
This course will focus on international expansion of franchises, learning the culture, monetary exchanges, imports and exports, local international market analysis and much more. Prerequisite(s): BA 204 and BA 306 and BA 427.

BA 440. Small Business Management I. 3 Hours.
This course supplies prospective and current small business managers with the essential concepts of starting and operating small businesses. Topics covered include: environment and management of small business enterprise, problems in starting small businesses, financial and administrative control, and management of business operations. Particular emphasis is placed on the interrelated nature of the components, particularly as they affect the financial picture of the firm. Through a lecture and discussion format, students are expected to share their own experiences in small businesses with their fellow students. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 441. Entrepreneurship I- New Venture Development. 3 Hours.
Students will be introduced to the practical application of classic and contemporary business theory as it applies to the early stages of entrepreneurship and intrapreneurship, opportunity recognition, innovation, and new venture development. Course topics include types of entrepreneurs, opportunity recognition, marketing, cash and other resource requirements, financial statements, planning, franchising, intellectual property, success/failure/resilience, and growth. Class will use text, cases, articles, internet sources, and guest lecturers. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 442. Applied Small Business Management. 3 Hours.
This is an advanced course which focuses on real problems in Small Business Management, using the case approach. Cases are drawn from the text, from actual local small businesses, and from the practical experience of students in the class. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 443. Entrepreneurship II: Business Plans. 3 Hours.
This class builds on BA 441, New Venture Development. The focus of this class is on the early stages of formalizing and growing a venture. Topics include business plan writing, fund raising and cash flow, measuring and conveying financial position, core strategy development and competitive advantage, sustainability, international entrepreneurship, supply chain, growth, and exit. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 460. Investments. 3 Hours.
Beginning with an introduction to financial markets and investment instruments, topics include stock and bond quotations and trading procedures, rate of return, margin trading, stock indexes, stock and bond valuation, risk and return, portfolio theory, active and passive portfolio management, and investment performance evaluation. Prerequisite(s): BA 362.

BA 464. Bank & Financial Services Management. 3 Hours.
This course will introduce students to the specific issues in the financial management of a banking firm and, to a smaller degree, of other financial intermediaries. Emphasis will be on products, roles, regulatory framework, and risk management. Prerequisite(s): BA 362.

BA 465. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 471. Life and Health Insurance. 3 Hours.
This course is intended to provide background knowledge for personal application and for those responsible for administering benefit plans for employees; it provides the necessary information required to pass the State of Maine license examination. Prerequisite(s): BA 271.

BA 472. Casualty and Property Insurance. 3 Hours.
The first part of the course introduces the basics of the entire insurance business, including a summary of legal aspects, types of insurers and principles of reinsurance; next, each type of insurance is studied in detail. Topics covered are fire, consequential loss, inland marine, ocean marine, theft and surety, liability and miscellaneous property insurance. Prerequisite(s): BA 271.
BA 473. Real Estate Appraisal. 3 Hours.
This course familiarizes the student with the foundation and principles of the appraisal process. The student will become familiar with the three approaches to value. Site valuation, construction costs, depreciation; comparables selection and adjustments; rental multipliers; and reconciliation will be discussed. The student will focus on the elements making up the standards for professional appraisal practice. These elements, i.e., Definitions, Rules, Standards and Standard Rules, Statements and advisory opinions are discussed in detail along with the philosophy and history of USPAP. Prerequisite(s): BA 401 and MS 132 and BA 362.

BA 475. E-Business and E-Commerce for Managers. 3 Hours.
This course teaches the basic e-business and e-commerce theory. The students will apply the theory through the development of a website for the prime purpose of marketing a product or service or idea online.

BA 490. International Business. 3 Hours.
This course covers the international dimensions of managerial decision-making including: world economies, international trade theories, tariffs, quotas and other trade issues, global strategic planning, cross-cultural management, international market entry, international human resource management, international organization strategy, international logistics, import/export operations, currency exchange, international financial management. Current developments in global economic and business are emphasized; students participate in a computerized simulation throughout the semester. Prerequisite(s): BA 310 and BA 321.

BA 495. Senior Management Project. 3 Hours.
An experiential course that gives seniors the opportunity to apply what they have learned in class to a real business situation. Prerequisite(s): College Level=Senior.

BA 496. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 497. Business and Culture Travel Study Course. 3 Hours.
Business and Culture Travel Study course is designed to expose students to economies across the world. During the course students will travel to important commercial, cultural and governmental cities. Through a combination of readings students will be exposed to 20th and 21st century history, economics, culture political and business philosophy. The course will also involve visits to major multinational corporations, cultural activities and lectures from University business faculty when available. The course will also have two pre-trip class sessions with readings and one post course session to wrap up the experience and discuss the student travel logs.

BA 498. Business Seminar. 3 Hours.
This honors course requires the study of various business problems under the supervision of members of the Department of Business Administration. A paper is required. An oral examination is scheduled as the final examination in the course. Prerequisite(s): College Level=Senior.

BA 499. Topic/. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 600. Research Methods in Business and Education. 3 Hours.
This course is designed for beginning graduate students who have little or no formal preparation in those areas of research and problem-solving essential for a comprehensive study of business and education at the graduate level. Emphasis is placed on the identification of common problem types and the selection and use of appropriate methods of analysis (primarily statistical in nature).

BA 601. Managerial Economics. 3 Hours.
This course begins with a comprehensive overview of micro- and macroeconomic concepts with the aim of developing within students a picture of how business and nonprofit organizations relate to the economy as a whole. The course then focuses on practical applications of economic analysis to problems of concern to managers. Case studies and projects are used to demonstrate the methods used to determine economic feasibility and cost-effectiveness of products, services, and programs.

BA 602. Managerial Accounting. 3 Hours.
This is an accelerated accounting course for those with little or no formal accounting background. The emphasis is on concepts which managers need to know in order to be effective. Topics include the preparation and interpretation of financial statements, cost planning and control, cost-volume-profit analysis, decision-making models, master budgeting and variances, and evaluation of capital projects.

BA 605. Management Communications. 3 Hours.
This is an advanced communications course that builds upon a student’s experience and prior undergraduate coursework in writing and oral communications. Topics include: advanced business writing, use of visual materials, selection of secondary sources of information, report preparation, and presentations to small and large groups.

BA 611. Organizational Behavior. 3 Hours.
This course surveys the major field of management, examining structures and processes on both group and organizational levels. Both traditional and contemporary theories are analyzed and applied to business operations.

BA 620. Financial Management. 3 Hours.
Topics considered include financial planning, operating and capital budgets, cash flow, purchasing and accounting procedures, the sources and uses of corporate and institutional funds, and financial analysis for evaluation and control. Students develop projects specifically related to their needs in educational administration, small business, or corporate management. Prerequisite(s): BA 602 or AC 301.

BA 621. Marketing Management. 3 Hours.
This course focuses on complex problems facing decision-makers in the marketing of goods and services. Emphasis is placed on the decision-making process, including assessment of the social, economic, and political environment in which the organization operates; problem definition; development and evaluation of alternatives, and the implementation of the best alternative. Cases in advertising, sales, marketing research, and strategic marketing management provide practice in marketing analysis and decision-making.

BA 622. Production Management. 3 Hours.
Emphasis is placed on the use of quantitative techniques for solving manufacturing problems. The student is given an opportunity to practice mathematical model-building and manipulation. Other topics considered include queuing system design, plant layout, statistical quality control, inventory modeling, Program Evaluation and Review Technique (PERT), linear and nonlinear programming, and control theory.
BA 625. Global Strategic Management. 3 Hours.
This course focuses on the strategic challenges and opportunities confronting firms that undertake to create value and to compete in the global economy. Successful companies develop strategies for doing business in emerging markets that are different from those they use at home and often find novel ways of implementing them too. The class will make extensive use of case analysis and discussion to evaluate and understand the strategic issues that confront firms operating internationally, as well as to appreciate the importance of values and ethics in organization decisions and actions. In this course we will probe the workings of business strategies in transition and emerging economies, gain an understanding of the strategies of local firms, and analyze the international success and failure of companies. Prerequisite(s): BA 600 and 15 Credits From Range [BA 600 To BA 799].

BA 626. Accounting in Planning, Budgeting and Control. 3 Hours.
This course examines the role of accounting in the planning, budgeting, and control process of a business in a dynamic environment. The integration of measuring and analyzing (planning), short-term decisions and managing organizations (control), and preparing various budgets (budgeting) are emphasized. This course is designed as a continuation of BA602 Managerial Accounting. Numerical problems, as well as case studies, are utilized as methods of study. Prerequisite(s): BA 602 or AC 211.

BA 627. Investment Analysis. 3 Hours.
This course provides a detailed description of securities market organization and approaches to investment opportunities. Students will examine theories used in the valuation of financial securities and employ projects and applications to develop a real world understanding of portfolio management. Prerequisite(s): BA 602.

BA 628. New Venture Planning and Management. 3 Hours.
This course deals with the foundation of new ventures and related aspects of managing the small growing enterprise. Techniques taught in this course are equally applicable to small businesses, nonprofit organizations, and new ventures of larger organizations. Topics include: use of scarce resources, such as money, talent and technological expertise; identification of environmental threats and opportunities; and operational considerations such as organizational structure, legal requirements, financing, and accounting procedures.

BA 641. Human Resource Management. 3 Hours.
This course explores human resource management as an integrated process of planning and control designed to achieve high employee productivity and job satisfaction. The course focuses on the essential functions of human resource management as they apply both to the general supervisory responsibilities of every manager and to the specific operations of the personnel department.

BA 642. Leadership in Business and Professions. 3 Hours.
This course is designed to provide graduate management students with a comprehensive review of the essentials for effective leadership. It focuses on the identification of basic leadership styles, explores the theoretical and practical findings of research in leadership development, and seeks to synthesize the student’s leadership style with the most effective working models of leadership.

BA 643. Strategic Change Management. 3 Hours.
Strategic Change Management focuses on the skills required to deal effectively with organizational change. The course addresses first the pressures in the business environment that make change a fundamental reality for managers. Particular attention is paid to change arising from public policy initiatives that impinge on business. The course then examines the manager as change agent responsible for initiating innovation and explores both the personal skills required in the role of change agent and the tools and techniques available to support the manager in that role. The course also examines the problems and opportunities of those who are the recipients of change in an organization and the skills required to cope effectively with that situation.

BA 644. The Legal Environment of Business. 3 Hours.
This course will provide an overview of the important aspects of business law for executives, managers, accountants, and other professionals. The areas of law covered include but are not limited to administrative, contract, corporate and other business organizations, employment relations, real estate, taxes, and UCC sales.

BA 646. Current Issues in Business. 3 Hours.
This course, conducted in seminar fashion, draws on current literature to analyze contemporary and emerging issues facing management in the late twentieth century. Content will vary.

BA 700. Health Care Management. 3 Hours.
This course examines management problems and policy-making in the health care industry. Several areas are considered including: (1) the functions of the health care manager, (2) the types of health care delivery systems, (3) the administration of hospitals, (4) the financing of medical care, and (5) the role of government. Through readings, lectures, discussions, and projects, students clarify their own role in the delivery of health services. The course regularly draws on experts in health planning and health care administration.

BA 701. Legal Environment of Health Care Management. 3 Hours.
The course provides a foundation in the legal and regulatory framework in which health care institutions operate. Students will also examine the legal issues confronting health care managers including director and administrative liability, malpractice, negligence, patient rights and confidentiality, licensure requirements, and the like.

BA 702. Health Care Economics. 3 Hours.
In this course, the principles and tools of economic decision-making are applied to management in the health care sector. The course explores the application to health care management functions of such concepts and processes as supply and demand, resource allocation and utilization, costing and pricing, resource productivity, forecasting and economic aspects of planning, and utilization review. While the principal emphasis in the course is on micro-economic analysis, some consideration is also given to an economic analysis of public policy alternatives for the delivery of health care service. Prerequisite(s): BA 601.

BA 703. Financial Management in Healthcare Organizations. 3 Hours.
This course applies the perspectives and tools of financial analysis to the management of health care organizations and evaluation of organizational performance. Topics covered include capital budgeting, sources of operating revenue, management of cash and inventories, risk analysis and forecasting. Particular attention is paid to cost containment regulatory strategies and their implications for financial planning and management. Prerequisite(s): BA 602.
BA 704. Managing Quality in Healthcare. 3 Hours.
This course examines methods and tools for managing quality in health facilities, physician practices, managed care, and public health. Topics include developments in quality assurance and improvement, utilization review, risk management, and patient satisfaction.

BA 705. Global Perspectives in Healthcare. 3 Hours.
This course examines the social, political, and economic aspects of global healthcare issues. Through a comparative analysis of the health systems of multiple nations, students will compare theories of health policy and priorities, healthcare system facilities, workforce, technology, cost, quality, and access. The emphasis of the course will be on health management strategies used in different countries and healthcare systems to mobilize, allocate, and maintain resources to improve the healthcare status and delivery systems.

BA 710. Law & Ethics for Non-Profit Organizations. 3 Hours.
Non-profit managers and supervisors are held to a higher standard of ethical behavior due to the nature of their funding sources and their mission. This course is designed to develop in the student a basic understanding of the laws governing non-profit organizations, the practical applications of these laws and the ethics that are demanded of non-profit managers.

BA 711. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues specific to managing and leading non-profit organizations. Topics covered include: leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 712. Strategic Marketing for Nonprofit Organizations. 3 Hours.
This course applies the concepts of marketing and strategy to the management of non-profit organizations. Through class lectures, discussion, case studies, and applied projects, students will build an understanding of the marketing process in the non-profit environment in order to be able to design, implement, and evaluate an organization’s approach to marketing and strategic positioning.

BA 713. Fundraising. 3 Hours.
This course takes a systems approach to the process of fund-raising. Topics covered include: donor cultivation, use of the annual fund, major gifts, corporate giving, and grant writing.

BA 720. Advanced Sales and Marketing in Hospitality. 3 Hours.
This course focuses on difficult problems and issues facing sales and marketing personnel in the hospitality industry. Students will make use of case studies in order to develop their decision-making process including the use of marketing research and analysis.

BA 721. Convention Planning and Events Planning. 3 Hours.
This course focuses on the rapidly growing convention sales and events planning industries. The student will learn how to design, plan, market and manage meetings and events.

BA 722. Advanced Front Office Operations. 3 Hours.
This course begins with a detailed introduction about numerous aspects of front office operations and management. The next section of the course examines the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.

BA 723. Legal Issues in Hospitality Management. 3 Hours.
This course will provide the student an overview of the important aspects of Hospitality Law for Managers, and other professionals. Some of the areas of study include and are not limited to Torts, Products Liability, Constitutional Law and Criminal Law and many other subjects.

BA 724. Managing Service. 3 Hours.
This course begins with an introduction to the framework for providing quality service to customers and guests. Next we will discuss the needs of the customer/guest and proceed to develop our menu and/or product accordingly. Finally, we will learn how management and staff create loyal customers and guests by delivering service that exceeds their expectations.

BA 729. Hospitality Graduate Directed Practicum. 3 Hours.
Each student will find, will choose or will be provided with an internship site. The site chosen will be based on; and interview conducted by the management of the internship site and the student’s preference of location based on those available. The Coordinator of Hospitality Management will have the final decision on all internship site placements. The Coordinator’s decision will be based on his or her interaction with the student during previous course work, his or her understanding of the student and the internship properties requirements. Every consideration will be given to the student’s personal preferences with regard to location and types of property. However, the student’s preferences will not be the only consideration for placement. Prerequisite(s): BA 720 and BA 722 and BA 724.

BA 731. Business and Information Technology. 3 Hours.
This graduate course approaches Information Technology from the perspective of information consumers as opposed to technology implementers. During this course, students will examine various technologies and their application within modern organizations. The course has two primary goals. (1) The course will explain information technologies in non-technical terms so that students can evaluate a technology’s effectiveness relative to any existing alternatives and the overall organizational needs. (2) This course should increase student awareness regarding how they interact with technology in a personal or business setting. Business leaders are constantly bombarded with technology. This course addresses the need to sift through that information in an intelligent manner and make smart business decisions.

BA 741. Staffing & Selection. 3 Hours.
A source of competitive advantage for any organization is its talent. The effectiveness of an organization depends on the performance of each individual in that organization. Hence, one of the most important human resource functions is that of staffing the organization. This course is essential for HR professionals who are responsible for recruiting, screening, hiring, promoting, and outplacing employees. It is also very crucial for any line managers, supervisors, team leaders, and hiring managers who are involved in recruiting, making promotions, succession, or any other workforce decisions. An examination of the scientific, legal, and administrative issues associated with the recruitment, selection, employment and retention of individuals by organizations augments the study. Specific attention will be given to the current challenges of an increasingly dynamic workplace and diverse workforce.

BA 742. Training & Development. 3 Hours.
The effective training and development of human resources creates tremendous and unique value for an organization. This course examines how organizations can develop and manage the talents and skillset of human capital. The course explores topics such as training needs analysis, formulating training objectives, and the design, implementation, and evaluation of training and development programs.
BA 745. Innovative Global Strategy. 3 Hours.
This course will build students' awareness of the challenges that must be addressed and the opportunities that may be present when competing in the global marketplace. The course focuses on how firms apply innovative strategies to create a sustainable competitive advantage in the global arena. Course content will be drawn from readings, case analysis, online content and discussions. The course requires students to analyze and understand real world examples of both successful and unsuccessful global strategy implementation.

BA 750. Fundamentals of Risk Management. 3 Hours.
This course explores the fundamentals of risk management. After discussion of the importance of risk and the rationale for its management in organizations, the remainder of the course will analyze the process of and methods for managing risk.

BA 751. Employee Benefits. 3 Hours.
This course explores the nature and operation of employer-sponsored benefit plans. Emphasis is placed on plan design, administration, funding, and regulation. The course also addresses organizational characteristics, benefit structure, and pricing of risk transfer schemes for groups.

BA 752. Crisis Management. 3 Hours.
Crisis Management can be defined as a communications response to an event that has a negative impact on an audience - the public, customers/clients, employees, shareholders, etc. Examples of such events could include tainted food, a corporate leak, a political scandal, an entertainment or athletic scandal, damaged products that cause or could potentially cause life-threatening situations, natural disasters, terrorism, and financial disasters. In this course, students will analyze and critique high-profile cases and learn how to effectively respond to crises.

BA 753. Corporate Risk Management. 3 Hours.
Corporate risk is analyzed through the lens of enterprise risk management. This course explores the operational and financial risks faced by firms and the study of various methods of handling these risks.

BA 754. Strategic Selling. 3 Hours.
The focus of this course is on key, strategic customer selling approaches. The process of sales planning and strategy development for these types of customers will be emphasized. The objective of this course is to understand and execute sales strategies for managing major and large customers.

BA 760. Technology & Innovation. 3 Hours.
BA 760 Technology & Innovation offers a research approach to identifying, analyzing, and creating technological advantage in nascent and mature industries. Students will apply the methodologies of innovation and discovery to business settings and markets, seeking to create competitive advantage and achieve market transformation through strategic initiatives that reframe consumer expectations and industry practices and reframe organizations to embrace innovative practices and processes.

BA 761. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 762. Groupthink. 3 Hours.
This course explores the origin of groupthink. Groupthink is a term first used by social psychologist Irving L. Janis (1972) that refers to a psychological phenomenon in which people strive for consensus within a group. This course explores groupthink as a phenomenon where people set aside their own personal beliefs or adopt the opinion of the rest of the group.

BA 763. Biotechnology & Innovation: Intellectual Property. 3 Hours.
This course focuses on the protection of proprietary and intellectual rights in inventions, writings, creative works, software, industry trade secrets, industry trade designations, and other intellectual assets at the international, Federal, and State Levels. The course will give special consideration to the emergence of new areas of patent law in Biotechnology and Pharmaceutical fields, examining not only the patentability of intellectual assets, but also the discovery process, particularly in collaborative environments involving multiple organizations and institutions, and the qualifying distinctions between collaborative and competitive research.

BA 790. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.*

BA 791. Professional Project. 3-6 Hours.
This course is used to award graduate credit for prior learning and educational experience obtained outside of the traditional classroom. Through the preparation of a professional project, students provide formal documentation of the specific graduate-level learning competencies which they have acquired through prior experience. A maximum of six (6) credit hours may be earned.

BA 792. Graduate Internship I. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 793. Graduate Internship II. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization’s supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 792.

BA 794. Graduate Internship III. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.
BA 796. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 798. Thesis. 6 Hours.
The thesis may be library-oriented research with extensive reliance on documents and a relatively limited amount of primary field research, or it may be action-oriented field research with relevant documentation from the literature. The title of the thesis topic must be filed with the graduate committee. A student, with the approval of his/her advisory committee, may register for the thesis after completion of twenty-four (24) semester hours.

BA 799. Topic/. 3 Hours.
Students work together in a seminar setting under the direction of a member of the graduate faculty. The content of the seminar will vary according to the interests of students and faculty involved.

Entrepreneurship Certificate

Innovative and/or growing companies have a goal of adding 30 percent of their sales from products, services or markets that did not exist 5 years before. Combining theory with a strong dose of applied learning, these courses will add the skills needed to start a company, or else re-start a business unit or product line in an existing company.

These certificate courses can be applied to an A.S. or B.S. degree in Business Administration at Husson University, enhance a degree in another discipline, or augment prior learning to provide for a change in career.

Small Business Certificate

Many theories of business were developed for large companies, but 90 percent of US companies employ 20 people or fewer. Chances are very good that the student will work for, supply, advise, or own a smaller company. The student may be joining a family run company, starting a new firm or buying an existing one. The courses in this certificate will step those big business theories down to the realities of a smaller company.

These certificate courses can be applied to an A.S. or B.S. degree in Business Administration at Husson University, enhance a degree in another discipline, or augment prior learning to provide for a change in career.

B.S. Business and Liberal Studies - Multidisciplinary Program of Study

The B.S. Business and Liberal Studies degree is a unique opportunity for Husson University students to stand out in a crowd by sharpening their competitive edge and demonstrating their ability to think analytically, critically, and creatively.

The impetus behind this degree was to help students, particularly those already in the work-force, increase the value and make meaning out of a liberal arts education by combining required courses in the general education curriculum with a focus on business courses and science and humanities electives.

Requirements for the Major

All Business and Liberal Studies majors must earn an overall 2.0 cumulative grade-point average as well as a 2.0 in their School of Business courses. Transfer students must complete a minimum of 30
credits hours at Husson University with a minimum of 15 credit hours in School of Business courses at Husson.

B.S. Business and Liberal Studies -
Multidisciplinary Program of Study

The fundamental program requirement is that each student must complete an approved program of study having no fewer than 120-credit hours of college-level work that demonstrates a broad base in business and in liberal studies courses along with a full complement of general education courses.

Students in the B.S. Business and Liberal Studies degree will be able to meet the following program objectives:

• To explain the major concepts in the functional areas of accounting, finance and management.
• To evaluate the legal, social and economic environments of business.
• To describe the global environment of business.
• To apply ethical decision making skills and integrity in an ever-changing, global environment.
• To apply critical problem solving and professional skills in an experiential learning environment.
• To demonstrate oral and written communication skills, appropriate to the profession.
• To critique ideas, to be self-reflective, to respond creatively to the ideas and experiences of others and to analyze, synthesize and evaluate ideas and information.
• To reflect on the question of relationships: between yourself and others; between personal values and actions; between your understanding of self and what you see as "your work in the world."
• To understand the dynamic social forces affecting your community, the nation and the world through study in such areas as history, economics, politics, social studies, and cultural studies.
• To understand the dynamic relationship between theory and practice.

*** May not be required for degree completion.

Business and Professional Studies

The undergraduate Business and Professional Studies major, leading to a B.S. degree, is designed for students who have completed an A.S. or A.A.S. degree at a Community College and concentrated on an area other than business. Various technology related degrees, such as automotive, building or welding can be evaluated for transfer credits into this program of study to allow for students to expand their knowledge for opening a business or working in their field of choice that has interaction with the business world.

In implementing this 2+2 program, the University has developed a specific articulation agreement with each institution. Where such an agreement does not exist, each student transcript will be evaluated individually to compensate for variations in academic programs. The curriculum objective is to ensure that every student has a minimum of 42 credits in general studies, a good foundation in business, and some depth of study in two or more business disciplines.

Requirements for Major

All Business and Professional Studies majors must earn an overall 2.0 cumulative grade-point average as well as a 2.0 in their Ba prefix courses.
Transfer students must complete a minimum of 15 credit hours in Business and Professional courses at Husson.

Global Elective
BA 351 Internship 3

Total Hours 57

A student who has completed one or more of the Husson requirements during an associate program will select substitutes from any of the following: risk management, operations management, or any upper (300 or 400) level business related elective.

Candidates for a Bachelor of Science degree are required to complete a minimum of 120 semester hours maintaining a 2.0 overall cumulative grade point average and a 2.0 overall in their major courses. Transfer students must complete a minimum of thirty (30) credit hours at Husson University. At least fifteen (15) credits must be earned in Husson Business courses.

**Courses**

**BA 101. Introduction to Business. 3 Hours.**

This course introduces students to the general nature of functional areas in business such as marketing, management, accounting, finance, research and development, and risk management. The relationship between business, the government, the economy, and the environment is examined.

**BA 111. Economic Geography. 3 Hours.**

This course is an introduction to the principles of economic geography, ranging from physical and biological geography to cultural and political factors. The decision making processes, both local and global, for different types of service oriented, manufacturing, transportation, and resource based businesses will be examined. The relationship of natural resources, population, and culture, and how such factors affect economic activity will be emphasized.

**BA 201. Business Law I. 3 Hours.**

This course provides students with a basic knowledge of the law of contracts, personal property and real property.

**BA 202. Business Law II. 3 Hours.**

This course is intended to augment BA 201 with in depth analysis of the law in Contracts, UCC, Corporations, Principal Agency Law, Advanced Tort Law, Environmental Law, Real Property Law, Securities Law and Employment Law.

**BA 204. Franchise Formation and Management. 3 Hours.**

This class will discuss franchise formation and management with particular emphasis on the discovery and evaluation of the franchisor and the feasibility of entrepreneurs converting an existing business into a franchise chain or creating and selling new franchises, domestic and international. Franchise accounting and finance (borrowing or leveraging) will be covered, as well as, taking the franchise to the stock market or going public (IPO) and raising investment capital. Prerequisite(s): BA 401.
BA 205. Real Estate Law. 3 Hours.
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

BA 210. Economics Overview for Non-Business Majors. 3 Hours.
This is an overview of microeconomic and macroeconomic concepts for non-business majors. It will include an introduction to American capitalism including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of competitive firms. It will also be an introduction to national income accounts, unemployment, inflation, government fiscal policy and monetary policy.

BA 211. Microeconomics. 3 Hours.
This is an introduction to American capitalism and microeconomic concepts including the mechanics of supply and demand, elasticity, consumer demand, and price and output determination of purely and impurely competitive firms.

BA 212. Macroeconomics. 3 Hours.
This is an introduction to macroeconomics in the American economy: national income accounts, unemployment, inflation, government fiscal policy, monetary policy and economic growth.

BA 220. Real Estate Principles and Practices. 3 Hours.
This course will provide students with methods of analyzing acquisition and retention of Real Estate. Also, there will be a focus on the skills and techniques required to operate a real estate business, including trust accounts, risk management, and property management.

BA 243. The Business of Innovation. 3 Hours.
This is a cross-disciplinary class that will introduce students to the Lean Startup Scientific Method for developing and commercializing ideas for new ventures or else innovating and developing new products or business models within existing companies. Topics include marketplace innovations, technology and science based innovations, marketplace hypothesis development and testing, frugal and agile engineering, business models, intellectual property, prototyping, exit strategies, and fundraising. Lab component is integrated within module deliverables.

BA 271. Risk Management. 3 Hours.
A study is made of the risks encountered by individuals and business firms. A presentation is made of the basic principles and institutions, which have been developed in risk management. This material is treated primarily from the consumer point of view.

BA 299. Topic/. 1 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 300. Business Presentations. 3 Hours.
Communication is a vital function of any business. Managers at all levels must be able to communicate effectively to advance their career and ensure the success of their organization. This course will give students a working knowledge of how to create, brief, and present information across the organizational communications spectrum. Students will learn how to think critically and apply problem solving skills across a variety of historical and contemporary business topics. Students will learn how to collect, analyze, synthesize, and present information in a professional manner to assorted audiences in different venues. The foundational skill set developed in this course is the ability for students to articulate their ideas in a professional manner within a variety of business settings. Prerequisite(s): EH 124.

BA 302. Business Ethics. 3 Hours.
This course is designed to raise a moral consciousness and sensitivity within the various disciplines of the business curriculum. The disciplines focused on here are business, accounting, marketing, multinational corporations, and those areas of human resource management inclusive of diversity in the workplace within the context of environmental and social responsibility.

BA 306. Franchise Law. 3 Hours.
This is a law class that analyzes all the issues of Franchise Law with a particular emphasis on Contracts, Principal/Agent Franchise Relations, Corporate Formation of Franchises, and Securities Law. Prerequisite(s): BA 201 and BA 202.

BA 310. Organization and Management. 3 Hours.
This course focuses on how to design organization systems and effectively manage them. Students completing the course should understand the universal process of management and key terminology in the language of management. Students are encouraged conceptually to blend contributions from the various schools of management thought into an integrated perspective of what managers do and why.

BA 311. Human Resource Management. 3 Hours.
This course addresses traditional personnel administration issues. Emphasis in the course is on how to manage the major human resource administration functions of job design, reward system design, staffing, training and performance control, to achieve maximum employee performance and satisfaction. Prerequisite(s): BA 310 or ( Major=BS Criminal Justice or Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Paralegal or Major=BS English - Prelaw).

BA 312. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics include leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 321. Marketing Principles. 3 Hours.
The course covers the language and issues of marketing with an emphasis on developing responsive marketing strategies that meet customer needs. The course focuses on marketing concepts, the role of marketing in the organization, and the role of marketing in society. Topics include market segmentation, product development, promotion, distribution, and pricing. Other topics will be incorporated into the course including the external environment (focus on integrative topics within marketing, such as economics, politics, government, and nature), marketing research, international/global marketing with relevance to cultural diversity, ethics, the impact of technology on marketing, and careers in marketing.
BA 334. International Economics. 3 Hours.
This applied economics course will emphasize the use of cases to study topics such as comparative advantage, treaties, tariffs, non-tariff trade barriers, and trade blocks among developed and developing nations. Prerequisite(s): BA 211 and BA 212.

BA 344. Personal Financial Planning. 3 Hours.
This course provides comprehensive coverage of personal financial planning in the areas of money management, axes, consumer credit, housing and other consumer decisions, legal protection, insurance, retirement planning, and estate planning. Prerequisite(s): MS 141 or MS 111 or MS 242 or MS 180 or MS 181.

BA 351. Internship. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 352. Internship II. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 353. Internship III. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 354. Internship IV. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.

BA 355. Internship V. 3 Hours.
In this experiential course, the student serves as an intern with a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong business element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 351 and BA 352 and BA 353 and BA 354.

BA 362. Financial Management I. 3 Hours.
The foundation finance course covers basic personal and corporate financial management issues. Topics include personal financial planning, financial statements, financial ratio analysis, capital budgeting, financial forecasting, and cash inventory and receivables management. Students are expected to become proficient in financial analysis of a corporation and in various aspects of corporate financial management. Prerequisite(s): AC 121 and (AC 122 or AC 211) and BA 211 and (MS 141 or MS 111 or MS 242 or MS 180 or MS 181).

BA 364. Financial Management II. 3 Hours.
The course is a continuation of Financial Management I and will cover such topics as real options, sensitivity, scenario and break-even analysis, basic issues regarding stocks and bonds, risk/return and cost of capital, capital structure and limits to the use of debt. Prerequisite(s): BA 362.

BA 375. Supply Chain Management. 3 Hours.
This course provides the basic concepts of logistics and supply chain management. The student will study logistical problems and appropriate strategics to solve these problems in the major areas of transportation, inventory, location, logistics control and global logistics planning. This course will represent the basic marketing areas: distribution, product, price and promotion.

BA 401. Managerial Economics. 3 Hours.
This course is designed to close the gap between economic theory and business application. It reviews traditional analysis and shows its application to the understanding and solution of economic problems of the firm and industry. Prerequisite(s): BA 211 and BA 212.

BA 411. Organizational Behavior. 3 Hours.
This course is highly experiential in its approach to helping students understand and appreciate why people behave the way they do in an organizational context. Students learn how to manage employee behavior by analysis of real world phenomena and by application of principles in the areas of human perception and communication, leadership and motivation, small group dynamics, organizational culture, and organizational change. Prerequisite(s): BA 310.

BA 413. Operations Management. 3 Hours.
Quantitative model building and manipulation are a means of analyzing and synthesizing the elements of productions management. Both deterministic and stochastic modeling are emphasized in the areas of work systems design, queuing, PERT, SQC, inventory control, forecasting, and linear and nonlinear programming. Prerequisite(s): BA 310 and MS 132.

BA 414. Business Strategy. 3 Hours.
This Business Administration senior seminar focuses on decision making at the executive management level, the formulation of strategy, and its implementation in the organization. The course will employ case studies, laboratory simulation techniques, and computer spreadsheet analysis. Prerequisite(s): College Level=Senior.

BA 421. Integrated Marketing Communication and Advertising. 3 Hours.
An introduction into the world of advertising. Students will plan and design Ad campaigns, write copy and design layouts for the different types/forms of advertising. The students will work with local companies and assist them in redesign of their ad campaigns. Prerequisite(s): BA 321.
BA 422. Sales and Sales Management. 3 Hours.
This course provides students with the fundamentals of good salesmanship and sales management. Prior to studying management principles students practice sales techniques in simulations. Cases are used to illustrate and evaluate principles of sales management. Prerequisite(s): BA 321.

BA 423. Retail Management. 3 Hours.
The purpose of this course is to provide students with an understanding of the fundamentals of successful retail operations. Topics included are the market concept in retailing, factors of area and market analysis, and aspects of organizational structure, layout, and personnel planning. Also covered are methods of pricing, merchandising planning, inventory, expense control and sales promotion techniques. Prerequisite(s): BA 321.

BA 424. Marketing Research. 3 Hours.
The basic research concepts and practices as applied to the analysis of marketing problems are examined. Topics include sources of data, collecting data, sampling, questionnaire construction, tabulating data, and report preparation; computerized statistical software is used. Prerequisite(s): BA 321 and MS 132.

BA 425. Marketing Management. 3 Hours.
This is the capstone course for marketing majors. Students apply concepts learned in other courses to marketing problems of business and nonprofit organizations. Cases and business simulations are used to teach decision-making in the complex environment of business. A complete marketing plan for a simulated company of the student's choice summarizes the student's knowledge of the field. Prerequisite(s): BA 321.

BA 426. Real Estate Market, Research and Analysis. 3 Hours.
This course will discuss market research, real estate sales, property valuations and analysis. Students will examine market research reports to gain insight into product and market trends, opportunities, projections, and growth in the Maine, the US and global real estate markets. Prerequisite(s): BA 401 and MS 132 and (BA 205 or PL 201).

BA 427. Franchise Market Research and Analysis. 3 Hours.
This class will focus on analysis of market demographics, feasibility studies, product pricing, promotion and distribution, franchise broker contacts, extrapolation of sales and expenses, and the projection of costs and net profits, emerging markets and capital expansion. Prerequisite(s): BA 401 and MS 132 and MS 232 and BA 362.

BA 428. Strategic Selling. 3 Hours.
This course builds on the fundamentals of selling. The student will understand how to advance sales in light of complex business environments consisting of layers of buyers, decision makers and those who influence purchasing decisions. A strategic account planning process will be analyzed and applied to real companies by way of case studies. The art and skill of negotiating will be studied and learned through role play. Prerequisite(s): BA 422.

BA 434. International Finance. 3 Hours.
The factors affecting exchange rates are discussed, as well as different types of exchange rate systems and how governments attempt to influence exchange rates. The relationships among interest rate parity, purchasing power parity, the Fisher effect and International Fisher effect and exchange rates are analyzed. Students learn how currency futures, currency options and money market hedges are used to hedge exchange rate risk. Prerequisite(s): BA 362.

BA 437. International Marketing. 3 Hours.
The basics of international marketing will be taught including the foundations of culture, cultural understanding, business customs and practices in global marketing, assessing global markets, and developing international marketing strategy. Prerequisite(s): BA 321.

BA 438. Export-Import Procedures. 3 Hours.
The basics of export-import procedures will be taught including justification for exporting/importing, market planning methods, selection of appropriate marketing mix variables, and regulation. Prerequisite(s): BA 321.

BA 439. International Franchising Management. 3 Hours.
This course will focus on international expansion of franchises, learning the culture, monetary exchanges, imports and exports, local international market analysis and much more. Prerequisite(s): BA 204 and BA 306 and BA 427.

BA 440. Small Business Management I. 3 Hours.
This course supplies prospective and current small business managers with the essential concepts of starting and operating small businesses. Topics covered include: environment and management of small business enterprise, problems in starting small businesses, financial and administrative control, and management of business operations. Particular emphasis is placed on the interrelated nature of the components, particularly as they affect the financial picture of the firm. Through a lecture and discussion format, students are expected to share their own experiences in small businesses with their fellow students. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 441. Entrepreneurship I- New Venture Development. 3 Hours.
Students will be introduced to the practical application of classic and contemporary business theory as it applies to the early stages of entrepreneurship and intrapreneurship, opportunity recognition, innovation, and new venture development. Course topics include types of entrepreneurs, opportunity recognition, marketing, cash and other resource requirements, financial statements, planning, franchising, intellectual property, success/failure/resilience, and growth. Class will use text, cases, articles, internet sources, and guest lecturers. Prerequisite(s): College Level=Senior or College Level=Junior.

BA 442. Applied Small Business Management. 3 Hours.
This is an advanced course which focuses on real problems in Small Business Management, using the case approach. Cases are drawn from the text, from actual local small businesses, and from the practical experience of students in the class. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 443. Entrepreneurship II: Business Plans. 3 Hours.
This class builds on BA 441, New Venture Development. The focus of this class is on the early stages of formalizing and growing a venture. Topics include business plan writing, fund raising and cash flow, measuring and conveying financial position, core strategy development and competitive advantage, sustainability, international entrepreneurship, supply chain, growth, and exit. Prerequisite(s): College Level=Junior or College Level=Senior.

BA 460. Investments. 3 Hours.
Beginning with an introduction to financial markets and investment instruments, topics include stock and bond quotations and trading procedures, rate of return, margin trading, stock indexes, stock and bond valuation, risk and return, portfolio theory, active and passive portfolio management, and investment performance evaluation. Prerequisite(s): BA 362.
BA 464. Bank & Financial Services Management. 3 Hours.
This course will introduce students to the specific issues in the financial management of a banking firm and, to a smaller degree, of other financial intermediaries. Emphasis will be on products, roles, regulatory framework, and risk management. Prerequisite(s): BA 362.

