

# MS APPLIED PSYCHOLOGY

Graduate Psychology Electives

Total Hours

30

This 30-credit interdisciplinary Master of Science in Applied Psychology offers students an

opportunity to advance their understanding of behavior, mental processes, and the philosophy

of the mind. Students will study both traditional and emerging subdisciplines in psychology. The

program provides a unique opportunity for students to customize their degree combining their

interests in different areas and pursue adaptive careers in psychology, public service, and the

creative and therapeutic arts.

This program is for students with an interest in understanding behavior and mental processes

from multiple perspectives, including education, business, the creative healing arts, as well as

positive, social, and cognitive psychology. Students can focus on practical applications of

theories and concepts and apply their knowledge to their careers and their daily lives and

relationships.
