B.S. ACCOUNTING

The Bachelor of Science in Accounting provides students with a strong foundation in accounting principles, business strategy, and financial decision-making. The program prepares graduates for professional careers in public accounting, corporate accounting, government, nonprofit organizations, and related fields.

Throughout the program, students develop the knowledge and analytical skills needed to examine financial information, support organizational decision-making, and ensure compliance with regulatory and reporting standards. Coursework emphasizes both technical accounting expertise and the practical application of accounting concepts in today's data-driven business environment.

Career opportunities include public accounting, auditing, taxation, financial reporting, management accounting, consulting, and advisory services. Graduates may pursue roles with multinational corporations, regional and local accounting firms, government agencies, nonprofit organizations, and entrepreneurial ventures.

Through a combination of rigorous coursework and real-world applications, the program equips students with the skills, professionalism, and ethical foundation needed to succeed in a rapidly evolving accounting profession. Specifically, in achieving the intended student learning outcomes for the B.S. Accounting degree, students will:

- Apply the major concepts of the functional areas of business.
- Apply legal and ethical principles in business to organizational decision-making.
- Apply business-related techniques to management decisions.
- Analyze leadership choices in the internship setting.
- Apply professional business communication skills.
- Collaborate with diverse colleagues in team situations.
- Demonstrate technical knowledge of the generally accepted accounting principles and practices tested on the Uniform CPA exam.