BA 465. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 471. Life and Health Insurance. 3 Hours.
This course is intended to provide background knowledge for personal application and for those responsible for administering benefit plans for employees; it provides the necessary information required to pass the State of Maine license examination. Prerequisite(s): BA 271.

BA 472. Casualty and Property Insurance. 3 Hours.
The first part of the course introduces the basics of the entire insurance business, including a summary of legal aspects, types of insurers and principles of reinsurance; next, each type of insurance is studied in detail. Topics covered are fire, consequential loss, inland marine, ocean marine, theft and surety, liability and miscellaneous property insurance. Prerequisite(s): BA 271.

BA 473. Real Estate Appraisal. 3 Hours.
This course familiarizes the student with the foundation and principles of the appraisal process. The student will become familiar with the three approaches to value. Site valuation, construction costs, depreciation; comparables selection and adjustments; rental multipliers; and reconciliation will be discussed. The student will focus on the elements making up the standards for professional appraisal practice. These elements, i.e., Definitions, Rules, Standards and Standard Rules, Statements and advisory opinions are discussed in detail along with the philosophy and history of USPAP. Prerequisite(s): BA 401 and MS 132 and BA 362.

BA 475. E-Business and E-Commerce for Managers. 3 Hours.
This course teaches the basic e-business and e-commerce theory. The students will apply the theory through the development of a website for the prime purpose of marketing a product or service or idea online.

BA 490. International Business. 3 Hours.
This course covers the international dimensions of managerial decision-making including: world economies, international trade theories, tariffs, quotas and other trade issues, global strategic planning, cross-cultural management, international market entry, international human resource management, international organization strategy, international logistics, import/export operations, currency exchange, international financial management. Current developments in global economic and business are emphasized; students participate in a computerized simulation throughout the semester. Prerequisite(s): BA 310 and BA 321.

BA 495. Senior Management Project. 3 Hours.
An experiential course that gives seniors the opportunity to apply what they have learned in class to a real business situation. Prerequisite(s): College Level=Senior.

BA 496. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 497. Business and Culture Travel Study Course. 3 Hours.
Business and Culture Travel Study course is designed to expose students to economies across the world. During the course students will travel to important commercial, cultural and governmental cities. Through a combination of readings students will be exposed to 20th and 21st century history, economics, culture political and business philosophy. The course will also involve visits to major multinational corporations, cultural activities and lectures from University business faculty when available. The course will also have two pre-trip class sessions with readings and one post course session to wrap up the experience and discuss the student travel logs.

BA 498. Business Seminar. 3 Hours.
This honors course requires the study of various business problems under the supervision of members of the Department of Business Administration. A paper is required. An oral examination is scheduled as the final examination in the course. Prerequisite(s): College Level=Senior.

BA 499. Topic. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the business area. This course may consist of seminars, lectures, individualized instruction and/or research related to a specific area of specialization.

BA 600. Research Methods in Business and Education. 3 Hours.
This course is designed for beginning graduate students who have little or no formal preparation in those areas of research and problem-solving essential for a comprehensive study of business and education at the graduate level. Emphasis is placed on the identification of common problem types and the selection and use of appropriate methods of analysis (primarily statistical in nature).

BA 601. Managerial Economics. 3 Hours.
This course begins with a comprehensive overview of micro- and macroeconomic concepts with the aim of developing within students a picture of how business and nonprofit organizations relate to the economy as a whole. The course then focuses on practical applications of economic analysis to problems of concern to managers. Case studies and projects are used to demonstrate the methods used to determine economic feasibility and cost-effectiveness of products, services, and programs.

BA 602. Managerial Accounting. 3 Hours.
This is an accelerated accounting course for those with little or no formal accounting background. The emphasis is on concepts which managers need to know in order to be effective. Topics include the preparation and interpretation of financial statements, cost planning and control, cost-volume-profit analysis, decision-making models, master budgeting and variances, and evaluation of capital projects.

BA 605. Management Communications. 3 Hours.
This is an advanced communications course that builds upon a student's experience and prior undergraduate coursework in writing and oral communications. Topics include: advanced business writing, use of visual materials, selection of secondary sources of information, report preparation, and presentations to small and large groups.
BA 611. Organizational Behavior. 3 Hours.
This course surveys the major field of management, examining structures and processes on both group and organizational levels. Both traditional and contemporary theories are analyzed and applied to business operations.

BA 620. Financial Management. 3 Hours.
Topics considered include financial planning, operating and capital budgets, cash flow, purchasing and accounting procedures, the sources and uses of corporate and institutional funds, and financial analysis for evaluation and control. Students develop projects specifically related to their needs in educational administration, small business, or corporate management. Prerequisite(s): BA 602 or AC 301.

BA 621. Marketing Management. 3 Hours.
This course focuses on complex problems facing decision-makers in the marketing of goods and services. Emphasis is placed on the decision-making process, including assessment of the social, economic, and political environment in which the organization operates; problem definition; development and evaluation of alternatives, and the implementation of the best alternative. Cases in advertising, sales, marketing research, and strategic marketing management provide practice in marketing analysis and decision-making.

BA 622. Production Management. 3 Hours.
Emphasis is placed on the use of quantitative techniques for solving manufacturing problems. The student is given an opportunity to practice mathematical model-building and manipulation. Other topics considered include queuing system design, plant layout, statistical quality control, inventory modeling, Program Evaluation and Review Technique (PERT), linear and nonlinear programming, and control theory.

BA 625. Global Strategic Management. 3 Hours.
This course focuses on the strategic challenges and opportunities confronting firms that undertake to create value and to compete in the global economy. Successful companies develop strategies for doing business in emerging markets that are different from those they use at home and often find novel ways of implementing them too. The class will make extensive use of case analysis and discussion to evaluate and understand the strategic issues that confront firms operating internationally, as well as to appreciate the importance of values and ethics in organization decisions and actions. In this course we will probe the workings of business strategies in transition and emerging economies, gain an understanding of the strategies of local firms, and analyze the international success and failure of companies. Prerequisite(s): BA 600 and 15 Credits From Range [BA 600 To BA 799].

BA 626. Accounting in Planning, Budgeting and Control. 3 Hours.
This course examines the role of accounting in the planning, budgeting, and control process of a business in a dynamic environment. The integration of measuring and analyzing (planning), short-term decisions and managing organizations (control), and preparing various budgets (budgeting) are emphasized. This course is designed as a continuation of BA602 Managerial Accounting. Numerical problems, as well as case studies, are utilized as methods of study. Prerequisite(s): BA 602 or AC 211.

BA 627. Investment Analysis. 3 Hours.
This course provides a detailed description of securities market organization and approaches to investment opportunities. Students will examine theories used in the valuation of financial securities and employ projects and applications to develop a real world understanding of portfolio management. Prerequisite(s): BA 602.

BA 628. New Venture Planning and Management. 3 Hours.
This course deals with the foundation of new ventures and related aspects of managing the small growing enterprise. Techniques taught in this course are equally applicable to small businesses, nonprofit organizations, and new ventures of larger organizations. Topics include: use of scarce resources, such as money, talent and technological expertise; identification of environmental threats and opportunities; and operational considerations such as organizational structure, legal requirements, financing, and accounting procedures.

BA 641. Human Resource Management. 3 Hours.
This course explores human resource management as an integrated process of planning and control designed to achieve high employee productivity and job satisfaction. The course focuses on the essential functions of human resource management as they apply both to the general supervisory responsibilities of every manager and to the specific operations of the personnel department.

BA 642. Leadership in Business and Professions. 3 Hours.
This course is designed to provide graduate management students with a comprehensive review of the essentials for effective leadership. It focuses on the identification of basic leadership styles, explores the theoretical and practical findings of research in leadership development, and seeks to synthesize the student’s leadership style with the most effective working models of leadership.

BA 643. Strategic Change Management. 3 Hours.
Strategic Change Management focuses on the skills required to deal effectively with organizational change. The course addresses first the pressures in the business environment that make change a fundamental reality for managers. Particular attention is paid to change arising from public policy initiatives that impinge on business. The course then examines the manager as change agent responsible for initiating innovation and explores both the personal skills required in the role of change agent and the tools and techniques available to support the manager in that role. The course also examines the problems and opportunities of those who are the recipients of change in an organization and the skills required to cope effectively with that situation.

BA 644. The Legal Environment of Business. 3 Hours.
This course will provide an overview of the important aspects of business law for executives, managers, accountants, and other professionals. The areas of law covered include but are not limited to administrative, contract, corporate and other business organizations, employment relations, real estate, taxes, and UCC sales.

BA 646. Current Issues in Business. 3 Hours.
This course, conducted in seminar fashion, draws on current literature to analyze contemporary and emerging issues facing management in the late twentieth century. Content will vary.

BA 700. Health Care Management. 3 Hours.
This course examines management problems and policy-making in the health care industry. Several areas are considered including: (1) the functions of the health care manager, (2) the types of health care delivery systems, (3) the administration of hospitals, (4) the financing of medical care, and (5) the role of government. Through readings, lectures, discussions, and projects, students clarify their own role in the delivery of health services. The course regularly draws on experts in health planning and health care administration.
BA 701. Legal Environment of Health Care Management. 3 Hours.
The course provides a foundation in the legal and regulatory framework in which health care institutions operate. Students will also examine the legal issues confronting health care managers including director and administrative liability, malpractice, negligence, patient rights and confidentiality, licensure requirements, and the like.

BA 702. Health Care Economics. 3 Hours.
In this course, the principles and tools of economic decision-making are applied to management in the health care sector. The course explores the application to health care management functions of such concepts and processes as supply and demand, resource allocation and utilization, costing and pricing, resource productivity, forecasting and economic aspects of planning, and utilization review. While the principal emphasis in the course is on micro-economic analysis, some consideration is also given to an economic analysis of public policy alternatives for the delivery of health care service. Prerequisite(s): BA 601.

BA 703. Financial Management in Healthcare Organizations. 3 Hours.
This course applies the perspectives and tools of financial analysis to the management of health care organizations and evaluation of organizational performance. Topics covered include capital budgeting, sources of operating revenue, management of cash and inventories, risk analysis and forecasting. Particular attention is paid to cost containment regulatory strategies and their implications for financial planning and management. Prerequisite(s): BA 602.

BA 704. Managing Quality in Healthcare. 3 Hours.
This course examines methods and tools for managing quality in health facilities, physician practices, managed care, and public health. Topics include developments in quality assurance and improvement, utilization review, risk management, and patient satisfaction.

BA 705. Global Perspectives in Healthcare. 3 Hours.
This course examines the social, political, and economic aspects of global healthcare issues. Through a comparative analysis of the health systems of multiple nations, students will compare theories of health policy and priorities, healthcare system facilities, workforce, technology, cost, quality, and access. The emphasis of the course will be on health management strategies used in different countries and healthcare systems to mobilize, allocate, and maintain resources to improve the healthcare status and delivery systems.

BA 710. Law & Ethics for Non-Profit Organizations. 3 Hours.
Non-profit managers and supervisors are held to a higher standard of ethical behavior due to the nature of their funding sources and their mission. This course is designed to develop in the student a basic understanding of the laws governing non-profit organizations, the practical applications of these laws and the ethics that are demanded of non-profit managers.

BA 711. Non-Profit Management and Leadership. 3 Hours.
This course examines the philosophical foundations of the non-profit sector and explores issues and problems specific to managing and leading non-profit organizations. Topics covered include: leading and governing non-profit organizations, managing non-profit operations, board/staff relations, and developing and managing non-profit resources.

BA 712. Strategic Marketing for Nonprofit Organizations. 3 Hours.
This course applies the concepts of marketing and strategy to the management of non-profit organizations. Through class lectures, discussion, case studies, and applied projects, students will build an understanding of the marketing process in the non-profit environment in order to be able to design, implement, and evaluate an organization’s approach to marketing and strategic positioning.

BA 713. Fundraising. 3 Hours.
This course takes a systems approach to the process of fund-raising. Topics covered include: donor cultivation, use of the annual fund, major gifts, corporate giving, and grant writing.

BA 720. Advanced Sales and Marketing in Hospitality. 3 Hours.
This course focuses on difficult problems and issues facing sales and marketing personnel in the hospitality industry. Students will make use of case studies in order to develop their decision-making process including the use of marketing research and analysis.

BA 721. Convention Planning and Events Planning. 3 Hours.
This course focuses on the rapidly growing convention and events planning industries. The student will learn how to design, plan, market and manage meetings and events.

BA 722. Advanced Front Office Operations. 3 Hours.
This course begins with detailed introduction about numerous aspects of front office operations and management. The next section of the course examines the complex relationships between lodging departments, technological advances, and personnel decisions. The final section of the course includes the many guest service concepts that distinguish a great hotel experience from an average one.

BA 723. Legal Issues in Hospitality Management. 3 Hours.
This course will provide the student an overview of the important aspects of Hospitality Law for Managers, and other professionals. Some of the areas of study include and are not limited to Torts, Products Liability, Constitutional Law and Criminal Law and many other subjects.

BA 724. Managing Service. 3 Hours.
This course begins with an introduction to the framework for providing quality service to customers and guests. Next we will discuss the needs of the customer/guest and proceed to develop our menu and/or product accordingly. Finally, we will learn how management and staff create loyal customers and guests by delivering service that exceeds their expectations.

BA 729. Hospitality Graduate Directed Practicum. 3 Hours.
Each student will find, will choose or will be provided with an internship site. The site chosen will be based on; and interview conducted by the management of the internship site and the student’s preference of location based on those available. The Coordinator of Hospitality Management will have the final decision on all internship site placements. The Coordinator’s decision will be based on his or her interaction with the student during previous course work, his or her understanding of the student and the internship properties requirements. Every consideration will be given to the student’s personal preferences with regard to location and type of property. However, the student’s preferences will not be the only consideration for placement. Prerequisite(s): BA 720 and BA 722 and BA 724.

BA 731. Business and Information Technology. 3 Hours.
This graduate course approaches Information Technology from the perspective of information consumers as opposed to technology implementers. During this course, students will examine various technologies and their application within modern organizations. The course has two primary goals. (1) The course will explain information technologies in non-technical terms so that students can evaluate a technology’s effectiveness relative to any existing alternatives and the overall organizational needs. (2) This course should increase student awareness regarding how they interact with technology in a personal or business setting. Business leaders are constantly bombarded with technology. This course addresses the need to sift through that information in an intelligent manner and make smart business decisions.
BA 741. Staffing & Selection. 3 Hours.
A source of competitive advantage for any organization is its talent. The effectiveness of an organization depends on the performance of each individual in that organization. Hence, one of the most important human resource functions is that of staffing the organization. This course is essential for HR professionals who are responsible for recruiting, screening, hiring, promoting, and placing employees. It is also very crucial for any line managers, supervisors, team leaders, and hiring managers who are involved in recruiting, making promotions, succession, or any other workforce decisions. An examination of the scientific, legal, and administrative issues associated with the recruitment, selection, employment, and retention of individuals by organizations augments the study. Specific attention will be given to the current challenges of an increasingly dynamic workplace and diverse workforce.

BA 742. Training & Development. 3 Hours.
The effective training and development of human resources creates tremendous and unique value for an organization. This course examines how organizations can develop and manage the talents and skillset of human capital. The course explores topics such as training needs analysis, formulating training objectives, and the design, implementation, and evaluation of training and development programs.

BA 745. Innovative Global Strategy. 3 Hours.
This course will build students’ awareness of the challenges that must be addressed and the opportunities that may be present when competing in the global marketplace. The course focuses on how firms apply innovative strategies to create a sustainable competitive advantage in the global arena. Course content will be drawn from readings, case analysis, online content, and discussions. The course requires students to analyze and understand real-world examples of both successful and unsuccessful global strategy implementation.

BA 750. Fundamentals of Risk Management. 3 Hours.
This course explores the fundamentals of risk management. After discussion of the importance of risk and the rationale for its management in organizations, the remainder of the course will analyze the process of and methods for managing risk.

BA 751. Employee Benefits. 3 Hours.
This course explores the nature and operation of employer-sponsored benefit plans. Emphasis is placed on plan design, administration, funding, and regulation. The course also addresses organizational characteristics, benefit structure, and pricing of risk transfer schemes for groups.

BA 752. Crisis Management. 3 Hours.
Crisis Management can be defined as a communications response to an event that has a negative impact on an audience - the public, customers/clients, employees, shareholders, etc. Examples of such events could include tainted food, a corporate leak, a political scandal, an entertainment or athletic scandal, damaged products that cause or could potentially cause life-threatening situations, natural disasters, terrorism, and financial disasters. In this course, students will analyze and critique high-profile cases and learn how to effectively respond to crises.

BA 753. Corporate Risk Management. 3 Hours.
Corporate risk is analyzed through the lens of enterprise risk management. This course explores the operational and financial risks faced by firms and the study of various methods of handling these risks.

BA 754. Strategic Selling. 3 Hours.
The focus of this course is on key, strategic customer selling approaches. The process of sales planning and strategy development for these types of customers will be emphasized. The objective of this course is to understand and execute sales strategies for managing major and large customers.

BA 760. Technology & Innovation. 3 Hours.
BA 760 Technology & Innovation offers a research approach to identifying, analyzing, and creating technological advantage in nascent and mature industries. Students will apply the methodologies of innovation and discovery to business settings and markets, seeking to create competitive advantage and achieve market transformation through strategic initiatives that redefine consumer expectations and industry practices and reframe organizations to embrace innovative practices and processes.

BA 761. Biotechnology: The Business of Genetics. 3 Hours.
This course is designed to provide students with the opportunity to become familiar with the scope and nature of organizations that work with genetics within biotechnology industries. Through extensive case studies, students focus on the dynamics of these enterprises, their organizational structures, the regulatory considerations of these entities, and how organizational cultures are created to enhance opportunities for innovation and discovery.

BA 762. Grouthink. 3 Hours.
This course explores the origin of grouthink. Grouthink is a term first used by social psychologist Irving L. Janis (1972) that refers to a psychological phenomenon in which people strive for consensus within a group. This course explores grouthink as a phenomenon where people set aside their own personal beliefs or adopt the opinion of the rest of the group.

BA 763. Biotechnology & Innovation: Intellectual Property. 3 Hours.
This course focuses on the protection of proprietary and intellectual rights in inventions, writings, creative works, software, industry trade secrets, industry trade designations, and other intellectual assets at the international, Federal, and State Levels. The course will give special consideration to the emergence of new areas of patent law in Biotechnology and Pharmaceutical fields, examining not only the patentability of intellectual assets, but also the discovery process, particularly in collaborative environments involving multiple organizations and institutions, and the qualifying distinctions between collaborative and competitive research.

BA 790. Independent Study. 3 Hours.
The student studies with a faculty member who specializes in an appropriate field. Emphasis is on individual reading and directed action or research programs which involve student and professor. The student must have the approval of the dean, the faculty member involved, and must file a written plan of the project with the graduate dean. A maximum of three (3) credits may be earned.*

BA 791. Professional Project. 3-6 Hours.
This course is used to award graduate credit for prior learning and educational experience obtained outside of the traditional classroom. Through the preparation of a professional project, students provide formal documentation of the specific graduate-level learning competencies which they have acquired through prior experience. A maximum of six (6) credit hours may be earned.

BA 792. Graduate Internship I. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director.
BA 793. Graduate Internship II. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization’s supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 792.

BA 794. Graduate Internship III. 3 Hours.
In this experiential course, the student serves as an intern in a business or non-profit organization. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional organization supervisor, and the internship director. The experience may be multidisciplinary, but should have a strong accounting element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): BA 793.

BA 796. Leadership Maine. 3 Hours.
This course awards academic credit for participation in the Bangor Region Leadership Institute (BRLI) program or the Leadership Maine program. Both programs are designed to lead students in an exploration of leadership and their leadership capabilities. Throughout the programs, students are introduced to key social and economic issues impacting the local region and the state of Maine. The programs culminate in an experiential project undertaken with a non-profit partner.

BA 798. Thesis. 6 Hours.
The thesis may be library-oriented research with extensive reliance on documents and a relatively limited amount of primary field research, or it may be action-oriented field research with relevant documentation from the literature. The title of the thesis topic must be filed with the graduate committee. A student, with the approval of his/her advisory committee, may register for the thesis after completion of twenty-four (24) semester hours.

BA 799. Topic/. 3 Hours.
Students work together in a seminar setting under the direction of a member of the graduate faculty. The content of the seminar will vary according to the interests of students and faculty involved.

Information Technology

Information Technology (IT) specialists design and operate the computer systems that are vital to businesses and organizations today. The Husson IT curriculum includes a strong core of general business courses, general education requirements, as well as special training in computer programming, software development, systems development and implementation, networking, and project management.

Students will learn programming in Visual Basic, HTML, and Java. Courses involving networking and network management as well as website design will give students valuable high-level skills and prepare them to go directly from college into a position of true responsibility. At Husson University you will learn to use the computer to manage many different forms of information that are vital to organizations today.

Requirements for IT Majors

All IT majors must earn an overall 2.0 cumulative grade-point average as well as a 2.0 overall in their Mi prefix courses. Transfer students must complete a minimum of 30 credit hours, and at least 15 credits must be earned in Mi prefix courses at Husson University.

Courses

MI 111. Introduction to Microcomputing. 3 Hours.
The elements of hardware, software and the uses of the microcomputer in today’s society. Hands-on experience includes word processing, spreadsheet, database management, and presentation software.

MI 131. Intro to Information Systems. 3 Hours.
Course surveys the historical, social and technological contexts of modern computing and computer science. Students are exposed to material through lectures and a number of online lab activities.

MI 210. Basic Database Design and Implementation. 3 Hours.
The course provides a strong hands-on overview of relational databases. Using small office database technologies (such as Microsoft Access) students will explore proper database design and construction. SQL is introduced as the primary tool for extracting data out of a database. The course is intended for non-IT majors. IT majors are directed to MI 411.

MI 214. Microcomputer Spreadsheet Applications. 3 Hours.
This course covers microcomputer spreadsheet software. Topics include: functions, decision making, macros, custom menus, importing and exporting.

MI 226. Web Applications. 3 Hours.
Students construct web pages using Hypertext Markup Language (HTML) and JavaScript. Emphasis is on object-oriented thinking and hands on work. Internet technologies including TCP/IP protocols, client/server programming, and security are also discussed. Prerequisite(s): MI 111.

MI 241. Managing and Maintaining a PC I. 3 Hours.
Course develops a base for supporting end-user workstation system. Emphasis is on hands on installation, configuration, and problem solving computer hardware and software in a laboratory setting. Prepares the student for the Comp TIA’s A+ exams.

MI 242. Managing and Maintaining a PC II. 3 Hours.
A continuation of Managing and Maintaining a PC I. Prepares the student for the Comp TIA’s A+ exams. Prerequisite(s): MI 241.

MI 245. Desktop Publishing. 3 Hours.
Students use current software packages to produce a wide range of high-quality interoffice publications such as forms, proposals and directories, and outside--of-organization communications such as flyers, catalogs, annual reports, brochures, newsletters, etc. Students will become familiar with typographic techniques used to create professional-looking documents. The use of basic design and layout features such as white space, graphic elements, and color will be introduced. Accuracy and creativity are essential as the students design and publish functional promotional materials. A professional portfolio containing sample projects is an integral part of the evaluation process.

MI 261. Introduction to Computer Programming I. 3 Hours.
This is a three credit hour course and the first of a two course sequence serving as an introduction to computer programming. The course covers the basic terminology and structure of writing computer software. In addition, the course establishes a solid foundation in the use of the basic building blocks associated with writing software including data types, variables, conditional and looping constructs, error handling, and debugging. Throughout the course, students will be introduced to and expected to follow industry standards and best practices of the software development discipline.
MI 262. Introduction to Computer Programming II. 3 Hours.  
This is a three credit hour course and the second of a two course sequence serving as an introduction to computer programming. The course covers the basic terminology and structure of writing computer software. In addition, the course builds upon the solid foundation in the use of the basic building blocks associated with writing software including arrays, collections, classes, file I/O, and database connections. Throughout the course, students will be introduced to and expected to follow industry standards and best practices of the software development discipline. Prerequisite(s): MI 261.

MI 299. Topic/. 3 Hours.  
This course is of variable content with selected topics presented to provide prerequisites for specifically identified additional coursework in CIS. The course emphasizes independent investigation and the fundamental principles of computing and information technology.

MI 321. Systems Analysis & Design. 3 Hours.  
Methodology for the investigation analysis and general design, detailed design, and implementation of computer information systems is covered. Comprehensive case studies are used to illustrate the phases of CIS project development. Topics presented for system development include data flow diagrams, normalization, RAD, extreme programming (XP), software development life cycle (SDLC), and program specifications. Prerequisite(s): MI 261.

MI 322. Decision Support and Expert Systems. 3 Hours.  
These systems are designed to synthesize what is known about the business application and to make that knowledge available to and effective in the hands of working decision-makers. Topics covered include artificial intelligence, natural language systems, expressing rules, and dealing with uncertainty. Expert system development software is used. Prerequisite(s): MI 111.

MI 325. Algorithms and Data Structures I. 3 Hours.  
This is a three credit hour course and the first of a two course sequence serving as an introduction to the algorithms and data structures utilized in computer programming. The course covers the basic data structures used in software development including lists, sorted lists, stacks, queues, sets, and graphs and their implementations. For algorithms, the students will be introduced to a number of algorithm designs including greedy and divide-and-conquer, and specific algorithms including resizing arrays, shortest path, and spanning trees. Prerequisite(s): MI 261.

MI 326. Algorithms and Data Structures II. 3 Hours.  
This is a three credit hour course and the second of a two course sequence serving as an introduction to the algorithms and data structures utilized in computer programming. The course covers the basic data structures used in software development including lists, sorted lists, stacks, queues, sets, and graphs and their implementations. For algorithms, the students will be introduced to a number of algorithm designs including greedy and divide-and-conquer, and specific algorithms including resizing arrays, shortest path, and spanning trees. Prerequisite(s): MI 325.

MI 331. Networking. 3 Hours.  
This course covers the different types of networking topologies: client-server, peer-to-peer, and network administration. Practical aspects include setting up a network, hardware maintenance, and hands-on experience.

MI 332. Advanced Networking. 3 Hours.  
This course builds upon basic network knowledge. Topics covered include network topology, infrastructure, hardware, segmentation, and troubleshooting as networks increase in scale and complexity. Security issues will be examined to protect data assets from internal and external threats. Prerequisite(s): MI 331.

MI 333. Computer Forensics. 3 Hours.  
This course will focus on the investigative use of computer technologies and electronic records. Students will be exposed to “digital evidence” and the valuable information it can provide to investigators. The course will have a two-tier approach. (1) Students will be shown how to extract readable decipherable information from someone’s computer such as looking for at their files or their browser history of web sites visited. Even if the information is password protected or has been deleted it might still be recoverable. (2) The course will examine criminals who use computers and the Internet to commit various crimes ranging from trying to lure children into chat rooms or face-to-face meetings to every sort of financial fraud. This course is intended to address a growing need in law enforcement. Prerequisite(s): Major=BS Comp Info Systems or Major=BS Criminal Justice.

MI 341. Managing and Maintaining a Windows Server I. 3 Hours.  
Course builds on fundamentals developed in MI 241-242 to detail the challenges and technology of distributed system management. Example topics include Configuration Management, Backup/Disaster Recovery, User Management, Data Management, Application Management, Logistics and Licensing. Prerequisite(s): MI 242.

MI 342. Managing and Maintaining a Windows Server II. 3 Hours.  
Course is a continuation of MI 341 Managing and Maintaining a Windows Server I. This course focuses on network configuration and security of the server. Prerequisite(s): MI 341.

MI 351. Information System Internship. 3 Hours.  
Cooperative Education is a College-supervised work experience course with participating employers in business and nonprofit organizations that provide a practical application of classroom theory. Prerequisite(s): College Level=Junior or College Level=Senior.

MI 352. Information System Internship. 3 Hours.  
Cooperative Education is a College-supervised work experience course with participating employers in business and nonprofit organizations that provide a practical application of classroom theory. Prerequisite(s): College Level=Junior or College Level=Senior.

MI 353. Information System Internship. 3 Hours.  
Cooperative Education is a College-supervised work experience course with participating employers in business and nonprofit organizations that provide a practical application of classroom theory. Prerequisite(s): College Level=Junior or College Level=Senior.

MI 354. Information System Internship. 3 Hours.  
Cooperative Education is a College-supervised work experience course with participating employers in business and nonprofit organizations that provide a practical application of classroom theory. Prerequisite(s): College Level=Junior or College Level=Senior.

MI 361. Java I. 3 Hours.  
This course focuses on problem solving using an object-oriented programming language. Emphasis is on programming using modern practices. Prerequisite(s): MI 262.

MI 362. Java II. 3 Hours.  
This course builds on language used in MI 361. Explores advanced use of the language including packages for data access and web server scripting. Prerequisite(s): MI 361.
MI 411. Database Design. 3 Hours.
The design of a database as part of the CIS development process is covered in detail. The theory and practical application of both relational and network databases is included. Normalization and SQL are also covered in detail.

MI 421. Project Management Techniques. 3 Hours.
Projects are undertakings, which must be completed within cost, schedule and quality constraints. This course provides the student with practical methodology for planning and managing large or small projects effectively. Software such as Microsoft Project for Windows® is used.

MI 422. Information System Project Development. 3 Hours.
A comprehensive project in CIS is undertaken. The team approach is used to plan, manage and implement a realistic CIS project of moderate complexity. Prerequisite(s): MI 421.

MI 499. Topic/. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the area of management information systems. The course may consist of seminars, individualized instruction and/or research related to a specific area of specialization.

B.S. Software Development

The B.S. in Software Development is designed to provide students with the skills needed to develop, create, and modify enterprise software or specialized utility programs. The Software Development program prepares students to identify issues and problems, collect and analyze data, and summarize and present findings.

The degree program focuses on the experiential learning model to prepare students to develop a wide array of software including enterprise applications (apps), mobile apps, web apps, games, and software to integrate systems. In smaller organizations, software professionals may be responsible for the design, development, testing, and training for a software project. In larger organizations, software professionals may focus on only one or two of these areas. Continuous professional improvement is critical in this field given the rapid changes in the industry regarding software languages, tools, and techniques.

In pursuing the B.S. Software Development students will be able to:

- Apply ethical decision-making skills and integrity in an ever-changing, global environment
- Demonstrate oral and written communication skills, appropriate to the profession
- Apply critical problem-solving and professional skills in an experiential, learning environment
- Demonstrate knowledge of computer hardware and software infrastructure.
- Apply best practices and guidelines of developing computer software.
- Demonstrate knowledge of project management practices and principles.
- Evaluate the implications/impact of computer technology solutions on business policies and practices.

functions, decision making, macros, custom menus, importing and exporting. This course covers microcomputer spreadsheet software. Topics include:

**MI 214. Microcomputer Spreadsheet Applications. 3 Hours.**

Students construct web pages using Hypertext Markup Language (HTML) and JavaScript. Emphasis is on object-oriented thinking and hands on work. Internet technologies including TCP/IP protocols, client/server programming, and security are also discussed. Prerequisite(s): MI 111.

**MI 241. Managing and Maintaining a PC I. 3 Hours.**

Course develops a base for supporting end-user workstation system. Emphasis is on hands on installation, configuration, and problem solving computer hardware and software in a laboratory setting. Prepares the student for the Comp TIA’s A+ exams.

**MI 242. Managing and Maintaining a PC II. 3 Hours.**

A continuation of Managing and Maintaining a PC I. Prepares the student for the Comp TIA’s A+ exams. Prerequisite(s): MI 241.

**MI 245. Desktop Publishing. 3 Hours.**

Students use current software packages to produce a wide range of high-quality interoffice publications such as forms, proposals and directories, and outside-of-organization communications such as flyers, catalogs, annual reports, brochures, newsletters, etc. Students will become familiar with typographic techniques used to create professional-looking documents. The use of basic design and layout features such as white space, graphic elements, and color will be introduced. Accuracy and creativity are essential as the students design and publish functional promotional materials. A professional portfolio containing sample projects is an integral part of the evaluation process.

**MI 261. Introduction to Computer Programming I. 3 Hours.**

This is a three credit hour course and the first of a two course sequence serving as an introduction to computer programming. The course covers the basic terminology and structure of writing computer software. In addition, the course establishes a solid foundation in the use of the basic building blocks associated with writing software including data types, variables, conditional and looping constructs, error handling, and debugging. Throughout the course, students will be introduced to and expected to follow industry standards and best practices of the software development discipline.

**MI 262. Introduction to Computer Programming II. 3 Hours.**

This is a three credit hour course and the second of a two course sequence serving as an introduction to computer programming. The course covers the basic terminology and structure of writing computer software. In addition, the course builds upon the solid foundation in the use of the basic building blocks associated with writing software including arrays, collections, classes, file I/O, and database connections. Throughout the course, students will be introduced to and expected to follow industry standards and best practices of the software development discipline. Prerequisite(s): MI 261.

**MI 299. Topic/. 3 Hours.**

This course is of variable content with selected topics presented to provide prerequisites for specifically identified additional coursework in CIS. The course emphasizes independent investigation and the fundamental principles of computing and information technology. Prerequisite(s): MI 261.
MI 322. Decision Support and Expert Systems. 3 Hours.
These systems are designed to synthesize what is known about the business application and to make that knowledge available to and effective in the hands of working decision-makers. Topics covered include artificial intelligence, natural language systems, expressing rules, and dealing with uncertainty. Expert system development software is used. Prerequisite(s): MI 111.

MI 325. Algorithms and Data Structures I. 3 Hours.
This is a three credit hour course and the first of a two course sequence serving as an introduction to the algorithms and data structures utilized in computer programming. The course covers the basic data structures used in software development including lists, sorted lists, stacks, queues, sets, and graphs and their implementations. For algorithms, the students will be introduced to a number of algorithm designs including greedy and divide-and-conquer, and specific algorithms including resizing arrays, shortest path, and spanning trees. Prerequisite(s): MI 261.

MI 326. Algorithms and Data Structures II. 3 Hours.
This is a three credit hour course and the second of a two course sequence serving as an introduction to the algorithms and data structures utilized in computer programming. The course covers the basic data structures used in software development including lists, sorted lists, stacks, queues, sets, and graphs and their implementations. For algorithms, the students will be introduced to a number of algorithm designs including greedy and divide-and-conquer, and specific algorithms including resizing arrays, shortest path, and spanning trees. Prerequisite(s): MI 325.

MI 331. Networking. 3 Hours.
This course covers the different types of networking topologies: client-server, peer-to-peer, and network administration. Practical aspects include setting up a network, hardware maintenance, and hands-on experience.

MI 332. Advanced Networking. 3 Hours.
This course builds upon basic network knowledge. Topics covered include network topology, infrastructure, hardware, segmentation, and troubleshooting as networks increase in scale and complexity. Security issues will be examined to protect data assets from internal and external threats. Prerequisite(s): MI 331.

MI 333. Computer Forensics. 3 Hours.
This course will focus on the investigative use of computer technologies and electronic records. Students will be exposed to "digital evidence" and the valuable information it can provide to investigators. The course will have a two-tier approach. (1) Students will be shown how to extract readily decipherable information from someone's computer such as looking for at their files or their browser history of web sites visited. Even if the information is password protected or has been deleted it might still be recoverable. (2) The course will examine criminals who use computers and the Internet to commit various crimes ranging from trying to lure children into chat rooms or face-to-face meetings to every sort of financial fraud. This course is intended to address a growing need in law enforcement. Prerequisite(s): Major=BS Comp Info Systems or Major=BS Criminal Justice.

MI 341. Managing and Maintaining a Windows Server I. 3 Hours.
Course builds on fundamentals developed in MI 241-242 to detail the challenges and technology of distributed system management. Example topics include Configuration Management, Backup/Disaster Recovery, User Management, Data Management, Application Management, Logistics and Licensing. Prerequisite(s): MI 242.

MI 342. Managing and Maintaining a Windows Server II. 3 Hours.
Course is a continuation of MI 341 Managing and Maintaining a Windows Server I. This course focuses on network configuration and security of the server. Prerequisite(s): MI 341.

MI 351. Information System Internship. 3 Hours.
Cooperative Education is a College-supervised work experience course with participating employers in business and nonprofit organizations that provide a practical application of classroom theory. Prerequisite(s): College Level=Junior or College Level=Senior.

MI 352. Information System Internship. 3 Hours.
Cooperative Education is a College-supervised work experience course with participating employers in business and nonprofit organizations that provide a practical application of classroom theory. Prerequisite(s): College Level=Junior or College Level=Senior.

MI 353. Information System Internship. 3 Hours.
Cooperative Education is a College-supervised work experience course with participating employers in business and nonprofit organizations that provide a practical application of classroom theory. Prerequisite(s): College Level=Junior or College Level=Senior.

MI 354. Information System Internship. 3 Hours.
Cooperative Education is a College-supervised work experience course with participating employers in business and nonprofit organizations that provide a practical application of classroom theory. Prerequisite(s): College Level=Junior or College Level=Senior.

MI 361. Java I. 3 Hours.
This course focuses on problem solving using an object-oriented programming language. Emphasis is on programming using modern practices. Prerequisite(s): MI 262.

MI 362. Java II. 3 Hours.
This course builds on language used in MI 361. Explores advanced use of the language including packages for data access and web server scripting. Prerequisite(s): MI 361.

MI 411. Database Design. 3 Hours.
The design of a database as part of the CIS development process is covered in detail. The theory and practical application of both relational and network databases is included. Normalization and SQL are also covered in detail.

MI 421. Project Management Techniques. 3 Hours.
Projects are undertakings, which must be completed within cost, schedule and quality constraints. This course provides the student with practical methodology for planning and managing large or small projects effectively. Software such as Microsoft Project for Windows® is used.

MI 422. Information System Project Development. 3 Hours.
A comprehensive project in CIS is undertaken. The team approach is used to plan, manage and implement a realistic CIS project of moderate complexity. Prerequisite(s): MI 421.

MI 499. Topic/. 1-3 Hour.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in the area of management information systems. The course may consist of seminars, individualized instruction and/or research related to a specific area of specialization.

B.S. Computer Information Systems

The Computer Information Systems degree programs at Husson University focus on the experiential learning model to prepare students for a wide variety of positions within the Information Technology (IT) field. In smaller organizations IT professionals typically have diverse
responsibilities ranging from network administrator to software developer to computer technician. In larger organizations IT professionals have cursory knowledge of many IT areas, but possess specialized skills in one particular area. Regardless of the position or organization, IT professionals are responsible for not only maintaining and securing existing equipment and data, but also assessing, recommending, and implementing new technology throughout the organization.

In completing the B.S. CIS degree, students will be able to:

- Apply ethical decision-making skills and integrity in an ever-changing, global environment
- Demonstrate oral and written communication skills, appropriate to the profession
- Apply critical problem-solving and professional skills in an experiential, learning environment
- Analyze and repair computer hardware and software infrastructure.
- Demonstrate knowledge of best practices and guidelines of developing computer software.
- Demonstrate knowledge of project management practices and principles.
- Evaluate the implications/impact of computer technology solutions on business policies and practices.

