

CERTIFICATE - FUNDAMENTALS OF VIDEO PRODUCTION

The Fundamentals of Video Production certificate provides students a base knowledge in all the aspects of what it takes to shoot and edit content in a commercial, film or live environment. It will help build a base understanding of all the different skill sets needed in this field.

Students enrolled in the B.S. in Video/Film Production are not eligible for this certificate.

Upon completing the Fundamentals of Video Production certificate program students will be able to:

1. Students will utilize current industry equipment and software necessary for video production
2. Students will safely utilize lighting for effect and style.
3. Students will identify skills and apply knowledge, in multiple roles of a video production workforce.