Courses

IS 455. Independent Study. 1-6 Hour.
This independent study offers an upper-class student the opportunity to present one or more small projects for analysis. The course may consist of seminars, individualized instruction, and/or research related to a specific area of specialization.

B.S. Computer Information Systems/M.B.A.

The dual bachelor's degree in CIS and Master of Business Administration program advances an undergraduate/graduate information technology and management curriculum. It combines the technical skills from the undergraduate information technology classes with the management and leadership skills of the graduate program. Students in this dual BS/MBA program may earn both degrees in as few as 5 years.

In completing the B.S. CIS portion of the dual degree, students will be able to:

- Apply ethical decision-making skills and integrity in an ever-changing, global environment
- Demonstrate oral and written communication skills, appropriate to the profession
- Apply critical problem-solving and professional skills in an experiential, learning environment
- Analyze and repair computer hardware and software infrastructure.
- Demonstrate knowledge of best practices and guidelines of developing computer software.
- Demonstrate knowledge of project management practices and principles.
- Evaluate the implications/impact of computer technology solutions on business policies and practices.

Students will also need to meet the program objectives of the MBA program.

**Courses**

**IS 455. Independent Study. 1-6 Hour.**
This independent study offers an upper-class student the opportunity to present one or more small projects for analysis. The course may consist of seminars, individualized instruction, and/or research related to a specific area of specialization.

**A.S. Computer Information Systems**

The two-year Associate in Science program prepares graduates for entry-level positions as computer programmers and networking specialists with potential to move to the level of system analyst or management in CIS and networking. All credits in the two-year program are transferable into the four-year program in CIS.

The associate’s degree program consists of 61 credit hours of course work and related activities in the Associate of Science program.

Computer Information Systems Minor

Students who wish to focus their electives on the area of IT are encouraged to declare a minor in Computer Information Systems. Choosing a minor to complement your degree program can add value to your college experience and boost your resume. Students who major in other fields may choose to complete a minor in CIS with six required courses.

MI Electives (200+) (CT 207/209 May be used) 12
MI Electives (300+)

Total Hours 18

All students seeking a minor within the School of Business must achieve a minimum grade point average of 2.0 in the courses relied upon for earning the designation.

Undergraduate Programs in Criminal Justice

Features of the Program

The Criminal Justice major prepares students for exciting and challenging careers in the rapidly expanding fields of law enforcement, investigations, private security, and corrections. In addition to modern course offerings, students visit courts, correctional facilities, law enforcement agencies, and private security installations. A vast system of networking enables students to interact with seasoned law enforcement officials.

A Criminal Justice major completes credits in professional and general education courses. The general education core helps the student develop analytic and communication skills, and provides an understanding of the economic, political, and social context within which the criminal justice system functions. Professional courses consist of the most advanced instruction available in investigations, evidence, policing procedures, criminal law, and modern correctional practices.

Requirements for Criminal Justice Majors

Candidates for a Bachelor of Science degree are required to complete a minimum of 121 semester credit hours. Candidates for an Associate of Science degree are required to complete 60 semester credit hours, maintaining a 2.0 overall cumulative grade point average and a 2.0 overall in the courses listed below. Transfer students must complete a minimum of 30 credit hours at Husson University. At least 15 credits must be earned in Husson Criminal Justice courses.

Students may submit a portfolio seeking credit for equivalent professional training in and life experience in law enforcement, corrections, or security work by taking PA 100 Portfolio Assessment.

Courses

CJ 101. Intro to Justice & Pub Safety. 3 Hours.
This course introduces students to the social reality of crime, criminal behavior, and law as each of these relates to the criminal justice system. Students examine the role of law enforcement, prosecution, defense, court system, corrections, and juvenile justice at various levels. Students are challenged to expand both their knowledge and appreciation of the criminal justice system through arranged visits to courts, detention facilities and working law enforcement agencies.

CJ 215. Police Operations. 3 Hours.
This course deals with everyday problems, situations and operations of the police department and the police officer. Included in the course is the study of many jobs and applications of duty in the police service. The course is a study of the patrol officer’s function, with a background investigation of the total organization. The use of staff deployment, tactical operations, and the use of various equipment are discussed in some detail during the course with an emphasis on how operations and equipment are changing. Prerequisite(s): CJ 101.

CJ 221. Criminalistics. 3 Hours.
This course will focus on the recovery, documentation and laboratory analysis of physical evidence found at the scene of a crime. The course covers the principles of effective crime scene management as well as what information can be obtained from particular pieces of physical evidence as a result of laboratory study. The laboratory analysis of the following will be covered: glass, soil, organic and inorganic substances, hairs, fibers, paint, drugs, poison, arson and explosive evidence, serology, DNA, fingerprints, firearms, tool impressions, miscellaneous impressions, photography, document and voice examinations. Prerequisite(s): CJ 101.
CJ 225. Criminal Procedure. 3 Hours.
This course is designed to teach the background and current information regarding arrest, search and seizure. It explores the development of standards in this field, through constitutional law, state law, concepts and interpretation, limitations of police powers, probable cause, and the suppression hearing.

CJ 235. Criminology. 3 Hours.
This course is intended to introduce and review the sociological perspective as it is applied to the themes of crime, criminality and the individual offender. Specifically, criminological theories of social process, social structure and social conflict will be explored in conjunction with views on developmental and trait-based perspectives to illuminate the social underpinnings of crime in modern society. Each particular viewpoint will be applied to the understanding of broad categories of criminal behavior and activity, including but not limited to: violent crime, property crime, public order crimes, organized crime, and white collar offenses. Additionally, the criminal justice system and its component structural and procedural parts will be reviewed to provide the student with an enhanced awareness of the social aspects of criminal behavior and its impact for law-making and enforcement. Prerequisite(s): PY 111 and (SY 201 or SY 222).

CJ 290. Psychology and the Legal System. 3 Hours.
Students will explore the movement of criminal defendants through the legal system in light of various clinical necessities, including but not limited to: Competencies to offer testimony, as well as to be sentenced and excused; jury selection; and the identification and evaluation of criminal suspects. Additionally, emphasis will be placed upon the psychology of victimization. Prerequisite(s): CJ 101 and CJ 225 and PY 111.

CJ 301. Critical Skills. 3 Hours.
This course is intended to introduce and review the basic law enforcement skills of self defense and control. Specifically, students will learn and practice the important elements of establishing control of situations using verbal, nonverbal and physical techniques as complementary intervention options. Strategies to manage the initial encounter will be discussed in regard to proper stance, appropriate social distance, authoritative body language and the use of verbal diffusion. The physical element of encounters will be reviewed and practiced to provide the student with a practical knowledge of techniques including, but not limited to: deflection, strikes and counters, take-downs and ground control of a combative individual. The above skills will be expanded upon to provide the necessary understanding of other control systems such as proper use of handcuffs, baton and chemical products to establish control. The focus on practical skills will be reviewed within the context of the use of force continuum ranging from verbal redirection to deadly force. Prerequisite(s): CJ 101 and CJ 215.

CJ 302. Advanced Critical Skills. 3 Hours.
This course is intended as a continuation of the psychological and physical applications of critical skills (police physical restraint and control). Through a series of steps, the student will reinforce the basics, enhance the flow of technique and finally though situational training strengthen and secure psychological and physical technique to specific calls and events. The focus on practical skills will be reviewed within the context of the use of force continuum ranging from verbal redirect to deadly force. Prerequisite(s): CJ 301.

CJ 305. Motor Vehicle Law. 3 Hours.
This course is intended to introduce and review motor vehicle law as it relates to the enforcement of those statutes concerned with moving violations. The student will also be introduced to the principles and procedures of identification and investigation of motor vehicle infractions. Specifically, topics will be presented ranging from vehicle stops and pursuit driving to operating under the influence and traffic-related fatalities, including homicide. Students will gain in-depth understanding of accident and hit-and-run investigation, as well as an overview of providing testimony in the courtroom. Each aspect of enforcement and investigation will thereby contribute to an appreciation of the complexities of police responsibilities regarding the monitoring and control of traffic movement. Prerequisite(s): PL 200.

CJ 307. Community Policing. 3 Hours.
This course is intended to introduce and review the basic principles of community policing strategies in contemporary society. The importance of enhanced law enforcement-community relationships will be discussed in relation to the benefits to the citizenry as well as enhanced relations with community stakeholders such as schools, businesses and religious institutions. Specifically, the student will be expected to gain an appreciation of the police officer as a community member who works collaboratively with private citizens to analyze, evaluate and respond to crime. This focus on cooperative problem-solving will be further explored in regard to how strategic partnerships between law enforcement and the community can positively impact criminal acts, fear of crime and social disorder. Prerequisite(s): CJ 215.

CJ 309. Constitutional Law. 3 Hours.
This course will explore the First, Second, Fourth, Fifth, Sixth, Eighth and Fourteenth Amendments of the Constitution through reading of case law and real life examples. Students will understand the arguments that exist for persons involved in civil and criminal matters from the Constitution. Prerequisite(s): CJ 225.

CJ 310. Mod Penology and Corrections. 3 Hours.
This course offers an in-depth familiarity with the key readings in the history and sociology of incarceration. Topics include: theories of incarceration, sentence determination, with emphasis on the controversy over the federal guidelines, history of our incarceration system, inmate and staff perspectives on incarceration, special category inmates such as mentally ill, rape victims, death row inmates, and juvenile offenders, the death penalty, and the community supervision movement. The course concludes with an examination of the new technologies of incarceration. Prerequisite(s): CJ 101.

CJ 315. Juvenile Justice. 3 Hours.
This course covers the institutional response to the problems of juvenile delinquency, juvenile misconduct and dependent/neglected and abused children. It emphasizes the police, court, and correctional agencies that process young people. In addition, it devotes attention to an understanding of the history of the system, recent legal developments, and an assessment of current proposals for reform. Prerequisite(s): CJ 101.

CJ 330. Ethics in Criminal Justice. 3 Hours.
This course will offer the student an examination of ethical systems as they relate to moral beliefs and professional behavior in law enforcement. Students will discuss how ideology and belief systems, whether liberal, moderate, or conservative affects criminal justice policy making and the day-to-day functioning of criminal justice agencies. As an exercise, students will apply ethical decision-making models to real world scenarios. Additionally, the course will include thirteen objectives that the student will be expected to master extending from a code of ethics for police to major rationales for punishment. Prerequisite(s): CJ 101.
CJ 333. Computer Forensics. 3 Hours.
This course will focus on the investigative use of computer technologies and electronic records. Students will be exposed to "digital evidence" and the valuable information it can provide to investigators. The course will have a two-tier approach. (1) Students will be shown how to extract readily decipherable information from someone's computer such as looking for at their files or their browser history of web sites visited. Even if the information is password protected or has been deleted it might still be recoverable. (2) The course will examine criminals who use computers and the Internet to commit various crimes ranging from trying to lure children into chat rooms or face-to-face meetings to every sort of financial fraud. This course is intended to address a growing need in law enforcement. Prerequisite(s): Major=BS Comp Info Systems or Major=BS Criminal Justice.

CJ 335. Report Writing and Testifying. 3 Hours.
This course is designed to teach students how to write police reports, search warrants and affidavits. Topics studied will include: the SEE method; legal concepts of reasonable articulable suspicion; probable cause to arrest; determination of custody for purposes of Miranda; and testifying effectively in court. Prerequisite(s): CJ 101 and CJ 225 and PL 200.

CJ 337. Interviewing and Interrogation. 3 Hours.
This course will focus on interviewing skills and techniques, both from a practical and legal perspective. Primary attention will be given to what needs to be done to satisfy the legal standards of voluntariness of admissions and confessions. Fifth and Sixth Amendment law will be thoroughly reviewed and discussed. The course will prepare students to conduct effective interrogations, and document the interrogation in a manner that will withstand later legal challenges. Prerequisite(s): CJ 101 and CJ 225 and PL 200.

CJ 341. Investigations. 3 Hours.
This course covers both private and public investigations as well as the practice and application to criminal investigations. It stresses the professionalism and modern investigation tools as it covers established investigation policies, procedures, and techniques for the law enforcement officer. Recent court cases and investigations are integrated throughout the course to update the students on significant happenings throughout the world. Prerequisite(s): CJ 101.

CJ 345. Comparative Criminal Justice. 3 Hours.
This course is intended to introduce and review the basic theoretical, cultural and practical applications of criminal justice systems in other parts of the world. American criminal law and procedure will be discussed to provide a comparative reference point for the variations in systems and practices across differing cultures in other nations. Additionally, the course will provide students with an understanding of the roles of social control mechanisms such as police, judiciary and correctional institutions outside of the U.S. Prerequisite(s): CJ 101 and CJ 225.

CJ 399. Topic/. 1-6 Hour.
This course is intended to provide the opportunity to offer advanced courses in criminal justice that would not normally be a part of the Husson curriculum. As such the topics will depend of the interests of students and faculty.

CJ 400. Evidence. 3 Hours.
This course will present the basic principles of the law of evidence as expressed in the Federal Rules of Evidence and the Maine Rules of Evidence. The student will develop the ability to read and apply a rule of evidence to specific information and circumstances. An emphasis will be placed on learning how the Federal & Maine Rules of Evidence effect trial preparation, negotiation, and trial. Participatory role play and discussion of hypothetical situations will constitute a significant part of the learning experience. Prerequisite(s): Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Criminal Justice or Major=BS Paralegal or Major=BS English - Prelaw.

CJ 401. Civil Liability in Law Enforcement. 3 Hours.
This course will provide students with a historical overview and current trends in civil litigation against law enforcement as well as describing the varying types of liability that exist under the law. Students will study the defenses to liability claims made against law enforcement. Liability claims will also be examined from the administrator's point of view including claims of failure to train and failure to supervise. Use of force and section 1983 claims will be examined in detail as the main claims against law enforcement. Prerequisite(s): CJ 101.

CJ 402. Perspectives in Terrorism. 3 Hours.
This course will analyze aspects of historical and current extremism and terrorism which will be related to contemporary domestic and international terrorism issues. The course will cover sophisticated theories developed by analysts around the world to investigate paramilitarism, white supremacy groups, hate groups, religious fundamentalism, and foreign terrorist groups which may pose a threat to United States interests. The special topic analyzed is not a regular course offering of the social sciences department. Since the topic covered in this class differs from year to year, students should seek further information from the instructor before registering regarding the particular topic that will be analyzed. Possible topics to be analyzed include: the ancient roots of terrorism, motivation of terrorists, the current vulnerability of modern democracies, and global jihad.

CJ 403. Domestic Violence Law. 3 Hours.
This course introduces domestic violence law from an interdisciplinary perspective and offers a contemporary view of the criminal justice experience with diverse populations and forms of violence. Topics will include violence perpetrated in a variety of age and gender relationships including: dating violence, sibling abuse, rape and incest, child and elder abuse and neglect, male battering, violence within the lesbian and gay communities, and violence against women. Students will also be expected to master current State of Maine and federal statutes relating to domestic violence. Prerequisite(s): PL 100 or CJ 101.

CJ 404. Cults. 3 Hours.
This course is intended to introduce and explore the structure and psychology of totalistic cultic organizations. Students will examine the key differences between conventional religious movements, splinter sects and cults to better understand the differences among varied faith-based organizations. Cults will be viewed both from historical and contemporary viewpoints in regard to recruiting practices, thought reform and control, personal and social consequences of cult membership, and the unique challenges that such groups pose for law enforcement. Additionally, students will review the clinical precursors which may predispose an individual to cultic persuasion and indoctrination, as well as the psychological consequences of membership. The course will rely heavily upon a detailed case study format which will scrutinize selected cult leaders/groups and allow students to apply theoretical knowledge to particular historical events and figures. Prerequisite(s): PY 332 or PY 232.
CJ 405. Crime & Literature. 3 Hours.
This course is intended to introduce several works of classical and modern literature which have incorporated the use of crime or criminality as a central theme. Students will be required to read from works of short fiction and novels as a means of preparing for discussion and analysis of core elements. Additionally, the various experiences of the individual criminal will be considered in light of those factors which may have an impact on the development of crime as a situational or social phenomenon. Required sources may include, but not remain limited to: Ernest Hemingway, Arthur Miller, William Faulkner and Truman Capote. Prerequisite(s): EH 200.

CJ 406. Victimology. 3 Hours.
This course will focus on the forgotten member of the criminal dyad: the victim. The purpose of this course is to introduce students to these developments and to alert them to ongoing victim-related issues. The goals of the course will include: Introducing the student to the development of the field of victimology; Delineating the conceptual boundaries of victimology; Familiarizing the student with basic concepts and literature within various sub-areas of victimology; Exploring policy developments and practical applications that stem from this concern over victims; and Assessing the progress away from a criminal justice system towards achieving a victim justice system. Prerequisite(s): CJ 235.

CJ 407. Advanced Community Policing. 3 Hours.
In this practicum based course, students will establish partnerships with relevant community members to identify problems related to the incidence of crime and social disorder. Students will engage in a collaborative problem solving exercise which will illustrate the enhanced ability of communities to prevent crime and disorder through cooperative and reciprocal relationships between police and citizens. Prerequisite(s): CJ 307.

CJ 408. Serial Homicide. 3 Hours.
This course is intended to introduce and explore the phenomenon of repetitive, intrinsically motivated homicide utilizing both clinical and law enforcement perspectives. Primary behavioral and crime scene characteristics of both organized and disorganized types of offenders will be reviewed to explain the incidence of serial homicide as a function of motivational factors ranging from sociopathy to severe psychiatric disturbance. The varied typologies and classification systems for serial murderers will be presented as a means of discussing issues ranging from victim selection to law enforcement investigative responsibilities. The course will rely heavily upon a detailed case study format which will scrutinize the crimes of key selected offenders and allow students to apply theoretical knowledge to particular serial perpetrators. Prerequisite(s): PY 332 or PY 232.

CJ 409. Criminal Profiling. 3 Hours.
This course is intended to introduce and review the basic theoretical and practical applications of criminal profiling techniques. Specifically, the student will be introduced to concepts including, but not limited to: the uses of criminal profiling; crime scene evaluation and reconstruction; criminal motivation and offender characteristics; modus operandi and offender signature; psychopathic and sadistic behavior; behavioral aspects of fire-setting; serial offenses, including rape and homicide. Students will explore varied offense behaviors and their psychological underpinnings to develop an understanding of the role of behavioral analysis of evidence in critical investigations. Prerequisite(s): PY 332 or PY 232.

CJ 410. Criminal Justice Internship. 3-9 Hours.
In this experiential course, the student serves as an intern with a criminal justice professional in a work setting. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional, and the internship director. The experience may be multidisciplinary, but should have a strong criminal justice element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): College Level=Junior or College Level=Senior.

CJ 411. Homeland Security. 3 Hours.
This course of study relates principle aspects of terrorism and how it affects our communities. This course compiles information from programs available on the national level that pertain to terrorism and the law enforcement officer’s response to these types of incidents. The instruction is designed to provide the student with an understanding of the key role of first responder in their response to a suspected terrorist incident.

CJ 414. Counterterrorism and Counterinsurgency. 3 Hours.
This course introduces students to the topics of counterterrorism and counterinsurgency. A variety of concepts, theories, and methodologies will be examined in an effort to better understand what drives violent jihadism and global terrorism. Students will learn about policies, strategies, and tactics designed to counter the global threats currently posed during the terror age, and the operational and political risks of government action or inaction.

CJ 415. Corporate Security. 3 Hours.
Security has entered a new era since the events of 9/11 and this course focuses on the impact of these events on Corporate Security. Risk assessment models and proactive strategic planning concepts will be discussed drawing from actual cases. Students will also learn the importance of working from measurable metrics and business needs rather than unproven assumptions.

CJ 416. Global Jihad and Radicalization. 3 Hours.
This course will focus on the rise of radical Islam beginning in the late 20th century with the Mujahideen in Afghanistan and the Muslim Brotherhood in Egypt, through the 21st century with the emergence of Al Qaeda, Taliban, Boka Haram and ISIS. The course will examine methods, practices and global ambitions of these groups. Additionally attention will be given to the global ambitions for the creation of an Islamic caliphate and its implications for the modern world. The process and dynamics of Islamic fundamentalist radicalization will be explored in terms of how and where it occurs and how it can be prevented. Extensive use will be made of multimedia images of historical and current events.

CJ 420. Leadership in Police Organizations I. 3 Hours.
This course awards academic credit for participation in the International Association of Chiefs of Police Leadership in Police Organizations Program (LPO). The program is a leadership training program based on the principles of dispersed leadership in a policing environment.

CJ 421. Leadership in Police Organizations II. 3 Hours.
This course awards academic credit for participation in the International Association of Chiefs of Police Leadership in Police Organizations Program (LPO). The program is a leadership training program based on the principles of dispersed leadership in a policing environment.
CJ 435. Management & Criminal Justice. 3 Hours.
This course examines the application of modern management theory and technique to the criminal justice system. It emphasizes the unique nature of the criminal justice community and the complex relationships, which are necessary to make it efficient and effective. Topics covered include: hiring, developing personnel; managing budgets, dealing with public sector unions; discipline and problem behaviors; complaints and grievances; stress and time management; performance appraisals; deploying human resources; and emerging trends in criminal justice management. Prerequisite(s): CJ 215.

CJ 445. Criminal Justice Capstone. 3 Hours.
This course is designed to synthesize the information and insights from other courses in the Criminal Justice Curriculum. It includes research in crime trends and causes, scholarly research, and an assessment of each student’s knowledge and understanding of the essential elements of the criminal justice system. This Capstone Course will focus on pragmatic application of principles and theories which guide Criminal Justice practice in the United States. Prerequisite(s): CJ 225 and PL 200.

CJ 490. Forensic Psychology. 3 Hours.
This course will introduce and review the basic theoretical and practical applications of forensic Psychology in our society. The student will be introduced to concepts in the field that directly impact or influence law enforcement and the judicial system. Concepts will range from the uses of criminal profiling, risk assessment of violent behavior and interrogation to custody, competency and discrimination determinations. Students will gain an in-depth understanding of each core topic as well as an appreciation for how each contributes to the broader domain of the criminal justice system. Prerequisite(s): (PY 332 or PY 232) and ( College Level=Junior or College Level=Senior).

CJ 491. Forensic Science I. 4 Hours.
This course builds on the scientific knowledge and analytical skills developed in the prerequisite science courses and laboratory work. The student will apply scientific principles and use current laboratory instrumentation to compare and distinguish between typical forensic evidence items. Students will become familiar with microscope examinations of trace evidence including soil, fibers and hairs, forensic serology and screening, DNA typing, bloodstain pattern analysis and toxicology. Topical discussions and lectures will be supplemented by scheduled field trips and guest speakers from the forensic science community. Prerequisite(s): SC 191 and SC 192 and SL 191 and SL 192 and SC 241 and CJ 221 and CJ 330 and SC 224.

CJ 492. Forensic Science II. 4 Hours.
This course builds on the scientific knowledge and analytical skills developed in the prerequisite science courses, laboratory work and Forensic Science I course. The student will build on their understanding of the properties of organic and inorganic compounds and apply these to analysis of typical forensic science samples. Students will analyze drugs, inks and dyes, explosives, fire debris samples. Forensic document examination, fingerprint development and bullet comparisons will be conducted. Scientific reports will be written for each specific forensic discipline. Topical discussions and lectures will be supplemented by scheduled field trips and guest speakers from the forensic science community. Prerequisite(s): CJ 491.

CJ 493. Forensic Seminar. 4 Hours.
This course is the capstone of the bachelor's degree in forensic science. The course will draw on the knowledge acquired throughout the previous seven semesters. The course will guide students through correct processing and sequencing of processing of evidence at the crime scene and in the laboratory. Particular attention will be placed on understanding the pros and cons, false negatives and false positives, cross reactions and potential for cross contamination in analyzing and testing evidence items. Students will learn various techniques for describing scientific principles in layman's terms. The course will finish up with a mock trial at the end of the semester, giving the student the chance to experience direct and cross examination. During the course of the semester the class will sit for the International Association of Identification (IAI) crime scene technician certification. This will give the students the opportunity to acquire international certification and well as earn the degree. Prerequisite(s): SC 103 and SL 103 and SC 241 and SL 241 and CJ 221 and CJ 330 and SC 224 and CJ 491.

CJ 496. Concepts and Issues in CJ. 3 Hours.
This course provides a broad overview and critical examination of criminal justice topics. Commentary on these issues is written by experts in fields such as crime and justice and America, American law enforcement, the court system, juvenile justice, corrections, and the future of justice in America. Students will be required to meet nineteen course objectives and will be expected to read and comprehend a series of essays and subsequently research current events related to the CJ topics. An additional requirement will be student-led class discussion on an assigned topic area over the course of the semester. Prerequisite(s): ( College Level=Junior or College Level=Senior) and ( Major=BS Criminal Justice or Major=BS Psychology - Crim Justice).

CJ 498. Basic Law Enforcement Training. 15 Hours.
Taught at the Maine Criminal Justice Academy, this 18-week course is designed to qualify a student as a Maine law enforcement officer. The Academy program tests a student's ability and willingness to assume the complex and challenging responsibilities of a modern law enforcement officer in keeping the peace, protecting state and federal constitutional rights and enforcing the law.

CJ 499. Topic/. 1-6 Hour.
This course is intended to provide the opportunity to offer advanced courses in criminal justice that would not normally be a part of the Husson curriculum. As such the topics will depend on the interests of students and faculty. Prerequisite(s): ( College Level=Junior or College Level=Senior).

CJ 700. Introduction to Criminal Justice Administration. 3 Hours.
This course provides an analysis and overview of the theories of organization and the administration of criminal justice agencies, including management styles, techniques of leadership, ethics, and decision-making for those students who do not have a previous background in criminal justice.

CJ 701. Justice Administration and Information Systems. 3 Hours.
This course will include the examination of contemporary law enforcement organizations and the issues police and other public service managers confront every day. The course will focus on case study analysis as a method of learning the latest management and behavioral theories. The five approaches to management that will be emphasized include: commitment to a common purpose, concern for high-quality public services; empowerment and shared leadership; pragmatic incrementalism; and dedication to public service.
CJ 702. Perspectives in Terrorism. 3 Hours.
The students in this course will analyze aspects of historical and current extremism and terrorism which will be related to contemporary domestic and international terrorism issues. The course will cover sophisticated theories developed by analysts around the world to investigate paramilitarism, white supremacy groups, hate groups, religious fundamentalism, and foreign terrorist groups which may pose a threat to United States interests. Among the topics to be analyzed include the ancient roots of terrorism, motivation of terrorists, the current vulnerability of modern democracies, and global jihad.

CJ 703. Labor and Employment Law. 3 Hours.
This course reviews the law under the National Labor Relations Act (NLRA). It will focus on unfair labor practices, union representative elections and conflict in the workplace. It includes an emphasis on proper collective bargaining processes, methods of mediation and arbitration to resolve disputes and the duty to bargain in good faith between employers and employees. Students are expected to study the text of the statute, relevant selections from actual cases, and various other materials and apply them to current events and hypothetical situations.

CJ 705. Leadership & Ethics. 3 Hours.
This course will provide students with a study of leadership principles and strategies using historical figures as examples. The primary source of effective leadership will be Ernest Shackleton and is 1914 Antarctic expedition. Other historical leaders that will be drawn from include, but are not limited to: George Washington, Abraham Lincoln, and Theodore Roosevelt. Students will focus on leadership decisions made by these individuals and the ethical framework that surrounds every decision. Students will incorporate the leadership and ethical decision making skills into a final project related to their own field of study.

CJ 707. Public Policy and Planning. 3 Hours.
Students will examine policy development and planning processes. Topics will include the process and models of policy formation, policy implementation methods and evaluation components typically associated with planned change in criminal justice.

CJ 709. Advanced Criminological Theories. 3 Hours.
This course is intended to introduce an advanced sociological perspective as it is applied to the themes of crime, criminality and the individual offender. Specifically, definitions of selected crimes will be explored in conjunction with various perspectives on both causation and response to criminal acts. This analysis will require students to read and discuss the primary writings of those thinkers responsible for the development of landmark classical and contemporary criminological theories.

CJ 710. Criminal Justice Graduate Internship. 3-6 Hours.
This course is designed for students who desire to obtain on-the-job experience in the criminal justice profession who have not previously been employed in the internship locale. The nature of the work and the location of the internship must be approved by the student’s advisor. Included in the experience and pre-counseling, on-site supervision, periodic summary and evaluation reporting, supplemental reading, pertinent research or practical work-related projects, and presentation of projects.

CJ 711. White Collar Crime. 3 Hours.
This course explores the nature of elite deviance as it relates to crime and power in American society. Various forms of white collar crime will be examined and illustrated through case studies and estimates of the extent and costs of these crimes will be presented. Students will have the opportunity to gain a better understanding of how white collar crime affects employees, consumer and citizens.

CJ 712. Homeland Security. 3 Hours.
This course relates principle aspects of terrorism and how it affects our communities. It compiles information from programs available on the national level that pertain to terrorism and the law enforcement officer’s response to these types of incidents. The instruction is designed to provide the student with an understanding of the key role of first responder in their response to a suspected terrorist incident.

CJ 713. Psychology and the Legal Environment. 3 Hours.
This course is intended to introduce and review the basic theoretical and practical applications of forensic psychology in our society. Specifically, issues related to the use of psychological research and knowledge in legal environments will be presented to allow the student to appreciate the unique interaction between psychology and the law. Concepts will range from the analysis of competency and insanity to the use of criminal profiling, risk assessments of violent behavior, and psychopathology. Considerable attention will be allotted to an investigation of victimology concerns stemming from sexual assault of children and adults, as well as domestic violence. Students will gain an in-depth understanding of each core topic as well as an appreciation for how each contributes to the broader domain of the legal system.

CJ 714. Counterterrorism and Counterinsurgency. 3 Hours.
This course introduces students to the topics of counterterrorism and counterinsurgency. A variety of concepts, theories, and methodologies will be examined in an effort to better understand what drives violent jihadism and global terrorism. Students will learn about policies, strategies, and tactics designed to counter the global threats currently posed during the terror age, and the operational and political risks of government action or inaction.

CJ 715. Corporate Security. 3 Hours.
This course will focus on the impacts on corporate security from the new age that has been entered since 9/11/01. Entirely new risk assessment models and proactive strategic planning concepts will be discussed drawing from actual cases. The important of working from measurable metrics and business needs rather than unproven assumptions will be discussed.

CJ 716. Global Jihad and Radicalization. 3 Hours.
This course will focus on the issue of the rise of radical Islam beginning in the late 20th century with the Mujahedeen in Afghanistan and the Muslim Brotherhood in Egypt, through the 21st century with the emergence of Al Qaeda, Taliban, Boka Haram and ISIS. The course will examine methods, practices, and global ambitions of these groups. Additionally attention will be given to the global ambitions for the creation of an Islamic caliphate and its implications for the modern world. The process and dynamics of Islamic fundamentalist radicalization will be explored in terms of how and where it occurs and how it can be prevented. Extensive use will be made of multimedia images of historical and current events.

CJ 717. Graduate Capstone Course. 3 Hours.
This course focuses on providing students an understanding of the major theories of the public policymaking process, the mechanics of the process, methods of examining policy impacts, and how criminological research can affect policy change as well as be driven by policy. Another goal of this course is to familiarize students with current pressing criminal justice issues and to have the students become sophisticated practitioners and consumers of evaluation research. Students will be expected to reflect critically upon the role of criminological research in the policy making / decision making process. Prerequisite(s): BA 600 and 18 Credits From Range [BA 600 To BA 799].
CJ 720. Leadership in Police Organizations I. 3 Hours.
This course awards academic credit for participation in the International Association of Chiefs of Police Leadership in Police Organizations Program (LPO). The program is a leadership training program based on the principles of dispersed leadership in a policing environment.

CJ 721. Leadership in Police Organizations II. 3 Hours.
This course awards academic credit for participation in the International Association of Chiefs of Police Leadership in Police Organizations Program (LPO). The program is a leadership training program based on the principles of dispersed leadership in a policing environment.

CJ 799. Topic/. 3-6 Hours.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in Criminal Justice Administration. This course may consist of seminars, individualized instruction, and/or research related to a specific area of specialization.

B.S. Criminal Justice

Students are expected to complete 121 credit hours of course work related activity in the Bachelor of Science program. This program provides both a strong core of professional courses as well as a varied liberal arts background. Students in this program are eligible to attend the Maine Criminal Justice Academy’s Pre-Service Training Program (http://www.maine.gov/dps/mcja/training/preservice), which certifies individuals to become eligible for employment as part-time law enforcement officers in the State of Maine, and receive six college credits as well. Students in their last year of the program may choose to attend the Maine Criminal Justice Academy’s Basic Law Enforcement Training Program (http://www.maine.gov/dps/mcja/training/basiclaw) to be eligible for employment as a full time law enforcement officer in the State of Maine and receive fifteen college credits as well. After students complete their first year, they are also eligible to do internships in law enforcement agencies, offices, and businesses for hands-on experiential learning. This program will prepare graduates for entry level positions and also for future advancement to leadership positions in the profession.

The program objectives for the B.S. Criminal Justice are:

• To demonstrate excellent or outstanding understanding of the key concepts of Criminal Justice:
  • Administration of Justice
  • Law Enforcement
  • Law Adjudication
  • Corrections
  • Criminological Theory
  • Research and Analytical Methods

• To apply ethical decision-making skills and integrity in an ever changing global environment.

• To produce and present effective oral and written forms of communication.

• To analyze diversity issues in the criminal justice field

The following classes are required to complete this program of study:

Total Hours 122
B.S. Criminal Justice/B.S. Psychology

This unique curriculum provides a strong core of professional courses as well as varied liberal arts offerings leading to Bachelor’s degrees in both Criminal Justice and Psychology. The course of study is structured to expose students to core theoretical, clinical and practical topics in complementary disciplines with elective based courses and fieldwork opportunities allowing the individual learner to tailor the program to include unique interests.

The dual degree program also provides the option of attending the Maine Criminal Justice Academy’s Pre-Service Training program (http://www.maine.gov/dps/mcja/training/preservice), allowing the student to earn six college credits and become eligible to work as a part-time law enforcement officer in the State of Maine. Those students in their final year of study may choose instead to attend the Academy’s Basic Law Enforcement Training Program (http://www.maine.gov/dps/mcja/training/basiclaw) to become eligible to work as a full-time law enforcement officer in the State of Maine, while earning fifteen college credits.

During the fourth and fifth years, students are required to complete a practicum experience in Psychology and may choose to complete an internship in a Criminal Justice related setting. Upon completion of the core Psychology coursework, the student is also able to apply for certification as a Mental Health Rehabilitation Technician, Community Level (MHRT-C) (http://www.husson.edu/psychology) in the State of Maine. These opportunities allow the student to meaningfully integrate classroom based learning into a real world application of knowledge. The dual degree student is therefore ideally positioned for entry level positions in both professions as well as post-baccalaureate study at a graduate level.

In order to earn both degrees, students will be expected to fulfill the program objectives for the B.S. Criminal Justice and B.S. Psychology.

This is a five-year dual degree major in which the student, upon completion of program requirements, is awarded the degrees of B.S. Criminal Justice and B.S. Psychology-MHRT-C. This course of study is prompted by homeland security training requirements and the expanding needs of such agencies as the FBI, CIA, and criminal investigation agencies. The latter cite an increasing demand for profilers with investigative and human behavior backgrounds. The B.S. Psychology-MHRT-C qualifies a student for State of Maine Mental Health Rehabilitation Technician-Community level certification.

A student enrolled in the dual degree program might be expected to take the following courses:

**Total Hours: 152**

* "C" or better in all courses marked
*** Credit may not be required for degree completion.

**CJ Courses**

**CJ 101. Intro to Justice & Pub Safety. 3 Hours.**
This course introduces students to the social reality of crime, criminal behavior, and law as each of these relates to the criminal justice system. Students examine the role of law enforcement, prosecution, defense, court system, corrections, and juvenile justice at various levels. Students are challenged to expand both their knowledge and appreciation of the criminal justice system through arranged visits to courts, detention facilities, and working law enforcement agencies.

**CJ 190. The Science of Fingerprints. 3 Hours.**
This course will allow students to examine every facet of the discipline, from the history of friction ridge identification and its earliest pioneers and researchers, skin growth in the embryo, structure of skin, scarring and histology, the chemistry of sweat and other secretions, to the scientific basis and the various steps of the identification process.
CJ 215. Police Operations. 3 Hours.
This course deals with everyday problems, situations and operations of the police department and the police officer. Included in the course is the study of many jobs and applications of duty in the police service. The course is a study of the patrol officer’s function, with a background investigation of the total organization. The use of staff deployment, tactical operations, and the use of various equipment are discussed in some detail during the course with an emphasis on how operations and equipment are changing. Prerequisite(s): CJ 101.

CJ 221. Criminalistics. 3 Hours.
This course will focus on the recovery, documentation and laboratory analysis of physical evidence found at the scene of a crime. The course covers the principles of effective crime scene management as well as what information can be obtained from particular pieces of physical evidence as a result of laboratory study. The laboratory analysis of the following will be covered: glass, soil, organic and inorganic substances, hairs, fibers, paint, drugs, poison, arson and explosive evidence, serology, DNA, fingerprints, firearms, tool impressions, miscellaneous impressions, photography, document and voice examinations. Prerequisite(s): CJ 101.

CJ 225. Criminal Procedure. 3 Hours.
This course is designed to teach the background and current information regarding arrest, search and seizure. It explores the development of standards in this field, through constitutional law, state law, concepts and interpretation, limitations of police powers, probable cause, and the suppression hearing.

CJ 235. Criminology. 3 Hours.
This course is intended to introduce and review the sociological perspective as it is applied to the themes of crime, criminality and the individual offender. Specifically, criminological theories of social process, social structure and social conflict will be explored in conjunction with views on developmental and trait-based perspectives to illuminate the social underpinnings of crime in modern society. Each particular viewpoint will be applied to the understanding of broad categories of criminal behavior and activity, including but not limited to: violent crime, property crimes, public order crimes, organized crime, and white collar offenses. Additionally, the criminal justice system and its component structural and procedural parts will be reviewed to provide the student with an enhanced awareness of the social aspects of criminal behavior and its impact for law-making and enforcement. Prerequisite(s): PY 111 and (SY 201 or SY 222).

CJ 290. Psychology and the Legal System. 3 Hours.
Students will explore the movement of criminal defendants through the legal system in light of various clinical necessities, including but not limited to: Competencies to offer testimony, as well as to be sentenced and excused; jury selection; and the identification and evaluation of criminal suspects. Additionally, emphasis will be placed upon the psychology of victimization. Prerequisite(s): CJ 101 and CJ 225 and PY 111.

CJ 301. Critical Skills. 3 Hours.
This course is intended to introduce and review the basic law enforcement skills of self defense and control. Specifically, students will learn and practice the important elements of establishing control of situations using verbal, nonverbal and physical techniques as complementary intervention options. Strategies to manage the initial encounter will be discussed in regard to proper stance, appropriate social distance, authoritative body language and the use of verbal diffusion. The physical element of encounters will be reviewed and practiced to provide the student with a practical knowledge of techniques including, but not limited to: deflection, strikes and counters, takedowns and ground control of a combative individual. The above skills will be expanded upon to provide the necessary understanding of other control systems such as proper use of handcuffs, baton and chemical products to establish control. The focus on practical skills will be reviewed within the context of the use of force continuum ranging from verbal redirection to deadly force. Prerequisite(s): CJ 101 and CJ 215.

CJ 302. Advanced Critical Skills. 3 Hours.
This course is intended as a continuation of the psychological and physical applications of critical skills (police physical restraint and control). Through a series of steps, the student will reinforce the basics, enhance the flow of technique and finally though situational training strengthen and secure psychological and physical technique to specific calls and events. The focus on practical skills will be reviewed within the context of the use of force continuum ranging from verbal redirection to deadly force. Prerequisite(s): CJ 301.

CJ 305. Motor Vehicle Law. 3 Hours.
This course is intended to introduce and review motor vehicle law as relates to the enforcement of those statutes concerned with moving violations. The student will also be introduced to the principles and procedures of identification and investigation of motor vehicle infractions. Specifically, topics will be presented ranging from vehicle stops and pursuit driving to operating under the influence and traffic-related fatalities, including homicide. Students will gain in in-depth understanding of accident and hit-and-run investigation, as well as an overview of providing testimony in the courtroom. Each aspect of enforcement and investigation will thereby contribute to an appreciation of the complexities of police responsibilities regarding the monitoring and control of traffic movement. Prerequisite(s): PL 200.

CJ 307. Community Policing. 3 Hours.
This course is intended to introduce and review the basic law enforcement principles of community policing strategies in contemporary society. The importance of enhanced law enforcement-community relationships will be discussed in relation to the benefits to the citizenry as well as enhanced relations with community stakeholders such as schools, businesses and religious institutions. Specifically, the student will be expected to gain an appreciation of the police officer as a community member who works collaboratively with private citizens to analyze, evaluate and respond to crime. This focus on cooperative problem-solving will be further explored in regard to how strategic partnerships between law enforcement and the community can positively impact criminal acts, fear of crime and social disorder. Prerequisite(s): CJ 215.

CJ 309. Constitutional Law. 3 Hours.
This course will explore the First, Second, Fourth, Fifth, Sixth, Eighth and Fourteenth Amendments of the Constitution through reading of case law and real life examples. Students will understand the arguments that exist for persons involved in civil and criminal matters from the Constitution. Prerequisite(s): CJ 225.
CJ 310. Mod Penology and Corrections. 3 Hours.
This course offers an in-depth familiarity with the key readings in the history and sociology of incarceration. Topics include: theories of incarceration, sentence determination, with emphasis on the controversy over the federal guidelines, history of our incarceration system, inmate and staff perspectives on incarceration, special category inmates such as mentally ill, rape victims, death row inmates, and juvenile offenders, the death penalty, and the community supervision movement. The course concludes with an examination of the new technologies of incarceration. Prerequisite(s): CJ 101.

CJ 315. Juvenile Justice. 3 Hours.
This course covers the institutional response to the problems of juvenile delinquency, juvenile misconduct and dependent/neglected and abused children. It emphasizes the police, court, and correctional agencies that process young people. In addition, it devotes attention to an understanding of the history of the system, recent legal developments, and an assessment of current proposals for reform. Prerequisite(s): CJ 101.

CJ 330. Ethics in Criminal Justice. 3 Hours.
This course will offer the student an examination of ethical systems as they relate to moral beliefs and professional behavior in law enforcement. Students will discuss how ideology and belief systems, whether liberal, moderate, or conservative affects criminal justice policy making and the day-to-day functioning of criminal justice agencies. As an exercise, students will apply ethical decision-making models to real world scenarios. Additionally, the course will include thirteen objectives that the student will be expected to master extending from a code of ethics for police to major rationales for punishment. Prerequisite(s): CJ 101.

CJ 333. Computer Forensics. 3 Hours.
This course will focus on the investigative use of computer technologies and electronic records. Students will be exposed to "digital evidence" and the valuable information it can provide to investigators. The course will have a two-tier approach. (1) Students will be shown how to extract readily decipherable information from someone's computer such as looking for at their files or their browser history of web sites visited. Even if the information is password protected or has been deleted it might still be recoverable. (2) The course will examine criminals who use computers and the Internet to commit various crimes ranging from trying to lure children into chat rooms or face-to-face meetings to every sort of financial fraud. This course is intended to address a growing need in law enforcement. Prerequisite(s): Major=BS Comp Info Systems or Major=BS Criminal Justice.

CJ 335. Report Writing and Testifying. 3 Hours.
This course is designed to teach students how to write police reports, search warrants and affidavits. Topics studied will include: the SEE method; legal concepts of reasonable articulable suspicion; probable cause to arrest; determination of custody for purposes of Miranda; and testifying effectively in court. Prerequisite(s): CJ 101 and CJ 225 and PL 200.

CJ 337. Interviewing and Interrogation. 3 Hours.
This course will focus on interviewing skills and techniques, both from a practical and legal perspective. Primary attention will be given to what needs to be done to satisfy the legal standards of voluntariness of admissions and confessions. Fifth and Sixth Amendment law will be thoroughly reviewed and discussed. The course will prepare students to conduct effective interrogations, and document the interrogation in a manner that will withstand later legal challenges. Prerequisite(s): CJ 101 and CJ 225 and PL 200.

CJ 341. Investigations. 3 Hours.
This course covers both private and public investigations as well as the practice and application to criminal investigations. It stresses the professionalism and modern investigation tools as it covers established investigation policies, procedures, and techniques for the law enforcement officer. Recent court cases and investigations are integrated throughout the course to update the students on significant happenings throughout the world. Prerequisite(s): CJ 101.

CJ 345. Comparative Criminal Justice. 3 Hours.
This course is intended to introduce and review the basic theoretical, cultural and practical applications of criminal justice systems in other parts of the world. American criminal law and procedure will be discussed to provide a comparative reference point for the variations in systems and practices across differing cultures in other nations. Additionally, the course will provide students with an understanding of the roles of social control mechanisms such as police, judiciary and correctional institutions outside of the U.S. Prerequisite(s): CJ 101 and CJ 225.

CJ 399. Topic/. 1-6 Hour.
This course is intended to provide the opportunity to offer advanced courses in criminal justice that would not normally be a part of the Husson curriculum. As such the topics will depend of the interests of students and faculty.

CJ 400. Evidence. 3 Hours.
This course will present the basic principles of the law of evidence as expressed in the Federal Rules of Evidence and the Maine Rules of Evidence. The student will develop the ability to read and apply a rule of evidence to specific information and circumstances. An emphasis will be placed on learning how the Federal & Maine Rules of Evidence affect trial preparation, negotiation, and trial. Participatory role play and discussion of hypothetical situations will constitute a significant part of the learning experience. Prerequisite(s): Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Criminal Justice or Major=BS Paralegal or Major=BS English - Prelaw.

CJ 401. Civil Liability in Law Enforcement. 3 Hours.
This course will provide students with a historical overview and current trends in civil litigation against law enforcement as well as describing the varying types of liability that exist under the law. Students will study the defenses to liability claims made against law enforcement. Liability claims will also be examined from the administrator’s point of view including claims of failure to train and failure to supervise. Use of force and section 1983 claims will be examined in detail as the main claims against law enforcement. Prerequisite(s): CJ 101.

CJ 402. Perspectives in Terrorism. 3 Hours.
This course will analyze aspects of historical and current extremism and terrorism which will be related to contemporary domestic and international terrorism issues. The course will cover sophisticated theories developed by analysts around the world to investigate paramilitarism, white supremacy groups, hate groups, religious fundamentalism, and foreign terrorist groups which may pose a threat to United States interests. The special topic analyzed is not a regular course offering of the social sciences department. Since the topic covered in this class differs from year to year, students should seek further information from the instructor before registering regarding the particular topic that will be analyzed. Possible topics to be analyzed include: the ancient roots of terrorism, motivation of terrorists, the current vulnerability of modern democracies, and global jihad.
CJ 403. Domestic Violence Law. 3 Hours.
This course introduces domestic violence law from an interdisciplinary perspective and offers a contemporary view of the criminal justice experience with diverse populations and forms of violence. Topics will include violence perpetrated in a variety of age and gender relationships including: dating violence, sibling abuse, rape and incest, child and elder abuse and neglect, male battering, violence within the lesbian and gay communities, and violence against women. Students will also be expected to master current State of Maine and federal statutes relating to domestic violence. Prerequisite(s): PL 100 or CJ 101.

CJ 404. Cults. 3 Hours.
This course is intended to introduce and explore the structure and psychology of totalistic cultic organizations. Students will examine the key differences between conventional religious movements, splinter sects and cults to better understand the differences among varied faith-based organizations. Cults will be viewed both from historical and contemporary viewpoints in regard to recruiting practices, thought control and personal and social consequences of cult membership, and the unique challenges that such groups pose for law enforcement. Additionally, students will review the clinical precursors which may predispose an individual to cultic persuasion and indoctrination, as well as the psychological consequences of membership. The course will rely heavily upon a detailed case study format which will scrutinize selected cult leaders/groups and allow students to apply theoretical knowledge to particular historical events and figures. Prerequisite(s): PY 332 or PY 232.

CJ 405. Crime & Literature. 3 Hours.
This course is intended to introduce several works of classical and modern literature which have incorporated the use of crime or criminality as a central theme. Students will be required to read from works of short fiction and novels as a means of preparing for discussion and analysis of core elements. Additionally, the various experiences of the individual criminal will be considered in light of those factors which may have an impact on the development of crime as a situational or social phenomenon. Required sources may include, but not remain limited to: Ernest Hemingway, Arthur Miller, William Faulkner and Truman Capote. Prerequisite(s): EH 200.

CJ 406. Victimology. 3 Hours.
This course will focus on the forgotten member of the criminal dyad: the victim. The purpose of this course is to introduce students to these developments and to alert them to ongoing victim-related issues. The goals of the course will include: Introducing the student to the development of the field of victimology; Delineating the conceptual boundaries of victimology; Familiarizing the student with basic concepts and literature within various sub-areas of victimology; Exploring policy developments and practical applications that stem from this concern over victims; and Assessing the progress away from a criminal justice system towards achieving a victim justice system. Prerequisite(s): CJ 235.

CJ 407. Advanced Community Policing. 3 Hours.
In this practicum based course, students will establish partnerships with relevant community members to identify problems related to the incidence of crime and social disorder. Students will engage in a collaborative problem solving exercise which will illustrate the enhanced ability of communities to prevent crime and disorder through cooperative and reciprocal relationships between police and citizens. Prerequisite(s): CJ 307.

CJ 408. Serial Homicide. 3 Hours.
This course is intended to introduce and explore the phenomenon of repetitive, intrinsically motivated homicide utilizing both clinical and law enforcement perspectives. Primary behavioral and crime scene characteristics of both organized and disorganized types of offenders will be reviewed to explain the incidence of serial homicide as a function of motivational factors ranging from sociopathy to severe psychiatric disturbance. The varied typologies and classification systems for serial murderers will be presented as a means of discussing issues ranging from victim selection to law enforcement investigative responsibilities. The course will rely heavily upon a detailed case study format which will scrutinize the crimes of key selected offenders and allow students to apply theoretical knowledge to particular serial perpetrators. Prerequisite(s): PY 332 or PY 232.

CJ 409. Criminal Profiling. 3 Hours.
This course is intended to introduce and review the basic theoretical and practical applications of criminal profiling techniques. Specifically, the student will be introduced to concepts including, but not limited to: the uses of criminal profiling; crime scene evaluation and reconstruction; criminal motivation and offender characteristics; modus operandi and offender signature; psychopathic and sadistic behavior; behavioral aspects of fire-setting; serial offenses, including rape and homicide. Students will explore varied offense behaviors and their psychological underpinnings to develop an understanding of the role of behavioral analysis of evidence in critical investigations. Prerequisite(s): PY 332 or PY 232.

CJ 410. Criminal Justice Internship. 3-9 Hours.
In this experiential course, the student serves as an intern with a criminal justice professional in a work setting. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional, and the internship director. The experience may be multidisciplinary, but should have a strong criminal justice element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): College Level=Junior or College Level=Senior.

CJ 412. Homeland Security. 3 Hours.
This course of study relates principle aspects of terrorism and how it affects our communities. This course compiles information from programs available on the national level that pertain to terrorism and the law enforcement officer’s response to these types of incidents. The instruction is designed to provide the student with an understanding of the key role of first responder in their response to a suspected terrorist incident.

CJ 414. Counterterrorism and Counterinsurgency. 3 Hours.
This course introduces students to the topics of counterterrorism and counterinsurgency. A variety of concepts, theories, and methodologies will be examined in an effort to better understand what drives violent jihadism and global terrorism. Students will learn about policies, strategies, and tactics designed to counter the global threats currently posed during the terror age, and the operational and political risks of government action or inaction.

CJ 415. Corporate Security. 3 Hours.
Security has entered a new era since the events of 9/11 and this course focuses on the impact of these events on Corporate Security. Risk assessment models and proactive strategic planning concepts will be discussed drawing from actual cases. Students will also learn the importance of working from measurable metrics and business needs rather than unproven assumptions.
CJ 416. Global Jihad and Radicalization. 3 Hours.
This course will focus on the rise of radical Islam beginning in the late 20th century with the Mujahdeen in Afghanistan and the Muslim Brotherhood in Egypt, through the 21st century with the emergence of Al Qaeda, Taliban, Boka Haram and ISIS. The course will examine methods, practices and global ambitions of these groups. Additionally attention will be given to the global ambitions for the creation of an Islamic caliphate and its implications for the modern world. The process and dynamics of Islamic fundamentalist radicalization will be explored in terms of how and where it occurs and how it can be prevented. Extensive use will be made of multimedia images of historical and current events.

CJ 420. Leadership in Police Organizations I. 3 Hours.
This course awards academic credit for participation in the International Association of Chiefs of Police Leadership in Police Organizations Program (LPO). The program is a leadership training program based on the principles of dispersed leadership in a policing environment.

CJ 421. Leadership in Police Organizations II. 3 Hours.
This course awards academic credit for participation in the International Association of Chiefs of Police Leadership in Police Organizations Program (LPO). The program is a leadership training program based on the principles of dispersed leadership in a policing environment.

CJ 435. Management & Criminal Justice. 3 Hours.
This course examines the application of modern management theory and technique to the criminal justice system. It emphasizes the unique nature of the criminal justice community and the complex relationships, which are necessary to make it efficient and effective. Topics covered include: hiring, developing personnel; managing budgets, dealing with public sector unions; discipline and problem behaviors; complaints and grievances; stress and time management; performance appraisals; deploying human resources; and emerging trends in criminal justice management. Prerequisite(s): CJ 215.

CJ 445. Criminal Justice Capstone. 3 Hours.
This course is designed to synthesize the information and insights from other courses in the Criminal Justice Curriculum. It includes research in crime trends and causes, scholarly research, and an assessment of each student’s knowledge and understanding of the essential elements of the criminal justice system. This Capstone Course will focus on pragmatic application of principles and theories which guide Criminal Justice practice in the United States. Prerequisite(s): CJ 225 and PL 200.

CJ 490. Forensic Psychology. 3 Hours.
This course will introduce and review the basic theoretical and practical applications of forensic psychology in our society. The student will be introduced to concepts in the field that directly impact or influence law enforcement and the judicial system. Concepts will range from the uses of criminal profiling, risk assessment of violent behavior and interrogation to custody, competency and discrimination determinations. Students will gain an in-depth understanding of each core topic as well as an appreciation for how each contributes to the broader domain of the criminal justice system. Prerequisite(s): (PY 332 or PY 232) and (College Level=Junior or College Level=Senior).

CJ 491. Forensic Science I. 4 Hours.
This course builds on the scientific knowledge and analytical skills developed in the prerequisite science courses and laboratory work. The student will apply scientific principles and use current laboratory instrumentation to compare and distinguish between typical forensic evidence items. Students will become familiar with microscope examinations of trace evidence including soil, fibers and hairs, forensic serology and screening, DNA typing, bloodstain pattern analysis and toxicology. Topical discussions and lectures will be supplemented by scheduled field trips and guest speakers from the forensic science community. Prerequisite(s): SC 191 and SC 192 and SL 191 and SL 192 and SC 241 and CJ 221 and CJ 330 and SC 224.

CJ 492. Forensic Science II. 4 Hours.
This course builds on the scientific knowledge and analytical skills developed in the prerequisite science courses, laboratory work and Forensic Science I course. The student will build on their understanding of the properties of organic and inorganic compounds and apply these to analysis of typical forensic science samples. Students will analyze drugs, inks and dyes, explosives, fire debris samples. Forensic document examination, fingerprint development and bullet comparisons will be conducted. Scientific reports will be written for each specific forensic discipline. Topical discussions and lectures will be supplemented by scheduled field trips and guest speakers from the forensic science community. Prerequisite(s): CJ 491.

CJ 493. Forensic Seminar. 4 Hours.
This course is the capstone of the bachelor’s degree in forensic science. The course will draw on the knowledge acquired throughout the previous seven semesters. The course will guide students through correct processing and sequencing of processing of evidence at the crime scene and in the laboratory. Particular attention will be placed on understanding the pros and cons, false negatives and false positives, cross reactions and potential for cross contamination in analyzing and testing evidence items. Students will learn various techniques for describing scientific principles in layman’s terms. The course will finish up with a mock trial at the end of the semester, giving the student the chance to experience direct and cross examination. During the course of the semester the class will sit for the International Association of Identification (IAI) crime scene technician certification. This will give the students the opportunity to acquire international certification and well as earn the degree. Prerequisite(s): SC 103 and SL 103 and SC 241 and SL 241 and CJ 221 and CJ 330 and SC 224 and CJ 491.

CJ 496. Concepts and Issues in CJ. 3 Hours.
This course provides a broad overview and critical examination of criminal justice topics. Commentary on these issues is written by experts in fields such as crime and justice and America, American law enforcement, the court system, juvenile justice, corrections, and the future of justice in America. Students will be required to meet nineteen course objectives and will be expected to read and comprehend a series of essays and subsequently research current events related to the CJ topics. An additional requirement will be student-led class discussion on an assigned topic area over the course of the semester. Prerequisite(s): (College Level=Junior or College Level=Senior) and (Major=BS Criminal Justice or Major=BS Psychology - Crim Justice).

CJ 498. Basic Law Enforcement Training. 15 Hours.
Taught at the Maine Criminal Justice Academy, this 18-week course is designed to qualify a student as a Maine law enforcement officer. The Academy program tests a student’s ability and willingness to assume the complex and challenging responsibilities of a modern law enforcement officer in keeping the peace, protecting state and federal constitutional rights and enforcing the law.
**CJ 499. Topic/. 1-6 Hour.**

This course is intended to provide the opportunity to offer advanced courses in criminal justice that would not normally be a part of the Husson curriculum. As such the topics will depend of the interests of students and faculty. Prerequisite(s): ( College Level=Junior or College Level=Senior).

**CJ 700. Introduction to Criminal Justice Administration. 3 Hours.**

This course provides an analysis and overview of the theories of organization and the administration of criminal justice agencies, including management styles, techniques of leadership, ethics, and decision-making for those students who do not have a previous background in criminal justice.

**CJ 701. Justice Administration and Information Systems. 3 Hours.**

This course will include the examination of contemporary law enforcement organizations and the issues police and other public service managers confront every day. The course will focus on case study analysis as a method of learning the latest management and behavioral theories. The five approaches to management that will be emphasized include: commitment to a common purpose; concern for high-quality public services; empowerment and shared leadership; pragmatic incrementalism; and dedication to public service.

**CJ 702. Perspectives in Terrorism. 3 Hours.**

The students in this course will analyze aspects of historical and current extremism and terrorism which will be related to contemporary domestic and international terrorism issues. The course will cover sophisticated theories developed by analysts around the world to investigate paramilitarism, white supremacy groups, hate groups, religious fundamentalism, and foreign terrorist groups which may pose a threat to United States interests. Among the topics to be analyzed include the ancient roots of terrorism, motivation of terrorists, the current vulnerability of modern democracies, and global jihad.

**CJ 703. Labor and Employment Law. 3 Hours.**

This course reviews the law under the National Labor Relations Act (NLRA). It will focus on unfair labor practices, union representative elections and conflict in the workplace. It includes an emphasis on proper collective bargaining processes, methods of mediation and arbitration to resolve disputes and the duty to bargain in good faith between employers and employees. Students are expected to study the text of the statute, relevant selections from actual cases, and various other materials and apply them to current events and hypothetical situations.

**CJ 705. Leadership & Ethics. 3 Hours.**

This course will provide students with a study of leadership principles and strategies using historical figures as examples. The primary source of effective leadership will be Ernest Shackleton and is 1914 Antarctic expedition. Other historical leaders that will be drawn from include, but are not limited to: George Washington, Abraham Lincoln, and Theodore Roosevelt. Students will focus on leadership decisions made by these individuals and the ethical framework that surrounds every decision. Students will incorporate the leadership and ethical decision making skills into a final project related to their own field of study.

**CJ 707. Public Policy and Planning. 3 Hours.**

Students will examine policy development and planning processes. Topics will include the process and models of policy formation, policy implementation methods and evaluation components typically associated with planned change in criminal justice.

**CJ 709. Advanced Criminological Theories. 3 Hours.**

This course is intended to introduce an advanced sociological perspective as it is applied to the themes of crime, criminality and the individual offender. Specifically, definitions of selected crimes will be explored in conjunction with various perspectives on both causation and response to criminal acts. This analysis will require students to read and discuss the primary writings of those thinkers responsible for the development of landmark classical and contemporary criminological theories.

**CJ 710. Criminal Justice Graduate Internship. 3-6 Hours.**

This course is designed for students who desire to obtain on-the-job experience in the criminal justice profession who have not previously been employed in the internship locale. The nature of the work and the location of the internship must be approved by the student’s advisor. Included in the experience and pre-counseling, on-site supervision, periodic summary and evaluation reporting, supplemental reading, pertinent research or practical work-related projects, and presentation of projects.

**CJ 711. White Collar Crime. 3 Hours.**

This course explores the nature of elite deviance as it relates to crime and power in American society. Various forms of white collar crime will be examined and illustrated through case studies and estimates of the extent and costs of these crimes will be presented. Students will have the opportunity to gain a better understanding of how white collar crime affects employees, consumer and citizens.

**CJ 712. Homeland Security. 3 Hours.**

This course relates principle aspects of terrorism and how it affects our communities. It compiles information from programs available on the national level that pertain to terrorism and the law enforcement officer’s response to these types of incidents. The instruction is designed to provide the student with an understanding of the key role of first responder in their response to a suspected terrorist incident.

**CJ 713. Psychology and the Legal Environment. 3 Hours.**

This course is intended to introduce and review the basic theoretical and practical applications of forensic psychology in our society. Specifically, issues related to the use of psychological research and knowledge in legal environments will be presented to allow the student to appreciate the unique interaction between psychology and the law. Concepts will range from the analysis of competency and insanity to the use of criminal profiling, risk assessments of violent behavior, and psychopathology. Considerable attention will be allotted to an investigation of victimology concerns stemming from sexual assault of children and adults, as well as domestic violence. Students will gain an in-depth understanding of each core topic as well as an appreciation for how each contributes to the broader domain of the legal system.

**CJ 714. Counterterrorism and Counterinsurgency. 3 Hours.**

This course introduces students to the topics of counterterrorism and counterinsurgency. A variety of concepts, theories, and methodologies will be examined in an effort to better understand what drives violent jihadism and global terrorism. Students will learn about policies, strategies, and tactics designed to counter the global threats currently posed during the terror age, and the operational and political risks of government action or inaction.
CJ 715. Corporate Security. 3 Hours.
This course will focus on the impacts on corporate security from the new age that has been entered since 9/11/01. Entirely new risk assessment models and proactive strategic planning concepts will be discussed drawing from actual cases. The important of working from measurable metrics and business needs rather than unproven assumptions will be discussed.

CJ 716. Global Jihad and Radicalization. 3 Hours.
This course will focus on the issue of the rise of radical Islam beginning in the late 20th century with the Mujahedeen in Afghanistan and the Muslim Brotherhood in Egypt, through the 21st century with the emergence of Al Qaeda, Taliban, Boko Haram and ISIS. The course will examine methods, practices, and global ambitions of these groups. Additionally attention will be given to the global ambitions for the creation of an Islamic caliphate and its implications for the modern world. The process and dynamics of Islamic fundamentalist radicalization will be explored in terms of how and where it occurs and how it can be prevented. Extensive use will be made of multimedia images of historical and current events.

CJ 717. Graduate Capstone Course. 3 Hours.
This course focuses on providing students an understanding of the major theories of the public policymaking process, the mechanics of the process, methods of examining policy impacts, and how criminological research can affect policy change as well as be driven by policy. Another goal of this course is to familiarize students with current pressing criminal justice issues and to have the students become sophisticated practitioners and consumers of evaluation research. Students will be expected to reflect critically upon the role of criminological research in the policy making / decision making process. Prerequisite(s): BA 600 and 18 Credits From Range [BA 600 To BA 799].

CJ 720. Leadership in Police Organizations I. 3 Hours.
This course awards academic credit for participation in the International Association of Chiefs of Police Leadership in Police Organizations Program (LPO). The program is a leadership training program based on the principles of dispersed leadership in a policing environment.

CJ 721. Leadership in Police Organizations II. 3 Hours.
This course awards academic credit for participation in the International Association of Chiefs of Police Leadership in Police Organizations Program (LPO). The program is a leadership training program based on the principles of dispersed leadership in a policing environment.

CJ 799. Topic/. 3-6 Hours.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in Criminal Justice Administration. This course may consist of seminars, individualized instruction, and/or research related to a specific area of specialization.

PY Courses
PY 111. General Psychology. 3 Hours.
This is a scientifically based introduction to the discipline of psychology. It examines the study of basic patterns of behavior including motivation, learning, emotions, the physiological basis of behavior, human growth and development, personality theory and measurement, and abnormal and deviant behavior.

PY 141. Human Growth and Development. 3 Hours.
This course includes physiological processes of development including conception, prenatal growth, birth, maturation, and aging, provide a framework for examining the cognitive, affective and social development of the individual during his/her life-span. Prerequisite(s): PY 111.

PY 231. Social Psychology. 3 Hours.
This course exposes the student to classic research in the field of social influence and perception. Students are introduced to several concepts that provide understanding of the world in new ways. Prerequisite(s): PY 111.

PY 232. Abnormal Psychology. 3 Hours.
This is a comprehensive course focusing on the better understanding of the field as an area of active inquiry both in clinical practice and in research. A complete presentation of the most important theoretical models along with topics that reflect contemporary interests are examined. Developmental perspectives along with current views of abnormality and current treatment approaches are studied. Prerequisite(s): PY 111 and PY 141.

PY 233. Psychology of Human Sexuality. 3 Hours.
This course examines the historical, behavioral, and psychological dimensions of human sexuality. Topics typically include sexual maturation, gender identity, sexual orientation, development and maintenance of healthy sexual relationships, sexual attitudes, normal sexual behavior, abnormal sexual behavior, sexual dysfunction, sexual trauma, and cross-cultural sexual practices. Prerequisite(s): PY 111 and PY 141.

PY 242. Research Methods. 3 Hours.
In this course students will cover basic topics in research methodology in psychology. They will learn how to develop research questions, identify problems inherent in many research designs, and how to present their findings. They will also cover ethical issues related to research with human beings and animals. Prerequisite(s): PY 111 and (PY 141 or PY 241).

PY 299. Topic/. 1-3 Hour.
This course is intended to provide the opportunity to offer courses in psychology that would not normally be a part of the Husson curriculum. As such the topics will depend upon the interests of students and faculty. Prerequisite(s): PY 111 and (PY 141 or PY 241).

PY 322. Diversity & Multiculturalism. 3 Hours.
This course critically explores an array of cultural forces as well as issues entailed by lifestyle diversity that may help play significant roles in shaping students’ understanding of and approaches to assisting individuals with emotional or psychological difficulties or who are experiencing problem in making adaptive adjustments to life’s many transitions. Prerequisite(s): PY 111 and (PY 141 or PY 241).

PY 333. Psychology of Personality. 3 Hours.
This is a critical review of methods and content in the study of personality. The development of the field, with attention to recent applications of scientific methods to problems of personality, is examined. A survey of major theories of personality is undertaken. Prerequisite(s): PY 111.

PY 335. Intro to Rehabilitation. 3 Hours.
The course will provide a basic foundational study of rehabilitation counseling with a conceptual overview of the professional, historical, theoretical and research foundations, as well as the counseling applications of the rehabilitation profession. Prerequisite(s): PY 241 and (PY 332 or PY 232).
PY 336. Evolutionary Psychology. 3 Hours.
Evolutionary psychology will examine the impact evolutionary theory on the field of psychology. This course links psychology, anthropology, and biology and examines why contemporary humans behave and think the way they do. It examines the proximate and ultimate causes of behavior with an emphasis on function. The course begins with an overview of heredity and evolutionary theory and then discusses research on evolutionary factors that influence human learning, thinking, motivation, and emotion. It also covers the evolutionary explanations for social behavior such as cooperation and competition, and mate-selection and parenting. Prerequisite(s): PY 111 and PY 141.

PY 338. Cognitive Psychology. 3 Hours.
This course provides students with an overview of the theories and research in cognition. The course covers diverse topics such as memory, attention, judgment, decision making, problem solving, language, intelligence, sensation, perception, and sensory integration. In addition, this course integrates concepts from many diverse areas of psychology including biopsychology, learning, development, educational psychology, and sociocultural psychology, as well as other scientific disciplines. Prerequisite(s): PY 111 and PY 141 and PY 242.

PY 340. Physiological Psychology. 3 Hours.
This course examines behavior as viewed by the biological perspective. It is an introduction to and survey of the physiological bases of behavior, including biochemical and neurophysiological determinants of sensation, motor control, sleep, eating and drinking, learning and memory, language and mental disorders. Prerequisite(s): PY 111.

PY 341. Gerontology. 3 Hours.
This course is designed to expose the students to the most relevant and current problems in the field of aging and present a variety of divergent views on the appropriate solutions to these problems. The topics covered include demographic trends, the aging process, longevity, social attitudes toward old age, problems and potentials of aging, retirement, death, living environments in later life and social policies, programs and services for older people. Also, mental and physical health, cognitive and personality development, relationships and sexuality are studied. The key theories on aging and the influence of scientific knowledge, changing world views and historical events on theoretical viewpoints are examined. Prerequisite(s): PY 241 or PY 141.

PY 344. Early Childhood. 3 Hours.
This course is designed to expose students to the interplay among biological, cognitive and social factors in children’s development and examine its multiple determination. Basic research, theoretical models and applications of knowledge in areas such as prenatal environment, heredity and environment, sensation, perception and learning, emotional development, language and communications, intelligence, family, peers, morality, altruism, aggression, gender roles and differences, and technology and television are examined. Prerequisite(s): PY 241 or PY 141.

PY 345. Therapeutic Psychology. 3 Hours.
This course covers an introduction to the principles and techniques to counseling and psychotherapy with attention given to professional identity factors, theoretical and research foundations, counseling applications, current issues in therapeutic practice, and the place and obligations of the psychotherapist in the profession. Prerequisite(s): PY 111 and (PY 332 or PY 232) and (PY 241 or PY 141) and PY 412.

PY 346. Adolescent Psychology. 3 Hours.
This course examines the contextual development of adolescents as they transition through biological, cognitive, and social changes. These contextual transitions include the family, peer groups, schools, and work and leisure. Also, the developmental issues of identity, autonomy, intimacy, sexuality, achievement and psychosocial problems are explored. Prerequisite(s): PY 241 or PY 141.

PY 410. History and Systems of Psychology. 3 Hours.
This course provides students with an overview of the historical trends, influential people, theoretical developments, and empirical findings that are either foundational for the discipline or have shaped the current directions in psychology. Prerequisite(s): PY 111 and PY 141 and PY 333.

PY 411. Psychological Tests and Measurements. 3 Hours.
This course is designed to provide an introduction to the principles of psychological testing. The topics it covers include the definition of psychological testing, the role of testing in evaluation of persons, the types of tests and purposes for which they are applied, principles of test construction including a review of relevant statistical concepts, item selection, standardization, reliability and validity. In addition, this course will consider and examine some major tests used in assessment of personality, intelligence, interests, and neuropsychology and the standards for ethical practice in psychological testing. Prerequisite(s): (MS 111 or MS 141 or MS 180 or MS 181) and MS 132 and (PY 332 or PY 232) and (PY 242 or PY 342).

PY 412. Social Service Field Placement. 3 Hours.
Social Services Practicum in Psychology is designed to provide students experiences in which others are assisted or served. Students select a developmental stage of interest or identified group with a specific need, then participate in an existing program or develop a project that can assist people of this stage or identified population in need. The course content is individualized so that students explore personal and professional interests while participating in a social service project. Student’s experiences are shared during classes so that class members benefit from other’s experiences. Prerequisite(s): PY 345 and (PY 241 or PY 141).

PY 431. Behavior Modification/Seminar in Learning. 3 Hours.
This is an advanced course examining how learning principles influence human behavior. The extension of these principles and concepts emerging from the experimental analysis of behavior to problems of behavior modification in academic, social, and industrial settings is studied. Prerequisite(s): PY 333 and (PY 332 or PY 232).

PY 442. Seminar in Psychology. 3 Hours.
This is a capstone course designed to review the academic work and empirical experiences of psychology majors in the field, but not excluding the incorporation of other academic and collegiate experiences from psychology’s point of view. Additionally, this course provides students the opportunity to explore topics they deem important. The course helps prepare students for program completion and a smooth transition from collegiate to professional life. It also provides a review of the students’ academic experiences and verifies that all of the collegiate co-curricular expectations have been met. Prerequisite(s): College Level=Senior and (Major=BS Psychology - Crim Justice or Major=BS Psychology - General or Major=BS Psychology/Clinical or Major=BS Psychology - MHRT/C Certification or Major=BS Psychology).
PY 447. Trauma and Recovery. 3 Hours.
The theory and methodology of sexual abuse, non-sexual trauma, and the effects of trauma is examined. Awareness of abuse, recognizing the sources of trauma and developing a recovery plan through the use of available resources for prevention and treatment in the State of Maine will also be covered. Prerequisite(s): (PY 141 or PY 241) and (PY 232 or PY 332) and (PY 345 or PY 450).

PY 450. Introduction to Counseling and Psychotherapy. 3 Hours.
This course covers an introduction to the principles and techniques to counseling and psychotherapy with attention given to professional identity factors, theoretical and research foundations, counseling applications, current issues in therapeutic practice, and the place and obligations of the psychotherapist in the profession. Prerequisite(s): (PY 141 or PY 241) and (PY 232 or PY 332).

PY 491. Field Placement. 3 Hours.
Field Placement in Psychology is designed to introduce students to the actual fieldwork in mental health that is related to their career goals. This is a highly individualized class that is structured to meet the individual educational and career related needs of each student. Weekly class meetings will focus on issues relevant to providing mental health services to patients, becoming aware of various systems that support provision of mental health services, and increasing one’s self-awareness in regards to working in mental health systems and providing mental health services. Students must receive approval from their advisor before they can register. Prerequisite(s): (PY 141 or PY 241) and (PY 232 or PY 332).

PY 499. Topic/. 3-3 Hours.
This course is intended to provide the opportunity to offer advanced courses in psychology that would not normally be a part of the Husson curriculum. As such the topics will depend upon the interests of students and faculty. Prerequisite(s): PY 111 and ( College Level=Junior or College Level=Senior).

B.S. Criminal Justice/M.S. Criminal Justice Administration

This five year program was established to provide a faster completion of an undergraduate and graduate degree concentrating on crime prevention and on the administration of the criminal justice system. The program stresses an integrated approach to criminal justice emphasizing policy development and analysis, as well as the impact of these policies on individuals and organizations responsible for administering justice in an ethical manner. The program requires students to complete a curriculum requiring 152 semester hours including general education requirements as well as criminal justice, business, and related courses.

The goals of this program include developing skills in:

- Critical thinking
- Writing and oral communication
- Research
- Management
- Ethical public service

Students are expected to maintain a GPA of 3.0 in their undergraduate to take graduate classes. Students must maintain a 3.0 in graduate classes to remain in this program.

The program objectives for the B.S. Criminal Justice and the M.S. Criminal Justice Administration are met with this dual degree.

A grade-point average of 3.0 must be achieved in order to enroll in graduate courses in the 7th semester.

* "C" or better in all courses marked

*** Course may not be required for degree completion.

Courses

CJ 101. Intro to Justice & Pub Safety. 3 Hours.
This course introduces students to the social reality of crime, criminal behavior, and law as each of these relates to the criminal justice system. Students examine the role of law enforcement, prosecution, defense, court system, corrections, and juvenile justice at various levels. Students are challenged to expand both their knowledge and appreciation of the criminal justice system through arranged visits to courts, detention facilities and working law enforcement agencies.

CJ 190. The Science of Fingerprints. 3 Hours.
This course will allow students to examine every facet of the discipline, from the history of friction ridge identification and its earliest pioneers and researchers, skin growth in the embryo, structure of skin, scarring and histology, the chemistry of sweat and other secretions, to the scientific basis and the various steps of the identification process.

CJ 215. Police Operations. 3 Hours.
This course deals with everyday problems, situations and operations of the police department and the police officer. Included in the course is the study of many jobs and applications of duty in the police service. The course is a study of the patrol officer’s function, with a background investigation of the total organization. The use of staff deployment, tactical operations, and the use of various equipment are discussed in some detail during the course with an emphasis on how operations and equipment are changing. Prerequisite(s): CJ 101.

CJ 221. Criminalistics. 3 Hours.
This course will focus on the recovery, documentation and laboratory analysis of physical evidence found at the scene of a crime. The course covers the principles of effective crime scene management as well as what information can be obtained from particular pieces of physical evidence as a result of laboratory study. The laboratory analysis of the following will be covered: glass, soil, organic and inorganic substances, hairs, fibers, paint, drugs, poison, arson and explosive evidence, serology, DNA, fingerprints, firearms, tool impressions, miscellaneous impressions, photography, document and voice examinations. Prerequisite(s): CJ 101.

CJ 225. Criminal Procedure. 3 Hours.
This course is designed to teach the background and current information regarding arrest, search and seizure. It explores the development of standards in this field, through constitutional law, state law, concepts and interpretation, limitations of police powers, probable cause, and the suppression hearing.
CJ 235. Criminology. 3 Hours.
This course is intended to introduce and review the sociological perspective as it is applied to the themes of crime, criminality and the individual offender. Specifically, criminological theories of social process, social structure and social conflict will be explored in conjunction with views on developmental and trait-based perspectives to illuminate the social underpinnings of crime in modern society. Each particular viewpoint will be applied to the understanding of broad categories of criminal behavior and activity, including but not limited to: violent crime, property crime, public order crimes, organized crime, and white collar offenses. Additionally, the criminal justice system and its component structural and procedural parts will be reviewed to provide the student with an enhanced awareness of the social aspects of criminal behavior and its impact for law-making and enforcement. Prerequisite(s): PY 111 and (SY 201 or SY 222).

CJ 290. Psychology and the Legal System. 3 Hours.
Students will explore the movement of criminal defendants through the legal system in light of various clinical necessities, including but not limited to: Competencies to offer testimony, as well as to be sentenced and excused; jury selection; and the identification and evaluation of criminal suspects. Additionally, emphasis will be placed upon the psychology of victimization. Prerequisite(s): CJ 101 and CJ 225 and PY 111.

CJ 301. Critical Skills. 3 Hours.
This course is intended to introduce and review the basic law enforcement skills of self defense and control. Specifically, students will learn and practice the important elements of establishing control of situations using verbal, nonverbal and physical techniques as complementary intervention options. Strategies to manage the initial encounter will be discussed in regard to proper stance, appropriate social distance, authoritative body language and the use of verbal diffusion. The physical element of encounters will be reviewed and practiced to provide the student with a practical knowledge of techniques including, but not limited to: deflection, strikes and counters, takedowns and ground control of a combative individual. The above skills will be expanded upon to provide the necessary understanding of other control systems such as proper use of handcuffs, baton and chemical products to establish control. The focus on practical skills will be reviewed within the context of the use of force continuum ranging from verbal redirection to deadly force. Prerequisite(s): CJ 101 and CJ 215.

CJ 302. Advanced Critical Skills. 3 Hours.
This course is intended as a continuation of the psychological and physical applications of critical skills (police physical restraint and control). Through a series of steps, the student will reinforce the basics, enhance the flow of technique and finally though situational training strengthen and secure psychological and physical technique to specific calls and events. The focus on practical skills will be reviewed within the context of the use of force continuum ranging from verbal redirection to deadly force. Prerequisite(s): CJ 301.

CJ 305. Motor Vehicle Law. 3 Hours.
This course is intended to introduce and review motor vehicle law as relates to the enforcement of those statutes concerned with moving violations. The student will also be introduced to the principles and procedures of identification and investigation of motor vehicle infractions. Specifically, topics will be presented ranging from vehicle stops and pursuit driving to operating under the influence and traffic-related fatalities, including homicide. Students will gain in in-depth understanding of accident and hit-and-run investigation, as well as an overview of providing testimony in the courtroom. Each aspect of enforcement and investigation will thereby contribute to an appreciation of the complexities of police responsibilities regarding the monitoring and control of traffic movement. Prerequisite(s): PL 200.

CJ 307. Community Policing. 3 Hours.
This course is intended to introduce and review the basic principles of community policing strategies in contemporary society. The importance of enhanced law enforcement-community relationships will be discussed in relation to the benefits to the citizenry as well as enhanced relations with community stakeholders such as schools, businesses and religious institutions. Specifically, the student will be expected to gain an appreciation of the police officer as a community member who works collaboratively with private citizens to analyze, evaluate and respond to crime. This focus on cooperative problem-solving will be further explored in regard to how strategic partnerships between law enforcement and the community can positively impact criminal acts, fear of crime and social disorder. Prerequisite(s): CJ 215.

CJ 309. Constitutional Law. 3 Hours.
This course will explore the First, Second, Fourth, Fifth, Sixth, Eighth and Fourteenth Amendments of the Constitution through reading of case law and real life examples. Students will understand the arguments that exist for persons involved in civil and criminal matters from the Constitution. Prerequisite(s): CJ 225.

CJ 310. Mod Penology and Corrections. 3 Hours.
This course offers an in-depth familiarity with the key readings in the history and sociology of incarceration. Topics include: theories of incarceration, sentence determination, with emphasis on the controversy over the federal guidelines, history of our incarceration system, inmate and staff perspectives on incarceration, special category inmates such as mentally ill, rape victims, death row inmates, and juvenile offenders, the death penalty, and the community supervision movement. The course concludes with an examination of the new technologies of incarceration. Prerequisite(s): CJ 101.

CJ 315. Juvenile Justice. 3 Hours.
This course covers the institutional response to the problems of juvenile delinquency, juvenile misconduct and dependent/neglected and abused children. It emphasizes the police, court, and correctional agencies that process young people. In addition, it devotes attention to an understanding of the history of the system, recent legal developments, and an assessment of current proposals for reform. Prerequisite(s): CJ 101.

CJ 330. Ethics in Criminal Justice. 3 Hours.
This course will offer the student an examination of ethical systems as they relate to moral beliefs and professional behavior in law enforcement. Students will discuss how ideology and belief systems, whether liberal, moderate, or conservative affects criminal justice policy making and the day-to-day functioning of criminal justice agencies. As an exercise, students will apply ethical decision-making models to real world scenarios. Additionally, the course will include thirteen objectives that the student will be expected to master extending from a code of ethics for police to major rationales for punishment. Prerequisite(s): CJ 101.
CJ 333. Computer Forensics. 3 Hours.
This course will focus on the investigative use of computer technologies and electronic records. Students will be exposed to “digital evidence” and the valuable information it can provide to investigators. The course will have a two-tier approach. (1) Students will be shown how to extract readily decipherable information from someone’s computer such as looking for at their files or their browser history of web sites visited. Even if the information is password protected or has been deleted it might still be recoverable. (2) The course will examine criminals who use computers and the Internet to commit various crimes ranging from trying to lure children into chat rooms or face-to-face meetings to every sort of financial fraud. Prerequisite(s): Major=BS Comp Info Systems or Major=BS Criminal Justice.

CJ 335. Report Writing and Testifying. 3 Hours.
This course is designed to teach students how to write police reports, search warrants and affidavits. Topics studied will include: the SEE method; legal concepts of reasonable articulable suspicion; probable cause to arrest; determination of custody for purposes of Miranda; and testifying effectively in court. Prerequisite(s): CJ 101 and CJ 225 and PL 200.

CJ 337. Interviewing and Interrogation. 3 Hours.
This course will focus on interviewing skills and techniques, both from a practical and legal perspective. Primary attention will be given to what needs to be done to satisfy the legal standards of voluntariness of admissions and confessions. Fifth and Sixth Amendment law will be thoroughly reviewed and discussed. The course will prepare students to conduct effective interrogations, and document the interrogation in a manner that will withstand later legal challenges. Prerequisite(s): CJ 101 and CJ 225 and PL 200.

CJ 341. Investigations. 3 Hours.
This course covers both private and public investigations as well as the practice and application to criminal investigations. It stresses the professionalism and modern investigation tools as it covers established investigation policies, procedures, and techniques for the law enforcement officer. Recent court cases and investigations are integrated throughout the course to update the students on significant happenings throughout the world. Prerequisite(s): CJ 101.

CJ 345. Comparative Criminal Justice. 3 Hours.
This course is intended to introduce and review the basic theoretical, cultural, and practical applications of criminal justice systems in other parts of the world. American criminal law and procedure will be discussed to provide a comparative reference point for the variations in systems and practices across differing cultures in other nations. Additionally, the course will provide students with an understanding of the roles of social control mechanisms such as police, judiciary and correctional institutions outside of the U.S. Prerequisite(s): CJ 101 and CJ 225.

CJ 399. Topic/. 1-6 Hour.
This course is intended to provide the opportunity to offer advanced courses in criminal justice that would not normally be a part of the Husson curriculum. As such the topics will depend of the interests of students and faculty.

CJ 400. Evidence. 3 Hours.
This course will present the basic principles of the law of evidence as expressed in the Federal Rules of Evidence and the Maine Rules of Evidence. The student will develop the ability to read and apply a rule of evidence to specific information and circumstances. An emphasis will be placed on learning how the Federal & Maine Rules of Evidence effect trial preparation, negotiation, and trial. Participatory role play and discussion of hypothetical situations will constitute a significant part of the learning experience. Prerequisite(s): Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Criminal Justice or Major=BS Paralegal or Major=BS English - Prelaw.

CJ 401. Civil Liability in Law Enforcement. 3 Hours.
This course will provide students with a historical overview and current trends in civil litigation against law enforcement as well as describing the varying types of liability that exist under the law. Students will study the defenses to liability claims made against law enforcement. Liability claims will also be examined from the administrator’s point of view including claims of failure to train and failure to supervise. Use of force and section 1983 claims will be examined in detail as the main claims against law enforcement. Prerequisite(s): CJ 101.

CJ 402. Perspectives in Terrorism. 3 Hours.
This course will analyze aspects of historical and current extremism and terrorism which will be related to contemporary domestic and international terrorism issues. The course will cover sophisticated theories developed by analysts around the world to investigate paramilitarism, white supremacy groups, hate groups, religious fundamentalism, and foreign terrorist groups which may pose a threat to United States interests. The special topic analyzed is not a regular course offering of the social sciences department. Since the topic covered in this class differs from year to year, students should seek further information from the instructor before registering regarding the particular topic that will be analyzed. Possible topics to be analyzed include: the ancient roots of terrorism, motivation of terrorists, the current vulnerability of modern democracies, and global jihad.

CJ 403. Domestic Violence Law. 3 Hours.
This course introduces domestic violence law from an interdisciplinary perspective and offers a contemporary view of the criminal justice experience with diverse populations and forms of violence. Topics will include violence perpetrated in a variety of age and gender relationships including: dating violence, sibling abuse, rape and incest, child and elder abuse and neglect, male battering, violence within the lesbian and gay communities, and violence against women. Students will also be expected to master current State of Maine and federal statutes relating to domestic violence. Prerequisite(s): PL 100 or CJ 101.

CJ 404. Cults. 3 Hours.
This course is intended to introduce and explore the structure and psychology of totalistic cultic organizations. Students will examine the key differences between conventional religious movements, splinter sects and cults to better understand the differences among varied faith-based organizations. Cults will be viewed both from historical and contemporary viewpoints in regard to recruiting practices, thought reform and control, personal and social consequences of cult membership, and the unique challenges that such groups pose for law enforcement. Additionally, students will review the clinical precursors which may predispose an individual to cultic persuasion and indoctrination, as well as the psychological consequences of membership. The course will rely heavily upon a detailed case study format which will scrutinize selected cult leaders/groups and allow students to apply theoretical knowledge to particular historical events and figures. Prerequisite(s): PY 332 or PY 232.
CJ 405. Crime & Literature. 3 Hours.
This course is intended to introduce several works of classical and modern literature which have incorporated the use of crime or criminality as a central theme. Students will be required to read from works of short fiction and novels as means of preparing for discussion and analysis of core elements. Additionally, the various experiences of the individual criminal will be considered in light of those factors which may have an impact on the development of crime as a situational or social phenomenon. Required sources may include, but not remain limited to: Ernest Hemingway, Arthur Miller, William Faulkner and Truman Capote. Prerequisite(s): EH 200.

CJ 406. Victimization. 3 Hours.
This course will focus on the forgotten member of the criminal dyad: the victim. The purpose of this course is to introduce students to these developments and to alert them to ongoing victim-related issues. The goals of the course will include: Introducing the student to the development of the field of victimology; Delineating the conceptual boundaries of victimology; Familiarizing the student with basic concepts and literature within various sub-areas of victimology; Exploring policy developments and practical applications that stem from this concern over victims; and Assessing the progress away from a criminal justice system towards achieving a victim justice system. Prerequisite(s): CJ 235.

CJ 407. Advanced Community Policing. 3 Hours.
In this practicum based course, students will establish partnerships with relevant community members to identify problems related to the incidence of crime and social disorder. Students will engage in a collaborative problem solving exercise which will illustrate the enhanced ability of communities to prevent crime and disorder through cooperative and reciprocal relationships between police and citizens. Prerequisite(s): CJ 307.

CJ 408. Serial Homicide. 3 Hours.
This course is intended to introduce and explore the phenomenon of repetitive, intrinsically motivated homicide utilizing both clinical and law enforcement perspectives. Primary behavioral and crime scene characteristics of both organized and disorganized types of offenders will be reviewed to explain the incidence of serial homicide as a function of motivational factors ranging from sociopathy to severe psychiatric disturbance. The varied typologies and classification systems for serial murderers will be presented as a means of discussing issues ranging from victim selection to law enforcement investigative responsibilities. The course will rely heavily upon a detailed case study format which will scrutinize the crimes of key selected offenders and allow students to apply theoretical knowledge to particular serial perpetrators. Prerequisite(s): PY 332 or PY 232.

CJ 409. Criminal Profiling. 3 Hours.
This course is intended to introduce and review the basic theoretical and practical applications of criminal profiling techniques. Specifically, the student will be introduced to concepts including, but not limited to: the uses of criminal profiling; crime scene evaluation and reconstruction; criminal motivation and offender characteristics; modus operandi and offender signature; psychopathic and sadistic behavior; behavioral aspects of fire-setting; serial offenses, including rape and homicide. Students will explore varied offense behaviors and their psychological underpinnings to develop an understanding of the role of behavioral analysis of evidence in critical investigations. Prerequisite(s): PY 332 or PY 232.

CJ 410. Criminal Justice Internship. 3-9 Hours.
In this experiential course, the student serves as an intern with a criminal justice professional in a work setting. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional, and the internship director. The experience may be multidisciplinary, but should have a strong criminal justice element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): College Level=Junior or College Level=Senior.

CJ 412. Homeland Security. 3 Hours.
This course of study relates principle aspects of terrorism and how it affects our communities. This course compiles information from programs available on the national level that pertain to terrorism and the law enforcement officer's response to these types of incidents. The instruction is designed to provide the student with an understanding of the key role of first responder in their response to a suspected terrorist incident.

CJ 414. Counterterrorism and Counterinsurgency. 3 Hours.
This course introduces students to the topics of counterterrorism and counterinsurgency. A variety of concepts, theories, and methodologies will be examined in an effort to better understand what drives violent jihadism and global terrorism. Students will learn about policies, strategies, and tactics designed to counter the global threats currently posed during the terror age, and the operational and political risks of government action or inaction.

CJ 415. Corporate Security. 3 Hours.
Security has entered a new era since the events of 9/11 and this course focuses on the impact of these events on Corporate Security. Risk assessment models and proactive strategic planning concepts will be discussed drawing from actual cases. Students will also learn the importance of working from measurable metrics and business needs rather than unproven assumptions.

CJ 416. Global Jihad and Radicalization. 3 Hours.
This course will focus on the rise of radical Islam beginning in the late 20th century with the Mujahideen in Afghanistan and the Muslim Brotherhood in Egypt, through the 21st century with the emergence of Al Qaeda, Taliban, Boko Haram and ISIS. The course will examine methods, practices and global ambitions of these groups. Additionally attention will be given to the global ambitions for the creation of an Islamic caliphate and its implications for the modern world. The process and dynamics of Islamic fundamentalist radicalization will be explored in terms of how and where it occurs and how it can be prevented. Extensive use will be made of multimedia images of historical and current events.

CJ 420. Leadership in Police Organizations I. 3 Hours.
This course awards academic credit for participation in the International Association of Chiefs of Police Leadership in Police Organizations Program (LPO). The program is a leadership training program based on the principles of dispersed leadership in a policing environment.

CJ 421. Leadership in Police Organizations II. 3 Hours.
This course awards academic credit for participation in the International Association of Chiefs of Police Leadership in Police Organizations Program (LPO). The program is a leadership training program based on the principles of dispersed leadership in a policing environment.
CJ 435. Management & Criminal Justice. 3 Hours.
This course examines the application of modern management theory and technique to the criminal justice system. It emphasizes the unique nature of the criminal justice community and the complex relationships, which are necessary to make it efficient and effective. Topics covered include: hiring, developing personnel; managing budgets, dealing with public sector unions; discipline and problem behaviors; complaints and grievances; stress and time management; performance appraisals; deploying human resources; and emerging trends in criminal justice management. Prerequisite(s): CJ 215.

CJ 445. Criminal Justice Capstone. 3 Hours.
This course is designed to synthesize the information and insights from other courses in the Criminal Justice Curriculum. It includes research in crime trends and causes, scholarly research, and an assessment of each student's knowledge and understanding of the essential elements of the criminal justice system. This Capstone Course will focus on pragmatic application of principles and theories which guide Criminal Justice practice in the United States. Prerequisite(s): CJ 225 and PL 200.

CJ 490. Forensic Psychology. 3 Hours.
This course will introduce and review the basic theoretical and practical applications of forensic psychology in our society. The student will be introduced to concepts in the field that directly impact or influence law enforcement and the judicial system. Concepts will range from the uses of criminal profiling, risk assessment of violent behavior and interrogation to custody, competency and discrimination determinations. Students will gain an in-depth understanding of each core topic as well as an appreciation for how each contributes to the broader domain of the criminal justice system. Prerequisite(s): (PY 332 or PY 232) and (College Level=Junior or College Level=Senior).

CJ 491. Forensic Science I. 4 Hours.
This course builds on the scientific knowledge and analytical skills developed in the prerequisite science courses and laboratory work. The student will apply scientific principles and use current laboratory instrumentation to compare and distinguish between typical forensic evidence items. Students will become familiar with microscope examinations of trace evidence including soil, fibers and hairs, forensic serology and screening, DNA typing, bloodstain pattern analysis and toxicology. Topical discussions and lectures will be supplemented by scheduled field trips and guest speakers from the forensic science community. Prerequisite(s): SC 191 and SC 192 and SL 191 and SL 192 and SC 241 and CJ 221 and CJ 330 and SC 224.

CJ 492. Forensic Science II. 4 Hours.
This course builds on the scientific knowledge and analytical skills developed in the prerequisite science courses, laboratory work and Forensic Science I course. The student will build on their understanding of the properties of organic and inorganic compounds and apply these to analysis of typical forensic science samples. Students will analyze drugs, inks and dyes, explosives, fire debris samples. Forensic document examination, fingerprint development and bullet comparisons will be conducted. Scientific reports will be written for each specific forensic discipline. Topical discussions and lectures will be supplemented by scheduled field trips and guest speakers from the forensic science community. Prerequisite(s): CJ 491.

CJ 493. Forensic Seminar. 4 Hours.
This course is the capstone of the bachelor’s degree in forensic science. The course will draw on the knowledge acquired throughout the previous seven semesters. The course will guide students through correct processing and sequencing of processing of evidence at the crime scene and in the laboratory. Particular attention will be placed on understanding the pros and cons, false negatives and false positives, cross reactions and potential for cross contamination in analyzing and testing evidence items. Students will learn various techniques for describing scientific principles in layman’s terms. The course will finish up with a mock trial at the end of the semester, giving the student the chance to experience direct and cross examination. During the course of the semester the class will sit for the International Association of Identification (IAI) crime scene technician certification. This will give the students the opportunity to acquire international certification and well as earn the degree. Prerequisite(s): SC 103 and SL 103 and SC 241 and SL 241 and CJ 221 and CJ 330 and SC 224 and CJ 491.

CJ 496. Concepts and Issues in CJ. 3 Hours.
This course provides a broad overview and critical examination of criminal justice topics. Commentary on these issues is written by experts in fields such as crime and justice and America, American law enforcement, the court system, juvenile justice, corrections, and the future of justice in America. Students will be required to meet nineteen course objectives and will be expected to read and comprehend a series of essays and subsequently research current events related to the CJ topics. An additional requirement will be student-led class discussion on an assigned topic area over the course of the semester. Prerequisite(s): (College Level=Junior or College Level=Senior) and (Major=BS Criminal Justice or Major=BS Psychology - Crim Justice).

CJ 498. Basic Law Enforcement Training. 15 Hours.
Taught at the Maine Criminal Justice Academy, this 18-week course is designed to qualify a student as a Maine law enforcement officer. The Academy program tests a student’s ability and willingness to assume the complex and challenging responsibilities of a modern law enforcement officer in keeping the peace, protecting state and federal constitutional rights and enforcing the law.

CJ 499. Topic/. 1-6 Hour.
This course is intended to provide the opportunity to offer advanced courses in criminal justice that would not normally be a part of the Husson curriculum. As such the topics will depend of the interests of students and faculty. Prerequisite(s): (College Level=Junior or College Level=Senior).

CJ 700. Introduction to Criminal Justice Administration. 3 Hours.
This course provides an analysis and overview of the theories of organization and the administration of criminal justice agencies, including management styles, techniques of leadership, ethics, and decision-making for those students who do not have a previous background in criminal justice.

CJ 701. Justice Administration and Information Systems. 3 Hours.
This course will include the examination of contemporary law enforcement organizations and the issues police and other public service managers confront every day. The course will focus on case study analysis as a method of learning the latest management and behavioral theories. The five approaches to management that will be emphasized include: commitment to a common purpose; concern for high-quality public services; empowerment and shared leadership; pragmatic incrementalism; and dedication to public service.
CJ 702. Perspectives in Terrorism. 3 Hours.
The students in this course will analyze aspects of historical and current extremism and terrorism which will be related to contemporary domestic and international terrorism issues. The course will cover sophisticated theories developed by analysts around the world to investigate paramilitarism, white supremacy groups, hate groups, religious fundamentalism, and foreign terrorist groups which may pose a threat to United States interests. Among the topics to be analyzed include the ancient roots of terrorism, motivation of terrorists, the current vulnerability of modern democracies, and global jihad.

CJ 703. Labor and Employment Law. 3 Hours.
This course reviews the law under the National Labor Relations Act (NLRA). It will focus on unfair labor practices, union representative elections and conflict in the workplace. It includes an emphasis on proper collective bargaining processes, methods of mediation and arbitration to resolve disputes and the duty to bargain in good faith between employers and employees. Students are expected to study the text of the statute, relevant selections from actual cases, and various other materials and apply them to current events and hypothetical situations.

CJ 705. Leadership & Ethics. 3 Hours.
This course will provide students with a study of leadership principles and strategies using historical figures as examples. The primary source of effective leadership will be Ernest Shackleton and is 1914 Antarctic expedition. Other historical leaders that will be drawn from include, but are not limited to: George Washington, Abraham Lincoln, and Theodore Roosevelt. Students will focus on leadership decisions made by these individuals and the ethical framework that surrounds every decision. Students will incorporate the leadership and ethical decision making skills into a final project related to their own field of study.

CJ 707. Public Policy and Planning. 3 Hours.
Students will examine policy development and planning processes. Topics will include the process and models of policy formation, policy implementation methods and evaluation components typically associated with planned change in criminal justice.

CJ 709. Advanced Criminological Theories. 3 Hours.
This course is intended to introduce an advanced sociological perspective as it is applied to the themes of crime, criminality and the individual offender. Specifically, definitions of selected crimes will be explored in conjunction with various perspectives on both causation and response to criminal acts. This analysis will require students to read and discuss the primary writings of those thinkers responsible for the development of landmark classical and contemporary criminological theories.

CJ 710. Criminal Justice Graduate Internship. 3-6 Hours.
This course is designed for students who desire to obtain on-the-job experience in the criminal justice profession who have not previously been employed in the internship locale. The nature of the work and the location of the internship must be approved by the student's advisor. Included in the experience and pre-counseling, on-site supervision, periodic summary and evaluation reporting, supplemental reading, pertinent research or practical work-related projects, and presentation of projects.

CJ 711. White Collar Crime. 3 Hours.
This course explores the nature of elite deviance as it relates to crime and power in American society. Various forms of white collar crime will be examined and illustrated through case studies and estimates of the extent and costs of these crimes will be presented. Students will have the opportunity to gain a better understanding of how white collar crime affects employees, consumer and citizens.

CJ 712. Homeland Security. 3 Hours.
This course relates principle aspects of terrorism and how it affects our communities. It compiles information from programs available on the national level that pertain to terrorism and the law enforcement officer's response to these types of incidents. The instruction is designed to provide the student with an understanding of the key role of first responder in their response to a suspected terrorist incident.

CJ 713. Psychology and the Legal Environment. 3 Hours.
This course is intended to introduce and review the basic theoretical and practical applications of forensic psychology in our society. Specifically, issues related to the use of psychological research and knowledge in legal environments will be presented to allow the student to appreciate the unique interaction between psychology and the law. Concepts will range from the analysis of competency and insanity to the use of criminal profiling, risk assessments of violent behavior, and psychopathology. Considerable attention will be allotted to an investigation of victimology concerns stemming from sexual assault of children and adults, as well as domestic violence. Students will gain an in-depth understanding of each core topic as well as an appreciation for how each contributes to the broader domain of the legal system.

CJ 714. Counterterrorism and Counterinsurgency. 3 Hours.
This course introduces students to the topics of counterterrorism and counterinsurgency. A variety of concepts, theories, and methodologies will be examined in an effort to better understand what drives violent jihadism and global terrorism. Students will learn about policies, strategies, and tactics designed to counter the global threats currently posed during the terror age, and the operational and political risks of government action or inaction.

CJ 715. Corporate Security. 3 Hours.
This course will focus on the impacts on corporate security from the new age that has been entered since 9/11/01. Entirely new risk assessment models and proactive strategic planning concepts will be discussed drawing from actual cases. The important of working from measurable metrics and business needs rather than unproven assumptions will be discussed.

CJ 716. Global Jihad and Radicalization. 3 Hours.
This course will focus on the issue of the rise of radical Islam beginning in the late 20th century with the Mujahedeen in Afghanistan and the Muslim Brotherhood in Egypt, through the 21st century with the emergence of Al Qaeda, Taliban, Boka Haram and ISIS. The course will examine methods, practices, and global ambitions of these groups. Additionally attention will be given to the global ambitions for the creation of an Islamic caliphate and its implications for the modern world. The process and dynamics of Islamic fundamentalist radicalization will be explored in terms of how and where it occurs and how it can be prevented. Extensive use will be made of multimedia images of historical and current events.

CJ 717. Graduate Capstone Course. 3 Hours.
This course focuses on providing students an understanding of the major theories of the public policymaking process, the mechanics of the process, methods of examining policy impacts, and how criminological research can affect policy change as well as be driven by policy. Another goal of this course is to familiarize students with current pressing criminal justice issues and to have the students become sophisticated practitioners and consumers of evaluation research. Students will be expected to reflect critically upon the role of criminological research in the policy making / decision making process. Prerequisite(s): BA 600 and 18 Credits From Range [BA 600 To BA 799].
CJ 720. Leadership in Police Organizations I. 3 Hours.
This course awards academic credit for participation in the International Association of Chiefs of Police Leadership in Police Organizations Program (LPO). The program is a leadership training program based on the principles of dispersed leadership in a policing environment.

CJ 721. Leadership in Police Organizations II. 3 Hours.
This course awards academic credit for participation in the International Association of Chiefs of Police Leadership in Police Organizations Program (LPO). The program is a leadership training program based on the principles of dispersed leadership in a policing environment.

CJ 799. Topic/. 3-6 Hours.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in Criminal Justice Administration. This course may consist of seminars, individualized instruction, and/or research related to a specific area of specialization.

A.S. Criminal Justice
Associate of Science in Criminal Justice
Students are expected to complete 61 credit hours of course work and related activity in the Associate of Science program. This program emphasizes professional courses and provides some basic training in microcomputing, writing, communication and math. Students in this program may be eligible to attend the Maine Criminal Justice Academy’s Pre-Service Training Program (http://www.maine.gov/dps/mcja/training/preservice) if they meet the requirements to certify them to apply for part-time law enforcement officer work in the State of Maine, and receive six college credits as well. After students complete their first year, they are also eligible to do internships in law enforcement agencies, offices and businesses for hands-on experiential learning in the field. This program will prepare graduates for entry level positions in the profession.

The program objectives for the A.S. Criminal Justice are:

- To have the percent of graduating seniors exceeding the mean of the ETS test be larger than the national average where the following key concepts are tested:
  - Theories of Criminal Behavior
  - The Law
  - Corrections
  - The Court System
  - Critical Thinking
  - Research Methodology and Statistics

- To demonstrate excellent or outstanding understanding of the key concepts of Criminal Justice:
  - Administration of Justice
  - Law Enforcement
  - Law Adjudication
  - Corrections
  - Criminological Theory
  - Research and Analytical Methods

- To apply ethical decision-making skills and integrity in an ever changing global environment.

- To produce and present effective oral and written forms of communication.

The following classes must be completed for this program of study:

Certificate in Counter Terrorism and Security

The 21st century ushered in a new era of global terrorism launched by the attacks on 9/11. Intermittent events of terrorism around the world remind us that the threat persists and continues to grow. At the root of global terrorism is a radical strain of Islamic fundamentalism that finds adherents from Saharan/sub Saharan Africa across the Middle East through Central and west/east Asia as well as Europe and North America. This global jihadist movement challenges governments and multinational organizations to maintain their traditional openness and freedoms of operation while installing security procedures and systems to counter this terrorist threat. This certificate is designed provide a foundational understanding of this threat for law enforcement, military, and corporate security officers who act as the first line of defense against terrorist acts. This on-line and hybrid certificate program is also intended for participants interested in a career in homeland security at federal, state and local levels in counter terrorism agencies. This certificate will be offered at both the undergraduate and graduate levels. Credits from this undergraduate certificate can be applied to an A.S. or B.S. Criminal Justice degree.

Total Hours: 19

CJ 225. Criminal Procedure. 3 Hours.
This course is designed to teach the background and current information regarding arrest, search and seizure. It explores the development of standards in this field, through constitutional law, state law, concepts and interpretation, limitations of police powers, probable cause, and the suppression hearing.

CJ 235. Criminology. 3 Hours.
This course is intended to introduce and review the sociological perspective as it is applied to the themes of crime, criminality and the individual offender. Specifically, criminological theories of social process, social structure and social conflict will be explored in conjunction with views on developmental and trait-based perspectives to illuminate the social underpinnings of crime in modern society. Each particular viewpoint will be applied to the understanding of broad categories of criminal behavior and activity, including but not limited to: violent crime, property crime, public order crimes, organized crime, and white collar offenses. Additionally, the criminal justice system and its component structural and procedural parts will be reviewed to provide the student with an enhanced awareness of the social aspects of criminal behavior and its impact for law-making and enforcement. Prerequisite(s): PY 111 and (SY 201 or SY 222).

CJ 290. Psychology and the Legal System. 3 Hours.
Students will explore the movement of criminal defendants through the legal system in light of various clinical necessities, including but not limited to: Competencies to offer testimony, as well as to be sentenced and excused; jury selection; and the identification and evaluation of criminal suspects. Additionally, emphasis will be placed upon the psychology of victimization. Prerequisite(s): CJ 101 and CJ 225 and PY 111.
CJ 301. Critical Skills. 3 Hours.
This course is intended to introduce and review the basic law enforcement skills of self defense and control. Specifically, students will learn and practice the important elements of establishing control of situations using verbal, nonverbal and physical techniques as complementary intervention options. Strategies to manage the initial encounter will be discussed in regard to proper stance, appropriate social distance, authoritative body language and the use of verbal diffusion. The physical element of encounters will be reviewed and practiced to provide the student with a practical knowledge of techniques including, but not limited to: deflection, strikes and counters, takedowns and ground control of a combative individual. The above skills will be expanded upon to provide the necessary understanding of other control systems such as proper use of handcuffs, baton and chemical products to establish control. The focus on practical skills will be reviewed within the context of the use of force continuum ranging from verbal redirection to deadly force. Prerequisite(s): CJ 101 and CJ 215.

CJ 302. Advanced Critical Skills. 3 Hours.
This course is intended as a continuation of the psychological and physical applications of critical skills (police physical restraint and control). Through a series of steps, the student will reinforce the basics, enhance the flow of technique and finally though situational training strengthen and secure psychological and physical technique to specific calls and events. The focus on practical skills will be reviewed within the context of the use of force continuum ranging from verbal redirection to deadly force. Prerequisite(s): CJ 301.

CJ 305. Motor Vehicle Law. 3 Hours.
This course is intended to introduce and review motor vehicle law as relates to the enforcement of those statutes concerned with moving violations. The student will also be introduced to the principles and procedures of identification and investigation of motor vehicle infractions. Specifically, topics will be presented ranging from vehicle stops and pursuit driving to operating under the influence and traffic-related fatalities, including homicide. Students will gain in-depth understanding of accident and hit-and-run investigation, as well as an overview of providing testimony in the courtroom. Each aspect of enforcement and investigation will thereby contribute to an appreciation of the complexities of police responsibilities regarding the monitoring and control of traffic movement. Prerequisite(s): CJ 301.

CJ 307. Community Policing. 3 Hours.
This course is intended to introduce and review the basic principles of community policing strategies in contemporary society. The importance of enhanced law enforcement-community relationships will be discussed in relation to the benefits to the citizenry as well as enhanced relations with community stakeholders such as schools, businesses and religious institutions. Specifically, the student will be expected to gain an appreciation of the police officer as a community member who works collaboratively with private citizens to analyze, evaluate and respond to crime. This focus on cooperative problem-solving will be further explored in regard to how strategic partnerships between law enforcement and the community can positively impact criminal acts, fear of crime and social disorder. Prerequisite(s): CJ 215.

CJ 309. Constitutional Law. 3 Hours.
This course will explore the First, Second, Fourth, Fifth, Sixth, Eighth and Fourteenth Amendments of the Constitution through reading of case law and real life examples. Students will understand the arguments that exist for persons involved in civil and criminal matters from the Constitution. Prerequisite(s): CJ 225.

CJ 310. Mod Penology and Corrections. 3 Hours.
This course offers an in-depth familiarity with the key readings in the history and sociology of incarceration. Topics include: theories of incarceration, sentence determination, with emphasis on the controversy over the federal guidelines, history of our incarceration system, inmate and staff perspectives on incarceration, special category inmates such as mentally ill, rape victims, death row inmates, and juvenile offenders, the death penalty, and the community supervision movement. The course concludes with an examination of the new technologies of incarceration. Prerequisite(s): CJ 101.

CJ 315. Juvenile Justice. 3 Hours.
This course covers the institutional response to the problems of juvenile delinquency, juvenile misconduct and dependent/neglected and abused children. It emphasizes the police, court, and correctional agencies that process young people. In addition, it devotes attention to an understanding of the history of the system, recent legal developments, and an assessment of current proposals for reform. Prerequisite(s): CJ 101.

CJ 330. Ethics in Criminal Justice. 3 Hours.
This course will offer the student an examination of ethical systems as they relate to moral beliefs and professional behavior in law enforcement. Students will discuss how ideology and belief systems, whether liberal, moderate, or conservative affects criminal justice policy making and the day-to-day functioning of criminal justice agencies. As an exercise, students will apply ethical decision-making models to real world scenarios. Additionally, the course will include thirteen objectives that the student will be expected to master extending from a code of ethics for police to major rationales for punishment. Prerequisite(s): CJ 101.

CJ 333. Computer Forensics. 3 Hours.
This course will focus on the investigative use of computer technologies and electronic records. Students will be exposed to “digital evidence” and the valuable information it can provide to investigators. The course will have a two-tier approach. (1) Students will be shown how to extract readily decipherable information from someone’s computer such as looking for at their files or their browser history of web sites visited. Even if the information is password protected or has been deleted it might still be recoverable. (2) The course will examine criminals who use computers and the Internet to commit various crimes ranging from trying to lure children into chat rooms or face-to-face meetings to every sort of financial fraud. This course is intended to address a growing need in law enforcement. Prerequisite(s): Major=BS Comp Info Systems or Major=BS Criminal Justice.

CJ 335. Report Writing and Testifying. 3 Hours.
This course is designed to teach students how to write police reports, search warrants and affidavits. Topics studied will include: the SEE method; legal concepts of reasonable articulable suspicion; probable cause to arrest; determination of custody for purposes of Miranda; and testifying effectively in court. Prerequisite(s): CJ 101 and CJ 225 and PL 200.

CJ 337. Interviewing and Interrogation. 3 Hours.
This course will focus on interviewing skills and techniques, both from a practical and legal perspective. Primary attention will be given to what needs to be done to satisfy the legal standards of voluntariness of admissions and confessions. Fifth and Sixth Amendment law will be thoroughly reviewed and discussed. The course will prepare students to conduct effective interrogations, and document the interrogation in a manner that will withstand later legal challenges. Prerequisite(s): CJ 101 and CJ 225 and PL 200.
CJ 341. Investigations. 3 Hours.
This course covers both private and public investigations as well as the practice and application to criminal investigations. It stresses the professionalism and modern investigation tools as it covers established investigation policies, procedures, and techniques for the law enforcement officer. Recent court cases and investigations are integrated throughout the course to update the students on significant happenings throughout the world. Prerequisite(s): CJ 101.

CJ 345. Comparative Criminal Justice. 3 Hours.
This course is intended to introduce and review the basic theoretical, cultural and practical applications of criminal justice systems in other parts of the world. American criminal law and procedure will be discussed to provide a comparative reference point for the variations in systems and practices across differing cultures in other nations. Additionally, the course will provide students with an understanding of the roles of social control mechanisms such as police, judiciary and correctional institutions outside of the U.S. Prerequisite(s): CJ 101 and CJ 225.

CJ 399. Topic/. 1-6 Hour.
This course is intended to provide the opportunity to offer advanced courses in criminal justice that would not normally be a part of the Husson curriculum. As such the topics will depend of the interests of students and faculty.

CJ 400. Evidence. 3 Hours.
This course will present the basic principles of the law of evidence as expressed in the Federal Rules of Evidence and the Maine Rules of Evidence. The student will develop the ability to read and apply a rule of evidence to specific information and circumstances. An emphasis will be placed on learning how the Federal & Maine Rules of Evidence affect trial preparation, negotiation, and trial. Participatory role play and discussion of hypothetical situations will constitute a significant part of the learning experience. Prerequisite(s): Major=AS Criminal Justice or Major=AS Paralegal or Major=BS Criminal Justice or Major=BS Paralegal or Major=BS English - Prelaw.

CJ 401. Civil Liability in Law Enforcement. 3 Hours.
This course will provide students with a historical overview and current trends in civil litigation against law enforcement as well as describing the varying types of liability that exist under the law. Students will study the defenses to liability claims made against law enforcement. Liability claims will also be examined by the administrator’s point of view including claims of failure to train and failure to supervise. Use of force and section 1983 claims will be examined in detail as the main claims against law enforcement. Prerequisite(s): CJ 101.

CJ 402. Perspectives in Terrorism. 3 Hours.
This course will analyze aspects of historical and current extremism and terrorism which will be related to contemporary domestic and international terrorism issues. The course will cover sophisticated theories developed by analysts around the world to investigate paramilitarism, white supremacy groups, hate groups, religious fundamentalism, and foreign terrorist groups which may pose a threat to United States interests. The special topic analyzed is not a regular course offering of the social sciences department. Since the topic covered in this class differs from year to year, students should seek further information from the instructor before registering regarding the particular topic that will be analyzed. Possible topics to be analyzed include: the ancient roots of terrorism, motivation of terrorists, the current vulnerability of modern democracies, and global jihad.

CJ 403. Domestic Violence Law. 3 Hours.
This course introduces domestic violence law from an interdisciplinary perspective and offers a contemporary view of the criminal justice experience with diverse populations and forms of violence. Topics will include violence perpetrated in a variety of age and gender relationships including: dating violence, sibling abuse, rape and incest, child and elder abuse and neglect, male battering, violence within the lesbian and gay communities, and violence against women. Students will also be expected to master current State of Maine and federal statutes relating to domestic violence. Prerequisite(s): PL 100 or CJ 101.

CJ 404. Cults. 3 Hours.
This course is intended to introduce and explore the structure and psychology of totalistic cultic organizations. Students will examine the key differences between conventional religious movements, splinter sects and cults to better understand the differences among varied faith-based organizations. Cults will be viewed both from historical and contemporary viewpoints in regard to recruiting practices, thought reform and control, personal and social consequences of cult membership, and the unique challenges that such groups pose for law enforcement. Additionally, students will review the clinical precursors which may predispose an individual to cultic persuasion and indoctrination, as well as the psychological consequences of membership. The course will rely heavily upon a detailed case study format which will scrutinize selected cult leaders/groups and allow students to apply theoretical knowledge to particular historical events and figures. Prerequisite(s): PY 332 or PY 232.

CJ 405. Crime & Literature. 3 Hours.
This course is intended to introduce several works of classical and modern literature which have incorporated the use of crime or criminality as a central theme. Students will be required to read from works of short fiction and novels as a means of preparing for discussion and analysis of core elements. Additionally, the various experiences of the individual criminal will be considered in light of those factors which may have an impact on the development of crime as a situational or social phenomenon. Required sources may include, but not remain limited to: Ernest Hemingway, Arthur Miller, William Faulkner and Truman Capote. Prerequisite(s): EH 200.

CJ 406. Victimology. 3 Hours.
This course will focus on the forgotten member of the criminal dyad: the victim. The purpose of this course is to introduce students to these developments and to alert them to ongoing victim-related issues. The goals of the course will include: Introducing the student to the development of the field of victimology; Delineating the conceptual boundaries of victimology; Familiarizing the student with basic concepts and literature within various sub-areas of victimology; Exploring policy developments and practical applications that stem from this concern over victims; and Assessing the progress away from a criminal justice system towards achieving a victim justice system. Prerequisite(s): CJ 235.

CJ 407. Advanced Community Policing. 3 Hours.
In this practicum based course, students will establish partnerships with relevant community members to identify problems related to the incidence of crime and social disorder. Students will engage in a collaborative problem solving exercise which will illustrate the enhanced ability of communities to prevent crime and disorder through cooperative and reciprocal relationships between police and citizens. Prerequisite(s): CJ 307.
CJ 408. Serial Homicide. 3 Hours.
This course is intended to introduce and explore the phenomenon of repetitive, intrinsically motivated homicide utilizing both clinical and law enforcement perspectives. Primary behavioral and crime scene characteristics of both organized and disorganized types of offenders will be reviewed to explain the incidence of serial homicide as a function of motivational factors ranging from sociopathy to severe psychiatric disturbance. The varied typologies and classification systems for serial murderers will be presented as a means of discussing issues ranging from victim selection to law enforcement investigative responsibilities. The course will rely heavily upon a detailed case study format which will scrutinize the crimes of key selected offenders and allow students to apply theoretical knowledge to particular serial perpetrators. Prerequisite(s): PY 332 or PY 232.

CJ 409. Criminal Profiling. 3 Hours.
This course is intended to introduce and review the basic theoretical and practical applications of criminal profiling techniques. Specifically, the student will be introduced to concepts including, but not limited to: the uses of criminal profiling; crime scene evaluation and reconstruction; criminal motivation and offender characteristics; modus operandi and offender signature; psychopathic and sadistic behavior; behavioral aspects of fire-setting; serial offenses, including rape and homicide. Students will explore varied offense behaviors and their psychological underpinnings to develop an understanding of the role of behavioral analysis of evidence in critical investigations. Prerequisite(s): PY 332 or PY 232.

CJ 410. Criminal Justice Internship. 3-9 Hours.
In this experiential course, the student serves as an intern with a criminal justice professional in a work setting. This placement may be in the public or private sector and is governed by an agreement signed by the student, the professional, and the internship director. The experience may be multidisciplinary, but should have a strong criminal justice element. Students are expected to be sufficiently motivated to seek out their own placement site with some guidance from the internship director. Prerequisite(s): College Level=Junior or College Level=Senior.

CJ 412. Homeland Security. 3 Hours.
This course of study relates principle aspects of terrorism and how it affects our communities. This course compiles information from programs available on the national level that pertain to terrorism and the law enforcement officer’s response to these types of incidents. The instruction is designed to provide the student with an understanding of the key role of first responder in their response to a suspected terrorist incident.

CJ 414. Counterterrorism and Counterinsurgency. 3 Hours.
This course introduces students to the topics of counterterrorism and counterinsurgency. A variety of concepts, theories, and methodologies will be examined in an effort to better understand what drives violent jihadism and global terrorism. Students will learn about policies, strategies, and tactics designed to counter the global threats currently posed during the terror age, and the operational and political risks of government action or inaction.

CJ 415. Corporate Security. 3 Hours.
Security has entered a new era since the events of 9/11 and this course focuses on the impact of these events on Corporate Security. Risk assessment models and proactive strategic planning concepts will be discussed drawing from actual cases. Students will also learn the importance of working from measurable metrics and business needs rather than unproven assumptions.

CJ 416. Global Jihad and Radicalization. 3 Hours.
This course will focus on the rise of radical Islam beginning in the late 20th century with the Mujahideen in Afghanistan and the Muslim Brotherhood in Egypt, through the 21st century with the emergence of Al Qaeda, Taliban, Boka Haram and ISIS. The course will examine methods, practices and global ambitions of these groups. Additionally attention will be given to the global ambitions for the creation of an Islamic caliphate and its implications for the modern world. The process and dynamics of Islamic fundamentalist radicalization will be explored in terms of how and where it occurs and how it can be prevented. Extensive use will be made of multimedia images of historical and current events.

CJ 420. Leadership in Police Organizations I. 3 Hours.
This course awards academic credit for participation in the International Association of Chiefs of Police Leadership in Police Organizations Program (LPO). The program is a leadership training program based on the principles of dispersed leadership in a policing environment.

CJ 421. Leadership in Police Organizations II. 3 Hours.
This course awards academic credit for participation in the International Association of Chiefs of Police Leadership in Police Organizations Program (LPO). The program is a leadership training program based on the principles of dispersed leadership in a policing environment.

CJ 435. Management & Criminal Justice. 3 Hours.
This course examines the application of modern management theory and technique to the criminal justice system. It emphasizes the unique nature of the criminal justice community and the complex relationships, which are necessary to make it efficient and effective. Topics covered include: hiring, developing personnel; managing budgets, dealing with public sector unions; discipline and problem behaviors; complaints and grievances; stress and time management; performance appraisals; deploying human resources; and emerging trends in criminal justice management. Prerequisite(s): CJ 215.

CJ 445. Criminal Justice Capstone. 3 Hours.
This course is designed to synthesize the information and insights from other courses in the Criminal Justice Curriculum. It includes research in crime trends and causes, scholarly research, and an assessment of each student’s knowledge and understanding of the essential elements of the criminal justice system. This Capstone Course will focus on pragmatic application of principles and theories which guide Criminal Justice practice in the United States. Prerequisite(s): CJ 225 and PL 200.

CJ 490. Forensic Psychology. 3 Hours.
This course will introduce and review the basic theoretical and practical applications of forensic Psychology in our society. The student will be introduced to concepts in the field that directly impact or influence law enforcement and the judicial system. Concepts will range from the uses of criminal profiling, risk assessment of violent behavior and interrogation to custody, competency and discrimination determinations. Students will gain an in-depth understanding of each core topic as well as an appreciation for how each contributes to the broader domain of the criminal justice system. Prerequisite(s): (PY 332 or PY 232) and (College Level=Junior or College Level=Senior).
CJ 491. Forensic Science I. 4 Hours.
This course builds on the scientific knowledge and analytical skills developed in the prerequisite science courses and laboratory work. The student will apply scientific principles and use current laboratory instrumentation to compare and distinguish between typical forensic evidence items. Students will become familiar with microscope examinations of trace evidence including soil, fibers and hairs, forensic serology and screening, DNA typing, bloodstain pattern analysis and toxicology. Topical discussions and lectures will be supplemented by scheduled field trips and guest speakers from the forensic science community. Prerequisite(s): SC 191 and SC 192 and SL 191 and SL 192 and SC 241 and CJ 221 and CJ 330 and SC 224.

CJ 492. Forensic Science II. 4 Hours.
This course builds on the scientific knowledge and analytical skills developed in the prerequisite science courses, laboratory work and Forensic Science I course. The student will build on their understanding of the properties of organic and inorganic compounds and apply these to analysis of typical forensic science samples. Students will analyze drugs, inks and dyes, explosives, fire debris samples. Forensic document examination, fingerprint development and bullet comparisons will be conducted. Scientific reports will be written for each specific forensic discipline. Topical discussions and lectures will be supplemented by scheduled field trips and guest speakers from the forensic science community. Prerequisite(s): CJ 491.

CJ 493. Forensic Seminar. 4 Hours.
This course is the capstone of the bachelor’s degree in forensic science. The course will draw on the knowledge acquired throughout the previous seven semesters. The course will guide students through correct processing and sequencing of processing of evidence at the crime scene and in the laboratory. Particular attention will be placed on understanding the pros and cons, false negatives and false positives, cross reactions and potential for cross contamination in analyzing and testing evidence items. Students will learn various techniques for describing scientific principles in layman’s terms. The course will finish up with a mock trial at the end of the semester, giving the student the chance to experience direct and cross examination. During the course of the semester the class will sit for the International Association of Identification (IAI) crime scene technician certification. This will give the students the opportunity to acquire international certification and well as earn the degree. Prerequisite(s): SC 103 and SL 103 and SC 241 and SL 241 and CJ 221 and CJ 330 and SC 224 and CJ 491.

CJ 496. Concepts and Issues in CJ. 3 Hours.
This course provides a broad overview and critical examination of criminal justice topics. Commentary on these issues is written by experts in fields such as crime and justice and America, American law enforcement, the court system, juvenile justice, corrections, and the future of justice in America. Students will be required to meet nineteen scheduled field trips and guest speakers from the forensic science community. Prerequisite(s): ( College Level=Junior or College Level=Senior) and ( Major=BS Criminal Justice or Major=BS Psychology - Crim Justice).

CJ 498. Basic Law Enforcement Training. 15 Hours.
Taught at the Maine Criminal Justice Academy, this 18-week course is designed to qualify a student as a Maine law enforcement officer. The Academy program tests a student's ability and willingness to assume the complex and challenging responsibilities of a modern law enforcement officer in keeping the peace, protecting state and federal constitutional rights and enforcing the law.

CJ 499. Topic/. 1-6 Hour.
This course is intended to provide the opportunity to offer advanced courses in criminal justice that would not normally be a part of the Husson curriculum. As such the topics will depend of the interests of students and faculty. Prerequisite(s): ( College Level=Junior or College Level=Senior).

CJ 700. Introduction to Criminal Justice Administration. 3 Hours.
This course provides an analysis and overview of the theories of organization and the administration of criminal justice agencies, including management styles, techniques of leadership, ethics, and decision-making for those students who do not have a previous background in criminal justice.

CJ 701. Justice Administration and Information Systems. 3 Hours.
This course will include the examination of contemporary law enforcement organizations and the issues police and other public service managers confront every day. The course will focus on case study analysis as a method of learning the latest management and behavioral theories. The five approaches to management that will be emphasized include: commitment to a common purpose; concern for high-quality public services; empowerment and shared leadership; pragmatic incrementalism; and dedication to public service.

CJ 702. Perspectives in Terrorism. 3 Hours.
The students in this course will analyze aspects of historical and current extremism and terrorism which will be related to contemporary domestic and international terrorism issues. The course will cover sophisticated theories developed by analysts around the world to investigate paramilitarism, white supremacy groups, hate groups, religious fundamentalism, and foreign terrorist groups which may pose a threat to United States interests. Among the topics to be analyzed include the ancient roots of terrorism, motivation of terrorists, the current vulnerability of modern democracies, and global jihad.

CJ 703. Labor and Employment Law. 3 Hours.
This course reviews the law under the National Labor Relations Act (NLRA). It will focus on unfair labor practices, union representative elections and conflict in the workplace. It includes an emphasis on proper collective bargaining processes, methods of mediation and arbitration to resolve disputes and the duty to bargain in good faith between employers and employees. Students are expected to study the text of the statute, relevant selections from actual cases, and various other materials and apply them to current events and hypothetical situations.

CJ 705. Leadership & Ethics. 3 Hours.
This course will provide students with a study of leadership principles and strategies using historical figures as examples. The primary source of effective leadership will be Ernest Shackleton and is 1914 Antarctic expedition. Other historical leaders that will be drawn from include, but are not limited to: George Washington, Abraham Lincoln, and Theodore Roosevelt. Students will focus on leadership decisions made by these individuals and the ethical framework that surrounds every decision. Students will incorporate the leadership and ethical decision making skills into a final project related to their own field of study.

CJ 707. Public Policy and Planning. 3 Hours.
Students will examine policy development and planning processes. Topics will include the process and models of policy formation, policy implementation methods and evaluation components typically associated with planned change in criminal justice.
CJ 709. Advanced Criminological Theories. 3 Hours.
This course is intended to introduce an advanced sociological perspective as it is applied to the themes of crime, criminality and the individual offender. Specifically, definitions of selected crimes will be explored in conjunction with various perspectives on both causation and response to criminal acts. This analysis will require students to read and discuss the primary writings of those thinkers responsible for the development of landmark classical and contemporary criminological theories.

CJ 710. Criminal Justice Graduate Internship. 3-6 Hours.
This course is designed for students who desire to obtain on-the-job experience in the criminal justice profession who have not previously been employed in the internship locale. The nature of the work and the location of the internship must be approved by the student’s advisor. Included in the experience and pre-counseling, on-site supervision, periodic summary and evaluation reporting, supplemental reading, pertinent research or practical work-related projects, and presentation of projects.

CJ 711. White Collar Crime. 3 Hours.
This course explores the nature of elite deviance as it relates to crime and power in American society. Various forms of white collar crime will be examined and illustrated through case studies and estimates of the extent and costs of these crimes will be presented. Students will have the opportunity to gain a better understanding of how white collar crime affects employees, consumer and citizens.

CJ 712. Homeland Security. 3 Hours.
This course relates principle aspects of terrorism and how it affects our communities. It compiles information from programs available on the national level that pertain to terrorism and the law enforcement officer’s response to these types of incidents. The instruction is designed to provide the student with an understanding of the key role of first responder in their response to a suspected terrorist incident.

CJ 713. Psychology and the Legal Environment. 3 Hours.
This course is intended to introduce and review the basic theoretical and practical applications of forensic psychology in our society. Specifically, issues related to the use of psychological research and knowledge in legal environments will be presented to allow the student to appreciate the unique interaction between psychology and the law. Concepts will range from the analysis of competency and insanity to the use of criminal profiling, risk assessments of violent behavior, and psychopathology. Considerable attention will be allotted to an investigation of victimology concerns stemming from sexual assault of children and adults, as well as domestic violence. Students will gain an in-depth understanding of each core topic as well as an appreciation for how each contributes to the broader domain of the legal system.

CJ 714. Counterterrorism and Counterinsurgency. 3 Hours.
This course introduces students to the topics of counterterrorism and counterinsurgency. A variety of concepts, theories, and methodologies will be examined in an effort to better understand what drives violent jihadism and global terrorism. Students will learn about policies, strategies, and tactics designed to counter the global threats currently posed during the terror age, and the operational and political risks of government action or inaction.

CJ 715. Corporate Security. 3 Hours.
This course will focus on the impacts on corporate security from the new age that has been entered since 9/11/01. Entirely new risk assessment models and proactive strategic planning concepts will be discussed drawing from actual cases. The important of working from measurable metrics and business needs rather than unproven assumptions will be discussed.

CJ 716. Global Jihad and Radicalization. 3 Hours.
This course will focus on the issue of the rise of radical Islam beginning in the late 20th century with the Mujahedeen in Afghanistan and the Muslim Brotherhood in Egypt, through the 21st century with the emergence of Al Qaeda, Taliban, Boka Harem and ISIS. The course will examine methods, practices, and global ambitions of these groups. Additionally attention will be given to the global ambitions for the creation of an Islamic caliphate and its implications for the modern world. The process and dynamics of Islamic fundamentalist radicalization will be explored in terms of how and where it occurs and how it can be prevented. Extensive use will be made of multimedia images of historical and current events.

CJ 717. Graduate Capstone Course. 3 Hours.
This course focuses on providing students an understanding of the major theories of the public policymaking process, the mechanics of the process, methods of examining policy impacts, and how criminological research can affect policy change as well as be driven by policy. Another goal of this course is to familiarize students with current pressing criminal justice issues and to have the students become sophisticated practitioners and consumers of evaluation research. Students will be expected to reflect critically upon the role of criminological research in the policy making / decision making process. Prerequisite(s): BA 600 and 18 Credits From Range [BA 600 To BA 799].

CJ 720. Leadership in Police Organizations I. 3 Hours.
This course awards academic credit for participation in the International Association of Chiefs of Police Leadership in Police Organizations Program (LPO). The program is a leadership training program based on the principles of dispersed leadership in a policing environment.

CJ 721. Leadership in Police Organizations II. 3 Hours.
This course awards academic credit for participation in the International Association of Chiefs of Police Leadership in Police Organizations Program (LPO). The program is a leadership training program based on the principles of dispersed leadership in a policing environment.

CJ 799. Topic/. 3-6 Hours.
This is a course of variable content. Faculty and students prepare a special topic of timely interest in Criminal Justice Administration. This course may consist of seminars, individualized instruction, and/or research related to a specific area of specialization.

Forensic Science
Features of the Program
Forensic Science is the application of science to legal proceedings. A student pursuing this degree will study Chemistry, Biology, and Forensic Science as well as substantive evidentiary and procedural law. Forensic science specialists examine and evaluate physical evidence, using chemical, microscopic, instrumental and physical methods of analysis. They may be required to work with blood and other biological fluids, hair, gunshot residue, drugs, fibers, paint and glass. Forensic science specialists also typically are responsible for preparing written reports on their findings, serving as expert witnesses in court hearings, and
conducting research regarding new technologies, equipment, and techniques.

**Requirements for Forensic Science Majors**

Candidates for a Bachelor of Science degree are required to complete a minimum of 130 semester credit hours maintaining a 2.0 overall cumulative grade point average and a 2.0 overall in the courses listed below. Transfer students must complete a minimum of 30 credit hours at Husson University. At least 15 credits must be earned in Husson Forensic Science courses.

B.S. Forensic Science majors must achieve a C or better in all lab science courses (designated with SC) and all labs (designated with SL) in order to complete the major requirements.

**B.S Forensic Science**

Students are expected to complete 130 credit hours of course work and related activity in the Bachelor of Science program. This program provides both a strong core of professional courses as well as a varied liberal arts background. The goal of this degree will be to give science and criminal justice students a new educational avenue to pursue and the opportunity to qualify for entry level forensic science positions within crime laboratories, police departments and medical related fields. Students will gain competency in the following areas:

- Forensic Science within the Justice System
- Crime Scene Processing
- Evidence Documentation, Preservation and Packaging
- Systematic and holistic approach to evidence examination
- Presumptive and Confirmatory testing of forensic samples
- Comparison of pattern evidence
- Judicial and Courtroom Procedures
- Research and Analytical Methods

The following courses are required to complete this Bachelors degree:

### B.S. Hospitality and Tourism Management

The program objectives of the B.S. Hospitality & Tourism Management degree are:

- To explain the major concepts in the functional areas of accounting, marketing, finance and management
- To evaluate the legal, social and economic environments of business
- To describe the global environment of business
- To apply ethical decision making skills and integrity in an ever-changing, global environment
- To demonstrate oral and written communication skills, appropriate to the profession
- To apply critical problem solving and professional skills in an experiential learning environment
- To demonstrate general and functional knowledge of Hospitality and Tourism Management principles including those related to the Food and Beverage Industry; the Lodging Industry; Travel and Tourism; and Sustainability

The B.S. in Hospitality and Tourism Management

Hospitality and Tourism Management students are required to complete 121 credit hours of course work maintaining a 2.0 overall cumulative grade point average and a 2.0 overall grade point average in their major courses. This program provides a very strong core of hospitality and tourism courses, a strategically balanced business acumen and a varied general education background.

*** Credit may not be required for degree completion

Courses

HA 101. Intro to Hospitality Mgmt. 3 Hours.
This survey of the hospitality industry will cover history, current practices, future of the industry, restaurant/food service operations, hotel/motel management, travel/tourism, managing in the service industry, operations management and personnel leadership.

HA 102. Basic Hospitality Internship. 3 Hours.
This internship is a college-supervised introduction to hospitality work experience at a participating industry property; course includes placement for a full summer. A journal and written assignments are required components of the internship experience (May-August). Prerequisite(s): HA 101.

HA 200. Tourism and Travel. 3 Hours.
This course is designed to expand the student’s knowledge of Tourism and Travel by examining how the different sectors of Tourism and Travel work separately and in unison. Some of the aspects covered will include the economics, psychology and sustainability of travel and tourism.
HA 201. Food & Beverage Control Systems. 3 Hours.
Theory and practice of food preparation. Topics will include: importance of food preparation to restaurant success, food history, kitchen and restaurant cost controls, menu development, purchasing, receiving, equipment operation and maintenance, and basic food preparation and presentation.

HA 202. Facilities & Guest Services. 3 Hours.
In-depth study of operations of food and rooms divisions in the hospitality industry. Topics will include hiring, staff development, quality services, and ethics. Prerequisite(s): HA 101 and HA 201.

HA 203. Intermediate Hospitality Inter. 3 Hours.
This college-supervised internship builds on the previous one to insure that the student gains exposure to front line industry positions that are different from the previous internship experience. A journal and written assignments are required components of the internship experience (May-August). Prerequisite(s): HA 102.

HA 209. Menu Planning and Food Safety. 3 Hours.
This course undertakes a comprehensive exploration of the basic functions in contemporary food service management. The course examines menu management and food safety within the modern food service industry and may lead to Servsafe certification. Prerequisite(s): HA 201.

HA 211. Economics of Tourism. 3 Hours.
The purpose of this specialized course is to expand the student’s knowledge in the fundamentals of the economic impact of tourism. In this 200 level course, the student will learn how to create value in tourism, who are the consumers of tourism and the impact of tourism on GDP. The student will visit a convention and visitors bureau and will prepare an impact project on an aspect on tourism on the local economy. Prerequisite(s): HA 101 and HA 200.

HA 299. Topic/. 3 Hours.
This course is intended to provide an intermediate course which is timely and based on the interests and needs of the students, faculty and the workplace environment. These courses would not normally be part of the Husson curriculum, but can be used to develop future courses.

HA 301. Supervision in Hospitality Management. 3 Hours.
This course will provide a framework for supervision combined with the responsibilities, skills, and tools necessary to improve the student’s effectiveness as a supervisor.

HA 302. Hotel Operations. 3 Hours.
This course covers topics involved with creating and managing hospitality properties including building, design and operations of room and food operations. In this course students will write a business plan for a hospitality property.

HA 303. Event Planning and Management. 3 Hours.
The purpose of this specialized course is to expand the student’s knowledge in the fundamentals of event management. In this junior level course, the student will learn that gatherings, meetings and events have been occurring for centuries. The student will visit an event center and will plan an event either actual or simulated from start to finish. Prerequisite(s): HA 101 and HA 200.

HA 311. Destination Management and Marketing. 3 Hours.
This course is designed to expand the student’s knowledge of the marketing of Tourism and Travel. The student will learn how this industry uses destination marketing and management to guide the consumer to make more efficient use of their leisure time. Prerequisite(s): HA 101 and HA 200.

HA 401. Hospitality Internship. 3 Hours.
A College-supervised work experience course with participating hospitality properties; course includes placement for a full summer and fall semester.

HA 402. Leadership in Hospitality Management. 3 Hours.
In depth analysis of selected case studies affecting today’s hospitality industry. Course emphasizes teamwork, hospitality sensitivity, critical reasoning and integration of skills. Prerequisite(s): HA 401.

HA 403. Advanced Hospitality Internship. 6 Hours.
Advanced Hospitality Internship—This college supervised work experience will provide the student with entry level management experience in the hospitality industry through placement in a hospitality property for a full summer or a fall and spring semester. Prerequisite(s): HA 401 and College Level=Senior.

HA 412. Sustainable Tourism. 3 Hours.
This course is designed to expand the student’s understanding of the concepts and principles of the marketing and management of ecotourism activities and the development of sustainable growth in tourism sectors. Prerequisite(s): HA 101 and HA 200.

HA 499. Topic/. 1-3 Hour.
This course is designed to allow students and faculty the opportunity to research and design special projects within the Hospitality and Tourism Industries. The course enhances the student’s knowledge of Hospitality and Tourism Management by building on prior course work and experiential learning.

BS Hospitality & Tourism Management - Sales and Marketing

Hospitality and Tourism Management students are required to maintain a 2.0 overall cumulative grade point average and a 2.0 overall grade point average in their major courses. This program provides a very strong core of hospitality and tourism courses, a strategically balanced business acumen concentrating in sales and marketing, and a varied general education background.

Students who complete the Sales and Marketing concentration will be able to:

- Demonstrate knowledge of basic principles of marketing
- Demonstrate knowledge of the importance of global markets
- Apply statistical, problem solving and critical thinking skills

Students will also complete the program objectives for the B.S. Hospitality Management degree.

Courses

HA 101. Intro to Hospitality Mgmnt. 3 Hours.
This survey of the hospitality industry will cover history, current practices, future of the industry, restaurant/food service operations, hotel/motel management, travel/tourism, managing in the service industry, operations management and personnel leadership.

HA 102. Basic Hospitality Internship. 3 Hours.
This internship is a college-supervised introduction to hospitality work experience at a participating industry property; course includes placement for a full summer. A journal and written assignments are required components of the internship experience (May-August).
Prerequisite(s): HA 101.
HA 200. Tourism and Travel. 3 Hours.
This course is designed to expand the student’s knowledge of Tourism and Travel by examining how the different sectors of Tourism and Travel work separately and in unison. Some of the aspects covered will include the economics, psychology and sustainability of travel and tourism.

HA 201. Food & Beverage Control Systems. 3 Hours.
Theory and practice of food preparation. Topics will include: importance of food preparation to restaurant success, food history, kitchen and restaurant cost controls, menu development, purchasing, receiving, equipment operation and maintenance, and basic food preparation and presentation.

HA 202. Facilities & Guest Services. 3 Hours.
In-depth study of operations of food and rooms divisions in the hospitality industry. Topics will include hiring, staff development, quality services, and ethics. Prerequisite(s): HA 101 and HA 201.

HA 203. Intermediate Hospitality Inter. 3 Hours.
This college-supervised internship builds on the previous one to insure that the student gains exposure to front line industry positions that are different from the previous internship experience. A journal and written assignments are required components of the internship experience (May-August). Prerequisite(s): HA 102.

HA 209. Menu Planning and Food Safety. 3 Hours.
This course undertakes a comprehensive exploration of the basic functions in contemporary food service management. The course examines menu management and food safety within the modern food service industry and may lead to Servsafe certification. Prerequisite(s): HA 201.

HA 211. Economics of Tourism. 3 Hours.
The purpose of this specialized course is to expand the student’s knowledge in the fundamentals of the economic impact of tourism. In this 200 level course, the student will learn how to create value in tourism, who are the consumers of tourism and the impact of tourism on GDP. The student will visit a convention and visitors bureau and will prepare an impact project on an aspect on tourism on the local economy. Prerequisite(s): HA 101 and HA 200.

HA 299. Topic/. 3 Hours.
This course is intended to provide an intermediate course which is timely and based on the interests and needs of the students, faculty and the workplace environment. These courses would not normally be part of the Husson curriculum, but can be used to develop future courses.

HA 301. Supervision in Hospitality Management. 3 Hours.
This course will provide a framework for supervision combined with the responsibilities, skills, and tools necessary to improve the student’s effectiveness as a supervisor.

HA 302. Hotel Operations. 3 Hours.
This course covers topics involved with creating and managing hospitality properties including building, design and operations of room and food operations. In this course students will write a business plan for a hospitality property.

HA 303. Event Planning and Management. 3 Hours.
The purpose of this specialized course is to expand the student’s knowledge in the fundamentals of event management. In this junior level course, the student will learn that gatherings, meetings and events have been occurring for centuries. The student will visit an event center and will plan an event either actual or simulated from start to finish. Prerequisite(s): HA 101 and HA 200.

HA 311. Destination Management and Marketing. 3 Hours.
This course is designed to expand the student’s knowledge of the marketing of Tourism and Travel. The student will learn how this industry uses destination marketing and management to guide the consumer to make more efficient use of their leisure time. Prerequisite(s): HA 101 and HA 200.

HA 401. Hospitality Internship. 3 Hours.
A College-supervised work experience course with participating hospitality properties; course includes placement for a full summer and fall semester.

HA 402. Leadership in Hospitality Management. 3 Hours.
In depth analysis of selected case studies affecting today’s hospitality industry. Course emphasizes teamwork, hospitality sensitivity, critical reasoning and integration of skills. Prerequisite(s): HA 401.

HA 403. Advanced Hospitality Internship. 6 Hours.
Advanced Hospitality Internship - This college supervised work experience will provide the student with entry level management experience in the hospitality industry through placement in a hospitality property for a full summer or a fall and spring semester. Prerequisite(s): HA 401 and College Level-Senior.

HA 412. Sustainable Tourism. 3 Hours.
This course is designed to expand the student’s understanding of the concepts and principles of the marketing and management of ecotourism activities and the development of sustainable growth in tourism sectors. Prerequisite(s): HA 101 and HA 200.

HA 499. Topic/. 1-3 Hour.
This course is designed to allow students and faculty the opportunity to research and design special projects within the Hospitality and Tourism Industries. The course enhances the student’s knowledge of Hospitality and Tourism Management by building on prior course work and experiential learning.

BS Hospitality & Tourism Management - Small Business/Entrepreneurship

Hospitality and Tourism Management students are required to maintain a 2.0 overall cumulative grade point average and a 2.0 overall grade point average in their major courses. This program provides a very strong core of hospitality and tourism courses, a strategically balanced business acumen concentrating in entrepreneurship, and a varied general education background.

The program objective of the Small Business and Entrepreneurship concentration is to demonstrate subject matter knowledge and competence as applied to a smaller company* or family business.

Students will also complete the program objectives of the B.S. Hospitality and Tourism Management degree.

**Courses**

**HA 101. Intro to Hospitality Mgmnt. 3 Hours.**
This survey of the hospitality industry will cover history, current practices, future of the industry, restaurant/food service operations, hotel/motel management, travel/tourism, managing in the service industry, operations management and personnel leadership.

**HA 102. Basic Hospitality Internship. 3 Hours.**
This internship is a college-supervised introduction to hospitality work experience at a participating industry property; course includes placement for a full summer. A journal and written assignments are required components of the internship experience (May-August). Prerequisite(s): HA 101.
HA 200. Tourism and Travel. 3 Hours.
This course is designed to expand the student’s knowledge of Tourism and Travel by examining how the different sectors of Tourism and Travel work separately and in unison. Some of the aspects covered will include the economics, psychology and sustainability of travel and tourism.

HA 201. Food & Beverage Control Systems. 3 Hours.
Theory and practice of food preparation. Topics will include: importance of food preparation to restaurant success, food history, kitchen and restaurant cost controls, menu development, purchasing, receiving, equipment operation and maintenance, and basic food preparation and presentation.

HA 202. Facilities & Guest Services. 3 Hours.
In-depth study of operations of food and rooms divisions in the hospitality industry. Topics will include hiring, staff development, quality services, and ethics. Prerequisite(s): HA 101 and HA 201.

HA 203. Intermediate Hospitality Inter. 3 Hours.
This college-supervised internship builds on the previous one to insure that the student gains exposure to front line industry positions that are different from the previous internship experience. A journal and written assignments are required components of the internship experience (May-August). Prerequisite(s): HA 102.

HA 209. Menu Planning and Food Safety. 3 Hours.
This course undertakes a comprehensive exploration of the basic functions in contemporary food service management. The course examines menu management and food safety within the modern food service industry and may lead to Servsafe certification. Prerequisite(s): HA 201.

HA 211. Economics of Tourism. 3 Hours.
The purpose of this specialized course is to expand the student’s knowledge in the fundamentals of the economic impact of tourism. In this 200 level course, the student will learn how to create value in tourism, who are the consumers of tourism and the impact of tourism on GDP. The student will visit a convention and visitors bureau and will prepare an impact project on an aspect on tourism on the local econony. Prerequisite(s): HA 101 and HA 200.

HA 299. Topic/. 3 Hours.
This course is intended to provide an intermediate course which is timely and based on the interests and needs of the students, faculty and the workplace environment. These courses would not normally be part of the Husson curriculum, but can be used to develop future courses.

HA 301. Supervision in Hospitality Management. 3 Hours.
This course will provide a framework for supervision combined with the responsibilities, skills, and tools necessary to improve the student’s effectiveness as a supervisor.

HA 302. Hotel Operations. 3 Hours.
This course covers topics involved with creating and managing hospitality properties including building, design and operations of room and food operations. In this course students will write a business plan for a hospitality property.

HA 303. Event Planning and Management. 3 Hours.
The purpose of this specialized course is to expand the student’s knowledge in the fundamentals of event management. In this junior level course, the student will learn that gatherings, meetings and events have been occurring for centuries. The student will visit an event center and will plan an event either actual or simulated from start to finish. Prerequisite(s): HA 101 and HA 200.

HA 311. Destination Management and Marketing. 3 Hours.
This course is designed to expand the student’s knowledge of the marketing of Tourism and Travel. The student will learn how this industry uses destination marketing and management to guide the consumer to make more efficient use of their leisure time. Prerequisite(s): HA 101 and HA 200.

HA 401. Hospitality Internship. 3 Hours.
A College-supervised work experience course with participating hospitality properties; course includes placement for a full summer and fall semester.

HA 402. Leadership in Hospitality Management. 3 Hours.
In depth analysis of selected case studies affecting today’s hospitality industry. Course emphasizes teamwork, hospitality sensitivity, critical reasoning and integration of skills. Prerequisite(s): HA 401.

HA 403. Advanced Hospitality Internship. 6 Hours.
Advanced Hospitality Internship-This college supervised work experience will provide the student with entry level management experience in the hospitality industry through placement in a hospitality property for a full summer or a fall and spring semester. Prerequisite(s): HA 401 and College Level-Senior.

This course is designed to expand the student’s understanding of the concepts and principles of the marketing and management of ecotourism activities and the development of sustainable growth in tourism sectors. Prerequisite(s): HA 101 and HA 200.

HA 499. Topic/. 1-3 Hour.
This course is designed to allow students and faculty the opportunity to research and design special projects within the Hospitality and Tourism Industries. The course enhances the student’s knowledge of Hospitality and Tourism Management by building on prior course work and experiential learning.

B.S. Hospitality & Tourism Mgmt/ M.B.A Hospitality and Tourism Management
The dual degree B.S. in Hospitality and Tourism Management / M.B.A. with Hospitality and Tourism Management concentration may be earned in as few as 5 years. Candidates for this dual degree program are required to maintain an undergraduate grade point average of 3.0 and a graduate grade point average of 3.0.

This dual-degree offering acknowledges the importance of the hospitality industry to the economy of Maine and the United States. This 5 year program prepares hospitality and tourism management students for advancement to upper management levels through course content taught by successful practitioners. This program of study provides the local hospitality industry with a much needed higher level of skilled personnel for their management teams. Combining the success of the undergraduate program with the academic strength of the MBA program, the student receives a highly marketable advanced dual degree in Hospitality and Tourism Management. Students will complete the program objectives for both the B.S. Hospitality and Tourism Management and the MBA - Hospitality Management degrees.

Courses

HA 101. Intro to Hospitality Mgmt. 3 Hours. 
This survey of the hospitality industry will cover history, current practices, future of the industry, restaurant/food service operations, hotel/motel management, travel/tourism, managing in the service industry, operations management and personnel leadership.

HA 102. Basic Hospitality Internship. 3 Hours.
This internship is a college-supervised introduction to hospitality work experience at a participating industry property; course includes placement for a full summer. A journal and written assignments are required components of the internship experience (May-August). Prerequisite(s): HA 101.

HA 200. Tourism and Travel. 3 Hours.
This course is designed to expand the student's knowledge of Tourism and Travel by examining how the different sectors of Tourism and Travel work separately and in unison. Some of the aspects covered will include the economics, psychology and sustainability of travel and tourism.

HA 201. Food & Beverage Control Systems. 3 Hours.
Theory and practice of food preparation. Topics will include: importance of food preparation to restaurant success, food history, kitchen and restaurant cost controls, menu development, purchasing, receiving, equipment operation and maintenance, and basic food preparation and presentation.

HA 202. Facilities & Guest Services. 3 Hours.
In-depth study of operations of food and rooms divisions in the hospitality industry. Topics will include hiring, staff development, quality services, and ethics. Prerequisite(s): HA 101 and HA 201.

HA 203. Intermediate Hospitality Inter. 3 Hours.
This college-supervised internship builds on the previous one to insure that the student gains exposure to front line industry positions that are different from the previous internship experience. A journal and written assignments are required components of the internship experience (May-August). Prerequisite(s): HA 102.

HA 209. Menu Planning and Food Safety. 3 Hours.
This course undertakes a comprehensive exploration of the basic functions in contemporary food service management. The course examines menu management and food safety within the modern food service industry and may lead to Servsafe certification. Prerequisite(s): HA 201.

HA 211. Economics of Tourism. 3 Hours.
The purpose of this specialized course is to expand the student's knowledge in the fundamentals of the economic impact of tourism. In this 200 level course, the student will learn how to create value in tourism, who are the consumers of tourism and the impact of tourism on GDP. The student will visit a convention and visitors bureau and will prepare an impact project on an aspect on tourism on the local economy. Prerequisite(s): HA 101 and HA 200.

HA 299. Topic/. 3 Hours.
This course is intended to provide an intermediate course which is timely and based on the interests and needs of the students, faculty and the workplace environment. These courses would not normally be part of the Husson curriculum, but can be used to develop future courses.

HA 301. Supervision in Hospitality Management. 3 Hours.
This course will provide a framework for supervision combined with the responsibilities, skills, and tools necessary to improve the student's effectiveness as a supervisor.

HA 302. Hotel Operations. 3 Hours.
This course covers topics involved with creating and managing hospitality properties including building, design and operations of room and food operations. In this course students will write a business plan for a hospitality property.

HA 303. Event Planning and Management. 3 Hours.
The purpose of this specialized course is to expand the student's knowledge in the fundamentals of event management. In this junior level course, the student will learn that gatherings, meetings and events have been occurring for centuries. The student will visit an event center and will plan an event either actual or simulated from start to finish. Prerequisite(s): HA 101 and HA 200.

HA 311. Destination Management and Marketing. 3 Hours.
The purpose of this specialized course is to expand the student's knowledge of the marketing of Tourism and Travel. The student will learn how this industry uses destination marketing and management to guide the consumer to make more efficient use of their leisure time. Prerequisite(s): HA 101 and HA 200.

HA 401. Hospitality Internship. 3 Hours.
A College-supervised work experience course with participating hospitality properties; course includes placement for a full summer and fall semester.

HA 402. Leadership in Hospitality Management. 3 Hours.
In depth analysis of selected case studies affecting today's hospitality industry. Course emphasizes teamwork, hospitality sensitivity, critical reasoning and integration of skills. Prerequisite(s): HA 401.

HA 403. Advanced Hospitality Internship. 6 Hours.
Advanced Hospitality Internship-This college supervised work experience will provide the student with entry level management experience in the hospitality industry through placement in a hospitality property for a full summer or a fall and spring semester. Prerequisite(s): HA 401 and College Level=Senior.

HA 412. Sustainable Tourism. 3 Hours.
This course is designed to expand the student's understanding of the concepts and principles of the marketing and management of ecotourism activities and the development of sustainable growth in tourism sectors. Prerequisite(s): HA 101 and HA 200.
HA 499. Topic/. 1-3 Hour.
This course is designed to allow students and faculty the opportunity to research and design special projects within the Hospitality and Tourism Industries. The course enhances the student’s knowledge of Hospitality and Tourism Management by building on prior course work and experiential learning.

Minors

Hospitality and Tourism Management Minor
Adding a minor in Hospitality and Tourism Management to majors such as Accounting, Finance, Marketing, Retail, Sport and Small Family Business will greatly enhance the student’s customer service skill set as well as improve their marketability to be hired by the Hospitality and Tourism industry in their chosen major field of study.

All students seeking a minor within the School of Hospitality, Sport and Tourism Management must achieve a minimum grade point average of 2.0 in the courses relied upon for earning the designation.

Tourism and Recreation Minor
The minor in Tourism and Recreation Management prepares students to pursue career options in the tourism and outdoor recreation field. The minor provides basic knowledge of recreation, tourism and park services, and an understanding of the benefits of leisure and recreation in our society. To complete the minor, students must take 18 hours of required courses which will provide undergraduates with the opportunity to explore recreation, parks, and leisure services.

* Fall Semester Course
** Spring Semester Course

Upon successful completion of the course, students will be able to:

1. develop an understanding of the competencies required to develop outdoor program in a variety of settings;
2. understand and apply basic outdoor programming terminology and the theories of outdoor and adventure-based programming;
3. recognize the philosophical basis and values of outdoor and adventure-based programming to the individual;
4. to increase understanding of natural resource management, ecosystem management, outdoor recreation, tourism, visitor management, and the relationships among them;
5. describe the management focus of the federal agencies responsible for managing wilderness and back-country recreation lands;
6. develop an understanding of theories and practical programming methods that are relevant to the delivery of quality outdoor and adventure-based programming within any agency; and
7. propose, plan, execute, and evaluate an outdoor and adventure-based program and/or special events

Legal Studies
The undergraduate Legal Studies major, leading to a B.S. degree in Legal Studies with a Pre-Law Concentration, offers a wide range of civil and criminal law courses through which students learn legal analytic and problem solving, as well as critical reading, writing, communication, and research skills. Students in the Legal Studies program with a Pre-Law Concentration will have completed a curriculum based upon the American Bar Association Core Skills and Values and will be particularly prepared for the rigors of the law school curriculum.

Program courses include Criminal Law, Real Estate Law, Probate Law, Civil Litigation, Alternative Dispute Resolution, Business Law, Workers’ Compensation, Ethics, Torts, and Family Law.

B.S. Legal Studies - Pre-Law
The Bachelor of Science in Legal Studies with a Pre-Law Concentration requires 122 semester hours including Husson University’s General Education requirements as well as Legal Studies, Business, and related courses. It is designed to provide students with skills for success in the legal field and specific preparation for the rigors of the law school curriculum. While the American Bar Association does not recommend any particular majors or courses for undergraduate education prior to law school, it does set forth Core Skills and Values for a Pre-Law education. Students in the Legal Studies program earning a Pre-Law Concentration will have completed a curriculum which has the American Bar Association Core Skills and Values as its foundation.

The program objectives for the B.S. Legal Studies with a Pre-Law Concentration are:

- To demonstrate excellent or outstanding understanding of the key concepts of the Legal Profession by:
  - Critical Thinking Skills
  - Organizational Skills
  - Communication Skills
  - Legal Research Skills
  - Legal Writing Skills
  - Interviewing and Investigation Skills
  - Law Office Management Skills
  - Demonstrating professionalism
  - Using legal terminology correctly
  - Working effectively with the courts
• Becoming proficient with computer technology, software and database

• To demonstrate excellent or outstanding ability to apply ethical decision-making skills and integrity in an ever changing global environment.

• To demonstrate excellent or outstanding ability to produce and present effective oral and written forms of communication.

Total Hours: 122-128

* "C" or better required in all courses marked

Credit may not be required for degree completion
Courses

PL 100. Intro to Legal Studies. 3 Hours.
This course is designed to educate students in the American legal system focusing on the origins and history of the American legal system, the meaning and application of important legal terminology, and attorney and paralegal ethics.

PL 200. Criminal Law. 3 Hours.
The substantive goal of this course is to cover the basic principles of criminal law, including the common law of crimes as well as the Maine Criminal Code and the Model Penal Code. The methodological role of the course is that of statutory construction - the techniques of applying legislative enactments to varying fact situations in light of text, history, purpose and structural context. All of this will proceed with the underlying assumption that it is always necessary to judge rules of law according to their effectiveness and desirability.

PL 201. Real Estate Law. 3 Hours.
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

PL 203. Civil Litigation. 3 Hours.
A survey of civil litigation issues covering the concepts and procedural rules designed to proceed from the initial client interview through trial. The student will gain a basic understanding of federal and Maine procedural rules and substantive law. In addition, the student will learn about the following: types of litigation, negligence cases, collection cases, commercial litigation, preparation of pleadings, discovery and settlements.

PL 204. Introduction to Wills, Estates, and Trusts. 3 Hours.
This course examines the general theory and procedures, legal and administrative, employed in the preparation and handling of wills, trusts, and estates. This course will prepare students to understand the basic concepts in the field and be able to apply these concepts to perform the tasks of a probate paralegal.

PL 205. Legal Research and Writing. 3 Hours.
This course introduces manual legal research including understanding legal citations, primary and secondary authorities, federal and state reporters, Shepardizing, and other research tools. Use of the Penobscot County Law Library is mandatory. Finally, students will explore the basic of legal writing including legal correspondence and legal memoranda. Prerequisite(s): PL 100 or Major=BS English - Prelaw.

PL 299. Topic/. 3 Hours.
This course is intended to provide the opportunity to offer introductory courses in paralegal studies that would not normally be a part of the Husson curriculum. As such the topics will depend upon the interests of students and faculty.

PL 301. Torts. 3 Hours.
Topics may vary from year to year, but will generally include a detailed treatment of defamation and privacy, and the torts relating to the intentional infliction of purely economic loss. Contemporary issues in the law of negligence (i.e. liability in negligence for purely economic loss; actions for wrongful birth and wrongful life); and new applications of the law of trespass, with implications for civil liberties and privacy; for regulating non-consensual medical procedures; and for intervening in abusive domestic relationships. Prerequisite(s): PL 205.

PL 302. Family Law. 3 Hours.
Family law covers all major subjects from marriage, divorce, child procreation and support, and child abuse and neglect. Our study includes a look at the economics of marriage and divorce, as well as some of the most cutting edge social and even scientific issues in the news. The main purpose of this course is to introduce major terms, topics, and issues. Prerequisite(s): PL 205 or Major=BS English - Prelaw.

PL 303. Alternative Dispute Resolution. 3 Hours.
This course is designed in response to an area of the law that is growing, and offers students practical instruction to assist in their future job placements. The course treats the full range of modern dispute resolution from inaction through mediation, arbitration, litigation and private judging. Looking at the full range of conflict resolution options, class inquiry will focus on the selection of the appropriate resolution process for a given case. Class discussions and problem solving will follow a concept-example, concept problem, and concept example-problem format. Prerequisite(s): PL 100 or Major=BS English - Prelaw.

PL 304. Alternative Dispute Resolution II. 3 Hours.
This course is a continuation of PL 303 which is designed in response to an area of the law that is growing, and offers students practical instruction to assist in their future job placements. The course explores in more depth the full range of modern dispute resolution with a focus on conflict resolution skills, including mediation. Class discussions and problem solving will follow a concept-example, concept problem, and concept examples-problem format. Prerequisite(s): PL 303.

PL 305. Legal Ethics. 3 Hours.
This course will cover the nature of the ethical responsibilities of a paralegal working in a law office, as well as the limits on independent practice. It will cover the Maine Code of Professional Responsibility as well as the ABA Model Rules and Code. Prerequisite(s): PL 100 or Major=BS English - Prelaw.

PL 309. Constitutional Law. 3 Hours.
This course will explore the First, Second, Fourth, Fifth, Sixth, Eighth and Fourteenth Amendments of the Constitution through reading of case law and real life examples. Students will understand the arguments that exist for persons involved in civil and criminal matters from the Constitution. Prerequisite(s): PL 200.

PL 400. Evidence. 3 Hours.
This course will present the basic principles of the law of evidence as expressed in the Federal Rules of Evidence and the Maine Rules of Evidence. The student will develop the ability to read and apply a rule of evidence to specific information and circumstances. An emphasis will be placed on learning how the Federal & Maine Rules of Evidence effect trial preparation, negotiation, and trial. Participatory role play and discussion of hypothetical situations will constitute a significant part of the learning experience. Prerequisite(s): Major=AS Paralegal or Major=BS Paralegal or Major=AS Criminal Justice or Major=BS Criminal Justice or Major=BS English - Prelaw.

PL 401. Domestic Violence Law. 3 Hours.
This course introduces domestic violence law from an interdisciplinary perspective and offers a contemporary view of the criminal justice and paralegal experience with diverse forms of violence and populations. Comprehensive inclusion of violence perpetrated in a variety of gender and age relationships; dating violence; sibling abuse; rape and incest; child and elder abuse and neglect; male battering; lesbian and gay violence; and violence against women. Prerequisite(s): CJ 101 or PL 100 or Major=BS English - Prelaw.
PL 403. Advanced Legal Writing. 3 Hours.
Cultivating analytical research and writing skills through problem-based learning is the aim of this course. Actual factual situations will be used to hone skills such as: identification of legal issues; research strategy and methodology formulation; use of relevant secondary sources; integration of print sources with non-print sources (electronic databases, CD-ROMs and the Internet); analyzing and synthesizing primary sources that are applicable; critical thinking applications; and writing clearly, concisely, logically and effectively. Skill development in these areas will assist students in their academic course work and prepare them for their professional careers. Prerequisite(s): PL 205 or Major=BS English - Prelaw.

PL 404. Civil Litigation II. 3 Hours.
The objective of the course is to familiarize the student with Discovery and Trial preparation, identifying legal elements of a case, Rules of Civil Procedure, Rules of Evidence, interviewing witnesses, obtaining evidence, Interrogatories, depositions, medical records and organizing evidence for trial, all with an emphasis on Maine Law. Prerequisite(s): PL 203.

PL 405. Workers Compensation. 3 Hours.
Study of the nature, development and exclusive nature of worker compensation and concepts. Topics include: arising out of employment, personal injury by accident, disease, employment status, specific inclusions or exemptions, benefits, employee and employer misconduct, third party action, adjective law, conflict of laws, insurance, and relation to other kinds of wage-loss protection. Prerequisite(s): PL 205 and PL 203.

PL 407. Legal Studies Capstone. 3 Hours.
This capstone course provides students with an opportunity to engage in advanced analysis, research and writing projects, integrating prior course work and further developing paralegal skills. Students will prepare a portfolio of documents, essays and projects that demonstrate core competencies. Job search strategies and continuing education opportunities will be discussed. Students will prepare for and complete a comprehensive, substantive assessment after review of various content areas. Prerequisite(s): (PL 100 or Major=BS English - Prelaw) and PL 203 and PL 205.

PL 498. Paralegal Internship. 3-9 Hours.
This course will require a student to serve as an intern with a professional in a work setting that requires and develops both legal knowledge and skills in a work setting for at least 120 hours during the semester. This internship provides students with a unique way to gain real life experience in the legal arena in combination with acquiring course credit. Prerequisite(s): ((PL 100 and PL 200 and PL 203 and PL 204 and PL 205) and ( College Level=Junior or College Level=Senior)) or Major=BS English - Prelaw.

PL 499. Topic/. 3 Hours.
This course is intended to provide the opportunity to offer advanced courses in paralegal studies that would not normally be a part of the Husson curriculum. As such the topics will depend upon the interests of students and faculty.

Programs in Paralegal Studies
Students may choose from the following program offerings in Paralegal Studies:
- B.S. Paralegal Studies
- A.S. Paralegal Studies
- Paralegal Studies Certificate
- Advanced Civil Practice Paralegal Certificate
- Advanced Criminal Practice Paralegal Certificate

Features of the Program
Paralegals are equipped with skills to allow them to participate as a member of the legal team in law offices, courts, corporations, government agencies and private consulting firms. They carry out legal research, write reports, and assist attorneys on a regular basis. They must be focused and familiar with the various areas of law including criminal law, torts, contracts and property law.

The title of paralegal is interchangeable with legal assistant and legal secretary. Students will learn how to perform the following tasks:
- Conducting client interviews and maintaining contact with clients
- Locate and interview witnesses
- Conduct investigations and statistical and documentary research
- Conduct legal research
- Draft legal documents and correspondence
- Analyze and summarize testimony, medical records and discovery documents
- Attend real estate closing, depositions, administrative court hearings, and execution of wills
- Assist lawyers in preparing for depositions, hearings, closings and trials.

Paralegal Studies students will also master the skills of:
- Communicating effectively
- Demonstrating professionalism
- Using legal terminology correctly
- Working effectively with the courts
- Becoming proficient with computer technology, software and database

The main purpose of this course is to introduce major terms, topics, and issues. Prerequisite(s): PL 205 or Major=BS English - Prelaw.

PL 303. Alternative Dispute Resolution. 3 Hours.
This course is designed in response to an area of the law that is growing, and offers students practical instruction to assist in their future job placements. The course treats the full range of modern dispute resolution from inaction through mediation, arbitration, litigation and private judging. Looking at the full range of conflict resolution options, class inquiry will focus on the selection of the appropriate resolution process for a given case. Class discussions and problem solving will follow a concept-example, concept problem, and concept example-problem format. Prerequisite(s): PL 100 or Major=BS English - Prelaw.

PL 304. Alternative Dispute Resolution II. 3 Hours.
This course is a continuation of PL 303 which is designed in response to an area of the law that is growing, and offers students practical instruction to assist in their future job placements. The course explores in more depth the full range of modern dispute resolution with a focus on conflict resolution skills, including mediation. Class discussions and problem solving will follow a concept-example, concept problem, and concept examples-problem format. Prerequisite(s): PL 303.

PL 305. Legal Ethics. 3 Hours.
This course will cover the nature of the ethical responsibilities of a paralegal working in a law office, as well as the limits on independent practice. It will cover the Maine Code of Professional Responsibility as well as the ABA Model Rules and Code. Prerequisite(s): PL 100 or Major=BS English - Prelaw.
PL 309. Constitutional Law. 3 Hours.
This course will explore the First, Second, Fourth, Fifth, Sixth, Eighth and Fourteenth Amendments of the Constitution through reading of case law and real life examples. Students will understand the arguments that exist for persons involved in civil and criminal matters from the Constitution. Prerequisite(s): PL 200.

PL 400. Evidence. 3 Hours.
This course will present the basic principles of the law of evidence as expressed in the Federal Rules of Evidence and the Maine Rules of Evidence. The student will develop the ability to read and apply a rule of evidence to specific information and circumstances. An emphasis will be placed on learning how the Federal & Maine Rules of Evidence effect trial preparation, negotiation, and trial. Participatory role play and discussion of hypothetical situations will constitute a significant part of the learning experience. Prerequisite(s): Major=AS Paralegal or Major=BS Paralegal or Major=AS Criminal Justice or Major=BS Criminal Justice or Major=BS English - Prelaw.

PL 401. Domestic Violence Law. 3 Hours.
This course introduces domestic violence law from an interdisciplinary perspective and offers a contemporary view of the criminal justice and paralegal experience with diverse forms of violence and populations. Comprehensive inclusion of violence perpetrated in a variety of gender and age relationships; dating violence; sibling abuse; rape and incest; child and elder abuse and neglect; male battering; lesbian and gay violence; and violence against women. Prerequisite(s): CJ 101 or PL 100 or Major=BS English - Prelaw.

PL 403. Advanced Legal Writing. 3 Hours.
Cultivating analytical research and writing skills through problem-based learning is the aim of this course. Actual factual situations will be used to hone skills such as: identification of legal issues; research strategy and methodology formulation; use of relevant secondary sources; integration of print sources with non-print sources (electronic databases, CD-ROMs and the Internet); analyzing and synthesizing primary sources that are applicable; critical thinking applications; and writing clearly, concisely, logically and effectively. Skill development in these areas will assist students in their academic course work and prepare them for their professional careers. Prerequisite(s): PL 205 or Major=BS English - Prelaw.

PL 404. Civil Litigation II. 3 Hours.
The objective of the course is to familiarize the student with Discovery and Trial preparation, identifying legal elements of a case, Rules of Civil Procedure, Rules of Evidence, interviewing witnesses, obtaining evidence, Interrogatories, depositions, medical records and organizing evidence for trial, all with an emphasis on Maine Law. Prerequisite(s): PL 203.

PL 405. Workers Compensation. 3 Hours.
Study of the nature, development and exclusive nature of worker compensation and concepts. Topics include: arising out of employment, personal injury by accident, disease, employment status, specific inclusions or exemptions, benefits, employee and employer misconduct, third party action, adjective law, conflict of laws, insurance, and relation to other kinds of wage-loss protection. Prerequisite(s): PL 205 and PL 203.

PL 407. Legal Studies Capstone. 3 Hours.
This capstone course provides students with an opportunity to engage in advanced analysis, research and writing projects, integrating prior course work and further developing paralegal skills. Students will prepare a portfolio of documents, essays and projects that demonstrate core competencies. Job search strategies and continuing education opportunities will be discussed. Students will prepare for and complete a comprehensive, substantive assessment after review of various content areas. Prerequisite(s): (PL 100 or Major=BS English - Prelaw) and PL 203 and PL 205.

PL 498. Paralegal Internship. 3-9 Hours.
This course will require a student to serve as an intern with a professional in a work setting that requires and develops both legal knowledge and approaches to problem identification, analysis, and critical thinking. The student will be evaluated by both the internship supervisor and the professional from the work setting. The student is required to be in the work setting for at least 120 hours during the semester. This internship provides students with a unique way to gain real life experience in the legal arena in combination with acquiring course credit. Prerequisite(s): ((PL 100 and PL 200 and PL 203 and PL 204 and PL 205) and (College Level=Junior or College Level=Senior)) or Major=BS English - Prelaw.

PL 499. Topic/. 3 Hours.
This course is intended to provide the opportunity to offer advanced courses in paralegal studies that would not normally be a part of the Husson curriculum. As such the topics will depend upon the interests of students and faculty.

B.S. Paralegal Studies

This program will make graduates highly competitive for careers in Law offices, corporations, government and other legal related fields. Bachelor of Science in Paralegal Studies students are expected to complete 122 credit hours of course work and related activity in the Bachelor of Science program. This program provides both a strong core of professional courses as well as a varied liberal arts background. This program will prepare graduates for entry level positions and also for future advancement to leadership positions in the profession. After students complete two years of course work, they will be eligible to do internships in agencies, offices, courts and businesses for hands-on experiential learning in the field.

The program objectives for the B.S. Paralegal Studies degree are:

• To demonstrate excellent or outstanding understanding of the key concepts of the Legal Profession by applying the skills of:
  • Critical Thinking
  • Organizational
  • Communication
  • Legal Research
  • Legal Writing
  • Interviewing and Investigation
  • Law Office Management
  • Professionalism
  • Use of legal terminology
  • Court procedure
  • Computer proficiency

• To demonstrate excellent or outstanding ability to apply ethical decision-making skills and integrity in an ever changing global environment.
To demonstrate excellent or outstanding ability to produce and present effective oral and written forms of communication.

* “C” or better in all courses marked

*** Credit may not be required for degree completion.

**Courses**

*PL 100. Intro to Legal Studies. 3 Hours.*

This course is designed to educate students in the American legal system focusing on the origins and history of the American legal system, the meaning and application of important legal terminology, and attorney and paralegal ethics.
PL 200. Criminal Law. 3 Hours.
The substantive goal of this course is to cover the basic principles of criminal law, including the common law of crimes as well as the Maine Criminal Code and the Model Penal Code. The methodological role of the course is that of statutory construction - the techniques of applying legislative enactments to varying fact situations in light of text, history, purpose and structural context. All of this will proceed with the underlying assumption that it is always necessary to judge rules of law according to their effectiveness and desirability.

PL 201. Real Estate Law. 3 Hours.
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

PL 203. Civil Litigation. 3 Hours.
A survey of civil litigation issues covering the concepts and procedural rules designed to proceed from the initial client interview through trial. The student will gain a basic understanding of federal and Maine procedural rules and substantive law. In addition, the student will learn about the following: types of litigation, negligence cases, collection cases, commercial litigation, preparation of pleadings, discovery and settlements.

PL 204. Introduction to Wills, Estates, and Trusts. 3 Hours.
This course examines the general theory and procedures, legal and administrative, employed in the preparation and handling of wills, trusts, and estates. This course will prepare students to understand the basic concepts in the field and be able to apply these concepts to perform the tasks of a probate paralegal.

PL 205. Legal Research and Writing. 3 Hours.
This course introduces manual legal research including understanding legal citations, primary and secondary authorities, federal and state reporters, Shepardizing, and other research tools. Use of the Penobscot County Law Library is mandatory. Finally, students will explore the basic of legal writing including legal correspondence and legal memoranda. Prerequisite(s): PL 100 or Major=BS English - Prelaw.

PL 299. Topic/. 3 Hours.
This course is intended to provide the opportunity to offer introductory courses in paralegal studies that would not normally be a part of the Husson curriculum. As such the topics will depend upon the interests of students and faculty.

PL 301. Torts. 3 Hours.
Topics may vary from year to year, but will generally include a detailed treatment of defamation and privacy, and the torts relating to the intentional infliction of purely economic loss. Contemporary issues in the law of negligence (i.e. liability in negligence for purely economic loss; actions for wrongful birth and wrongful life); and new applications of the law of trespass, with implications for civil liberties and privacy; for regulating non-consensual medical procedures; and for intervening in abusive domestic relationships. Prerequisite(s): PL 205.

PL 302. Family Law. 3 Hours.
Family law covers all major subjects from marriage, divorce, child procreation and support, and child abuse and neglect. Our study includes a look at the economics of marriage and divorce, as well as some of the most cutting edge social and even scientific issues in the news. The main purpose of this course is to introduce major terms, topics, and issues. Prerequisite(s): PL 205 or Major=BS English - Prelaw.

PL 303. Alternative Dispute Resolution. 3 Hours.
This course is designed in response to an area of the law that is growing, and offers students practical instruction to assist in their future job placements. The course treats the full range of modern dispute resolution from inaction through mediation, arbitration, litigation and private judging. Looking at the full range of conflict resolution options, class inquiry will focus on the selection of the appropriate resolution process for a given case. Class discussions and problem solving will follow a concept-example, concept problem, and concept example-problem format. Prerequisite(s): PL 100 or Major=BS English - Prelaw.

PL 304. Alternative Dispute Resolution II. 3 Hours.
This course is a continuation of PL 303 which is designed in response to an area of the law that is growing, and offers students practical instruction to assist in their future job placements. The course explores in more depth the full range of modern dispute resolution with a focus on conflict resolution skills, including mediation. Class discussions and problem solving will follow a concept-example, concept problem, and concept examples-problem format. Prerequisite(s): PL 303.

PL 305. Legal Ethics. 3 Hours.
This course will cover the nature of the ethical responsibilities of a paralegal working in a law office, as well as the limits on independent practice. It will cover the Maine Code of Professional Responsibility as well as the ABA Model Rules and Code. Prerequisite(s): PL 100 or Major=BS English - Prelaw.

PL 309. Constitutional Law. 3 Hours.
This course will explore the First, Second, Fourth, Fifth, Sixth, Eighth and Fourteenth Amendments of the Constitution through reading of case law and real life examples. Students will understand the arguments that exist for persons involved in civil and criminal matters from the Constitution. Prerequisite(s): PL 200.

PL 400. Evidence. 3 Hours.
This course will present the basic principles of the law of evidence as expressed in the Federal Rules of Evidence and the Maine Rules of Evidence. The student will develop the ability to read and apply a rule of evidence to specific information and circumstances. An emphasis will be placed on learning how the Federal & Maine Rules of Evidence effect trial preparation, negotiation, and trial. Participatory role play and discussion of hypothetical situations will constitute a significant part of the learning experience. Prerequisite(s): Major=AS Paralegal or Major=BS Paralegal or Major=AS Criminal Justice or Major=BS Criminal Justice or Major=BS English - Prelaw.

PL 401. Domestic Violence Law. 3 Hours.
This course introduces domestic violence law from an interdisciplinary perspective and offers a contemporary view of the criminal justice and paralegal experience with diverse forms of violence and populations. Comprehensive inclusion of violence perpetrated in a variety of gender and age relationships; dating violence; sibling abuse; rape and incest; child and elder abuse and neglect; male battering; lesbian and gay violence; and violence against women. Prerequisite(s): CJ 101 or PL 100 or Major=BS English - Prelaw.
PL 403. Advanced Legal Writing. 3 Hours.
Cultivating analytical research and writing skills through problem-based learning is the aim of this course. Actual factual situations will be used to hone skills such as: identification of legal issues; research strategy and methodology formulation; use of relevant secondary sources; integration of print sources with non-print sources (electronic databases, CD-ROMs and the Internet); analyzing and synthesizing primary sources that are applicable; critical thinking applications; and writing clearly, concisely, logically and effectively. Skill development in these areas will assist students in their academic course work and prepare them for their professional careers. Prerequisite(s): PL 205 or Major=BS English - Prelaw.

PL 404. Civil Litigation II. 3 Hours.
The objective of the course is to familiarize the student with Discovery and Trial preparation, identifying legal elements of a case, Rules of Civil Procedure, Rules of Evidence, interviewing witnesses, obtaining evidence, Interrogatories, depositions, medical records and organizing evidence for trial, all with an emphasis on Maine Law. Prerequisite(s): PL 203.

PL 405. Workers Compensation. 3 Hours.
Study of the nature, development and exclusive nature of worker compensation and concepts. Topics include: arising out of employment, personal injury by accident, disease, employment status, specific inclusions or exemptions, benefits, employee and employer misconduct, third party action, adjective law, conflict of laws, insurance, and relation to other kinds of wage-loss protection. Prerequisite(s): PL 200 and PL 203.

PL 407. Legal Studies Capstone. 3 Hours.
This capstone course provides students with an opportunity to engage in advanced analysis, research and writing projects, integrating prior course work and further developing paralegal skills. Students will prepare a portfolio of documents, essays and projects that demonstrate core competencies. Job search strategies and continuing education opportunities will be discussed. Students will prepare for and complete a comprehensive, substantive assessment after review of various content areas. Prerequisite(s): (PL 100 or Major=BS English - Prelaw) and PL 203 and PL 205.

PL 498. Paralegal Internship. 3-9 Hours.
This course will require a student to serve as an intern with a professional in a work setting that requires and develops both legal knowledge and approaches to problem identification, analysis, and critical thinking. The student will be evaluated by both the internship supervisor and the professional from the work setting. The student is required to be in the work setting for at least 120 hours during the semester. This internship provides students with a unique way to gain real life experience in the legal arena in combination with acquiring course credit. Prerequisite(s): (PL 100 and PL 200 and PL 203 and PL 204 and PL 205) and (College Level=Junior or College Level=Senior)) or Major=BS English - Prelaw.

PL 499. Topic/. 3 Hours.
This course is intended to provide the opportunity to offer advanced courses in paralegal studies that would not normally be a part of the Husson curriculum. As such the topics will depend upon the interests of students and faculty.

A.S. Paralegal Studies

Associate of Science in Paralegal Studies students are expected to complete 61 credit hours of course work and related activity in the Associate of Science program. This program emphasizes professional courses and provides a foundation in accounting, microcomputing, writing, and communication. After students complete one year of course work, they will be eligible to do internships in agencies, offices, courts and businesses for hands-on experiential learning in the field. This program will prepare graduates for entry level positions in the profession. Students have the opportunity to choose one upper level elective course as they progress through the program.

The program objectives for the A.S. Paralegal Studies are:

- To demonstrate excellent or outstanding understanding of the key concepts of the Legal Profession by:
  - Critical Thinking Skills
  - Organizational Skills
  - Legal Research Skills
  - Legal Writing Skills
  - Demonstrating professionalism
  - Using legal terminology correctly

- To demonstrate excellent or outstanding ability to apply ethical decision-making skills and integrity in an ever changing global environment.

- To demonstrate excellent or outstanding ability to produce and present effective oral and written forms of communication.

PL 203. Civil Litigation. 3 Hours.
This course surveys civil litigation issues covering the concepts and procedural rules designed to proceed from the initial client interview through trial. The student will gain a basic understanding of federal and Maine procedural rules and substantive law. In addition, the student will learn about the following: types of litigation, negligence cases, collection cases, commercial litigation, preparation of pleadings, discovery and settlements.

PL 205. Legal Research and Writing. 3 Hours.
This course introduces manual legal research including understanding legal citations, primary and secondary authorities, federal and state reporters, Shepardizing, and other research tools. Use of the Penobscot County Law Library is mandatory. Finally, students will explore the basic of legal writing including legal correspondence and legal memoranda. Prerequisite(s): PL 100 or Major=BS English - Prelaw.

PL 299. Topic/. 3 Hours.
This course is intended to provide the opportunity to offer introductory courses in paralegal studies that would not normally be a part of the Husson curriculum. As such the topics will depend upon the interests of students and faculty.

PL 300. Criminal Law. 3 Hours.
Family law covers all major subjects from marriage, divorce, child protection, and support, and child abuse and neglect. Our study includes a look at the economics of marriage and divorce, as well as some of the most cutting edge social and even scientific issues in the news. The main purpose of this course is to introduce major terms, topics, and issues. Prerequisite(s): PL 205 or Major=BS English - Prelaw.

PL 301. Torts. 3 Hours.
Topics may vary from year to year, but will generally include a detailed treatment of defamation and privacy, and the torts relating to the intentional infliction of purely economic loss. Contemporary issues in the law of negligence (i.e. liability in negligence for purely economic loss; actions for wrongful birth and wrongful life); and new applications of the law of trespass, with implications for civil liberties and privacy; for regulating non-consensual medical procedures; and for intervening in abusive domestic relationships. Prerequisite(s): PL 205.

PL 302. Family Law. 3 Hours.
Family law covers all major subjects from marriage, divorce, child protection, and support, and child abuse and neglect. Our study includes a look at the economics of marriage and divorce, as well as some of the most cutting edge social and even scientific issues in the news. The main purpose of this course is to introduce major terms, topics, and issues. Prerequisite(s): PL 205 or Major=BS English - Prelaw.

PL 303. Alternative Dispute Resolution. 3 Hours.
This course is designed in response to an area of the law that is growing, and offers students practical instruction to assist in their future job placements. The course treats the full range of modern dispute resolution from inaction through mediation, arbitration, litigation and private judging. Looking at the full range of conflict resolution options, class inquiry will focus on the selection of the appropriate resolution process for a given case. Class discussions and problem solving will follow a concept-example, concept problem, and concept example-problem format. Prerequisite(s): PL 100 or Major=BS English - Prelaw.

PL 304. Alternative Dispute Resolution II. 3 Hours.
This course is a continuation of PL 303 which is designed in response to an area of the law that is growing, and offers students practical instruction to assist in their future job placements. The course explores in more depth the full range of modern dispute resolution with a focus on conflict resolution skills, including mediation. Class discussions and problem solving will follow a concept-example, concept problem, and concept examples-problem format. Prerequisite(s): PL 303.

PL 305. Legal Ethics. 3 Hours.
This course will cover the nature of the ethical responsibilities of a paralegal working in a law office, as well as the limits on independent practice. It will cover the Maine Code of Professional Responsibility as well as the ABA Model Rules and Code. Prerequisite(s): PL 100 or Major=BS English - Prelaw.
PL 309. Constitutional Law. 3 Hours.
This course will explore the First, Second, Fourth, Fifth, Sixth, Eighth and Fourteenth Amendments of the Constitution through reading of case law and real life examples. Students will understand the arguments that exist for persons involved in civil and criminal matters from the Constitution. Prerequisite(s): PL 200.

PL 400. Evidence. 3 Hours.
This course will present the basic principles of the law of evidence as expressed in the Federal Rules of Evidence and the Maine Rules of Evidence. The student will develop the ability to read and apply a rule of evidence to specific information and circumstances. An emphasis will be placed on learning how the Federal & Maine Rules of Evidence effect trial preparation, negotiation, and trial. Participatory role play and discussion of hypothetical situations will constitute a significant part of the learning experience. Prerequisite(s): Major=AS Paralegal or Major=BS Paralegal or Major=AS Criminal Justice or Major=BS Criminal Justice or Major=BS English - Prelaw.

PL 401. Domestic Violence Law. 3 Hours.
This course introduces domestic violence law from an interdisciplinary perspective and offers a contemporary view of the criminal justice and paralegal experience with diverse forms of violence and populations. Comprehensive inclusion of violence perpetrated in a variety of gender and age relationships; dating violence; sibling abuse; rape and incest; child and elder abuse and neglect; male battering; lesbian and gay violence; and violence against women. Prerequisite(s): CJ 101 or PL 100 or Major=BS English - Prelaw.

PL 403. Advanced Legal Writing. 3 Hours.
Cultivating analytical research and writing skills through problem-based learning is the aim of this course. Actual factual situations will be used to hone skills such as: identification of legal issues; research strategy and methodology formulation; use of relevant secondary sources; integration of print sources with non-print sources (electronic databases, CD-ROMs and the Internet); analyzing and synthesizing primary sources that are applicable; critical thinking applications; and writing clearly, concisely, logically and effectively. Skill development in these areas will assist students in their academic course work and prepare them for their professional careers. Prerequisite(s): PL 205 or Major=BS English - Prelaw.

PL 404. Civil Litigation II. 3 Hours.
The objective of the course is to familiarize the student with Discovery and Trial preparation, identifying legal elements of a case, Rules of Civil Procedure, Rules of Evidence, interviewing witnesses, obtaining evidence, Interrogatories, depositions, medical records and organizing evidence for trial, all with an emphasis on Maine Law. Prerequisite(s): PL 203.

PL 405. Workers Compensation. 3 Hours.
Study of the nature, development and exclusive nature of worker compensation and concepts. Topics include: arising out of employment, personal injury by accident, disease, employment status, specific inclusions or exemptions, benefits, employee and employer misconduct, third party action, adjective law, conflict of laws, insurance, and relation to other kinds of wage-loss protection. Prerequisite(s): PL 205 and PL 203.

PL 407. Legal Studies Capstone. 3 Hours.
This capstone course provides students with an opportunity to engage in advanced analysis, research and writing projects, integrating prior course work and further developing paralegal skills. Students will prepare a portfolio of documents, essays and projects that demonstrate core competencies. Job search strategies and continuing education opportunities will be discussed. Students will prepare for and complete a comprehensive, substantive assessment after review of various content areas. Prerequisite(s): (PL 100 or Major=BS English - Prelaw) and PL 203 and PL 205.

PL 498. Paralegal Internship. 3-9 Hours.
This course will require a student to serve as an intern with a professional in a work setting that requires and develops both legal knowledge and approaches to problem identification, analysis, and critical thinking. The student will be evaluated by both the internship supervisor and the professional from the work setting. The student is required to be in the work setting for at least 120 hours during the semester. This internship provides students with a unique way to gain real life experience in the legal arena in combination with acquiring course credit. Prerequisite(s): ((PL 100 and PL 200 and PL 203 and PL 204 and PL 205) and ( College Level=Junior or College Level=Senior)) or Major=BS English - Prelaw.

PL 499. Topic. 3 Hours.
This course is intended to provide the opportunity to offer advanced courses in paralegal studies that would not normally be a part of the Husson curriculum. As such the topics will depend upon the interests of students and faculty.

Paralegal Certificate

The Paralegal Certificate Program provides students with an understanding of the basic areas of law. Many students entering this program are changing careers and returning as non-traditional students. As such, they may not be able to maintain a full-time course load, nor do they need to complete a full degree in Paralegal Studies to obtain a job in a law office. This program also meets the needs of students who are already practicing as paralegals, but their employers would like them to expand their knowledge base. This program will enable paralegal students to earn a certificate in the area of paralegal studies. Students will be required to complete 15 credit hours (5 courses). Students can who complete this Certificate can continue their studies with an Advanced Civil Practice or Advanced Criminal Practice Certificate.

Total Hours 15
Candidates for a Certificate Paralegal Studies are required to complete a minimum of 15 semester credit hours maintaining a 2.0 overall cumulative grade point average.

Courses

PL 100. Intro to Legal Studies. 3 Hours.
This course is designed to educate students in the American legal system focusing on the origins and history of the American legal system, the meaning and application of important legal terminology, and attorney and paralegal ethics.

PL 200. Criminal Law. 3 Hours.
The substantive goal of this course is to cover the basic principles of criminal law, including the common law of crimes as well as the Maine Criminal Code and the Model Penal Code. The methodological role of the course is that of statutory construction - the techniques of applying legislative enactments to varying fact situations in light of text, history, purpose and structural context. All of this will proceed with the underlying assumption that it is always necessary to judge rules of law according to their effectiveness and desirability.

PL 201. Real Estate Law. 3 Hours.
This course presents a systematic study of the basic principles of real property law through explanation, discussion and problem-solving techniques. The course provides a decision-oriented approach to legal concepts, featuring student completion of a complete abstract of title at the Penobscot County Registry of Deeds; real estate forms; and comprehension of relevant Maine statutes.

PL 203. Civil Litigation. 3 Hours.
A survey of civil litigation issues covering the concepts and procedural rules designed to proceed from the initial client interview through trial. The student will gain a basic understanding of federal and Maine procedural rules and substantive law. In addition, the student will learn about the following: types of litigation, negligence cases, collection cases, commercial litigation, preparation of pleadings, discovery and settlements.

PL 204. Introduction to Wills, Estates, and Trusts. 3 Hours.
This course examines the general theory and procedures, legal and administrative, employed in the preparation and handling of wills, trusts, and estates. This course will prepare students to understand the basic concepts in the field and be able to apply these concepts to perform the tasks of a probate paralegal.

PL 205. Legal Research and Writing. 3 Hours.
This course introduces manual legal research including understanding legal citations, primary and secondary authorities, federal and state reporters, Sheparding, and other research tools. Use of the Penobscot County Law Library is mandatory. Finally, students will explore the basic of legal writing including legal correspondence and legal memoranda. Prerequisite(s): PL 100 or Major=BS English - Prelaw.

PL 299. Topic/. 3 Hours.
This course is intended to provide the opportunity to offer introductory courses in paralegal studies that would not normally be a part of the Husson curriculum. As such the topics will depend upon the interests of students and faculty.

PL 301. Torts. 3 Hours.
Topics may vary from year to year, but will generally include a detailed treatment of defamation and privacy, and the torts relating to the intentional infliction of purely economic loss. Contemporary issues in the law of negligence (i.e. liability in negligence for purely economic loss; actions for wrongful birth and wrongful life); and new applications of the law of trespass, with implications for civil liberties and privacy; for regulating non-consensual medical procedures; and for intervening in abusive domestic relationships. Prerequisite(s): PL 205.

PL 302. Family Law. 3 Hours.
Family law covers all major subjects from marriage, divorce, child procreation and support, and child abuse and neglect. Our study includes a look at the economics of marriage and divorce, as well as some of the most cutting edge social and even scientific issues in the news. The main purpose of this course is to introduce major terms, topics, and issues. Prerequisite(s): PL 205 or Major=BS English - Prelaw.

PL 303. Alternative Dispute Resolution. 3 Hours.
This course is designed in response to an area of the law that is growing, and offers students practical instruction to assist in their future job placements. The course treats the full range of modern dispute resolution from inaction through mediation, arbitration, litigation and private judging. Looking at the full range of conflict resolution options, class inquiry will focus on the selection of the appropriate resolution process for a given case. Class discussions and problem solving will follow a concept-example, concept problem, and concept example-problem format. Prerequisite(s): PL 100 or Major=BS English - Prelaw.

PL 304. Alternative Dispute Resolution II. 3 Hours.
This course is a continuation of PL 303 which is designed in response to an area of the law that is growing, and offers students practical instruction to assist in their future job placements. The course explores in more depth the full range of modern dispute resolution with a focus on conflict resolution skills, including mediation. Class discussions and problem solving will follow a concept-example, concept problem, and concept example-problem format. Prerequisite(s): PL 303.

PL 305. Legal Ethics. 3 Hours.
This course will cover the nature of the ethical responsibilities of a paralegal working in a law office, as well as the limits on independent practice. It will cover the Maine Code of Professional Responsibility as well as the ABA Model Rules and Code. Prerequisite(s): PL 100 or Major=BS English - Prelaw.

PL 309. Constitutional Law. 3 Hours.
This course will explore the First, Second, Fourth, Fifth, Sixth, Eighth and Fourteenth Amendments of the Constitution through reading of case law and real life examples. Students will understand the arguments that exist for persons involved in civil and criminal matters from the Constitution. Prerequisite(s): PL 200.

PL 400. Evidence. 3 Hours.
This course will present the basic principles of the law of evidence as expressed in the Federal Rules of Evidence and the Maine Rules of Evidence. The student will develop the ability to read and apply a rule of evidence to specific information and circumstances. An emphasis will be placed on learning how the Federal & Maine Rules of Evidence effect trial preparation, negotiation, and trial. Participatory role play and discussion of hypothetical situations will constitute a significant part of the learning experience. Prerequisite(s): Major=AS Paralegal or Major=BS Paralegal or Major=AS Criminal Justice or Major=BS Criminal Justice or Major=BS English - Prelaw.
PL 401. Domestic Violence Law. 3 Hours.
This course introduces domestic violence law from an interdisciplinary perspective and offers a contemporary view of the criminal justice and paralegal experience with diverse forms of violence and populations. Comprehensive inclusion of violence perpetrated in a variety of gender and age relationships; dating violence; sibling abuse; rape and incest; child and elder abuse and neglect; male battering; lesbian and gay violence; and violence against women. Prerequisite(s): CJ 101 or PL 100 or Major=BS English - Prelaw.

PL 403. Advanced Legal Writing. 3 Hours.
Cultivating analytical research and writing skills through problem-based learning is the aim of this course. Actual factual situations will be used to hone skills such as: identification of legal issues; research strategy and methodology formulation; use of relevant secondary sources; integration of print sources with non-print sources (electronic databases, CD-ROMs and the Internet); analyzing and synthesizing primary sources that are applicable; critical thinking applications; and writing clearly, concisely, logically and effectively. Skill development in these areas will assist students in their academic course work and prepare them for their professional careers. Prerequisite(s): PL 205 or Major=BS English - Prelaw.

PL 404. Civil Litigation II. 3 Hours.
The objective of the course is to familiarize the student with Discovery and Trial preparation, identifying legal elements of a case, Rules of Civil Procedure, Rules of Evidence, interviewing witnesses, obtaining evidence, Interrogatories, depositions, medical records and organizing evidence for trial, all with an emphasis on Maine Law. Prerequisite(s): PL 203.

PL 405. Workers Compensation. 3 Hours.
Study of the nature, development and exclusive nature of worker compensation and concepts. Topics include: arising out of employment, personal injury by accident, disease, employment status, specific inclusions or exemptions, benefits, employee and employer misconduct, third party action, adjective law, conflict of laws, insurance, and relation to other kinds of wage-loss protection. Prerequisite(s): PL 205 and PL 203.

PL 407. Legal Studies Capstone. 3 Hours.
This capstone course provides students with an opportunity to engage in advanced analysis, research and writing projects, integrating prior course work and further developing paralegal skills. Students will prepare a portfolio of documents, essays and projects that demonstrate core competencies. Job search strategies and continuing education opportunities will be discussed. Students will prepare for and complete a comprehensive, substantive assessment after review of various content areas. Prerequisite(s): (PL 100 or Major=BS English - Prelaw) and PL 203 and PL 205.

PL 498. Paralegal Internship. 3-9 Hours.
This course will require a student to serve as an intern with a professional in a work setting that requires and develops both legal knowledge and approaches to problem identification, analysis, and critical thinking. The student will be evaluated by both the internship supervisor and the professional from the work setting. The student is required to be in the work setting for at least 120 hours during the semester. This internship provides students with a unique way to gain real life experience in the legal arena in combination with acquiring course credit. Prerequisite(s): ((PL 100 and PL 200 and PL 203 and PL 204 and PL 205) and ( College Level=Junior or College Level=Senior)) or Major=BS English - Prelaw.

PL 499. Topic/. 3 Hours.
This course is intended to provide the opportunity to offer advanced courses in paralegal studies that would not normally be a part of the Husson curriculum. As such the topics will depend upon the interests of students and faculty.

Paralegal Certificate - Advanced Civil Practice
The Advanced Civil Practice Certificate Program provides Paralegal students with advanced instruction in civil litigation which will enable graduates to demonstrate at a higher level the competencies outlined by the American Association for Paralegal Education. Many students undertaking this program are changing careers and returning as non-traditional students. As such, they may not be able to maintain a full-time course load, nor do they need to complete a full degree in Paralegal Studies to obtain a job in a law office. This program also meets the needs of students who are already practicing as paralegals, but their employers would like them to expand their knowledge base. This program will enable paralegal students who have already earned a Paralegal Certificate to earn an advanced certificate in the area of civil litigation.

Sport Management

Husson University’s Bachelor of Science in Sport Management, offered through the School of Hospitality, Sport, and Tourism Management in the College of Business, blends two distinct fields of study – sport and business administration – so as to prepare students for careers in this field.

The sport management curriculum emphasizes experiential learning through the practical assignments integrated into the sport management courses and Husson students are required to complete at least nine credit hours of internship experience with a sport organization. Additionally, through collaboration with the National Interscholastic Athletic Administrators Association (NIAAA), student will complete the academic requirements for the NIAAA’s Certified Athletic Administrator (CAA) and the Registered Athletic Administrator (RAA).

Students can pursue a B.S. Sport Management degree or combine the B.S. degree with an MBA to complete both degrees in 5 years. Students may also choose a minor in Coaching or Tourism and Recreation Management.

B.S. Sport Management

Students pursuing the B.S. Sport Management degree will be able to:

- Explain the major concepts in the functional areas of accounting, marketing, finance and management
- Evaluate the legal, social and economic environments of business
- Describe the global environment of business
- Apply ethical decision making skills and integrity in an ever-changing, global environment
- Demonstrate oral and written communication skills, appropriate to the profession
- Apply critical problem solving and professional skills in an experiential learning environment
- Demonstrate general and functional knowledge of Sport Management principles including: Behavioral Dimensions in Sport; Management and Organizational Skills in Sport; Governance and Legal Aspects in Sport; and Sustainability

In this program of study, students earn 121 credit hours, including 45 semester hours of required General Business courses and 39 semester hours of required Sport Management coursework in order to prepare for careers in this field. The continued success of our graduates is based upon a solid foundation of business and liberal arts knowledge combined with essential experiential learning activities.

### Courses

**SM 101. Intro to Sport Management. 3 Hours.**
Historical and philosophical aspects of sports management are covered together with an overview of current issues, and career opportunities in sports management. Students will formulate personal and career goals. Prerequisite(s): Major=BS Bus Ad - Sport Mgmt or Major=BS Sport Management.

**SM 201. Introduction to Sport Law. 3 Hours.**
This course provides students with a basic knowledge of the principles of law that regulate both the amateur and professional sports industries. In addition, students will become familiar with legal principles relating to contracts and property. The course materials will be taken primarily from sport and will concentrate on the many legal issues that regulate this unique industry. Special emphasis will be placed on the risks of litigation.

**SM 202. Hospitality and Sport Facility Design and Management. 3 Hours.**
This course is designed to introduce students to facility design and management in the hospitality and sport industry. The course will investigate theories and concepts utilized in the planning, construction, and management of new and existing hospitality and sport facilities as well as guidelines for evaluating the sustainability and life cycle of existing facilities.

**SM 203. Sport in Society. 3 Hours.**
This course is intended to provide an in depth study of sport in society. The course includes gender equity, deviance and aggression, race and culture, economics and social class, and the role of the media. Prerequisite(s): SM 101.

**SM 299. Topic/. 1-3 Hour.**
This course is intended to provide the opportunity to offer courses in Sport Management that would not normally be part of the Husson Curriculum. As such, the topics will depend upon the interests of the students and faculty.

**SM 300. Principles & Qualities of Coaching. 3 Hours.**
This 3-credit class is designed to educate, prepare and certify individuals to coach at all levels. Students will obtain an (ASEP) American Sports Education Program Certification upon completing the instruction and passing the test. A CPR and First Aid certificate will also be issued after completing the specific testing required. Principles and Quality of Coaching will cover all aspects of coaching including: Developing a coaching philosophy, effective communication among coaches, players, parents, officials, media and the community. How to conduct tryouts, motivating players, building a program, how to deal with college coaches recruiting players, practice plans, game preparation, etc.
SM 302. Sports Ethics. 3 Hours.
This course will focus on the exploration of contemporary values, issues, and controversies associated with sport and sport management. Current issues, ethical dilemmas in the sport environment, organizational responsibility, and professional ethics will be discussed. During this course, students will become involved with discussions on sportsmanship, fan behavior, performance-enhancing drugs, cheating and deception, the role of violence in sports, gender equity in sport, deviant behavior in athletics, and issues related to youth sports participation. This course will explore the various issues to be raised by encouraging discussion among the students, by conducting formal debates, and developing position papers on the subject matter.

SM 304. Principles of Sports Medicine. 3 Hours.
This course is designed to integrate basic medical concepts and related scientific information to provide a foundation in the prevention, recognition, assessment, management, disposition, and reconditioning of sport-related injuries and illnesses.

SM 307. Sport Finance. 3-3 Hours.
This course examines financial considerations relative to Sport Management, including: budgeting, fundraising, marketing and the economic impact of sport events. Although the focus of the course is on the two most visible segments of the sport industry – intercollegiate and professional athletics, sufficient attention is given to methods and strategies that may be applied across the discipline. Prerequisite(s): SM 101.

SM 322. Sport Marketing. 3 Hours.
This upper level major course examines the theories, fundamentals and practical applications of marketing for sport related organizations. It offers a broad perspective of the diverse segments that comprise the sport industry – the Sport Performance Segment; the Sport Production Segment; and the Sport Promotion Segment. For the purpose of this course, sport marketing is defined as, "the process of designing and implementing activities for the production, pricing, promotion, and distribution of a sport or sport business product to satisfy the needs or desires of consumers and to achieve the companies objectives." Students will gain experience working in groups and are encouraged to develop interpersonal skills that may be employed in future endeavors. Additional emphasis will be placed on the development of critical thinking, analytical, writing and oral communication skills. Prerequisite(s): BA 321.

SM 331. Governance and Policy in Sport. 3 Hours.
This course is an examination of the integration of management theory with sport governance and policy development practice. The course provides an overview of the sport industry that will provide students with an understanding of the authority, organizational structures, and function of the major governing bodies in the various segments of professional and amateur sport organizations at the local, national, and global levels. The study of policy development in educational, non-profit, professional, and international sport organizations in relation to governance issues will also be addressed.

SM 341. Recreational Programming and Event Management. 3 Hours.
This course is an examination of the principles and methods of program development, management, delivery, and assessment within the sport industry, specifically integrating youth, community and campus recreation. Using principles and practice of event coordination and administration, students will design, develop, and implement community-based programs and/or events, including competitive and non-competitive leagues and tournaments, and non-credit instructional sport programs, events, and services.

SM 407. Psychology of Sport. 3 Hours.
The focus is on how people behave in sport and exercise settings: motivation, anger, fear, and how such emotions affect performance; how emotions can be moderated and how behaviors can be made more effective are covered.

SM 409. Leadership in Sports Organizations. 3 Hours.
This course provides an in-depth study of leadership styles and their importance in the field of sports. Prerequisite(s): College Level=Senior.

SM 441. Outdoor Recreation Programming. 3 Hours.
This course is an examination of the values, principles and methods of program development, management, delivery, and assessment within the outdoor and adventure recreation industry. Additionally, the course will focus on environmental and governmental impact of outdoor and adventure recreation. The basic principles and procedures for developing outdoor recreation programs will be introduced while providing the opportunities to acquire and utilize recreation programming skills through practical application. Prerequisite(s): SM 341.

SM 496. Sports Management Internship. 3 Hours.
This course is designed to provide sport management students with practical work experience in a sports management environment.

SM 497. Intermediate Sport Management Internship. 3 Hours.
This course is designed to provide sport management students with practical work experience in a sport business setting. This college-supervised internship builds upon the SM 496 internship experience to provide the student with additional exposure to the sport industry. A journal and written assignments are required components of the internship experience.

SM 498. Advanced Sport Management Internship. 3 Hours.
This course is designed to provide sport management students with practical work experience in a sport business setting. This college-supervised internship builds upon prior internship experiences to provide the student with additional exposure to the sport industry. A journal and written assignments are required components of the internship experience.

SM 499. Topic/. 1-3 Hour.
This course provides sport management students the opportunity to research and develop special projects within the realm of sport management. Open to Junior and Senior students only.

B.S. Sport Management/M.B.A.

Students may choose to complete both a B.S. in Sport Management combined with an MBA degree in as little as 5 years. This combination of an undergraduate and graduate degree will provide them with more management and other promotion opportunities throughout their careers. Students will complete the program objectives for both the B.S. Sport Management and MBA degrees.

### Minors

#### Coaching Minor
The minor in coaching prepares students interested in pursuing a career in coaching. The minor includes study of the physical, social, medical, and strategies of coaching individual and team sports and the application of these principles in an actual coaching setting through a practicum experience. The minor fulfills the state of Maine coaching endorsement requirements.

#### Tourism and Recreation Minor
The minor in Tourism and Recreation Management prepares students to pursue career options in the tourism and outdoor recreation field. The minor provides basic knowledge of recreation, tourism and park services, and an understanding of the benefits of leisure and recreation in our society. To complete the minor, students must take 18 hours of required courses which will provide undergraduates with the opportunity to explore recreation, parks, and leisure services.

* Fall Semester Course  
** Spring Semester Course

Upon successful completion of the course, students will be able to:

1. develop an understanding of the competencies required to develop outdoor program in a variety of settings;
2. understand and apply basic outdoor programming terminology and the theories of outdoor and adventure-based programming;
3. recognize the philosophical basis and values of outdoor and adventure-based programming to the individual;
4. to increase understanding of natural resource management, ecosystem management, outdoor recreation, tourism, visitor management, and the relationships among them;
5. describe the management focus of the federal agencies responsible for managing wilderness and back-country recreation lands;
6. develop an understanding of theories and practical programming methods that are relevant to the delivery of quality outdoor and adventure-based programming within any agency; and
7. propose, plan, execute, and evaluate an outdoor and adventure-based program and/or special events

### Army R.O.T.C.
Army ROTC is a college elective program designed to develop individual leadership skills for either a military or civilian career. Husson students can participate in the ROTC program during freshman and sophomore college years without any military obligation. Credits from ROTC courses can be applied to traditional degree programs like business, criminal justice or nursing. Students will take classes at Husson during their first two years with some physical fitness at the University of Maine campus in Orono. Students will join with University of Maine colleagues in their third and fourth years for classes on the Orono campus.

Army ROTC gives students a wide range of experiences while you work toward your college degree. ROTC combines classroom instruction with hands-on training. The results are skills that give an edge over peers when it comes time to look for a job. Participants may gain scholarship status in their second year and graduate from ROTC as second lieutenants in the Army.

Courses in the program include:

</table>

ROTC courses may be applied to degree programs at Husson as follows (individual curriculum assessment will be done for each student):
ML 101 & ML 201 = Open elective credit
ML 102 & ML 202 = Open elective credit
ML 301 = CJ elective, open elective or BA 310 credit
ML 302 = BA 302, CJ 330 or open elective credit
ML 350 = Open elective
ML 390 = Open elective
ML 401 = BA elective, BA 351 or CJ 435 credit
ML 402 = BA elective, CJ elective or open elective credit
ML 410 = BA elective, CJ elective or open elective credit
ML 420 = BA elective, CJ elective or open elective credit

Graduate Programs in the College of Business

The College of Business offers the following graduate programs in Business and Criminal Justice Administration:

- Master of Business Administration (MBA)
- Master of Science in Criminal Justice Administration (MSCJA)
- Certificate Counter Terrorism and Security

Please refer to the pages specific to the programs for more detailed information.

College of Business Transfer Credit Policy

For graduate programs, credits which were earned more than five years from the time of application may not be transferable. All transfer credits will be reviewed by Directors of the Schools within the College of Business individually.

Graduate Programs in Business

The Master of Business Administration Program reflects Husson’s belief that a good education is more than a matter of theory and books. Active classrooms, courses tied closely to actual management experience, and a diverse student body representing various academic and industry backgrounds contribute to a broader, more useful education. Our program is distinguished by the following:

- Master of Business Administration (MBA)
- Master of Business Administration (MBA) - Biotechnology & Innovation
- Master of Business Administration (MBA) - Healthcare Management
- Master of Business Administration (MBA) - Hospitality & Tourism Management
- Master of Business Administration (MBA) - Organizational Management
- Master of Business Administration (MBA) - Risk Management
- Master of Science in Criminal Justice Administration (MSCJA)
- Certificate Counter Terrorism and Security

Students from a Variety of Backgrounds

In the Master of Business Administration Program, there are no undergraduate prerequisites to graduate-level course work. Working professionals with bachelor’s degrees from a wide range of fields find the program well suited for continuing professional development.

Admission

Application for admission to the Master of Business Administration Program at Husson should be made to:

The School of Graduate Studies
Husson University
One College Circle
Bangor, Maine 04401
1-800-4-HUSSON

To be admitted, an applicant must have received a baccalaureate degree from an accredited institution and possess a demonstrable ability and motivation to pursue graduate-level work. Evidence of such may include, but not be limited to:

- Letters of recommendation
- Previous college or university work
- Resume (Optional)
- Statement of Purpose essay

An application is not considered complete until the following are received:

- An application with the $50 application fee
- Official transcripts from each college or university attended
- One letter of recommendation
- Immunization Records
- Statement of Purpose essay
- ALC Scores (if required)

Status

An applicant’s admission status is one of the following:

Regular: Students whose applications are complete and who are accepted by the Graduate Admissions Committee without condition are admitted as regular graduate students.

Conditional: In reviewing a candidate’s application, the Graduate Admissions Committee may recommend that a student be accepted on a conditional basis. This status is assigned to those students who are taking graduate courses, but whose applications are not yet complete. The letter of acceptance will contain the conditions that must be met before the student can be reclassified for regular status. No more than
6 credit hours in conditional status may be applied toward the master's degree.

Non-degree: This status is assigned to those students who are taking graduate courses, but who have not yet applied to the Master of Business Administration Program. Admission as a non-degree student does not necessarily mean that the student will be accepted as a regular student when and if application is made for such status. No more than 6 credit hours in non-degree status may be applied toward the master's degree. Admission to non-degree status requires the submission of official undergraduate transcripts.

Academic Standards

Students must maintain a “B” average (3.0) in order to continue in a graduate program. A student whose average falls below 3.0, who earns a grade lower than a “C,” or who earns more than two grades of “C” or “C+,” will be reviewed by the Graduate Academic Program Committee, which may dismiss the student or determine the conditions under which the student may continue in the program. No more than six credits of course work in the “C” range can be applied toward the master’s degree. A student who has not attained a grade point average of 3.0 or better at the end of his or her program of study will not graduate.

Students may elect to repeat courses in which they have received a grade of “C” or below, but may not attempt a course more than three times. The newly earned grade will replace the original grade in the calculation of the student’s cumulative grade-point average, regardless of whether the new grade earned is higher or lower than the previous grade. The former grade is retained as originally recorded in the student’s transcript. Students cannot repeat a course that has been removed from the curriculum unless another course has been designated as an approved alternative for the deleted course. When a student receives a failing grade (X, F, or FW) in a topics course (usually designated by a course number 799) and seeks to repeat the course, the Dean of the School in which the course was offered may authorize a comparable course to be taken as a substitute. The grade in the designated substitute course will replace the failing grade in calculating the student’s grade-point average.

A student required to repeat a course will be charged full tuition for the course.

Transfer Credit

Normally six credits of appropriate graduate-level course work, earned within five years of entry into the Husson program, may be transferred from an accredited institution, if the grades earned in such course work are “B” or better.

In special circumstances, an individual who has begun a graduate management program at another accredited institution may transfer up to nine credits from the program, if those credits have been earned within five years of the date of entry to the Husson program. Likewise, an individual who relocates out of the area may, with prior approval of the Dean, transfer back to the Husson program up to nine credits of graduate-level course work from an accredited institution in order to complete the requirements for the Master in Business Administration degree. Only credits earned in course work completed with a grade of “B” or better will be eligible for transfer.

International Students

The international applicant is expected to submit the same credentials as other students, including transcripts of courses taken and examination results. If the documents are not in English, they must be accompanied by an English translation certified by the same issuing authority or by a reputable translation service.

Applicants whose native language is not English must demonstrate proficiency in reading, writing, speaking and understanding English. Successful completion of a minimum of four undergraduate courses at Husson University or another accredited U.S. College or university is required. Two of the courses must be in English, technical writing, or a related area. The remaining two courses must be in business or a related field. A grade of “C” or higher must be earned in each composition course and a grade of “B” or higher in each business course.

Master of Business Administration

Established in 1978, the Master of Business Administration Program reflects Husson’s long-standing commitment to education for leadership in business. The University believes such education is more than a matter of theory and books. Active classrooms, courses tied closely to actual management experience, and a diverse student body representing various academic and industry backgrounds contribute to a broader, more useful education.

Classes are scheduled on evenings, weekends and online to accommodate participants’ work schedules. A part-time student can complete the program in two years without career interruption. The program is offered at the Husson Campus in Bangor, at the University’s Southern Maine campus in Westbrook, at the Presque Isle Center, Online, and at selected other off-campus locations.

Husson University has affiliation agreements with Unity College, University of Maine Presque Isle and University of Maine Fort Kent which allow their undergraduate students to take courses in the Master of Business Administration and the Master of Science in Criminal Justice Administration Programs. This enables these students to graduate with a Baccalaureate degree from their respective institution and a Master’s Degree from Husson University.

Students in the Master of Business Administration degree will be able to:

• Recognize business problems
• Integrate theories and practice to perform strategic analysis
• Demonstrate effective written forms of communication and oral business presentations
• Work effectively in diverse teams
• Apply decision-making techniques, using both quantitative and qualitative analysis, to management issues

Core Requirements

The core curriculum in the Husson University Master of Business Administration Program consists of eight required courses. Four additional courses, selected from a range of electives, make up the thirty-six credits required for completion of the program.

Students with a strong background in one or more of the required course areas may, with approval, substitute an elective for the course(s) in question. The core curriculum is as follows:

<table>

BA 760 Technology & Innovation
BA 761 Biotechnology: The Business of Genetics
BA 762 Groupthink
BA 763 Biotechnology & Innovation: Intellectual Property
BA 799 Topic/ (Biotechnology Mgmt Elective)
CJ 705 Leadership & Ethics

Total Hours 36

Students who wish to focus their course work in healthcare management are expected to complete the Master of Business Administration core curriculum, take four of the industry specific courses listed below, and complete one other elective course sufficient to satisfy the thirty-six credit hour requirement.

The program objective of the concentration is to have students demonstrate knowledge of key functions and issues in the healthcare industry including: healthcare economics, healthcare law, ethical issues pertinent to healthcare organizations, identification of unique management issues encountered by healthcare organizations, and financial management in healthcare organizations. Students will also complete the MBA program objectives.

The healthcare management courses are:

BA 600 Research Methods in Business and Education 3
BA 601 Managerial Economics 3
BA 602 Managerial Accounting 3
BA 605 Management Communications 3
BA 625 Global Strategic Management 3
BA 643 Strategic Change Management 3
BA 703 Financial Management in Healthcare Organizations

BA Graduate Elective 3
Select One of the Following
BA 621 Marketing Management 3
BA 712 Strategic Marketing for Nonprofit Organizations
BA 720 Advanced Sales and Marketing in Hospitality

Select Three of the Following 9
BA 700 Health Care Management
BA 701 Legal Environment of Health Care Management
BA 702 Health Care Economics
BA 704 Managing Quality in Healthcare
BA 705 Global Perspectives in Healthcare
BA 799 Topic/ (Healthcare Management Elective)

Total Hours 36

**MBA Hospitality Management**

While the Master of Business Administration Program has been designed primarily for the education of management generalists, the curriculum does contain a specialized program option in hospitality & tourism management. Students who wish to focus their course work in the hospitality and tourism sector are expected to complete the Master of Business Administration core curriculum, take the industry specific courses listed below, and complete a hospitality graduate directed practicum.

The program objective for the concentration is to have students demonstrate knowledge of key functions of the hospitality and tourism industry including: hospitality law, convention and events planning, sales and marketing, food and beverage service management, and front office operations. Students will also complete the MBA program objectives.

The hospitality & tourism management courses are:

BA 600 Research Methods in Business and Education 3
MBA Organizational Management

The Organizational Management Concentration allows students to focus their studies in the areas of leadership, organizational dynamics, and human resource management.

The program objective for the concentration is to have students demonstrate knowledge of major management and leadership practices and theories. Students will also complete the MBA program objectives.

Students in the Organizational Management Concentration will complete the Master of Business Administration core curriculum as well as four of the concentration-specific electives listed below.

**MBA Risk Management**

Risk and uncertainty are present in all types of businesses and organizations. Inadequate risk management can result in severe consequences for organizations. Focused on the identification, assessment, and prioritization of risks, the Risk Management concentration of the MBA program is designed to instill the knowledge and skills necessary to successfully manage in times of uncertainty. Students will learn to understand, analyze, and address risk to ensure that organizations achieve their objectives.

**Graduate Program in Criminal Justice Administration**

The Master of Science in Criminal Justice Administration Program reflects Husson's long-standing commitment to education for professional leadership. The program was developed in response to the Law Enforcement community's expressed need to have education beyond the B.S. in Criminal Justice. Active classroom discussion, courses tied closely to field experience, and a diverse student body contribute to a relevant and outstanding educational experience.

In the program, there are no undergraduate prerequisites to graduate-level course work. Working professionals with bachelor's degrees from a wide range of fields find the program well suited to balancing current job demands with the need for continuing professional development. If a student does not have an undergraduate degree in Criminal Justice or a related degree or does not have experience working in a criminal justice related career field, then the student will need to take a graduate level introductory course on criminal justice professions and material related to law enforcement, corrections, and the court system. The student will complete 36 credits for this program.

Classes are scheduled on evenings and weekends to accommodate participants' work schedules. The part-time student can complete the program in two and one-half years without career interruption. The program is offered on the Husson Campus in Bangor, at the University's Southern Maine and Northern Maine locations, and online.
Admission

Application for admission to the Master of Science in Criminal Justice Administration Program at Husson should be made to:

School of Graduate Studies
Husson University
One College Circle
Bangor, Maine 04401
1-866-567-5990

To be admitted, an applicant must have earned a baccalaureate degree from an accredited institution of higher education and must show promise of ability and motivation to pursue graduate-level work. This requirement is determined by the Graduate Committee based on the following factors:

- A personal interview with the Director of the M.S. in Criminal Justice Administration Program.
- Letters of recommendation.
- Previous college or university work.
- Previous work experience.

Status

An applicant’s admission status is one of the following:

Regular: Students whose applications are complete and who are accepted by the Graduate Admissions Committee without condition are admitted as regular graduate students.

Conditional: In reviewing a candidate’s application, the Graduate Admissions Committee may recommend that a student be accepted on a conditional basis. The letter of acceptance will contain the conditions that must be met before the student can be reclassified for regular status.

Non-degree: This status is assigned to those students who are taking Husson University graduate courses for professional development or personal enrichment, but do not plan to formally apply to a program of study. Admission as a non-degree student does not necessarily mean that the student will be accepted as a regular student when and if application is made for such status. No more than 6 hours in non-degree status may be applied toward the master's degree. Admission to non-degree status requires the submission of an official undergraduate transcripts.

Academic Standards

Students must maintain a “B” average (3.0) in order to continue in a graduate program. A student whose average falls below 3.0, who earns a grade lower than a “C,” or who earns more than two grades of “C” or “C+,” will be reviewed by the Graduate Academic Program Committee, which may dismiss the student or determine the conditions under which the student may continue in the program. No more than six credits of course work in the “C” range can be applied toward the master’s degree. A student who has not attained a grade point average of 3.0 or better at the end of his or her program of study will not graduate.

Transfer Credit

Normally six credits of appropriate graduate-level course work, earned within five years of entry into the Husson program, may be transferred from an accredited institution, if the grades earned in such course work are “B” or better.

In special circumstances, and individual who has begun a graduate program at another accredited institution may transfer up to nine credits from the program, if those credits have been earned within five years of the date of entry to the Husson program. Likewise, an individual who relocates out of the area may, with prior approval of the Dean, transfer back to the Husson program up to nine credits of graduate-level course work from an accredited institution in order to complete the requirements for the M.S. in Criminal Justice Administration degree. Only credits earned in course work completed with a grade of “B” or better will be eligible for transfer.

Program Information

The core curriculum in the Husson University Master of Science in Criminal Justice Administration program consists of five Criminal Justice courses, and five required and two elective Graduate Business courses. Students with a strong background in one or more of the required course areas may, with approval, substitute an elective for the course(s) in question. NOTE: CJ 700 Introduction to Criminal Justice Administration is required in addition to the five Criminal Justice courses if the student has no prior school or work background in Criminal Justice. In addition to the CJ courses listed in the first box below, students may take special topics in Criminal Justice courses (CJ 799) to fulfill the 5 CJ designated course requirement. Topics will vary but may include: Current Topics in Criminal Justice, Current Topics in Corrections, and Crime and the Media.

M.S. in Criminal Justice Administration

The Master of Science in Criminal Justice Administration Program is a thirty-six credit graduate management curriculum designed to develop and strengthen skills in analysis, decision-making, and implementation. The program balances strengths in the traditional areas of law, budgeting, and policy-making, with careful attention to the development of skills in communication, interpersonal relations, psychology and leadership essential to effective performance in organizations. Students also have the opportunity to participate in experiential internships with organizations related to the Criminal Justice field that they choose.

Students who successfully complete the MSCJA degree will be able to:

1. Analyze how criminal justice policy is formulated at the federal, state and local level within a political, economic and social context.
2. Articulate the roles and functions of the various components of the criminal justice system.
3. Apply decision-making techniques, using quantitative and qualitative analysis, and theory to management issues.
4. Understand the cultural context in which the criminal justice system operates.
5. Demonstrate leadership skills through effective written and oral communication.
6. Use current technology to access information, analyze and interpret data, and generate reports.
7. Demonstrate effective team work with a diverse group.

The following classes must be completed for this degree program:

**Certificate in Counter Terrorism and Security**

The 21st century ushered in a new era of global terrorism launched by the attacks on 9/11. Intermittent events of terrorism around the world remind us that the threat persists and continues to grow. At the root of global terrorism is a radical strain of Islamic fundamentalism that finds adherents from Saharan/sub Saharan Africa across the Middle East through Central and west/east Asia as well as Europe and North America. This global jihadist movement challenges governments and multinational organizations to maintain their traditional openness and freedoms of operation while installing security procedures and systems to counter this terrorist threat. This certificate is designed provide a foundational understanding of this threat for law enforcement, military, and corporate security officers who act as the first line of defense against terrorist acts. This certificate is intended for participants interested in a career in homeland security at federal, state and local levels in counter terrorism agencies. This certificate is offered at both the undergraduate and graduate levels. Credits from this graduate certificate can be applied to the M.S. Criminal Justice Administration degree.

The College of Health and Education (COHE) supports the mission and vision of the university by offering fully accredited undergraduate and graduate professional programs that are grounded in the sciences and humanities. We offer degrees in Occupational and Physical Therapy, Nursing, Counseling, and Education. Students interested in careers in Nursing, Counseling and Education can choose from several tracks at both the undergraduate and graduate levels and Occupational and Physical Therapy students earn bachelor's degrees in Healthcare Studies or Kinesiology respectively on the pathway to earning their Master of Science in Occupational Therapy or their Doctor of Physical Therapy.

COHE Mission

The Husson University College of Health and Education inspires and prepares students for contemporary, evidence-based, and ethical practice in health, counseling, and education professions.

We foster student success by promoting:

- Professional identity
- Self-directed learning
- Critical reflection and scholarship
- Practice focused on the individuals, families, groups and populations we serve
- Integration of state-of-the-art technology
- Cultural competence, social justice, and advocacy for our clients and our professions.

COHE Vision

The College of Health and Education aspires to shape our students into compassionate and effective practitioners, leaders, and scholars who value inter-professional collaboration, lifelong learning, and global engagement.

Accreditation

Our programs are fully accredited or approved by one of the following agencies:

The Commission on Collegiate Nursing Education (CCNE)
The Commission on Accreditation in Physical Therapy Education (CAPTE)
The Accreditation Council for Occupational Therapy Education (ACOTE)
The Council for Accreditation of Counseling and Related Educational Programs (CACREP)
The National Board of Certified Counselors (NBCC)
The Maine State Board of Nursing
The Maine State Board of Education

Admissions Criteria

Each of our programs have admissions criteria unique to the discipline. Refer to your program of interest for detailed information about the qualifications for admissions into the program.

- B.S. Educational Studies (non-teaching track)
  - Elementary Education
  - Physical Education
- B.S. Physical Education (K-12)
- B.S. in Secondary Education, with concentrations in:
  - English (7-12)
  - Life Sciences (7-12)
  - Physical Science (7-12)
- Alternative Certifications (Pathways II)
  - Elementary Education
  - Secondary English
  - Secondary Life Sciences
  - Secondary Physical Science

Education

Features of the Programs
Program options in the School of Education are carefully designed to prepare future teachers to work with our nation’s youth. There are currently five majors at the baccalaureate level in the Teacher Education Program that will lead to eligibility for a provisional certificate granted by the Maine State Department of Education; Elementary Education (K-8), Physical Education (K-12), and Secondary Education (grades 7-12) with concentrations in English, Life Science, or Physical Science. Graduates of certification programs will become eligible to be licensed in Maine and/or in other states. Pre-service teachers are immersed in real-life applications while learning the theory, methods, and characteristics of diverse classroom settings. They are instilled with an enthusiasm for the teaching profession and a commitment to working successfully and supportively with learners in dynamic and diverse school settings.

The Educational Studies major is a baccalaureate level program with concentrations in Elementary Education or Physical Education for those interested in working in an alternative setting. This program prepares students through an internship experience for working in a non-classroom setting or in a community-based, youth-serving program like those offered at the YMCA/YWCA, museums and municipal recreation departments.

All School of Education programs feature integrated learning experiences, including several field placements in the community. Throughout the coursework, students are exposed to curriculum frameworks of various national and state standards. During coursework and field experiences, pre-service teachers become increasingly knowledgeable in theoretical models, curriculum and assessment practices, technology in education, diversity and multiculturalism, classroom management, differentiated instruction, and professional collaboration.

Graduates from the School of Education are equipped to compete for positions in Maine as well as nationally. They begin their careers as confident professionals ready to embrace their role in preparing their own students for work, higher education, citizenship, and personal fulfillment.

Admissions Standards
The following admission requirements apply for students wishing to enter or transfer into a Teacher Education Program leading to certification:
- Grade point average of at least 2.5
- If 45 or more credits are being transferred in, students must provide documentation of passing PRAXIS I Core scores and documentation of fingerprinting through the Maine Department of Education
- If less than 45 credits, SAT composite must be 890 with a minimum of 450 for Reading/Writing and 440 for Math, or ACT composite of 16 or above or documentation of passing PRAXIS I Core scores

The following admission requirements apply for students wishing to enter or transfer into an Educational Studies Program:
- Grade point average of at least 2.2
Clinical Experience

worth a total of 6 credit hours.

credit hour practicum experiences, and an Internship with a capstone worth a total of 15-credit hours. Undergraduates in Educational Experiences, and two 8-week student teaching placements with a capstone worth a total of 30 credit hours at Husson prior to Student Teaching.

Required Background Checks and Screening

Two levels of background check must be completed early in the program. Fingerprinting through the Maine Department of Education and a background check through CastleBranch are both required before students can participate in field experiences. A criminal record may jeopardize completion of a student's coursework and degree requirements, as well as licensure by the state professional regulating body.

Clinical, Practicum and Student Teaching Field Experiences

Pre-service teachers in programs leading to certification must complete one non-credit clinical experience, three one-credit hour practicum experiences, and two 8-week student teaching placements with a capstone worth a total of 15-credit hours. Undergraduates in Educational Studies must complete one non-credit clinical experience, three one-credit hour practicum experiences, and an Internship with a capstone worth a total of 6 credit hours.

Clinical Experience
